AirFree vent

3 Bottles

9oz/260ml
Slow flow nipple
1m+

SCF408/32

Designed to reduce colic, gas and reflux*

Our unique AirFree vent is designed to help your baby swallow less air as they drink by keeping the nipple full of milk during feeding. Reducing the amount of air your baby ingests helps w/common feeding issues such as colic, reflux & gas.

AirFree vent designed for less air ingestion

- Helps baby swallow less air with AirFree vent
- Nipple stays full of milk, not air

Clinically proven to reduce colic and fussing*

- Valve in the nipple prevents vacuum build-up*

Easy to assemble, use - and clean!

- Easy to clean - wide neck & few parts
- AirFree vent is one piece, simple to use
- Nipple shape designed for a secure latch

Additional benefits

- Different nipple flow rates available
- Use your bottle with or without the AirFree vent
- Mix and match with other Philips Avent products

PHILIPS
AVENT

Highlights

Unique venting system

Our unique AirFree vent is designed to help your baby swallow less air as they drink, by drawing air away from the nipple. Reducing the amount of air your baby ingests can help with common feeding issues, such as colic, reflux and gas.

Reduces colic and fussing*

Clinical studies have shown that the Philips Avent bottle reduces colic and fussing. Fussing is significantly reduced at night as babies fed with Philips Avent anti-colic bottles experienced 60% less fussing than babies fed with a leading competitor's vented bottle.

Easy to clean

With its wide neck and fewer parts, our bottle is easier to assemble and to clean quickly and thoroughly.

Nipple full of milk, not air

The nipple stays full even when the bottle is horizontal, so your baby can drink in an upright position. This can help reduce reflux, aid digestion, and make feeding time more comfortable for you and your little one.

Designed for a secure latch

The shape of the nipple allows for a secure latch, and the ribbed texture helps prevent nipple collapse, for uninterrupted, comfortable feeding.

While feeding, make sure the AirFree vent stays on top. This keeps the nipple full of milk, even when the bottle is held in a horizontal position, for easier upright feeding.

Specifications

Country of origin

- United Kingdom

Design

- Bottle design: Ergonomic shape, Wide neck

Development stages

- Stages: 0-12 months

Ease of use

- Bottle use: Easy to assemble, Dishwasher & microwave safe, Easy to clean, Easy to hold

www.philips.com

* At 2 weeks of age, babies fed with a Philips Avent bottle showed a trend to less colic compared to a conventional bottle and a significant reduction in fussing at night compared to babies fed with another leading bottle.

* Our unique AirFree vent is designed to help your baby swallow less air as they drink by keeping the nipple full of milk during feeding. Reducing the amount of air your baby ingests helps w/common feeding issues such as colic, reflux & gas.

* What colic is, and how it affects babies? Colic is caused in part by swallowing air while feeding, which creates discomfort in a baby's digestive system. Symptoms include crying, fussing, gassiness and spit-up.
