## On tap water purifier

Bacteria removal > 99.99% Removes residual chlorine, Three modes of water selection

WP3829/00

# Specifications

### General specifications

- Accessories: QuickFit tap-mounting adapters
- Replacement filter cartridge: WP3929
- Water selection: Unfiltered stream, Unfiltered spray, Filtered stream

### Filter specifications

- Major filter components: hollow-fiber membrane, granular activated carbon

### Country of origin

- Water purifier: China
- Replacement filter: China

### Purification system

- Bacteria removal: > 99.99%
- Chlorine removal
- Turbidity removal

### Water input conditions

- Input water pressure: 1.5-3.5 bar
- Input water temperature: 5-38 °C
- Input water quality: Municipal tap water

# Highlights

### Multi-filtration system

The composite filter with a multi-filtration system consist of a hi-tech hollow-fiber membrane which can remove 99.99%\* of bacteria, and a fine granular activated carbon layer to remove unpleasant chlorine, bad taste and odors. The filter preserves the minerals in drinking water that are vital for human health.

### Ingenuity design

A simple rotation of the water selection lever switches the water flow from regular, unfiltered tap water (stream or spray) to effectively treated filtered water.

### Filters are easily changed

Eject the used filter by pushing the switch and simply insert the new one.

### Easy installation

This advanced water purifier comes with a number of tailor-made Quick Fit tap adapters to help in the easy and simple installation of your purifier onto your tap.

### One-piece disposable filter

Convenient and safe to discard the one-piece filter after use, avoiding secondary pollution.
