UMM USB FLASH DRIVE

UMM is aimed at users who appreciate interesting design and expect good performance. UMM is equipped with a USB 3.0 interface, which provides significant speed bump in comparison to products based on the older generation interface.

INTERFACE:

3.0

USB 3.0

AVAILABLE CAPACITIES:

16 - 128 GB

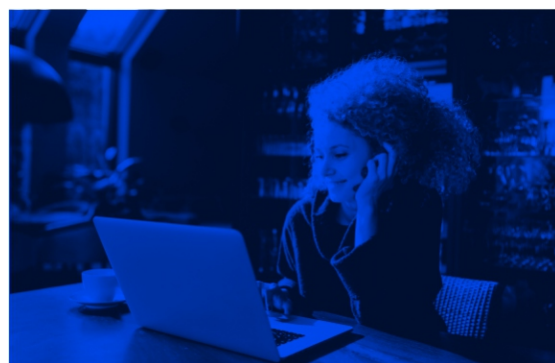

A COMBINATION OF CLASSIC AND MODERN DESIGN

The GOODRAM UMM housing is made of plastic with a piano black finish. The intense black color and original finish highlight the modern nature of this flash drive. The USB flash drive can be used both in devices equipped with a USB 3.0, port, as well as those equipped with older standards of USB ports. GOODRAM UMM is backwards compatible with the USB 2.0 interface, but only a host device supporting USB 3.0 will allow to fully enjoy fast transfers.

SPEED OF OPERATIONS (USB 3.0):

60 MB/s
