- Connects smart brush handle and smart brush heads
- Always know when to replace your brush heads
- Philips Sonicare's advanced sonic technology

Designed around you

- Makes traveling easier for you

PHILIPS

Highlights

Naturally whiter teeth

Click on the W DiamondClean brush head to remove surface stains and reveal a whiter smile more than 2x better from Day 1. With its densely packed central stain-removal bristles, it's clinically proven to whiten teeth in just one week.

Say goodbye to plaque

Densely-packed, high-quality bristles remove up to 10x more plaque from all areas of your teeth than a manual toothbrush. And the specially curved power tip makes reaching the teeth at the back of your mouth a breeze.

Improves gum health

Densely-packed, high-quality bristles give you an extra gentle brushing to reduce gum bleeding up to 5x and improves gum health up to 6x better than a manual toothbrush in 2-weeks.

Safe and gentle

You can be sure of a safe brushing experience: our sonic technology is suitable for use with braces, fillings, crowns, and veneers, and helps prevent cavities and improve gum health.

Too much pressure?

You may not notice if you're brushing too hard, but your toothbrush will. If you start taking it out on your gums, the toothbrush will make a pulsing sound as a reminder to ease off on the pressure.

Brushing your way

This toothbrush allows you to customize your brushing with a choice of three modes and three intensities. Clean mode is standard for superior cleaning. White is the ideal mode for removing surface stains. And Gum Care mode adds an extra minute of reduced-power brushing, so you

can gently massage your gums. Three intensities allow you to switch the order of 'higher' and 'lower' to align with the intensities from left to right.

BrushSync technology

A microchip-enabled technology that detects and synchronizes the smart brush head with the smart handle. The smart handle and smart brush head pair is a powerful combination that enables Smart mode pairing and Smart replacement reminders.

Mode and intensity pairing

Wondering which mode and intensity you should use? Wonder no longer. BrushSync mode pairing tells your smart handle which smart brush head you're using. So, if you click on a gum care brush head, for example, your toothbrush knows to select the optimal mode and intensity for your gums. All you need to do is to press the power button.
