

WHEN THE GOING GETS TOUGH

HD725 External Hard Drive

HD725 External Hard Drive

The HD725 takes external hard drive durability further than any other drive. We test it to beyond IP68 dust and waterproof standards, it exceeds military-grade shock proofing with a triple-layered protective construction. With capacities up to 2TB.

Beyond IP68 to Withstand the Unexpected

ADATA's external storage expertise results in a drive that is dustproof and waterproof. The HD725 has been tested for 120 minutes under 2 meters of water - that is longer and deeper than IEC IPX8 requirements!

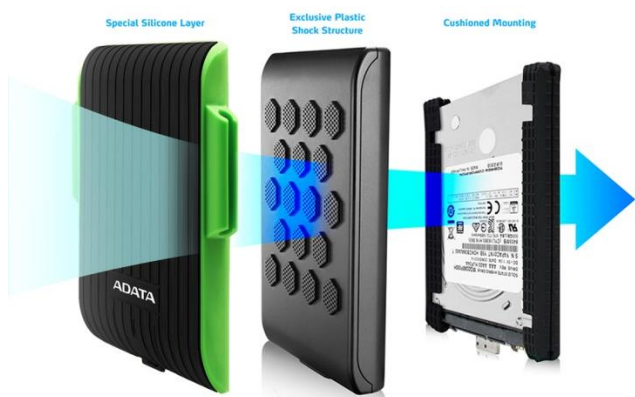

Military-Grade Protection

The HD725 holds up a total of 26 points over its surface, including the faces, edges, and corners. ADATA has tested it to US Army MIL-STD-810G 516.6 standards, meaning it can easily withstand falls from up to 1.8 meters.

Robust Triple-Layer Construction

The HD725 has three primary layers: a tough silicone casing, shock-absorbing buffer, and cushioned mounting that holds the drive firmly in place.

Features

- Military-grade protection – Drop-tested from 1.8m
- Beyond IPX8 (Tested to survive 2m of water for 120 minutes)
- IP6X dustproof
- Robust triple-layer construction
- Shock sensor technology

Specifications

- Interface: USB 3.1
- Capacity: 1TB / 2TB
- Color: Yellow / Red / Black / Blue / Green
- Dimensions (L x W x H):
134 x 101 x 21mm / 5.2 x 3.9 x 0.8"
- Weight: 223g / 7.9oz
- Warranty: 3 years

Exclusive Shock Sensor Technology

The HD725 features shock sensors that can detect potentially harmful vibrations, shaking, and impact. There is an LED light on the drive that lets users know the status of the drive.
