GB

INSTRUCTIONS FOR USE

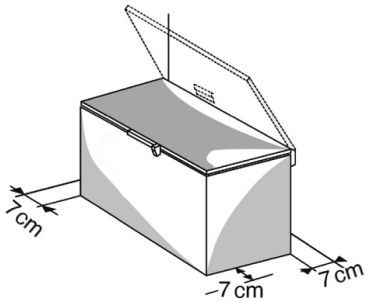

1. Lid handle
2. Lock (if provided)
3. Seal
4. Defrost water drain plug (if present)
5. Control panel
6. Basket (if present)
7. Condenser (located at the rear)

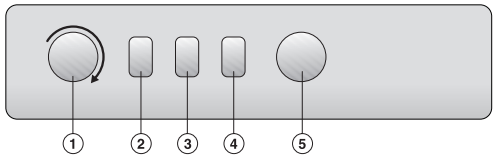

Climatic Class	Amb. T. (°C)	Amb. T. (°F)
SN	From 10 to 32	From 50 to 90
N	From 16 to 32	From 61 to 90
ST	From 16 to 38	From 61 to 100
T	From 16 to 43	From 61 to 110

INSTALLATION

- **Please refer to the chapter "BEFORE USING THE APPLIANCE".**
- **Unpack the appliance.**
- **Remove the 4 protection pieces inserted between lid and appliance.**

- Ensure that the defrosting water drainage plug (if provided) is correctly positioned **(4)**.
- For best operation of the appliance and in order to avoid damage when the lid is opened, leave a space of at least 7 cm from the rear wall and 7 cm at the sides.
- Fit the accessories (if provided).

1. **Thermostat:** it can be used to adjust the internal temperature of the appliance.
2. **Red LED (if provided):** Indicates that the appliance temperature is not sufficiently low.
3. **Green LED (if provided):** indicates that the appliance is on.
4. **Yellow LED (if provided):** when on, it indicates that the fast freeze function has been activated.
5. **Fast freeze pushbutton (if provided):** activates/deactivates the fast freeze function.

The exact configuration of the controls may vary according to the model.

Switching on the appliance

- The appliance is factory set for optimum operation at a temperature of -18°C.
- Plug in the appliance.
- The green LED lights up (if provided).
- Also the red LED (if provided) will switch on because the temperature inside the appliance is not yet sufficiently low for food storage. The red LED will normally switch off within the first six hours after the appliance is switched on.
- After connecting the appliance to the mains supply and when the optimal temperature has been reached (this phase takes about 1 hour during which the lid will not open), ensure that the fast freeze button is not pressed (the yellow LED, if provided, is off).
- Place food inside the product only when the red LED (if provided) has switched off.
- Thanks to the efficient lid seal, the appliance lid will not re-open easily immediately after closing. Wait a few minutes before re-opening the lid of the appliance.

Temperature Adjustment

Use the thermostat to select the ideal storage temperature. To adjust the internal temperature, proceed as follows:

- Turn the thermostat knob to 1 for a storage temperature that is less cold.
- Turn the thermostat knob to 6 / for a colder storage temperature.
- For partial loads, or when the load indicator is below the "e" symbol inside the appliance (if present), it is advisable to move the thermostat to the lower position (on "e", if present on the thermostat scale).

CE

INSTRUCTIONS FOR USE

BEFORE USING THE APPLIANCE

Your new appliance is designed exclusively for domestic use and for storing frozen food, freezing fresh food and making ice cubes.

Regulations require that the appliance is earthed. The manufacturer declines all liability for injury to persons or animals and for damage to property resulting from failure to observe the above procedures and reminders.

1. After unpacking, make sure that the appliance is undamaged and that the lid closes perfectly tight. Any damage must be reported to your dealer within 24 hours after delivery of the appliance.
2. Wait at least two hours before switching the appliance on in order to ensure the refrigerant circuit is fully efficient.
3. Installation of the appliance and electrical connections must be carried out by a qualified electrician, in accordance with the manufacturer's instructions and local safety regulations.
4. Clean the inside of the appliance before using it.

- Before connecting the appliance to the mains supply, ensure that the voltage corresponds to that given on the rating plate located on the rear of the appliance.
- **Electrical connections must be made in accordance with local regulations.**

FREEZING FOOD

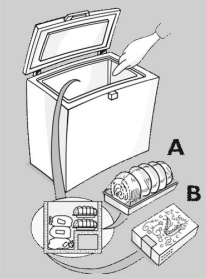

Preparation of fresh food for freezing

- Before freezing, wrap and seal fresh food in: aluminium foil, cling film, air and water-tight plastic bags, polyethylene containers with lids, provided they are suitable for freezing foods.
- Food must be fresh, mature and of prime quality in order to obtain high quality frozen food.
- Fresh vegetables and fruit should preferably be frozen as soon as they are picked to maintain the full original nutritional value, consistency, colour and flavour.
- Always leave hot food to cool before placing in the appliance.

Freezing fresh food

- Place foods to be frozen in direct contact with the walls of appliance:
  A) - foods to be frozen,
  B) - foods already frozen.
- Avoid placing foods to be frozen in direct contact with food already frozen.
- For best and fastest freezing, foods should be split into small portions; this will also be useful when the frozen items are to be used.

1. At least 24 hours before storing fresh food in the appliance, press the fast freeze button. For appliances without this button, turn the thermostat to ❄.
2. Place the food to be frozen and keep the lid of the appliance closed for 24 hours. At the end of this period, switch off the fast freeze button (if provided).

FOOD STORAGE

Refer to the table on the appliance (if provided).

Classification of frozen foods

Put the frozen products into the appliance and classify them; The storage date should be indicated on the packs, to allow use within expiry dates.

MONTHS	FOOD
1-3	
4-7	
8-12	

Advice for storing frozen food

When purchasing frozen food products:

- Ensure that the packaging is not damaged (frozen food in damaged packaging may have deteriorated). If the package is swollen or has damp patches, it may not have been stored under optimal conditions and defrosting may have already begun.
- When shopping, leave frozen food purchases until last and transport the products in a thermally insulated cool bag.
- Once at home, place the frozen foods immediately in the appliance.
- Avoid, or reduce temperature variations to the minimum. Respect the best-before date on the package.
- Always observe the storage information on the package.

Note:

Eat fully or partially defrosted foods immediately.
Do not refreeze unless the food is cooked after it has thawed. Once cooked, the thawed food can be refrozen.
If there is a long power failure:

- **Do not open the appliance lid except to place ice packs (if provided) over the frozen foods on the right and left of the appliance. This will slow down the rise in temperature.**

CE

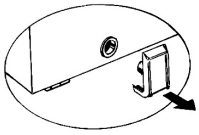

INSTRUCTIONS FOR USE

PRECAUTIONS AND ADVICE

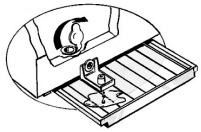

- **After installation, make sure the appliance is not resting on the power cable.**
- Do not store glass containers with liquids in the appliance, as they could burst.
- Do not eat ice cubes or ice lollies immediately after taking them out of the appliance, since they could cause cold burns.
- Before carrying out any maintenance or cleaning operation, unplug the appliance or disconnect the electrical power supply.
- Do not install the appliance in places exposed to direct sunlight or near heat sources, as this will result in higher energy consumption.
- Do not store or use petrol or other flammable liquids and gases in the vicinity of this or other electrical appliances. The fumes can create a fire hazard or explosion.
- Install and level the appliance on a floor able to take its weight and in a place suitable for its size and use.
- Install the appliance in a dry and well-ventilated place. The appliance is arranged for use in places with temperatures inside the following ranges defined according to the climatic class given on the dataplate located on the back. The appliance may not work properly if left for a long time at temperatures outside the range provided for.
- It is advisable to leave the appliance connected, even if empty even for short periods.
- Be careful not to damage the floors (e.g. parquet) when moving the appliance. To facilitate moving, it is advisable to empty the appliance beforehand, if possible.
- Do not use mechanical devices or any means other than those recommended by the manufacturer to speed up the defrosting process.
- Do not use electrical appliances inside it, unless they are of the type recommended by the manufacturer.
- **This appliance is not intended for use by people (including children) with limited physical, sensory or mental abilities or without experience and knowledge of it, unless they are supervised or instructed in its use by a person responsible for their safety.**
- **To prevent the risk of children becoming trapped and suffocating, do not let them play or hide inside the appliance.**
- **The power cable must only be replaced by an authorised person.**
- **Do not use extension leads or multi-adapters.**
- **It must be possible to disconnect the power supply by unplugging or by means of a double-pole mains switch installed ahead of the socket.**
- **Make sure the voltage specified on dataplate matches the voltage in your home.**
- **Do not swallow the liquid (non-toxic) contained in the ice packs (if provided).**
- **Limit the number of times the appliance door is opened.**

DEFROSTING THE APPLIANCE

The appliance should be defrosted when the thickness of ice on the walls reaches 5-6 mm.

- Disconnect the appliance from the mains power supply.
- Remove the packs of food from the appliance and wrap them close together in newspaper and store in a very cool place or thermally insulated bag.

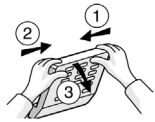

- Leave the appliance lid open.
- Remove the internal defrost water drain plug (depending on model).
- Remove the external defrost water drain plug (depending on model) and reposition it as shown in the figure.
- Place a bowl beneath the drainage channel to collect the residual water. If available, use the divider.
- Speed up defrosting by using a spatula to detach the ice from the appliance walls.
- Remove the ice from the bottom of the appliance.
- **In order to avoid permanent damage to the appliance interior, do not use pointed or sharp metal instruments for removing the ice.**
- **Do not use abrasive products or heat up the interior artificially.**
- **Dry the interior of the appliance thoroughly.**
- On completion of the defrosting, refit the plug.

CARE AND MAINTENANCE

- Remove the ice from the upper edge (see the Troubleshooting Guide).
- Clean the inside after defrosting, using a sponge dampened with warm water and/or mild detergent.
- Clean the side motor cooling grille (depending on model).
- Remove dust from the condenser on the rear of the appliance.

Before carrying out maintenance, unplug the appliance.
Do not use abrasive products, scourers or stain-removers (e.g. acetone, trichloroethylene) to clean the appliance.
To obtain the best results from your appliance, carry out cleaning and maintenance at least once a year.

CHANGING THE LID LIGHT BULB (if provided)

- Disconnect the appliance from the mains power supply.
- Remove the diffuser by following the sequence of steps shown in the figure.
- Unscrew the light bulb and replace it with an identical bulb of the same wattage and voltage.
- Refit the diffuser and plug in the appliance.

TROUBLESHOOTING GUIDE

1. The red LED (if provided) remains alight.

- Is there a power failure?
- Is defrosting in progress?
- Is the appliance lid properly closed?
- Is the appliance positioned near a heat source?
- Is the thermostat setting correct?
- Are the ventilation grille and condenser clean?

2. The appliance is too noisy.

- Is the appliance perfectly horizontal?
- Is the appliance in contact with other furniture or objects that may cause vibrations?
- Has the packaging been removed from under the appliance?

CE

INSTRUCTIONS FOR USE

Note: gurgling noises from the refrigerating circuit after the compressor cuts out are perfectly normal.

3. The green LED (if provided) is off and the appliance is not working.
- Is there a power failure?
- Is the plug properly inserted in the socket?
- Is the electric cable intact?

4. The green LED (if provided) is off and the appliance is working.
- The green LED is not working. Contact the After Sales Service for a replacement.

5. The compressor runs continuously.
- Have hot foods been put in the appliance?
- Has the appliance lid been left open for a long time?
- Is the appliance positioned in a very warm room or near heat sources?
- Is the thermostat setting correct?
- Has the fast freeze function (depending on model) been pressed by mistake?

6. Too much ice on the upper edge.
- Are the defrost water drainage plugs correctly positioned?
- Is the appliance lid properly closed?
- Is the appliance lid seal damaged or deformed? (See chapter "Installation")
- Have the 4 protection pieces been removed? (See chapter "Installation")

7. Condensation forms on the external walls of the appliance
- It is normal for condensation to form under certain atmospheric conditions (humidity above 85%) or if the appliance is located in a damp or poorly ventilated room. The performance of the appliance is in no way affected.

8. The layer of ice on the internal walls of the appliance is not uniform.
- This phenomenon is quite normal.

SAFEGUARDING THE ENVIRONMENT

1. Packing

The packaging material is entirely recyclable, and marked with the ♺ recycling symbol. Follow local regulations for scrapping. Keep the packaging materials (plastic bags, polystyrene parts, etc.) out of reach of children, as they are potentially dangerous.

2. Scrapping

The appliance is manufactured using recyclable material .
This appliance is marked according to the European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE).
By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The symbol  on the product, or on the documents accompanying the product, indicates that this appliance may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment.
Before scrapping, make the appliance unusable by cutting off the power cable and removing the doors and shelves so that children cannot easily climb inside the appliance.
Disposal must be carried out in accordance with local environmental regulations for waste disposal. Deliver the appliance immediately to an authorized dump; do not leave it unattended even for a few days, since it is potentially dangerous for children. For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

Information:

This appliance does not use CFC. The refrigerant system contains either R134a (HFC) or R600 (HC). Refer to the rating plate inside the appliance.
Appliances with Isobutane (R600a): isobutane is a natural gas without environmental impact, but is flammable. Therefore, make sure the refrigerant circuit pipes are not damaged.
This product may contain Fluorinated Greenhouse Gases covered by the Kyoto Protocol; the refrigerant gas is inside a hermetically sealed system.
Refrigerant gas: R134a has a Global Warming Potential of (GWP) 1300.

Declaration of conformity
- This appliance is intended for storing food and is manufactured in conformity with European regulation (EC) No. 1935/2004. CE
- This product has been designed, manufactured and marketed in compliance with:
  - the safety objectives of Low Voltage Directive 2006/95/EC (replacing 73/23/EEC and subsequent amendments);
  - the protection requirements of Directive "EMC" 2004/108/CE.
- The electrical safety of the appliance can only be guaranteed if the product is connected to an approved earth connection.

AFTER-SALES SERVICE

Before contacting After-Sales Service:

1. See if you can solve the problem yourself.
2. Switch the appliance on again to see if the problem has been solved. If it has not, disconnect the appliance from the power supply and wait for about an hour before switching on again.
3. If the problem persists after this course of action, contact After-Sales Service.

Specify:
- the nature of the fault,
- the model,
- the service number (the number after the word SERVICE on the rating plate on the rear of the appliance)
- your full address,
- your telephone number and area code.
