EAN code	

The NewStar Universal 4-in-1 KVM Switch cables are designed to be the highest quality tangle-free KVM switch cables available.

This cable combine separate keyboard, monitor, mouse, speaker and microphone in to one cable split apart at each end. This design makes him inherently tangle-free and easier to manage since the total cable count is reduced to 1/3.

The VGA Video section of the cable is coaxial eliminating picture "ghosting" and fuzzy images, and using ferrite cores near the connector ends provides superior EMI interference protection.
