

OVERVIEW

The Metered Auto Transfer Switch provides redundant power for single-corded data center equipment. Includes a local LED display to view power data.

Benefits

- If the primary power source experiences failure, the transfer switch automatically shifts to a secondary source to ensure uninterrupted service. Once power is restored, the unit switches back to the primary power source.
- The local LED display provides real-time power data for instant feedback when deploying or moving critical IT equipment.
- Every unit is 100% tested for reliability and functionality.
- Simple and convenient configuration options for cord lengths and chassis colors.
- Standard three-year warranty, upgraded to a five-year warranty with product registration.
