

Classic+ teat

- 2 pcs
- Medium flow teat
- 3m+

SCF633/27

Clinically proven to reduce colic and discomfort*

Designed to reduce wind

Our Classic+ teat is part of the Airflex venting system, air is vented into the bottle and away from the baby's tummy. The ribbed texture prevents teat collapse and reduces feeding interruptions and discomfort.

Benefits

Clinically proven to reduce colic and discomfort*

- Airflex venting system proven to reduce colic*
- 60% less fussing at night*
- Ribbed texture prevents collapse for uninterrupted feeding
- Teat shape designed for secure latch

Other benefits

- Compatible range from breastfeeding to cup
- Different teat flow rates available
- This teat is BPA free

PHILIPS

Features

Less colic

Our clinically proven Airflex venting system is designed to reduce wind and colic. As your baby feeds, the valve integrated into the teat flexes to allow air into the bottle to prevent vacuum build up and vents it towards the back of the bottle. It keeps air in the bottle and away from baby's tummy to help reduce wind, spit-up and burping.

Less fussing

Philips Avent Classic+ bottle reduces fussing. Babies fed with Philips Avent Classic+ bottles experienced 60% less fussing at night, than babies fed with a competitor's anti-colic bottle. *

Uninterrupted feeding

The teat shape allows secure latch and the ribbed texture helps prevent teat collapse for uninterrupted, comfortable feeding.

Secure latch

Growing up with your baby

Mix and match our breast pump, bottle and cup parts, and create the product that works for you, when you need it!

Fits your baby's growing needs

The Philips Avent Classic+ bottle range offers different teat flow rates to keep up with your baby's growth. Remember that age indications are approximate as babies develop at different rates. All teats are available in twin packs: Newborn, Slow, Medium, Fast and Variable Flow, and Thick feed.

BPA free

Philips Avent Classic+ teat is made of BPA free material (silicone).

- * At 2 weeks of age, babies fed with a Philips Avent bottle showed less colic, and significantly less fussing at night compared to babies fed with another competitor bottle.
- * Teat design proven to prevent teat collapse and associated air ingestion and feeding interruptions.
- * What colic is, and how it affects babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying, fussing, wind and spit-up.
- * 0% BPA, following EU regulation 10/2011
