

# Dependable, secure cloud printing for enterprise mobile devices

HP and PrinterOn Enterprise

## What if?

- What if you could print from virtually any mobile or desktop device, regardless of its operating system or manufacturer?
- What if you could print without a virtual private network (VPN)?
- What if your device connected seamlessly to printers in every company location, even the ones you've never been to before?
- What if you could encrypt data traveling to (or from) printers, protecting proprietary information?

With PrinterOn Enterprise—you can.

**WORLDWIDE**  
enterprise cloud printing solution

DEPLOYED  
in more than **100**  
COUNTRIES

**100+** PAGES  
MILLION printed

## The challenge

Today's mobile professionals work on the run, doing business from laptops, tablets, and smartphones with increasing regularity. The challenge facing today's struggling enterprise IT departments is how to support the rapidly escalating number and variety of mobile users, apps, and devices. From C-suites to sales floors, mobile users expect to access protected resources, exchange secure information, and even print safely on local as well as remote printers, all from their mobile devices—and they expect it to happen reliably, every time.

There's only one enterprise-class mobile printing solution you can count on to deliver the capability, security, and dependability your users demand: **PrinterOn Enterprise.**

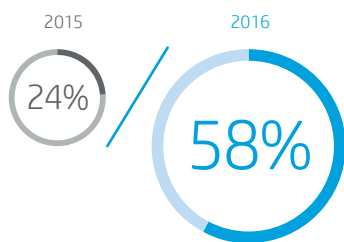

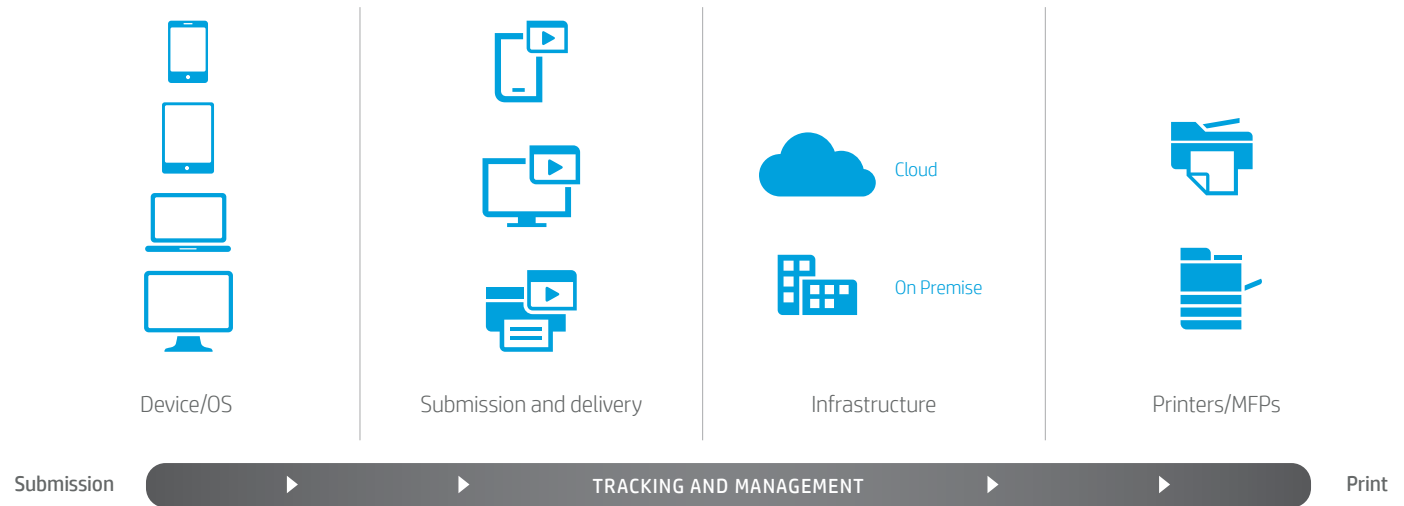

## The solution

PrinterOn Enterprise connects both desktop and mobile users to printers both on and off the trusted network, regardless of the device's manufacturer or operating system. The solution can be deployed on-premise or in the customer's private cloud, according to the needs and expectations of the business. It supports most major printer brands, the most popular desktop and mobile devices, and most operating systems.

PrinterOn Enterprise makes enterprise mobile printing easy, reliable, and secure, so you can **print simply anywhere**®.

# PrinterOn Enterprise

Virtually any device, any submission, any cloud, any printer

organisations surveyed use a public or private cloud for more than small applications or workloads.<sup>1</sup> **Improved productivity** and **resource utilisation** are driving cloud adoption—cloud printing has to keep up!

## Key benefits for IT

Encrypted data, both in transit and at rest

Authentication both at the device (active directory) and the printer (release codes)

Centralised control of secure mobile printing from the MDM console

## Key benefits for end users

Simple, single sign-on (SSO)

Support for most printers and mobile devices

Print easily from almost any location, on any network
