COSA ACCADE:

1. La pallina percorre il binario ed entra nel **vortice**.
2. La pallina cade sul **tappeto elastico** che la fa rimbalzare sul binario fino al cestino.

DIVERTIMENTO SENZA FINE...

ESPANSIONE

AZIONE REAZIONE

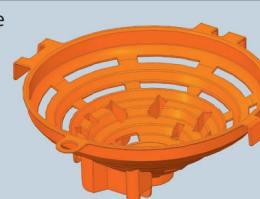

VORTICE + TAPPETO ELASTICO

Con questa espansione compatibile con tutta la gamma di **Azione e Reazione** potrai divertirti ad arricchire le tue piste inserendo due nuovi elementi funzionali, il **Vortice** e il **Tappeto elastico**. Aggiungi divertenti effetti speciali e affina sempre di più la tua capacità di centrare il bersaglio!

COMPONENTI DEL KIT

Vortice
1 pz

Tappeto elastico
1 pz

Membrana
elastica
1 pz

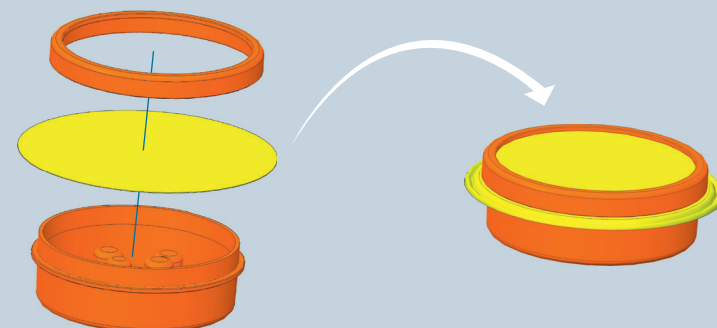

Pallina verde
1 pz

ELEMENTI FUNZIONALI: segui gli step illustrati di seguito per assemblare il TAPPETO ELASTICO e il VORTICE

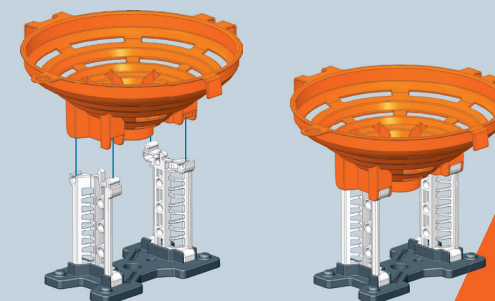

1 TAPPETO ELASTICO

La pallina colpisce il tappeto elastico con una **forza** che è direttamente proporzionale alla sua massa e all'altezza da cui cade. La membrana restituisce alla pallina una **forza contraria** che la spinge nella direzione opposta.

2 VORTICE

Nel passaggio dal binario al **vortice** il moto della pallina si trasforma da lineare a circolare. Nel **moto circolare** si sviluppa la **forza centripeta**. Per effetto della **gravità** poi la pallina cade nel foro.
