

HP Blue Back Satin Billboard Paper delivers high opacity and is specially developed for outdoor billboards, posters and kiosks. Even without lamination, it combines water- and scratch-resistance with brilliant, true-to-life colour quality¹.

Commercial and Professional Print Service Providers and Sign Shops looking for an affordable outdoor paper that is compatible with HP low-solvent inks.

Consistently produce brilliant, high-quality prints with this multilayered satin coated media. The swellable coating delivers high colour brilliance from any viewing distance.

Its water- and scratch-resistance – combined with its excellent folding properties – makes it second to none for outdoor billboards, posters, kiosks and more.

The paper's blue backing ensures high opacity and reduced shine-through on all indoor and outdoor applications. It can be applied directly over previous prints, thereby saving time and improving efficiency.

¹ Image permanence and application durability using HP 780 or HP 790 low-solvent inks, based on typical exposure in vertical display conditions and varies as environmental conditions change.

HP Blue Back Satin Billboard Paper 130 g/m²

Compatibility

For compatibility information, please refer to the latest Large Format Supplies Compatibility chart on www.hp.com/go/designjet/supplies

For the latest ICC/media profiles, please visit www.hp.com/go/designjet/supplies (click on ICC profiles and select your printer). For non-post script printers see your external RIP vendor.

Weight	130 g/m ² per ISO 536 Test Method
