The power to engage

LASER NOVA/SKY ACCESSORIES

INCREASED STUDENT AND TEACHER PARTICIPATION

BOOST YOUR TOUCH SCREEN EXPERIENCE WITH PRACTICAL ACCESSORIES

Do you want to take collaboration to the next level? CTOUCH offers a wide range of practical accessories for your convenience.

- Connectivity accessories for wireless screen sharing with any tablet, smartphone, Windows or Mac notebook.
- Powerful OPS modules
- Wallom mobile and wall lift mount
- Software and training

CONNECTIVITY

WIRELESS SHARING

With our new Laser Sky and Laser Nova displays you are all set for increasing the interaction between the presenter and your audience. The partnership between CTOUCH and the BARCO MirrorOp application makes wireless sharing easier than ever before.

MIRROROP

MirrorOp is a software application that mirrors the screen of your PC, Mac, Chromebook or mobile device on the large screen. Simply install the app on your device and start sharing!

MirrorOp has the unique advantage of not only mirroring your content from your devices, but it also gives you the possibility to control the content on both the touchscreen and your device. This is what we call a two-way-touch-functionality. This is truly unique!

An overview of MirrorOp advantages:
- Two-way-touch – touch functionality works both ways.
- Quad view – stream and view up to 4 devices at the same time.
- Up to 64 users in one session – Switch easily between devices.
- Works on all mainstream operating systems: Android, Chrome, IOS, MacOS and Windows.

An overview of functions of MirrorOp:

Sender OS	Type of app/licence	Mirror display	Mirror audio	Quad view	Touch back
Android	MirrorOp app	V	Via phone	X	X
IOS	MirrorOp app	Limited function	V	X	X
	AirPlay (*)	V	V	X	X
MacOS	MirrorOp app	V	V	V	V
	AirPlay (*)	V	V	X	X
Windows	MirrorOp app	V	V	V	V
Google Cast	Google Cast	V	V	X	X

For an up to date overview of supported OS versions, please visit our help centre: http://support.ctouch.eu
* requires Extended Streaming Licence.

OPTIONAL CONNECTIVITY ACCESSORIES

1. Unlimited streaming licence MirrorOp*

With this unlimited streaming licence, you only need to install the MirrorOp app from the app store on your device. You can add up to 64 users, have quad view and two-way-touch.

2. Extended streaming licence MirrorOp**

If you also want to stream via AirPlay and/or Google Cast, you can buy the extended streaming licence. You can stream directly from AirPlay or Google Cast without installing the MirrorOp app.

3. Wi-Fi module*

The Laser Sky is equipped with a LAN-in port, so you can have wired internet on your display. If you require wireless internet on your Laser Sky, we have the opportunity to add a 2.4/5Ghz AC Wi-Fi module. The Laser Sky comes with a dedicated Wifi slot so you can easily install the WiFi module. The module offers also an additional HDMI input source and USB port. The module enables wireless connection directly to your display. This way you can create your own local Wi-Fi hotspot.

4. Dynamic Pen

The dynamic pen simulates natural handwriting and allows you to easily adjust volume, open programs or simply use it as an air mouse.

* For Laser Sky only, the Laser Nova is already equipped with these items. ** Only in combination with the unlimited streaming licence (MirrorOp).

5. Connectivity Pack*

We created a special best value for money package. With this Connectivity Pack you can upgrade your Laser Sky to expand the functionalities of your display even further.

This pack includes:
- Wi-Fi module 2.4/5Ghz AC
- Unlimited streaming licence MirrorOp
- Dynamic Pen

OPS PC MODULES

The OPS PC Module and OPS Pro PC Module comply with Intel OPS (Open Pluggable Specification) standard and house the Intel 7th Generation Core i5/i7 for optimal graphical and computing performance. The 8GB/16GB memory brings enough room to run multiple applications with no hassle. The wireless 802.11 AC network interface will enable you to connect to networks with speeds up to 867Mbps.

An extra drive bay enables you to upgrade the storage with a 2.5" SATA3 SSD or HDD. The OPS Pro PC Module has additional features like Intel® vPro™ powered Unite® and Active Management Technology support for optimal versatility and remote management to save cost and maximise uptime.

Next to increased memory and storage capacity it also has TPM 2.0 support for additional security related options.

For detailed information, please view the individual model spec sheets.

MOUNTING

WALLOM 2 WALL LIFT

If you consider a fixed mounting solution, CTOUCH offers the most flexible wall lift of its kind. The Wallom2 wall lift has an unique and enhanced design with high demands of ergonomics, quality and durability. The lift can be mounted extremely tight to the wall and fits all ages or circumstances because of the extreme high-low adjustment range . Easy to install out of the box.

WALLOM 2 MOBILE LIFT

CTOUCH offers you a perfect fit if you need a flexible mounting solution. The Wallom2 mobile lift has an unique and enhanced design with high demands of ergonomics, quality and durability. The lift is easy to manoeuvre without becoming unstable due to the big and solid TENTE® wheels and a push rod. Comes pre-installed in the box and is easy to install and operate.

Important note:
Please note that a 86" bracket is needed to place a Laser Sky or Laser Nova 86" on the Wallom 2 Wall and Mobile Lift.

SOFTWARE & TRAINING

CTOUCH ACADEMY

We believe that everybody should experience a positive experience when it comes down to interactive sharing of knowledge. To achieve this, the CTOUCH Academy offers a diverse range of courses to make our customers confident and enthusiastic about using our interactive touchscreens.

The courses are specifically created for these environments:
- Learning and education
- Agile working
- Design and review
- Unified Communication & Collaboration (UC &C) platforms

Our special training will be given at the location of your choice or at the CTOUCH Experience Hub and can be customized to your own requirements and wishes.
