Intuitive systems management with intelligent automation

PowerEdge servers with embedded iDRAC with Lifecycle Controller offer agent-free management right out of the box, delivering smart automation of routine tasks. The T440 is easily managed which frees up time for work priorities.

- Simplify and automate management of your Dell EMC infrastructure with OpenManage Essentials.
- Increase IT data protection and integrity with the embedded security features of iDRAC9.

Rely on PowerEdge with integrated security

Every PowerEdge server is made with a cyber-resilient architecture, building security into all parts of a server's life cycle. The T440 uses these new security features so you can reliably and securely deliver the right data to where your customers are, no matter where they are. Dell EMC considers each part of system security, from design to end of life, to ensure trust and deliver worry-free, secure systems.

- Rely on a secure supply chain that protects servers from the factory to the data center.
- Maintain data safety with cryptographically signed firmware packages and Secure Boot.
- Prevent unauthorized or malicious change with Server Lockdown.
- Wipe all data from storage media including hard drives, SSDs and system memory quickly and securely with System Erase.

PowerEdge T440

- Grow data over time with up to 8 x 3.5" or 16 x 2.5" HDD or SSD drive options
- Seamlessly scale as your workload requirements change with 5 x PCIe Gen3 I/O slots
