- farewell to era of a single key
- enjoy the fun of DIY
- for swift unlock and information safety

Smart life, "lock" with excellence

- brings you modern and simple visual enjoyment
- lets the family enjoy a quiet sleep

PHILIPS

Highlights

Multiple smart unlock modes

Philips 5000 series auxiliary lock can be unlocked by fingerprint identification, card identification and password verification. It changes the traditional way of unlocking with a mechanical key and helps you quickly enter a smart life.

Easy to install

You can directly replace the old spherical lock, split lock etc with the 5000 series smart door lock, or you can install the 5000 series smart door lock while keeping the existing old lock. The lock has a variety of application scenarios: it can be used on inside and outside doors of a home, on the door of a studio or of an office, to easily create a private space.

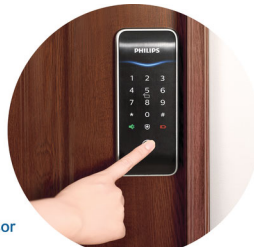

Compact body

The compact and slim lock body is made by unique panel cutting process; comfortable curved lines

combined with the deep texture of zinc alloy, create pure and elegant fashionable appearance.

Semiconductor sensor

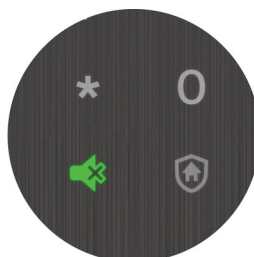

The lock employs a semiconductor fingerprint sensor with an identification speed of less than 0.2 second, which is fast and sharp. The identification is implemented by way of human skin temperature, capacitance value etc. Fingerprints can not be duplicated or copied, imitation. It can effectively prevent fake fingerprints or fingerprint film. You can enjoy smart, easy, fast and safe smart life.

Privacy password

Philips smart lock employs fake PIN code technology which allows you to enter random number combinations to successfully get identified as long as there is consecutive input of the real password. This feature can effectively prevent peeping and safeguard your real password.

Mute function

When you go back home late and don't want to disturb your family during their sleep, you can press the mute button and hold for 2 seconds to turn off the prompting voice at once. Silent operation gives your family the most heartwarming care.
