

Dual Band AC2600 Managed Indoor Access Point

The edge 802.11ac built-in high performance Access Point with MU-MIMO technology for high-density use on multiple applications.

EnGenius Wireless Management Access Point solution is designed for deploying on the versatile indoor and outdoor application. To meet today's requirement on varied networking environment, EnGenius would like to provide the solution as flexible, robust and effective as the organization they desire.

The state-of-the-art 802.11ac and MU-MIMO technology brings revolutionary connecting speed and bandwidth for diversity of multimedia applications. EWS375AP equips with two powerful RF interfaces that support up to 1,733 Mbps in 5GHz frequency band and 800 Mbps in 2.4GHz frequency band (with 4ss/VHT40 clients).

Features

- > Dual radio 4x4 802.11 ac/a/b/g/n Access Point with multi-user MIMO (MU-MIMO)
- > Support up to 1,733 Mbps in 5GHz frequency band and 800 Mbps in 2.4GHz frequency band (with 4ss/VHT40 clients).
- > Support 802.11ac Wave 2.0 technology to enhance overall bandwidth and speed to wireless client devices.
- > 360° omni-directional antennas to achieve comprehensive coverage for networking client devices under a pervasive environment.
- > Compliance with 802.3at/Proprietary 48V-54V PoE Input for flexible installation over 100 meters (328 feet)
- > Systemic and distributed management over EnGenius ezMaster and EWS Management switch without licensing or subscription fee.
- > Perform one-click update to deliver a configuration over multi-segments for managed Access Points.
- > Choose an operating mode to meet your management and deployment requirement. (Managed mode/Stand alone mode)

Wireless Management solution is ideal for deployment in these venues:

- | | | |
|------------------------|-----------------------|--------------------------|
| > Airport Terminals | > Rail Station | > Stadiums & Arena |
| > Warehouse Operations | > Shopping Malls | > Medical Centers |
| > College Campuses | > Resort Properties | > Luxury Homes & Estates |
| > Corporate Campuses | > Parks & Campgrounds | |

Provide Consistent Performance

Designed by EnGenius could provide the powerful RF interfaces to assure the reliability of signal strength and sensitivity in a pervasive environment. The optimized interfaces will provide the evenly coverage to assist users to reduce dead spots in their WLAN and boost received signal quality to deliver the best 2.5Gbps air performance to wireless client devices.

Carry multimedia content over MU-MIMO Transmit Beam-forming technology.

Be a prior AC2600 solution, EWS375AP is not only built in powerful RF interfaces, but it also features advanced Multi-Users Multiple input Multiple output (MU-MIMO) and Transmit beamforming (TxBF) technology.

The significant improvement on 802.11ac wave 2.0 is MU-MIMO technology, which enhances a dramatic break-through in the performance and flexible transmission to wireless client devices. MU-MIMO allows multiple spatial streams to be allocated to different clients simultaneously, increasing totally throughput, reduce latency, capacity of the WLAN system and increase spectral efficiency.

Beamforming is a standard in 802.11ac wave 2.0 which allows Access Points to focus energy of multiple antennas to transmit to a particular client device in that direction of that client. The innovative technology significantly enhances the higher signal-to-noise ratio and greater throughput of that client.

With MU-MIMO and Beamforming technology, EWS AC2600 advanced Managed Access Points could bring more traffic to wireless client devices simultaneous over the longer distance and save time for serving other wireless client devices.

Exquisite RF Management to Achieve Optimal Wireless Performance

EnGenius intelligent RF detecting mechanism—**Background Scanning**, continues to monitor RF movement of an environment and initialize the control of **Transmit Power** and **channel assignment** assuring the evenly RF coverage and consistent wireless performance. To assist client devices to get the optimal performance under a pervasive environment, **Band Steering** automatically steers dual-band capable client devices to the appropriate channel, while prefer 5GHz or band balancing works to maintain a balanced number of clients per Access Point. Configuring multiple Access Points to serve your own devices (BYOD) in enterprise class wireless LAN environment can enable **Fast Roaming** to reduce roaming delay time and to secure seamless connection on VOIP service when mobile devices move between Access Points.

Securable Portals for different purpose

EnGenius provides **Captive Portal** to differentiate the authority of users on using Internet access. Considering the value added function, administrators offer a securable service to serve client devices including to encrypt over database of an authentication server, customized-branded splash of webpage, simplified logon service, and promoting content and using polices. Administrators can also use **Virtual LAN (VLAN)** with **Guest Network** to isolate each client for avoiding an unnecessary touch, leaking sensitive data, and enhancing Internet security and reliability.

Restrain Wireless Traffic under a Pervasive Environment

To effectively manage the usage of each client devices at a LAN topology, **Traffic Shaping** controls the bottle of bandwidth to offer the limited bandwidth for an individual **SSID** or **each client** per Access Point. This constraint offers the constant bandwidth to perform specific applications like VOIP and video streaming fluently and smoothly without air congestion on each client devices.

Comprehensive Network Protection

With EWS Access Points, your network is protected from attacks at multiple level through advanced wireless encryption standards such as Wi-Fi Protected Access (WPA and WPA2) which uses a temporal key integrity protocol (TKIP) and authentication database, IEEE 802.1X with Radius server. EnGenius also offers the advanced encryption standard (AES) to encrypt traffic between Access Points and client devices. EnGenius wireless management system offers advanced mechanism to detect and to prohibit threats over **Rogue AP detection**. Once threats or event are detected, built-in **E-mail Alerts** systems will automatically deliver an e-mail notification for administrators to trigger immediate actions on these networks threats.

Simplified Management and Configuration over ezMaster or EWS Management Switch

EWS-series managed Access Point is designed to work with EWS-series Wireless Management Switch and ezMaster management platform for scalable and flexible wireless management application.

Whether you want to manage a few or 1000+ Access Points and switches on network in different locations with different segment—or 10 to 10,000 concurrent users, the **EnGenius ezMaster platform** makes these management and configuration simplified and intuitively over centralizing bulk configuration, provision and monitoring which is the lower operating and maintenance cost from a local or remote server—or in the cloud.

With the small scope or maximum 50pcs managed requirement, **EWS management switch** can perform auto discovery to search EWS managed Access Points. WLAN administrator can easily use individual or cluster settings to fast deploy numbers of AP with desired settings, saving repetitive configuration tasks.

Via SmartSync Redundancy, if the connection to your ezMaster platform is lost, EWS management switch will automatically store syslog and statistics from the APs. Then, when the connection is re-established, all information will be re-synchronized and sent to ezMaster Management platform. Administrators will not miss any statistics and reports.

Technical Specifications Wireless Managed Indoor Access Point

Wireless Radio Specification

Access Point Type:

Indoor, dual radios concurrent, 5GHz 802.11 ac 4x4 MIMO is backwards compatible with 802.11 a/n mode, 2.4GHz 802.11 n 4x4 MIMO is backwards compatible with 802.11 b/g.

SU-MIMO:

Four(4) spatial stream SU-MIMO for 2.4GHz and four(4) spatial stream SU-MIMO for 5GHz up to totally 2,533 Mbps wireless data rate to a single wireless client device under the both 2.4GHz and 5GHz radio.

MU-MIMO

Four(4) spatial streams Multiple (MU)-MIMO for up to 1733 Mbps wireless data rate to transmit to two(2) two streams MU-MIMO 11AC capable wireless client devices under 5GHz simultaneously.

Frequency Radio

2.4GHz: 2400MHz ~ 2835MHz,
5GHz: 5150MHz~5250MHz, 5250MHz~5350MHz, 5470~5725MHz,
5725MHz~5850MHz

Support radios and channels will be varied on the configured regulatory domain.

Supported Radio Technology

802.11b: Direct-sequence spread-spectrum (DSSS)
802.11ac/a/g/n: Orthogonal frequency-division multiplexing (OFDM)
802.11n/ac: 4x4 MIMO with 4 streams
802.11ac supports very high throughput (VHT) — VHT 20/40/80 MHz
802.11n supports high throughput (HT) — HT 20/40 MHz
802.11n supports very high throughput under the 2.4GHz radio —VHT40 MHz (256-QAM)
802.11n/ac packet aggregation: A-MPDU, A-SPDU

Supported Modulation Type

802.11b: BPSK, QPSK, CCK
802.11a/g/n: BPSK, QPSK, 16-QAM, 64-QAM
802.11ac: BPSK, QPSK, 16-QAM, 64-QAM, 256-QAM

Transmit Power (Maximum Value)

2.4GHz: 15dBm
5GHz: 15dBm

Maximum power is limited by regulatory domain

Tx Beamforming (TxBF)

Increasing signal reliability and transmitting distance.

Supported data rates (Mbps)

802.11b: 1, 2, 5.5, 11
802.11a/g: 6, 9, 12, 18, 36, 48, 54
802.11n: 6.5 to 600 (MCS0 to MCS23)
802.11ac: 6.5 to 1,733 (MCS0 to MCS9, NSS=1 to 4)

Power

Maximum Power Consumption

19.1W

Power Source

Direct DC Input: 12V/2A
Power Over Ethernet: 802.3at Input

Antenna

EWS375AP: (Internal Antenna)

2.4GHz: 3.0dBi
5GHz: 3.0dBi

Interfaces

Networking Interface

Two (2) 10/100/1000 BASE-T RJ-45 Ethernet Ports
Link Aggregation achieves 2Gbps Throughput

DC Powering Interface

One (1) DC Jack interface

LED Indicators

Display system and wireless transmission status

Reset Button

Convert Access Point to the Factory default or the Users Default

Mounting

Ceiling Mounting

Assemble a mounting bracket to attach into T-rail for drop ceiling

Wall Mounting

Mount Access Point on a flat wall

Mechanical & Environment

Dimensions

21.5 x 21.5 x 5.6 cm (8.46" x 8.46" x 2.2")

Weight

TBD

Operating:

Temperature: 0°C~40°C (32°F~104°F)
Humidity: 0% ~ 90% typical

Storage:

Temperature: -30°C~80°C (-22°F~176°F)
Humidity: 0% ~ 90% typical

Low Voltage Directive 2014/30/ EU

Technical Specifications Wireless Managed Indoor Access Point

Operating Mode

Managed Mode

Cluster setting and centralized management over ezMaster or EWS management switch

Stand Alone Mode

Independent services wireless client devices.

Exquisite RF Management

Background Scanning

Regular scanning signal level of an environment to provide parameters for performing Auto Transmit power and auto channel.

Auto Transmit Power

Automatically adjust power level when EWS access points work at an environment.

Auto Channel

Automatically assign a clearly channel to perform RF transmission under a pervasive environment.

Fast Roaming (802.11k)

Collect the parameters of neighborhood Access Points to find the optimal AP.

Band Steering

Steer client devices to a proper frequency band for getting more bandwidth and speed under an Access Point.

RSSI Threshold

Kick the client which the signal (RSSI) is above the set value from the AP for reducing the interference and optimize the connecting quality.

Optimize Performance

Quality of Service

Compliance with IEEE 802.11e standard
Prioritizes voice over data for both tagged and untagged traffic
Transmit video, voice and data at the same SSID

Power Save Mode

Support U-APSD

Pre-Authentication

Compliance with 802.11i & 11x

PMK Caching

Compliance with 802.11i
If wireless client devices has authenticated to an access point, it does not perform a full authentication exchange when client devices roaming between access points.

Fast Roaming (802.11r)

Use a Fast Transition key to handover between Access Points

Multicast to Unicast Conversion

Using the IGMP protocol, an access Point delivers high definition content to a large number of clients simultaneously.

Easy to Management

Multiple SSIDs

BSSID support
Support 8 SSIDs on both 2.4GHz and 5GHz bands

Captive Portal

Captive Portal (NAT/ Bridge mode)

Guest Network

Isolate each client for avoiding an unnecessary touch, leaking sensitive data, and enhancing Internet security and reliability.

VLAN Tag

Independent VLAN setting can be enable or disable. Any packet that enters the Device without a VLAN tag will have a VLAN tag inserted with a PVID (Ethernet Port VID)

VLAN Per SSID

Integrate VLAN ID with a SSID interface to forward packets over the defined path.

Management VLAN

Feature is enabled with specified VLAN ID, the device will only allow management access with the same specified VLAN ID from remotely location by using protocols such as telnet, SSH, snmp, syslog etc.

Traffic Shaping

Controls the bottle of bandwidth to offer the limited bandwidth for an individual SSID or each client per Access Point.

MAC Address Filtering

Filter up to 64 sets MAC addresses per SSID

E-Mail Alert

Provides a network monitoring tool for administrators to stay informed the configuration change.

Finger Printing

The value added solution collect information of client devices including name of devices, IP address, MAC address, Operating system version, transmitting and receiving data, and signal level.

Save Configuration as Users Default

Save the customized configuration as default value for different customer demands.

Wi-Fi Scheduler

Perform a regular reboot on access point at assigned schedule
Perform it to enable or disable 2.4GHz or 5GHz interface from a period time.

SNMP & MIB

v1/v2c/v3 support
MIB I/II, Private MIB
CLI supported

RADIUS Accounting

Help operators to offload 3G to Wi-Fi seamlessly

Wireless Clients list

Provide the list to display real status of wireless client devices on this Access Point.

Comprehensive Protection

Wireless Encryption Standard

WEP Encryption—64/128/152 bit
WPA/WPA2 Enterprise (WPA-EAP using TKIP or AES)

Hide SSID in beacons

Rogue AP Detection

Enable the function to detect the fake access points in the environment.

L2 Isolation

Block the communication between the associated clients to communicate with other clients from all hosts on the same subnet.

Client Isolation

Block/Isolate the communication between the associated clients under the same WLAN.

HTTPS

A secure communication protocol can be enabled to allow secure management web access over a computer network.

SSH Tunnel

A secure communication protocol can be enabled to allow secure remote shell access or command execution.

RF Performance Specification Wireless Managed Indoor Access Point

Channel	Data Rate	Transmit Power (Aggregated, dBm)	Receive Sensitivity (Aggregated, dBm)
802.11b 2.4 GHz	1 Mbps	15.0	-96.0
	2 Mbps	15.0	-92.0
	5.5 Mbps	15.0	-91.0
	11 Mbps	15.0	-88.0
802.11g 2.4 GHz	6 Mbps	15.0	-90.0
	54 Mbps	13.0	-75.0
802.11a 5 GHz	6 Mbps	14.0	-90.0
	54 Mbps	13.0	-74.0
802.11n HT20 2.4 GHz	MCS 0 / 8 / 16 / 24	15.0	-90.0
	MCS 7 / 15 / 23 / 31	13.0	-71.0
802.11n HT40 2.4 GHz	MCS 0 / 8 / 16 / 24	15.0	-88.0
	MCS 7 / 15 / 23 / 31	12.0	-69.0
802.11n HT20 5GHz	MCS 0 / 8 / 16 / 24	14.0	-90.0
	MCS 7 / 15 / 23 / 31	13.0	-70.0
802.11n HT40 5GHz	MCS 0 / 8 / 16 / 24	13.0	-87.0
	MCS 7 / 15 / 23 / 31	12.0	-67.0
802.11ac VHT20 5GHz	MCS0	13.0	-90.0
	MCS9	12.0	-65.0
802.11ac VHT40 5GHz	MCS0	13.0	-87.0
	MCS9	14.0	-60.0
802.11ac VHT80 5GHz	MCS0	13.0	-82.0
	MCS9	11.0	-57.0

*Maximum RF performance of the hardware provided. Maximum transmit power is limited by local regulatory.

*The supported frequency bands are restricted by local regulatory requirements.

*Transmit power is configured in 1.0dBm increments.
