The way you work

As always, HP’s journey to deliver what’s desired starts with understanding our customers and their needs. As technology evolves, the people who use it also change, the way they work evolves, and the workplace itself transforms.

The WORKFORCE: Millennials

The biggest part of the **Workforce** is already the millennial generation and it will continue to grow. Not only do Millennials want a business device to be high-performing but they also expect it to be stylish.

The WORK STYLE: Highly collaborative

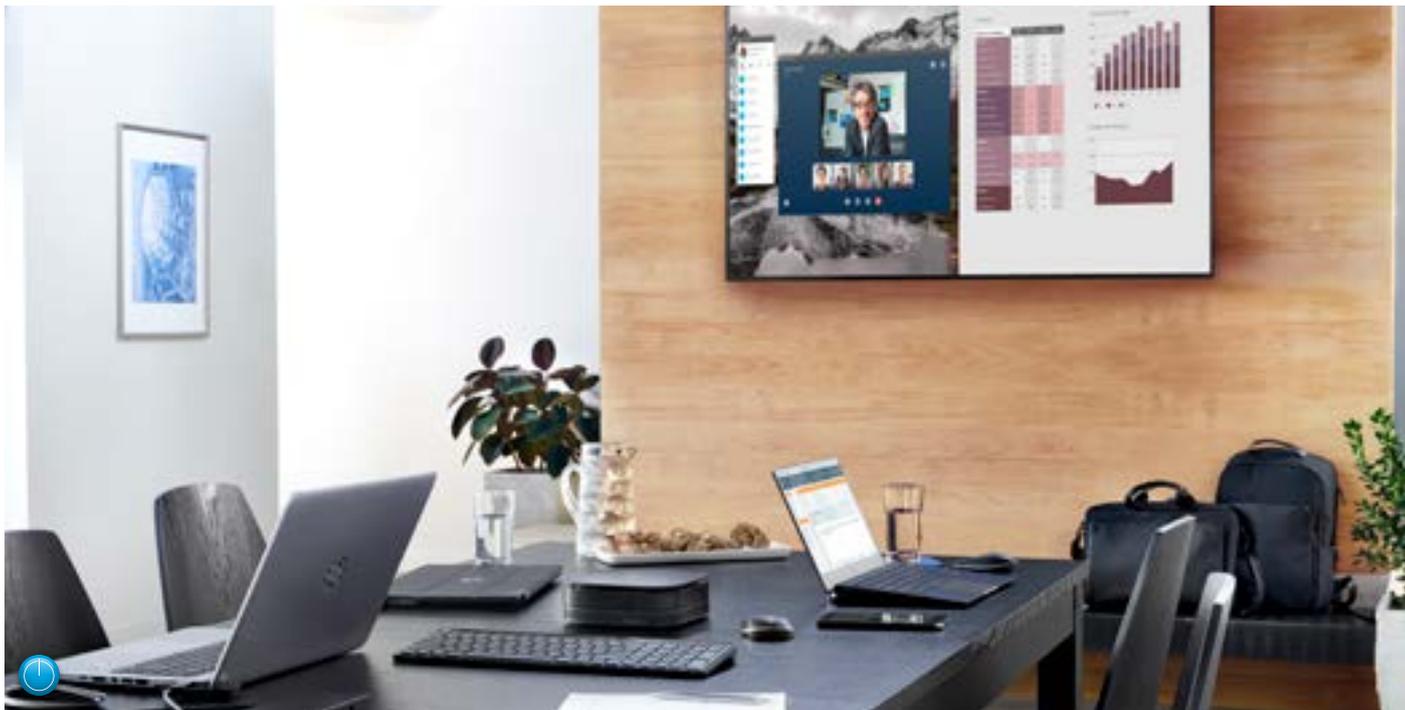

The transformation in the workforce is accompanied by the evolution of the Work Styles – 94% of today’s professionals agree that collaboration is critically important and spend about 40% of their time in conference calls.

The WORKPLACE: Open, mobile, more vulnerable

With workforce and work styles shifting, the Workplace is also rapidly modernizing to evoke a sense of energy and openness, with lots of light and shared working spaces – 70% of US offices have open floor plans. The offices also become mobile - 62% of people work from more than one location.

 In 2020, Millennials will be almost **HALF** of the Workforce

(Ponemon Institute LLC, The Cost of a Lost Laptop, Feb 2009. Exact quote: "The average value of a lost laptop is \$49,246. This value is based on seven cost components: replacement cost, detection, forensics, data breach, lost intellectual property costs, lost productivity and legal, consulting and regulatory expenses." www.intel.nl/content/dam/doc/white-paper/enterprise-security-the-cost-of-a-lost-laptop-paper.pdf)

Collaboration Solutions for the modern workplace

Collaborating across different regions can sometimes be challenging. Whether you're gathering in a conference room, small huddle room or at your desk, HP has solutions to keep you communicating and collaborating fast and easy, in a way that works for your Workplace and Work Style.

For the Mid-Size Conference Room & Huddle Rooms

HP Slice for Meeting Rooms¹ is an integrated conferencing solution designed for the office of the future. Simple, secure, and easily managed, it combines one-touch conferencing with the soul and manageability of a powerful PC. Paired with the HP Collaboration Cover, Audio Module and Large Format Display, team members can gather and have real time collaboration between onsite and remote participants.

For the Mobile and Desk-Based Professionals

Whether you're collaborating on the road or at your desk, HP's Unified Collaboration (UC) Speaker Phone provides a smart and easy way to turn any room into a virtual conference center^{2,3} for your Windows, Android™ or iOS device. Paired with our UC wireless and wired headsets, these lightweight and comfortable solutions enable a transparent and seamless experience as you join a meeting or conference call. Experience driving your conference calls directly from the HP Conferencing Keyboard, a full-sized, quiet USB keyboard with intuitive, dedicated, and illuminated keys for voice and video call functions.³

 **40%**

of professionals' time is spent in conference calls

¹ HP Slice for Meetings includes HP Slice with Intel® Unite™ software, HP Collaboration Cover and HP Audio Module. Other modules are sold separately.

² Listening to personal stereo equipment at full volume for long periods can damage the user's hearing. To reduce the risk of hearing damage, lower the volume and amount of time listening at full volume.

³ Internet connection and voice service required and sold separately.

Increase productivity beyond the office

Stay connected and productive on the road or wherever your **Mobile Workplace** takes you. HP's comprehensive and robust portfolio of accessories and displays enable you to transition effortlessly from one location to the next without missing a beat.

Work from more than one location

From products designed for UC conferencing anywhere, travel docking stations, various power and charging options that let you work longer, sleek input/output devices to fit neatly into your stylish carrying case and a portable display for expanded screen real estate on the go, HP solutions keep you productive.

Experience seamless transitions

For the Notebook “Power Professional” in today’s [Workplace](#), multi-tasking and transitioning from your desk to meetings and back again throughout the day requires the flexibility and tools that keep you connected and productive.

Meet the Office of the Future.

Imagine your day with a tailored HP ecosystem designed for your Work Style. Behold a breathtaking, continuous view with barely-there breaks when you tile multiple micro-edge displays side by side. Multi-task on your dual display set up, collaborating with teammates and driving conference calls with your UC Conferencing Keyboard and Wireless Headset in the morning.

Next, heading to your meeting with your Carrying Case, Power Bank and Notebook Privacy Screen, returning to your desk after the meeting with a simple click into the docking station and you are back in Power mode.

Office of the Future: Designed for efficiency

Creating the [Office of the Future](#) with an HP Desktop or Workstation Z2 Mini means having a small and stylish design that delivers superb performance, elegance, and efficiency while minimizing clutter and streamlining your work area.

Whether your [Workplace](#) is a shared environment such as a library, hotel touch down area or single user environment such as a business office, your challenges and considerations may be different relating to things like access to the PC and ports, security, productivity requirements, and much more. With HP's Desktop Mini PC, the world's smallest business class desktop, you can easily add modular solutions to fit your unique business needs. Mount a compatible HP Commercial display with a Mini PC, or a Z Display with a Mini Workstation to create an efficient, affordable, and integrated workspace solution for all of your business computing and productivity needs.

Powerful [Office of the Future](#) solution for compact work areas.

Classroom of the Future: Designed for learning

HP Education solutions are designed to deliver meaningful outcomes for students, schools and communities. Beyond our Education Edition PCs and Classroom Manager Software, we've crafted a robust portfolio of accessories that enhance the [Classroom of the Future](#) and overall learning experience, while protecting your investment.

Dead batteries and damaged devices can cause challenges when delivering lesson plans or doing homework. HP's Notebook Charging Carts minimize down time from dead batteries while providing the classroom a safe place to securely store, charge and transport the Notebooks. Our Always-On Cases boast a rugged design to protect the 11" & 14" Chromebook from most accidental damages. They are designed with features that enable students and teachers to work directly from the case with full accessibility to ports and viewing angles while protecting the notebook. Rounding out our accessories offering is the HP Prime Wireless Math Classroom, a comprehensive ecosystem of tools that empowers educators and encourages student STEM-based learning through wireless one-to-many teaching and classroom collaboration.

It's important for students and teachers to have the right devices, HP provides a range of cost-effective choices, extending access and learning to students.

Memory & Storage Solutions

HP memory and storage solutions are great ways to take the productivity of your machines to the next level when you need it. All HP memory and storage modules are fully tested, warranted and supported.

Notebook memory solutions

Optimize your business computing performance with HP memory. Random Access Memory (RAM) temporarily stores information from your operating system, applications and data that are in current use. This allows your processor to easily access the critical information that makes your programs run. More RAM allows you to run more programs simultaneously and makes it easier to toggle between programs.

Insufficient memory and hard drive paging can slow your applications down. Upgrading your memory is a cost-effectively boosts performance without having to upgrade your processor. All HP RAM is warranted and tested to meet the demanding needs of your business.

For workstations, HP offers Error-correcting code memory (ECC) because high performance decision-making demands high performance reliability.
