- Get high-quality LED light, while saving energy
- Lamp lifetime for up to 25 years of use

Superior design for an optimal light effect

- The perfect light beam for accent lighting
- Adjustable spot head for maximum flexibility

PHILIPS

Features

SceneSwitch 3 light settings

Change your room ambience to suit whatever you're doing. With the Philips SceneSwitch LED spots, you can easily change the setting from bright light, to natural light and to a cosy warm glow. No dimmer or additional installation required. All you need is your existing switch.

Restore to factory settings

If multiple SceneSwitch lights are used and they are no longer synchronised, simply toggle the switch (turn it on and off again within one second) to restore them to the default factory setting.

Recall your last light setting

This SceneSwitch spot light has a built-in memory chip which will memorise your last light setting if the switch is turned off for longer than 6 seconds. If you don't often switch between activities, the light will be in your favourite mode when you turn it on again.

Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.

High light output – 430 lumen

Brighten up your home with high-quality light

Integrated LED light

This spot has an integrated high-quality LED light that provides optimal light output.

ClickFix easy mounting

Install your spot light easily and by yourself. Thanks to ClickFix, no extra pair of hands is needed. Simply mount the bracket to the ceiling, connect the wires, then click and fix the lamp in one go.

5-year warranty

All our spot lights are built to last. They come with a full 5-year warranty on the complete product, ensuring you will enjoy long-lasting quality lighting every day.

Instant brightness

There is no need to wait with Philips LED spots. They provide their full level of brightness immediately upon switching on. Their true incandescent-like warm white light instantly creates a cosy, inviting atmosphere.

Energy-saving LED light

LED lights save up to 80% energy compared to traditional lighting with the same light output. When you buy a Philips LED lamp or light bulb, you start saving money straight away. For each light source you replace with a LED light, you will see immediate returns on a lower energy bill.

Perfect for accent lighting

Modern lighting with a familiar wide-angle light output (40 degrees), this LED spot is suitable for both accent lighting and general-purpose lighting. It is ideal for use in kitchens, living rooms and dining rooms.

Easy-to-adjust spot head

The adjustable spot head is designed to direct the light where you need it most.

Lifetime for up to 25 years

LED lights last longer, avoiding the hassle of frequent light source replacement. This significantly reduces waste, but also saves you money in the long term.
