

Philips
Pre-filter water purifier

Removes impurities

Backwash structure
Made in Germany

WP4100

Comprehensive worry-free protection

24 hour protection for your home

This pre-filter water purifier is the first guard in supplying clean water to the whole home. It removes impurities such as silt and rust from municipal water to protect your household water-related appliances

First defense line for your household water supply

- Effectively removes rust, silt, and algae
- Effective cleaning and long service life
- Effectively blocks impurities with fine mesh
- Hi-flow with maximum rate of 2.3 T/H

PHILIPS

Specifications

General specifications

- Backwash cycle: every 2 weeks *
- Structure diagram: Plug, Copper alloy valve, Filter housing, Stainless steel filter

Country of origin

- Water purifier: Germany

Water input conditions

- Input water pressure: 2-16 bar
- Input water temperature: 5-38 °C
- Input water quality: Municipal tap water

Highlights

Precision filter

Preliminary, effective purification of water with 40um of filter precision. Removes rust, sediment, algae and other pollutants, protecting pipes and household water-related appliances.

Deflector-type backwash

New added channel of the deflector-type backwash structure to create the pressure difference required to strengthen the washing effect and also improve anti-flush suction, extending the service life of the product.

Stainless steel strainer

Stainless steel strainer with unique fine weaving and effective anti-pressure loss extends the filter's life.

Hi-flow

Has a maximum flow rate of 2.3T/H, resulting in little change to the normal flow rate of unfiltered water. Enlarges the filter area to increase the flow rate of water flow in each unit area to improve the filter's effect, so that household water demands of washing fruits and vegetables, showering and doing laundry can be easily satisfied.
