

## P/N : USB-HUB2

---

### **Description and Function:**

Your USB HUB is made for extending the USB Port/s of your computer. Charge and/or operate only with USB Devices.

Please consider that there are two groups of USB Devices:

- |                           |   |
|---------------------------|---|
| <b>Self powered:</b>      | These devices have an own power supply, e.g. printer, scanner...  |
| <b>Bus Powered:</b>       | These devices receive their energy from the USB port, e.g. USB mouse, USB Keyboard<br>USB Flash drive, USB Headsets.. |
| <b>Plug &amp; Play:</b>   | It is not necessary to install driver software from a CD-ROM.   |
| <b>Operation systems:</b> | Windows 2000, XP, VISTA, 7, 8, 10 and MAC OS  |

### **Connecting and Operating:**

1. Connect the USB Plug to your computer/notebook.  
Some models have integrated, some has an included USB Cable.
2. USB jacks with USB Small devices.
3. Connect an external power supply (5V 2A DC) to the USB HUB,  
If more than one "bus powered" device is used.
