HP Stitch S1000 Printer

Superwide dye-sub production printing designed to simplify your operation

Beat client expectations with high-quality prints

- Produce high-value jobs with 1200 native dpi, deep black, and vivid colors.

- Get sharp results, even when printing high-density jobs direct-to-fabric, with the Drop & Dry system.

- Reliable image quality with the Smart Nozzle Compensation system and the latest Optical Media Advance Sensor.

Meet deadlines with high productivity

- Easily handle short deadlines and seasonal peaks with production speeds up to 2370 ft²/hr (220 m²/hr).

- Maximize uptime with user-replaceable printheads, and preventive maintenance from HP Smart Services.

- Confidently print unattended with the spreader rollers, 10-liter ink supplies, and rolls up to 600 lb.

Save time with easy operation[1]

- In 40% less time, a single operator can easily load and unload both transfer paper and textile rolls.[1]

- Reduce daily manual interventions with fully automated printhead maintenance.

- Confidently distribute jobs across the fleet with best-in-class color consistency[1] and HP SmartColor tools.

- Get accurate colors over time, even as environmental conditions change, with the built-in spectrophotometer.

Eco Highlights

- ECO PASSPORT certified dye sublimation inks[1]
- Free, convenient HP ink cartridge and printhead recycling[2]

Please recycle large-format printing hardware and printing supplies. Find out how at our website
hp.com/ecosolutions

[1] Original HP Dye Sublimation Inks for the HP Stitch S Printer series are certified ECO PASSPORT by Oeko-Tex,® which is a globally uniform testing and certification system for textile chemicals, colorants, and auxiliaries. It consists of a two-step verification procedure that analyzes whether the compounds and each ingredient meet specific criteria for sustainability, safety, and regulatory compliance.
[2] Program availability varies. Please check http://www.hp.com/recycle for details.

[1] The color variation inside a printed job has been measured at 4-pass mode on transfer media and also in direct-to-fabric situations within this limit: maximum color difference (95% of colors) ≤ 1.5 dE2000. Reflective measurements on a 943 color target under CIE standard illuminant D50, and according to the standard CIEDE2000 as per CIE Draft Standard DS 014-6/E:2012. 5% of colors may experience variations above 1.5 dE2000. Backlit substrates measured in transmission mode may yield different results. Results are dependent on sublimation process variability.
