

Contour Mouse Wireless - because hands are not one-size

Contour Mouse is an ergonomic mouse designed to support your hand comfortably, however large or small your hands are, and regardless of whether you are right- or left-handed. Contour Mouse provides an excellent balance between ergonomics and efficiency, and is available in five sizes.

Available in both right-handed and left-handed versions

With multiple sizes available in both right-handed and left-handed versions, you are sure to find a Contour Mouse that fits your hand perfectly. It is important to have a relaxed grip, without having to bend your fingers too much, otherwise your hand and wrist can become strained, causing injuries.

Technology moves fast, but our hands don't change

The Contour Mouse was launched in 1995. We tested over 120 different models, until we found the perfect design for your hand, and then we launched it under the name Perfit Mouse – short for “Perfect Fit”. Although technology moves fast, our hands don't change. Therefore, we have kept to the original design of the Contour Mouse, which helps you to reduce mouse-related injuries such as carpal tunnel syndrome and tendinitis caused by repeated mouse movements.

Designed with three equally sized buttons

Contour Mouse has five buttons, including a third, full-size middle button. The three primary buttons are elongated, allowing your fingers to rest on them. You can click with outstretched fingers using small, gentle movements, without having to bend your fingers. Your thumb rests on the side of the mouse, between the Forward/Back button and the scroll wheel.

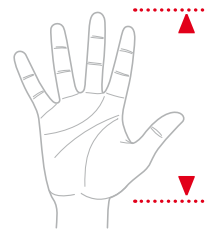

Functions

- A Left click.** Use the large left button to left click.
- B Middle click.** Use the middle click button to auto-scroll.
- C Right click.** Use the large right button to right click.
- D Scroll wheel.** Move up and down.
- E Toggle switch.** Performs “back” and “forward” browser functions in most browsers.

Finding the right size

To find the right size of Contour Mouse for you, measure the length from the tip of your middle finger to the first crease of the wrist.

- L**
More than 19 cm
- M**
17 - 19 cm
- S**
Less than 17 cm

Length	Your size	Right	Left
More than 19 cm	L	x	
17 - 19 cm	M	x	x
Less than 17 cm	S	x	x
