Specially designed for children

- Cute and effective
- Efficient, reliable and friendly

Short treatment times

- Treatment in 6-8 minutes*

For commonly prescribed medications

- Compatible with commonly prescribed medications

PHILIPS

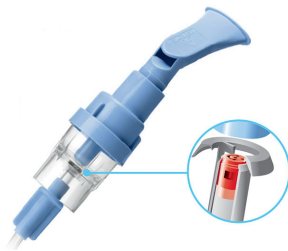

Highlights

Tucker pediatric mask

Our cute Tucker the Turtle character mask is made of a soft, flexible material that contours to your child's face for comfort and fit. It also incorporates a vent design that helps to direct medication away from your child's eyes.

Proven nebulizer technology

Consistent delivery of high quality aerosol therapy. SideStream is designed to withstand frequent, repeated use and is able to efficiently deliver your child's nebulizer medication until it is time for replacement.

Fast, effective treatment

Our SideStream nebulizer is specifically designed to keep your child's treatment times as short as possible. As Willis the Whale pushes air through the tube, additional air is drawn in through the top of the nebulizer to create a fast flow of aerosol medication for your child to inhale. Treatments can take as little as 6 minutes.*

Make therapy fun

There's no better way to help your child with their asthma therapy than blurring the lines between playtime and treatment time. Willis the Whale compressor nebulizer system is fun, friendly and most importantly, delivers effective

therapy you can trust - so there is more time for the serious things in life, like pirate adventures.

Versatility

Willis the Whale is designed for use with most aerosol medications prescribed for common respiratory diseases.

Multiple configurations

The light blue SideStream Reusable Nebulizer can be used for 6 months before replacing. The disposable nebulizer provides consistent drug delivery time after time and can be used with most commonly prescribed respiratory medications.
