- Engineered to boost our unique sonic cleaning power

Designed to optimize performance

- For the most effective cleaning, every day
- Works with any Philips Sonicare click-on toothbrush
- Rigorously tested to meet patients' oral health needs

PHILIPS

sonicare

Highlights

Say goodbye to plaque

The Philips Sonicare Premium plaque control brush head gives you our deepest clean. Thanks to its flexible sides and unique bristle pattern design, it removes up to 10x more plaque, even in hard-to-reach areas* for a truly deep clean along the gum line and between teeth.

Philips Sonicare technology

Patients get a personalized clean every time they brush with our adaptive cleaning technology. Soft, flexible rubber sides let Premium plaque control adapt to the unique contours of the mouth. Our bristles adjust to gums and teeth, giving patients up to 4x more surface contact than a DiamondClean brush head for deeper cleaning, even in hard-to-reach spots. Adaptive cleaning technology also: allows gentle tracking along the gumline; absorbs excessive brushing pressure; and enables an enhanced sweeping

motion, for a unique in-mouth feel and superior cleaning.

BrushSync mode pairing

Patients will always get their best possible clean with our BrushSync mode pairing feature. A microchip in the Premium plaque control brush head syncs with the connected Philips Sonicare toothbrush handle. It prompts the handle to automatically select the optimal brushing mode and intensity level for exceptional plaque removal. All your patients need to do is start brushing.

Philips Sonicare technology

Your Sonicare brush head and handle are the ultimate team. Enhancing our sonic technology, they give you unrivaled cleaning. High-speed vibrations in your toothbrush handle power up to 31,000 brush strokes per minute that whip up your toothpaste into plaque fighting bubbles,

driving them deep between your teeth and along the gum line for exceptional cleaning.

Smart brush head replacement

Brush heads exhibit fatigue and bristle wear after three months of normal use. Philips Sonicare smart toothbrushes provide accurate brush head replacement reminders based on how often patients brush and how much pressure they use. For those who don't use a smart toothbrush, Premium plaque control's blue reminder bristles fade to white to let patients know it's time for a replacement brush head.

Easy to click-on

Premium White simply clicks on to a Philips Sonicare toothbrush handle for a secure fit and easy maintenance and cleaning. Premium White fits all Philips Sonicare toothbrush handles except PowerUp Battery and Essence.

Specifications
