MODEL NUMBER: U444-T6N-VUBC

USB-C to VGA adapter adds VGA, USB-A and USB-C Power Delivery ports to your laptop, MacBook or other compatible device.

Features

USB 3.1 Type-C Adapter Connects a VGA Monitor to Your USB-C or Thunderbolt 3 Device This USB 3.1 C adapter helps you transmit 1080p video from your tablet, laptop, Chromebook, MacBook, smartphone or PC to a VGA-enabled television, monitor or projector. It's an ideal tool for giving video presentations in conference rooms and classrooms, editing multiple documents on a larger screen, or streaming video for digital signage in crystal-clear 1080p.

Supports USB-C DisplayPort Alternate Mode for Transmitting Video Signals By connecting the self-storing USB-C cable to a source device that supports USB DisplayPort Alt Mode, you can output video to a compatible monitor, television or projector without installing special software drivers.

Transmits Crystal-Clear 1080p Video to a VGA Display To send high-definition video to a VGA television, projector or monitor, connect the VGA port to the display using a VGA cable (such as P502-Series VGA cables, sold separately). The USB to VGA adapter supports video resolutions up to 1920 x 1200 (1080p) at 60 Hz.

Connects USB Peripherals and Transfers Data at Fast USB 3.1 Gen 1 Speeds The USB-A 3.0 port accepts USB peripherals, such as a flash drive, mouse, keyboard or printer, and provides up to 1.5 amps (7.5 watts) for charging and powering mobile devices. Like the USB-C port, it transfers data at speeds up to 5 Gbps, which is 10 times faster than USB 2.0. The USB Type-C adapter is backward compatible with previous USB generations, so you can continue using older peripherals while getting high-speed performance from new devices. Note: Host must support USB OTG (On-the-Go)

PD Charging Port Charges Connected Device via AC Wall Charger The USB-C Power Delivery 3.0 port provides power output up to 5 amps (100 watts), which is more than sufficient for charging and powering the connected source device, such as a MacBook or Chromebook. Just connect the device's AC wall charger to the USB-C PD port and enjoy fast USB 3.1 Gen 1 data transfer speeds up to 5 Gbps. Like the USB-A port, it is backward compatible with previous USB generations. Note: USB-C PD port does not support Quick Charge (QC).
