FUJITSU Server PRIMERGY TX2550 M4 Tower Server

Tower powerhouse with the richest feature set

FUJITSU Server PRIMERGY will give you the servers you need to power any workload and changing business requirements. As business processes expand so does the need for applications. Each has its own resource footprint, so you need a way to optimize your computing to better serve your users. PRIMERGY systems will help you match your computing capabilities to your business priorities with our complete portfolio of expandable PRIMERGY tower servers for remote and branch offices, versatile rack-mount servers, compact and scalable blade systems, as well as hyper-converged scale-out servers. They convince by business proven quality with a wide range of innovations, highest efficiency cutting operational cost and complexity, provide more agility in daily operations, and integrate seamlessly to let help you concentrate on core business functions.

Perfect for small and medium businesses as well as branch offices, FUJITSU Server PRIMERGY TX tower systems are robust and cost-efficient servers by providing rock solid reliability. Additionally they are characterized by simple IT operations, low power consumption and quiet operation so that they can be handled by non-technically trained staff and can be used in standard office environments. By the way: Almost all PRIMERGY TX servers can be rack-mounted to offer best flexibility.

PRIMERGY TX2550 M4

The FUJITSU Server PRIMERGY TX2550 M4 is a brand new dual socket tower server designed for demanding business needs to deliver the highest levels of workload versatile performance, expandability and cost-effectiveness. This office ready, powerful system comes with the latest Intel® Xeon® Processor Scalable Family CPUs with 26 cores, along with DDR4 memory technology with up to 768GB capacity and is ideal for most CPU/memory driven requirements such as demanding business applications (industry-specific, analytics apps), business processing (ERP, CRM) and virtualized workloads. The server is designed for huge expandability with up to 32 storage drives, advanced RAID and a range of high-throughput networking cards including DynamicLOM options, making it highly suitable for storage centric requirements such as collaboration/ IT infrastructure workloads and even high-data transfer web or big-data configurations. Up to 8 expansion slots are available for future growth. An optional high-end graphics card can boost performance for graphics intensive applications, display infrastructure. The server is designed for silent operation, ideal for offices. The server also delivers world-class reliability and energy efficiency up to 96% efficient, dual power supplies. Operation in higher ambient temperatures is ensured by the Cool-safe® Advanced Thermal Design, avoiding the need for expenditure on special cooling. Furthermore, the server supports the Fujitsu iRMC S5, to enhance admin productivity and ease server usage across the entire lifecycle.

Features & Benefits

Main Features	Benefits
Power packed performance across workloads	
■ Intel® Xeon® Processor Scalable family CPUs with up to 26 cores relying on Intel® UltraPath Interconnect for an increased data rate between the CPUs. Up to 768 GB DDR4 memory with 2,666 MHz (12 DIMM slots)	■ Enhanced Dual-socket compute and high bandwidth DDR4 memory - optimal for demanding enterprise and SME requirements. These can include Business processing, demanding enterprise applications and virtualized workloads
■ Highly expandable and flexible storage configurations: Up to 32x hot plug 2.5" HDD/SSD including 8xPCIe SSD, or up to 12x hot plug 3.5" HDD/SSD + 2x non-hp 2.5" HDD/SSD and up to 3x 1.6" drive bays for ODD or backup. Advanced RAID controllers (RAID 0,1,1E,10,5,50,6,60) with up to 2GB cache for enhanced data protection and reliability beyond embedded basic RAID capability	■ Ideal for securely managing extremely large datasets and flexible enough to be matched to a range of storage centric requirements such as IT infrastructure or collaboration workloads. Drives and RAID controllers can be tailored to specific business needs and budgets
■ Onboard LAN for basic requirements, DynamicLoM via OCP for extended requirements. Additional high throughput networking cards (25/10Gb) also available	■ Range of Ethernet configurations depending on your business need and budget. Combination of Basic capabilities via onboard LAN, plus higher performance, optional DynamicLoM via OCP offers excellent flexibility and cost effective growth capability. High throughput cards enable growth for the highest data rate requirements
■ Up to 1x GFX card support	■ Improves capability for Graphics intensive apps; get more from your display infrastructure
Designed for growth	
■ 8 Expansion slots (in maximal optional configuration; 7x PCIe and 1x PCI-32)	■ Flexible expandability for the integration of existing and new storage controllers, networking cards, GFX card capability. Add capabilities per your business needs
■ Rack Form factor available from the factory and as an upgrade option	■ Invest in a system designed for scalability to match your business growth
Go green, with cost savings and reliability improvements	
■ Power supply units with 96% energy efficiency	■ High efficiency redundant power supplies for energy cost savings and enhanced reliability
■ Fujitsu's Cool-safe® Advanced Thermal Design for higher ambient temperatures in the data center	■ Operate your equipment without having to invest in expensive cooling equipment
