

## ROBOT DIGITAL DISPLAY EVOLUTION 2.0

**Model:** 2712/51

**Code:** 00P271251AR0

**EAN:** 8003705111820

Evolution 2.0 is the robot vacuum cleaner featuring a LED display which autonomously cleans floors and carpets and returns to its base for recharging. Equipped with the most advanced anti-collision and antiobstacle sensors, it moves around the obstacles found during cleaning and detects the different levels, preventing falls. Thanks to the independent navigation system, Evolution 2.0 cleans even the corners and the room edges. The robot is also equipped with a dust detecting sensor, i.e. a TURBO function which automatically activates in presence of most dirty areas: it concentrates on a 1.0 m diameter area with concentric movements at higher speed and power.

The display touch screen permits to set:

- A postponed cleaning cycle at a precise time of the day
- The robot direction during its functioning in different directions (up-down-right-left)
- The return to the recharge BASE
- The TURBO mode

### Product specifications

AUTO cleaning (along wall/circular/zig zag)	✓
Dust tank capacity 0,5 L.	✓
Turbo Spot	✓
Battery	Lithium
Along wall	✓

Choose directions	✓
Cleaning program settings	✓
Return to charging base	✓
Touch screen on top and remote control	✓
Virtual wall	✓
2 lateral brushes	✓
Sensor	anti-collision, anti-falling - return to charging base
