

UBT Rechargeable AGM battery 7 Ah – 9 Ah – 12 Ah – 17 Ah – 24 Ah / 12 V

UBT: Powerful and reliable back-up storage.

Salicru's **UBT** series batteries are extremely powerful and compact rechargeable lead-lead dioxide energy accumulators particularly suitable for UPSs and other security systems that require reliable and high-quality energy back-up.

Salicru's **UBT** battery range includes 7, 9, 12, 17 and 24 Ah models, all at 12 V.

The sulphuric acid electrolyte is absorbed by the separators and plates. And these in turn immobilised. They are designed using gas recombination technology which eliminates the need for the regular addition of water by controlling the evolution of hydrogen and oxygen during charging. The battery is completely sealed and watertight and therefore maintenance free, enabling it to be used in any position. If the battery is accidentally overcharged, resulting in the production of hydrogen and oxygen, a number of special one-way valves allow the gases to escape to avoid interior overpressure.

Battery construction:

Component	Positive plate	Negative plate	Container	Lid
Raw material	Lead dioxide	Lead	ABS	ABS
Safety valve	Terminal	Separator	Electrolyte	
Rubber	Copper	Fibreglass	Sulphuric acid	

Features

- AGM technology for efficient gas recombination of up to 99% and free of maintenance or adding water.
- No restrictions for air transport, compliance with IATA/ICAO Special Provision A67.
- Can be mounted in any position.
- Lead designed by computer with calcium/tin alloy rack for high energy density.
- Long service life in both float and cyclic applications.
- Maintenance-free.
- Low self-discharge.

Applications

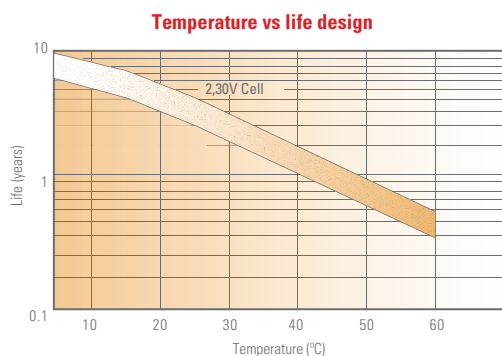

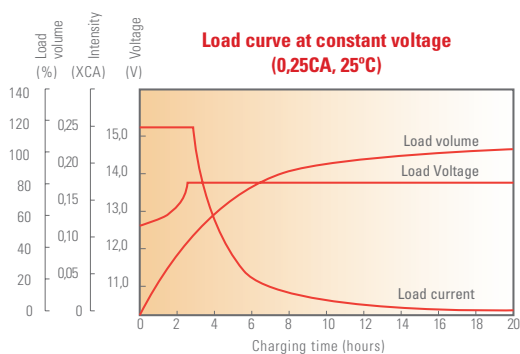

Uninterruptible power supply systems (UPS), emergency lighting systems, signalling systems, communications and electrical equipment, broadcasting systems, lift automation panels, electronic cash registers, etc.

Rechargeable AGM battery 7 Ah – 9 Ah – 12 Ah – 17 Ah – 24 Ah / 12 V
