

# MX350 Mesh

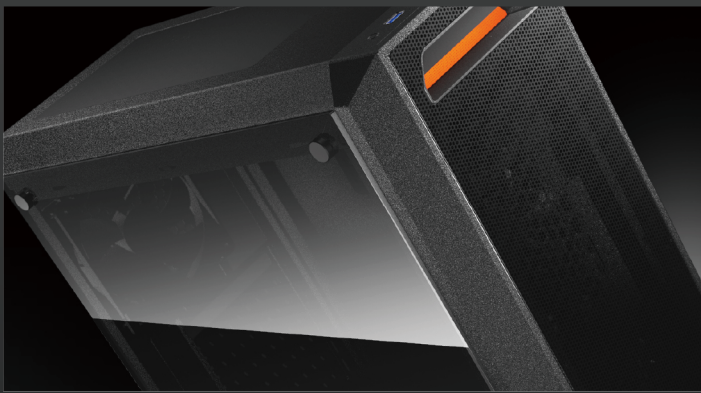

*Tempered Glass Side Panel Mid-Tower*

MX350 Mesh offers you a high-end design with a clear vision of your computer's internal components thanks to its massive tempered glass side panel. Add to this an impressive support for cooling and components and a front mesh panel that seamlessly allows air to go in, and you've got one of the best mid-towers ever.

## A Window to Power

MX350 Mesh offers you great visibility of your PC's components: A generously sized tempered glass side window allows you to see your gaming beast in action, giving you room to create excellent lighting solutions and enjoy them!

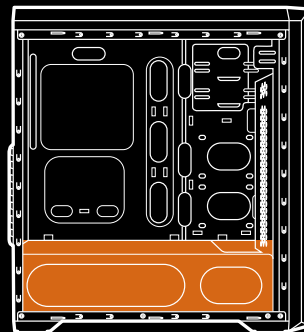

## Massive Expandability

7 PCI slots and support for up to three 350mm long graphics cards allow you to install all the horsepower you need to run games at ultra settings, 4K/60fps and even more. When you add up the capability of installing up to two 2.5" SSDs and two 3.5" HDDs, what you get is a case that can run and store all the games you want, in the way you want to run them.

## Minimalist Beauty

The covers for the PSU and the 3.5" drive bay will allow you to hide the cables behind them, improving the internal airflow and giving you an unobstructed view of your components. Easily detachable and cleanable dust filters behind the front, top and bottom covers will further help keep your computer clean and gorgeous!

Tempered Glass Side Panel Mid-Tower

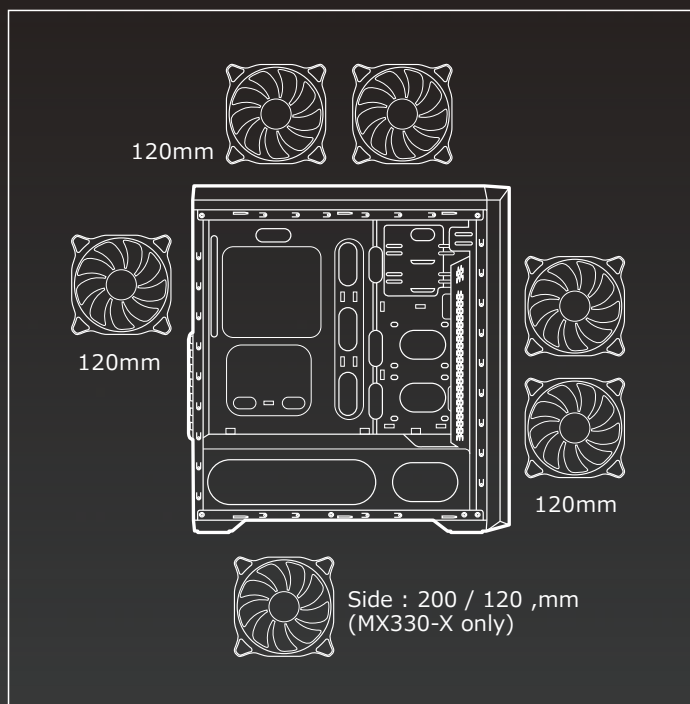

## Strong Cooling

Want to cool all those powerful components? No problem. You can install up to five fans and three water cooling radiators (with the frontal one up to 240mm) to protect your investment from the threat of overheating.

## Water cooling radiator support

## Air cooling support
