Easy to experience

- Timer to wake up with the smell of fresh coffee
- Adjustable keep-warm time from 10 minutes to 2 hours
- Drip stop to pour a cup of coffee whenever you like
- Water level indication for easy filling

PHILIPS

Highlights

Integrated bean grinder

To have the delicious taste of freshly ground coffee, fresh coffee beans are grinded before brewing. This coffee maker has conical burr grinders to have the optimal grind size, which ensures the best taste.

Timer

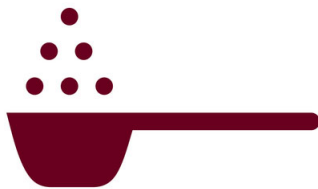

Wake up with the smell of fresh coffee thanks to the timer. Prepare your coffee maker, set the time, and a fresh jug of coffee is brewed at the time you desire.

Strength select

Adjust the intensity of your coffee from mild, medium or intense coffee.

Ground coffee brew

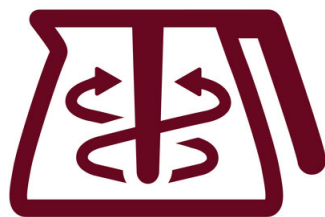

You can also use ground coffee instead of coffee beans. The grind-off function disables the grinder and you can simply fill ground coffee into the filter.

Aroma seal

Aroma seal to keep your beans fresh in the container

Aroma twister

This smart nozzle inside the jug circulates the inflowing coffee evenly through the jug for an optimal and consistent aroma, from the first to the last cup.

Adjustable keep-warm time

Select how long you want your coffee to stay hot after brewing. You can adjust the automatic shut-off time from 10 minutes up to 2 hours.

Water level indication

Fill the water tank easily and precisely with the water level indication.

Drip stop

The drip stop allows you to pour a cup of coffee before the full brewing cycle is finished.

Grind selector knob

Personalize the coffee taste, by choosing between 9 grind size options. Select a fine grind for a stronger coffee taste or coarse grind for a lighter, smooth filter coffee.

Specifications

Accessories

- Included: Glass jug

Design

- Color: Copper metal

Finishing

- Material of main body: Stainless steel & plastic
- Material water tank: Plastic

Country of origin

- Made in: China
