

AG352UCG6

35 inch (88.98 cm) LCD MONITOR

Featuring NVIDIA G-SYNC, 1440p resolution and 120Hz refresh rate, the AG352UCG-6 delivers a totally immersive experience for serious gamers.

120Hz

120Hz Refresh Rate

Make the most of the graphical output of your PC with a monitor that can handle it: 120Hz translates high GPU framerates into a smooth and responsive gameplay experience. Unleash your reflexes and stay AGON, where double the industry standard refresh rate is just par for the course.

Curved screen

Immerse yourself into virtual worlds with AOC's curved gaming displays. Curved displays with an aggressive 1800 mm or more subtle 2000 mm radius put you in your characters' eyes, with the display covering your whole peripheral vision. In 16:9 or 21:9 aspect ratio, curved gaming displays bring futuristic design, comfortable viewing and immersion together.

Lowblue Light

AOC Lowblue Light protects you from harmful blue light which, during long sessions, has been shown to cause eye strain, headaches, and sleeping disorders. Our Lowblue Light feature reduces the harmful wavelengths emitted without sacrificing color composition, setting the experience free from the worry of eye damage.

G Sync

NVIDIA®G-SYNC™ display technology delivers the smoothest and most breathtaking gaming experience on offer. G-SYNC™ synchronizes the monitor's refresh rate to the GPU in your NVIDIA-powered PC, eliminating screen tearing and minimizing display stutter and input lag. Scenes appear instantly, while objects look sharper and more vibrant.

UltraWide 1440p Resolution

With 3440 x 1440 resolution, Wide Quad HD (WQHD) offers superior picture quality and crisp imagery that reveals every detail. The widescreen 21:9 aspect ratio is perfect for watching movies in an expansive format or immersing yourself in the latest game, plus it offers more space when it's time to work. True 8-bit color provides a broad color palette for vibrant, natural-looking images.
