

Philips
Micro Theater

MCD712

Superb cinematic experience

plus USB Direct playback

Experience cinema-quality sound at home with the Philips Micro Theater MCD712. Plug in a USB-compatible device for photo and MP3/WMA music playback in superb sound. Dramatic sound is yours to enjoy with 100W RMS total output power.

Enrich your movie experience

- Play DVD, DivX®, (S)VCD, MP3-CD, WMA-CD, CD(RW) & Picture CD
- Dolby Digital for ultimate movie experience
- Progressive Scan component video for optimized image quality

Enrich your sound experience

- USB Direct for music and photo playback
- Digital Sound Control for optimized music style settings
- Dynamic Bass Boost for deep and dramatic sound
- Loudness for bass and treble enhancement
- 100W RMS total output power

Easy to use

- Digital tuning with preset stations for extra convenience
- Motorized CD loader for convenience access
- Wake up and sleep timer functions

PHILIPS

Highlights

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually

get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Dolby Digital

Because Dolby Digital, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

USB Direct

Simply plug in your USB device on the system and share your stored digital music and photos with your family and friends.

Progressive Scan

Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending a field comprising the odd lines to the screen first, followed by the field with the even lines, both fields are written at one time. A full image is created instantaneously, using the maximum resolution. At such a speed, your eye perceives a sharper picture with no line structure.

Loudness

In the sound spectrum, high and low frequencies are relatively less audible to human ears - especially at low volumes. By activating the Loudness feature, the bass and treble will be amplified so you can savor a more balanced sound perception overall.

Specifications

Sound

- Output Power: 2x50W RMS / 1800 watts PMPO
- Sound Enhancement: Loudness, Digital Sound Control 4 modes, Dynamic Bass Boost
- Sound System: Dolby Digital

Loudspeakers

- Main Speaker: 2 way, 4" woofer, Bass Reflex Speaker System, Speaker grilles detachable, Piezo tweeter
