This printer is intended to work only with cartridges that have a new or reused HP chip, and it uses dynamic security measures to block cartridges using a non-HP chip. Periodic firmware updates will maintain the effectiveness of these measures and block cartridges that previously worked. A reused HP chip enables the use of reused, remanufactured, and refilled cartridges. More at: http://www.hp.com/learn/ds

¹ Glossiest white based on internal HP testing in January, 2018 compared to leading competitive printers with CMYK configuration under \$350,000 USD. Based on level of gloss at 60 degrees on a rigid material (acrylic). Tested using Glossmeter BYK micro-TRI-gloss (20°, 60°, 85°), compatible with ISO 2813 and ASTM D523 relative to glossiness measure.

² HP Latex Inks are UL ECOLOGO® Certified. UL ECOLOGO® Certification to UL 2801 demonstrates that an ink meets a range of multi-attribute, lifecycle based criteria related to human health and environmental

considerations (see http://www.ul.com/EL). There is a broad set of media with very different odor profiles. Some of the media can affect the odor performance of the final print 3 When HP 886 White Latex Printheads are placed in the storage cassettes, no white ink is used for servicing when printheads are not in use.

ECO highlights

- Better for print operations—no hazard warning labels or HAPs, no special ventilation needed Better for the environment—HP designs end-to-end sustainability into large-format printing Water-based inks produce odorless prints? HP Latex Inks are UL ECOLOGO® and UL GREENGUARD GOLD Certified³

Please recycle large-format printing hardware and printing supplies. Find out how at our website: http://www.hp.com/ecosolutions

¹ Contains no Hazardous Air Pollutants according to EPA Method 311. Special ventilation equipment (air filtration) is not required to meet U.S. OSHA requirements. Special ventilation equipment installation is at the discretion of the customer—see the Site Preparation Guide for details. Customers should consult state and local requirements and regulations. Contains no Hazardous Air Pollutants according to EPA Method 311.

² There is a broad set of media with very different odor profiles. Some of the media can affect the odor performance of the final print.

³ UL ECOLOGO® Certification to UL 2801 demonstrates that nink meets a range of multi-attribute, lifecycle based criteria related to human health and environmental considerations (see http://www.ul.com/EL). UL GREENGUARD GOLD Certification to UL 2818 demonstrates that products are certified to ULS GREENGUARD standards for low chemical emissions into indoor air during product usage. ¹ Print speed may vary due to the adaptive printing mechanism to avoid image quality defects.
² Reflective measurements on a 943 colour target under CIE standard illuminant DSO, and according to the standard CIED2000 as per CIE Draft Standard DS 014-6/E-2012. Backlit substrates measured in transmission mode may yield different results.
³ Roll media is only compatible with the purchase of the optional HP Latex R1000 Roll Printing Kit.
⁴ Recyclable HP papers can be recycled through commonly available recycling programs, or according to region-specific practices. Some HP media are eligible for return through the HP Large Format Media take-back program. Programs may not exist in your area. See http://www.HPLFMedia.com/hp/ecosolutions for details.
