- FM tuner for radio enjoyment
- Rip-plus for one-touch MP3 recording from multiple sources

Easy to use

- MP3 Link for portable music playback
- Handy remote control for extra convenience

Rich and clear sound

- Dynamic Bass Boost for deep and dramatic sound

PHILIPS

Highlights

USB Direct

With the USB Direct mode, simply plug in your USB device to the USB port on your Philips device and your digital music will be played directly from the Philips device.

Play MP3/WMA-CD, CD and CD-RW

Audio compression technology allows large digital music files to be reduced up to 10 times in size without radically degrading their audio quality. MP3 or WMA are two of the compression formats that let you enjoy a world of digital music on your Philips player. Download MP3 or WMA songs from authorized music sites on the Internet or create your own MP3 or WMA music files by ripping your audio CDs and transferring them onto your player.

MP3 Link

The MP3 link connectivity allows direct playback of MP3 content from portable media players. Besides the benefit of enjoying your favorite music in the superior sound quality delivered by the audio system, the MP3 link is also extremely convenient as all you have to do is to plug your portable MP3 player to the audio system.

Autostop cassette deck

Autostop cassette deck

FM tuner

FM tuner for radio enjoyment

Handy remote control

With a handy remote control for greater convenience at your fingertips, all you have to do is sit back and relax.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Rip-plus

With this smart feature, you can rip your desired music content from CDs, cassette tapes (if applicable), radio programs or any device with a line-in connection via the hi-fi system directly to your USB device and SD card (if applicable) into MP3 format- without using a PC.

Specifications

Connectivity

- USB: USB host
- Audio/Video output: Headphone (3.5mm)
- MP3 Link: 3.5mm stereo line in

Audio playback

- Playback media: CD, CD-R, CD-RW, MP3-CD, WMA-CD
