## On tap water purifier

Bacteria removal > 99.9% Residual chlorine removal >99%, Two modes of water selection, QuickTwist

# Specifications

### General specifications

- Accessories: QuickFit tap-mounting adapters
- Replacement filter cartridge: WP3906 & WP3911
- Water selection: Filtered stream, Unfiltered stream

### Filter specifications

- Major filter components: hollow-fiber membrane, granular activated carbon

### Country of origin

- Water purifier: China
- Replacement filter: China

### Purification system

- Bacteria removal: > 99.9%
- Chlorine removal: > 99%
- Turbidity removal

### Water input conditions

- Input water pressure: 1.5-3.5 bar
- Input water temperature: 5-38 °C
- Input water quality: Municipal tap water

WP3826/00

# Highlights

### Multi-filtration system

The composite filter with a multi-filtration system consists of a hi-tech hollow-fiber membrane which can remove 99.9%\* of bacteria, and a fine granular activated carbon layer to remove unpleasant chlorine, bad tastes and odors. The residual chlorine removal rate is higher than 99%\*. Furthermore, the filter preserves minerals in drinking water that are vital for human health.

### Ingenuity design

A simple rotation of the water selection lever switches the water flow from regular, unfiltered tap water to effectively treated filtered water.

### QuickTwist

The advanced QuickTwist filter mechanism makes changing the filter quick, easy and secure, providing ease and simplicity to the water purifier's maintenance.

### Easy installation

This advanced water purifier comes with a number of tailor-made Quick Fit tap adapters to help in the easy and simple installation of your purifier onto your tap.

### Filter lifetime reminder

Filter status is visible through the transparent window which can be seen by removal of the cover, indicating the time for filter replacement.

### One-piece disposable filter

Convenient and safe to discard the one-piece filter after use, avoiding secondary pollution.
