

# Hospital-Grade Power Cords

## Safe Connections for Healthcare Settings

### HG Power Cords

Green dots on the NEMA 5-15P plug indicate the cord is hospital grade.

### Coiled HG Power Cord

P006-C08-HG10 coiled cord resists tangles and saves space.

### HG Power Cords with Clear Connectors

Clear connectors allow inspection of internal components.

**NEW!**

### HG Power Cords with Locking C13 Connector

C13 connector has a locking design to resist accidental disconnection from equipment, even during frequent repositioning.

Tripp Lite's hospital-grade power cords provide a safe solution for powering electronics in medical facilities. The cords connect computers, scanners, lab equipment, mobile carts and other medical equipment to a grounded hospital-grade AC outlet. Ideal as replacements for old or lost cords, these hospital-grade power cords meet stringent standards to help protect patients and staff from shock hazards. All models have a lifetime limited warranty.

### Key Features

- Cords are tested to ANSI/UL 62 and 817 and CAN/CSA C22.2 no. 21 and 49 to safely provide power.
- NEMA 5-15P plugs have green dots and are clearly marked "Hospital Grade" for easy identification.
- SJT jacket and fully molded connectors provide durability and long service life.
