#### **UL3E**

An Ultra HD large display, the UL3E series will improve business productivity in any location. All content is delivered in vivid colors and with fine details, giving audiences a clearer viewing experience. Moreover, equipped with wireless solutions and high compatibility features, the UL3E series makes operation promotions or meetings easier and more efficient.

#### UL3E

#### **Superior Picture Quality**

#### True Color, Wide View

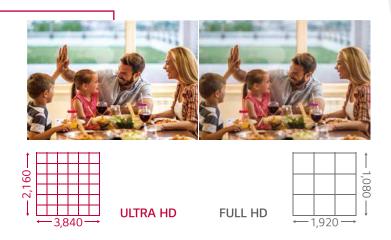

LG IPS panel features a wide viewing angle to deliver clear content regardless of where meeting participants are seated. Each pixel in the IPS panel reproduces image colors true-to-life, without distortion.

#### Vivid Color Details with Ultra HD

The UHD resolution allows users to view details even when zooming in on the display, with four times higher definition than FHD. The UL3E ensures stable UHD video playback with HEVC (High Efficiency Video Coding).

#### UL3E

#### **Wireless Solution**

#### **Content Sharing**

Content Mirroring among devices is more convenient on a Wi-Fi network.

With Beacon and BLE (Bluetooth Low Energy), shop managers can provide coupons and information in real-time.

#### **Wireless Access Point**

The UL3E series operates as a virtual router which can be an wireless access point for mobile devices.

#### **PC-less Content Management**

#### **Embedded Content Management**

The embedded CMS (Content Management System) allows you to edit and play content, schedule a playlist and even group and control signages via remote control, mouse or even mobile phone, without needing a separate PC or software. This makes content management much easier and user-friendly.

- \* The scenes are simulated for illustrative purposes. Actual GUI may differ from the accompanying image.
- \*\* All displays must be connected to the same network.

#### USB Data Cloning

USB data cloning makes managing multiple displays more efficient for optimal operation, since users don't have to set up each display one by one. Once users copy data to a USB in one display, it will be easily distributed to others through a USB plug-in.

#### UL3E

#### **Easy Maintenance**

#### Compatibility with AV Control System

The UL3E series has been certified Crestron Connected® for a higher level of compatibility with professional AV controls to achieve seamless integration and automated control <sup>1</sup>, boosting business management efficiency.

1) Network based control

#### **Real-Time Remote Monitoring**

In case of malfunctions or errors, real-time remote care is available. When an error occurs, a notification can be sent through the SNMP (Simple Network Management Protocol) protocol.

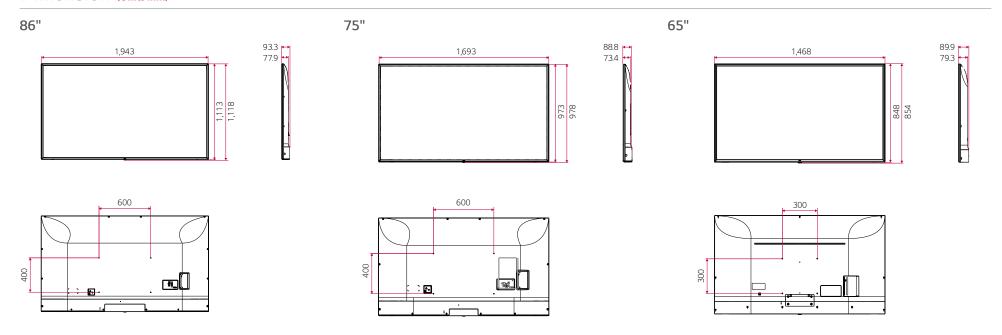

WOL (Wake-on-LAN) enables users to send a message through network to turn on displays. This greatly simplifies the installation and maintenance processes as only a single wire is required for power and network connection.
