

AVENT VIA™ is the innovative, disposable way to feed your baby when on-the-go. VIA Bases are pre-sterilized for immediate use straight from the pack and are disposable, however they can be re-used. Due to repeated usage and cleaning, we recommend re-using VIA Bases no more than three times before discarding. Use clip to re-seal bag to keep VIA Bases clean/sterile.

ALL OTHER COMPONENTS MUST BE STERILIZED BEFORE FIRST AND EVERY USE.

VIA Bases are more flexible than standard feeding bottles – avoid applying unnecessary pressure when lids are in place as this could cause them to leak/spill.

Nipple Travel Pack.
Keeps nipples sterile for 24 hours.

All items, except pre-sterilized VIA™ Bases, should be separated, washed and sterilized BEFORE first use. Always ensure all items are separated after EACH use; wash, rinse thoroughly and sterilize.

- DO NOT use anti-bacterial cleaners, as they may cause plastic components to crack.
- Suitable for all methods of sterilization.
- To sterilize, use an AVENT Electric or Microwave Steam Sterilizer or boil for 5 minutes.
- Wash your hands thoroughly and ensure surfaces are clean prior to contact with sterilized components.
- Dishwasher safe: Food colorings may discolor components.
- Microwave caution: DO NOT warm feeds in a microwave oven as this may cause uneven heating and could scald your baby.

Expressed breast milk can be stored in the fridge or freezer in sterile VIA Bases and sterilized Lids: in refrigerator for up to 48 hours (not in the door) or freezer for up to 3 months. Never refreeze breast milk or add fresh breast milk to already frozen milk. Only fill VIA Bases to 6oz or 8oz for storage in freezer, as contents will expand.

For your child's safety and health. **WARNING!** Breast milk, formula or solids will heat faster in AVENT VIA Bases than in standard feeding bottles/containers. Always check food temperature before feeding.

- Never use feeding nipples as dummies, pacifiers or soothers. Continuous/prolonged sucking of any fluids other than milk and water will cause tooth decay. Fruit juices and flavored sugary drinks are not recommended. If used, they should be well diluted and only used for limited periods, not constantly sipped.
- Always use this product under adult supervision. DO NOT allow your child to play with small parts or walk/run while using bottles/nursers/cups.
- For use with AVENT clear silicone nipples. Always inspect nipples before use and throw away if damaged. In any event we recommend replacing nipples after 3 months use. Always assemble nipples while wet.
- Nipples available in newborn, slow, medium, fast and variable flow rates.
