

10 Gigabit Fiber SFP+ Optical Transceiver Module

10GBase-LR (LC) Single-Mode Port, 10 km (6.2 mi.)

Part No.: **507479**

10GBase-LR Gigabit Fiber SFP+ Optical Transceiver Module

The new line of Intellinet Enhanced Small Form Factor Pluggable (SFP+) Transceivers provides customers with a combination of high-performance and affordability. These SFP+ transceiver modules come in a metal housing that reduces electromagnetic interference and increases their durability.

10 Gigabit Connectivity

Intellinet 10GBase-LR Fiber SFP+ Optical Transceiver Module, model 507479, is the right choice when it comes to connecting two buildings at 10 GbE speeds with single mode fiber. That's a 10 Gbps connection up to a distance of 10 km (or 6.2 miles).

Small Size for High-Density Fiber Connections

The transceiver comes in a mini-GBIC form factor, making it ideal for environments that require many fiber connections by taking up less space in your cabinet and/or computer room.

Compatibility

Compatibility in your network is everything, and the Intellinet SFP+ Transceiver Module (model 507479) delivers. Use it with any Intellinet SFP+ equipped network switch or any other MSA compliant SFP+ enabled switch. And since the Intellinet SFP+ transceiver module is set to broadcast the vendor pn SFP-10G-LR, compatibility to your Cisco gear is provided.

Hot-Pluggable

The Intellinet 10 Gigabit Fiber SFP+ Optical Transceiver Module (model 507479) is fully hot-pluggable, and that allows you to install the module without rebooting your network switch for uninterrupted network traffic.

Digital Diagnostics Monitoring (DDM)

The Intellinet 10 Gigabit Fiber SFP+ Optical Transceiver Module (model 507479) supports standard digital diagnostics monitoring (DDM) functions, also known as digital optical monitoring (DOM). This gives the user the ability to monitor parameters of the SFP, such as optical output power, optical input power, temperature, laser bias current, and transceiver supply voltage, in real time.
