FOR REAL GAMERS

# DORIAN

## ATX COMPUTER CASE

The ATX Dorian case is the right election for those gamers looking for an innovative design, enough space to create their perfect computer and high quality guarantee.

All this so that the gaming experience meets the expectations of the most demanding players. Those who are really themselves in their gaming sessions. The moment where gamers' real face is shown.

Dorian provides enough storage space thanks to its 4 internal bays (2 x 3.5/2.5" + 2 x 2.5") and the 5.25" external bay.

Dorian connectivity is ensured by two USB 2.0 + one 3.0 on top of the chassis.

Dorian also allows you to fit up to 7 fans, three in the front, three in the top of the chassis and one in the rear. And if your option is choosing RGB or Led fans the achieved effect will be ideal for those long gaming sessions in your gaming zone; where you are yourself, in your environment and with your rules. No masks.

In addition, Dorian is compatible with air or liquid cooling systems, so that the only temperature that matters is the competitions' one.

Because to be a gamer is to be real, not afraid to show as you are. And being a real gamer is being Dorian.
