**Message** Unable to update the GPU firmware version because the internal USB port is disabled.

**Detailed Description** The GPU firmware cannot be updated because the internal USB port is disabled.

**Recommended Response Action** Enable the USB port by doing one of the following: 1) On the BIOS page, set the "iDRAC Direct USB Port" option to "On". 2) On the iDRAC GUI: Click Configuration > BIOS Settings > Integrated Devices. 2a) Set the iDRAC Direct USB Port to On 3) Run the following RACADM command at the RACADM CLI: racadm set BIOS.IntegratedDevices.UsbManagedPort On 4) After enabling the USB port, to apply modified value, create a configuration job and restart the system.

## SVAL—StorageFabric Validation Alert Event Messages

### SVAL0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add alert subscriber arg1 to database because the ID already exists.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = alert ID</li></ul>
<b>Detailed Description</b>	The alert subscriber identified in the message cannot be added to database because the ID already exists.
<b>Recommended Response Action</b>	Enter a valid and unique subscriber ID and retry the operation.
<b>Category</b>	Configuration (SVAL = StorageFabric Validation Alert)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVAL0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the alert subscriber arg1 to database because the ID does not exist.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = alert ID</li></ul>
<b>Detailed Description</b>	The alert subscriber identified in the message cannot updated because the ID does not exist.
<b>Recommended Response Action</b>	Make sure that the subscriber ID exists by querying all alert subscription and retry the operation.
<b>Category</b>	Configuration (SVAL = StorageFabric Validation Alert)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVAL0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete the alert subscriber arg1 to database because the ID does not exist.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = alert ID</li></ul>
<b>Detailed Description</b>	The alert subscriber identified in the message cannot deleted because the ID does not exist.
<b>Recommended Response Action</b>	Make sure that the subscriber ID exists by querying all alert subscription and retry the operation.
<b>Category</b>	Configuration (SVAL = StorageFabric Validation Alert)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVAL0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to get the alert subscriber arg1 because the ID does not exist in the database.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = alert ID</li></ul>
<b>Detailed Description</b>	The alert subscriber identified in the message cannot retrieved because the ID does not exist.
<b>Recommended Response Action</b>	Make sure that the subscriber ID exists by querying all alert subscription and retry the operation.
<b>Category</b>	Configuration (SVAL = StorageFabric Validation Alert)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVAL0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add or update alert subscriber because an alert subscriber with a similar content already exists.
<b>Detailed Description</b>	The alert subscriber cannot be added or updated because an alert subscriber with a similar content already exists.
<b>Recommended Response Action</b>	Make sure that the subscription content is different and retry the operation.
<b>Category</b>	Configuration (SVAL = StorageFabric Validation Alert)

## SVEP0117

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the host because the Port ID configuration is non zero.
<b>Detailed Description</b>	The host cannot be created because the host Port ID can only be of value zero.
<b>Recommended Response Action</b>	Either remove the Port ID in the configuration or keep it as zero and retry the operation.
<b>Category</b>	Configuration (SVEP = StorageFabric Validation End Point)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVEP0118

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the subsystem because the Port ID value in the configuration is out of range.
<b>Detailed Description</b>	The subsystem cannot be created because the Port ID configuration is out of range. The Port ID of the subsystem is in the range of 1 to 65535.
<b>Recommended Response Action</b>	Enter a valid Port ID range (1 to 65535) and retry the operation.
<b>Category</b>	Configuration (SVEP = StorageFabric Validation End Point)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVEP0119

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the host because the Entry Key Type value is used in configuration.
<b>Detailed Description</b>	The host cannot be created because the Entry Key Type is in the given configuration.
<b>Recommended Response Action</b>	Remove the Entry Key Type from the host configuration and retry the operation.
<b>Category</b>	Configuration (SVEP = StorageFabric Validation End Point)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM—StorageFabric Validation Fabric Manager Event Messages

### SVFM0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process Smart Fabric Services credentials configuration because missing username or password or ip address.
<b>Detailed Description</b>	Missing username or password or ip address in the Smart Fabric Services credentials configuration.
<b>Recommended Response Action</b>	Retry the configuration with valid credentials.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### SVFM0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process Smart Fabric Services credentials because of incorrect credentials.
<b>Detailed Description</b>	Incorrect Smart Fabric Storage Services Credentials.
<b>Recommended Response Action</b>	Retry the configuration with valid credentials.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVFM0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process instance configuration because instance arg1 already configured.

**Arguments**

- arg1 = instance ID

**Detailed Description** Instance already configured with same instance identifier.

**Recommended Response Action** Retry configuration with different instance identifier.

**Category** Configuration (SVFM = StorageFabric Validation Fabric Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVFM0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process instance configuration because invalid instance id.

**Detailed Description** The instance configuration is unsuccessful because the given instance identifier is invalid.

**Recommended Response Action** Retry instance configuration with a valid instance identifier in the range 1-16.

**Category** Configuration (SVFM = StorageFabric Validation Fabric Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVFM0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process instance configuration because missing instance identifier.

**Detailed Description** Missing instance identifier in instance configuration.

**Recommended Response Action** Retry instance configuration with a valid instance identifier.

**Category** Configuration (SVFM = StorageFabric Validation Fabric Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVFM0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process instance configuration because missing service network list in instance configuration.
<b>Detailed Description</b>	Missing service network list in instance configuration.
<b>Recommended Response Action</b>	Retry instance configuration with service network list.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process instance configuration because service network configured on another instance.
<b>Detailed Description</b>	The service network list configured on another instance.
<b>Recommended Response Action</b>	Retry instance configuration with valid service network list.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process instance configuration because instance not created.
<b>Detailed Description</b>	The instance is not created to modify the attributes.
<b>Recommended Response Action</b>	Create the instance and retry the operation.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process instance arg1 configuration because of failure at Smart Fabric Stroage Services.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = instance ID</li></ul>
<b>Detailed Description</b>	The instance configuration failed at Smart Fabric Stroage Services.
<b>Recommended Response Action</b>	Retry the operation and if the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process instance configuration because virtual networks not configured at Smart Fabric Storage Services.
<b>Detailed Description</b>	Virtual networks associated with this instance not configured at Smart Fabric Storage Services.
<b>Recommended Response Action</b>	Configure virtual networks at Smart Fabric Stroage Services and retry the operation.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process instance delete operation because instance not configured.
<b>Detailed Description</b>	Instance identifier not configured.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process instance arg1 delete configuration because of failure at Smart Fabric Storage Services.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = instance ID</li></ul>
<b>Detailed Description</b>	Instance delete configuration failed at Smart Fabric Services.
<b>Recommended Response Action</b>	Retry after sometime and if the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process Direct Discovery Controller configuration due to missing ip address or address family or sequence number.
<b>Detailed Description</b>	Missing ip address or address family or sequence number in Direct Discovery Controller configuration.
<b>Recommended Response Action</b>	Retry Direct Discovery Controller configuration with valid ip address and address family and sequence number.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process Direct Discovery Controller configuration because host with same ip address is already configured.
<b>Detailed Description</b>	TheDirect Discovery Controller already configured with the ip address.
<b>Recommended Response Action</b>	Retry the operation with different IP address.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process Direct Discovery Controller configuration because invalid ip address or sequence number.
<b>Detailed Description</b>	Invalid ip address or sequence number in Direct Discovery Controller configuration.
<b>Recommended Response Action</b>	Retry the Direct Discovery Controller configuration with valid ip address and address family and sequence number.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process configuration because of Direct Discovery Controller not created.
<b>Detailed Description</b>	The Direct Discovery Controller not created to modify the attributes.
<b>Recommended Response Action</b>	Make sure to create the Direct Discovery Controller before modifying the attributes.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the Direct Discovery Controller configuration because of failure at SmartFabric Storage Services.
<b>Detailed Description</b>	The Direct Discovery Controller configuration failed at SmartFabric Storage Services.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process Direct Discovery Controller delete configuration because of failure at SmartFabric Storage Services.
<b>Detailed Description</b>	The Direct Discovery Controller delete failed at SmartFabric Storage Services.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process Direct Discovery Controller configuration because of invalid IP address.
<b>Detailed Description</b>	The Direct Discovery Controller IP address invalid.
<b>Recommended Response Action</b>	Retry the operation with valid IP address.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process configuration because Smart Fabric Sotrage Services not reachable.
<b>Detailed Description</b>	The SmartFabric Sotrage Services is not reachable.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process configuration because database write failure.
<b>Detailed Description</b>	Unable to write into the Database.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process configuration because general configuration error.
<b>Detailed Description</b>	The configuration error occurred.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process configuration because of the Smart Fabric Storage Services error.
<b>Detailed Description</b>	The configuration error occurred with the Smart Fabric Storage Services.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persist contact system administrator.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVFM0025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create CDC instance with new Vxlan because maximum network limit (16) is reached.
<b>Detailed Description</b>	Vxlan network mapping maximum limit (16)for CDC instance is reached.
<b>Recommended Response Action</b>	Configure Vxlan Mapping to CDC instance within the maximum allowed network limit.
<b>Category</b>	Configuration (SVFM = StorageFabric Validation Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLC—StorageFabric Validation License Event Messages

### SVLC0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to download the SmartFabric Storage Software base license because it already exists.
<b>Detailed Description</b>	The base license cannot be downloaded because it already exists. A base license can be downloaded only once.
<b>Recommended Response Action</b>	No action required.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### SVLC0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to install the SmartFabric Storage Software expansion license because the base license is not installed.
<b>Detailed Description</b>	The Expansion license cannot be installed because the Base lincense is not installed.
<b>Recommended Response Action</b>	Installthevalid Base license and retry the operation. For information aboutBase and Expansion licenses, refer to theSmartFabric Storage Software RESTful API Guide.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVLC0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to validate the SmartFabric Storage Software license certificate because the license file is not valid.
<b>Detailed Description</b>	The SmartFabric Storage Software license certificate cannot be validated because the license file is invalid.
<b>Recommended Response Action</b>	Generate the license certificate by using the Dell Digital license generator and retry the operation.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLC0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to install the license because the device ID associated with the license file does not match the device-id of the SmartFabric Storage Software.
<b>Detailed Description</b>	The license file cannot be installed on the SmartFabric Storage Software because the license file generated with the device ID did not match the device ID of the SmartFabric Storage Software on which the license file was installed.
<b>Recommended Response Action</b>	Generate a valid license file by using correct SmartFabric Storage Software device ID.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLC0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to install the expansion license because the number of supported licenses (endpoints), which is defined by SmartFabric Storage Software and platform type, has exceeded the maximum value.
<b>Detailed Description</b>	The SmartFabric Storage Software expansion license cannot be installed because the number of supported licenses (endpoints), which is defined by SmartFabric Storage Software and platform type, has exceeded the maximum value.
<b>Recommended Response Action</b>	Remove the existing expansion license or add the license to another SmartFabric Storage Software, and then retry the operation.

<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLC0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to install the license because an internal server issues such as insufficient system resource such as memory, filesystem errors.
<b>Detailed Description</b>	The request cannot be processed because internal server issues such as insufficient system resource or filesystem errors.
<b>Recommended Response Action</b>	Make sure system resources such as memory,filesystemareavailable.If the issue persists, contact your server administrator.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLC0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to install the expansion license of SmartFabric Storage Software because this license is already installed.
<b>Detailed Description</b>	The expansion license of SmartFabric Storage Software cannot be installed because this license is already installed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLC0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to continue the configuration operation because the End User License Agreement (EULA) of the partner license is not accepted.
<b>Detailed Description</b>	The configuration operation cannot be continued because the End User License Agreement (EULA) of the partner license is not accepted.

<b>Recommended Response Action</b>	Accept the End User License Agreement and retry the operation.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLC0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to install the expansion license because it cannot be installed on the partner license.
<b>Detailed Description</b>	The expansion license cannot be installed on a partner license.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SVLC = StorageFabric Validation License)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

# SVLM—StorageFabric Validation Lifecycle Manager Event Messages

## SVLM0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the request because either the Centralized Discovery Controller instance identifier is invalid or not entered at all.
<b>Detailed Description</b>	The Centralized Discovery Controller instance cannot be added because either the Centralized Discovery Controller instance identifier is invalid or not entered at all.
<b>Recommended Response Action</b>	Enter a valid Centralized Discovery Controller ID (1-16) and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the Centralized Discovery Controller instance because either an invalid instance image version is entered or the image version is not entered.
<b>Detailed Description</b>	The Centralized Discovery Controller instance cannot be added because either an invalid instance image version is entered or the image version is not entered.
<b>Recommended Response Action</b>	Enter a valid centralized discovery controller instance image version and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the Centralized Discovery Controller instance because an invalid interface name is entered.
<b>Detailed Description</b>	The Centralized Discovery Controller instance cannot be added because an invalid interface name is entered.
<b>Recommended Response Action</b>	Enter a valid Centralized Discovery Controller interface name and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the Centralized Discovery Controller instance because an instance with the same instance name already exists.
<b>Detailed Description</b>	The Centralized Discovery Controller instance cannot be added because the same instance name already exists.
<b>Recommended Response Action</b>	Enter a different and unique Centralized Discovery Controller name and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVLM0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to add the Centralized Discovery Controller instance because the interface arg1 does not have a valid IP address assigned to it.

**Arguments**

- arg1 = interfaceName

**Detailed Description** The Centralized Discovery Controller instance cannot be added because the interface identified in the message does not have a valid IP address assigned to it.

**Recommended Response Action** Enter a valid Centralized Discovery Controller interface ID and retry the operation.

**Category** Configuration (SVLM = StorageFabric Validation Lifecycle Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVLM0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to add the Centralized Discovery Controller instance because the given interface arg1 is part of another Centralized Discovery Controller instance arg2.

**Arguments**

- arg1 = interfaceName
- arg2 = instanceName

**Detailed Description** The Centralized Discovery Controller instance cannot be created because the interface identified in the message is part of another Centralized Discovery Controller instance.

**Recommended Response Action** Enter a valid unassigned Centralized Discovery Controller interface ID and retry the operation.

**Category** Configuration (SVLM = StorageFabric Validation Lifecycle Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVLM0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process the request because lifecycle operation is in progress for the given instance.

**Detailed Description** The operation cannot be completed because the Lifecycle operation is in progress on the instance of the Centralized Discovery Controller.

<b>Recommended Response Action</b>	Wait for few minutes and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because invalid centralized discovery controller instance is given.
<b>Detailed Description</b>	The request cannot be processed because an invalid Centralized Discovery Controller instance ID is entered.
<b>Recommended Response Action</b>	Enter a valid Centralized Discovery Controller instance and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because Discovery Admin state is missing.
<b>Detailed Description</b>	The Centralized Discovery Controller instance cannot be added or updated because the Discovery Admin State attribute is not entered.
<b>Recommended Response Action</b>	Enter a valid Discovery Admin State attribute and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add or update the Centralized Discovery Controller instance because the Admin State attribute is not entered.
<b>Detailed Description</b>	The Centralized Discovery Controller instance cannot be added or updated because the Admin State attribute is not entered.

<b>Recommended Response Action</b>	Enter a valid Admin State attribute and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add or update the Centralized Discovery Controller instance because a management interface arg1 is entered.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = interfaceName</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller instance cannot be added or updated because a management interface name is entered as identified in the message.
<b>Recommended Response Action</b>	Enter a valid interface name other than the management interface, and then retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because internal server issues such as communication or filesystem errors.
<b>Detailed Description</b>	The request cannot be processed because internal server issues such as communication or filesystem errors.
<b>Recommended Response Action</b>	Retry after some time. If the issue persists, contact your server administrator.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure the authentication method because an invalid method is entered.
----------------	---

<b>Detailed Description</b>	The authentication method cannot be configured because an invalid method is entered.
<b>Recommended Response Action</b>	Enter a valid authentication method and retry the operation. For example, local, radius, and tacacs.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)

## SVLM0060

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the installable image file download request because there is not enough disk space available.
<b>Detailed Description</b>	The installable image file cannot be downloaded because of insufficient disk space.
<b>Recommended Response Action</b>	Delete unused images and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0061

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add a route because an invalid destination IP is entered.
<b>Detailed Description</b>	Routes cannot be added because Destination IP given in Routes is invalid.
<b>Recommended Response Action</b>	Enter a valid Destination IP in Routes and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0062

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add a route because an invalid destination prefix is entered.
<b>Detailed Description</b>	Routes cannot be added because Destination Prefix given in Routes is invalid.
<b>Recommended Response Action</b>	Enter a valid Destination Prefix in Routes and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0063

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add a route because an invalid nexthop IP is entered.
<b>Detailed Description</b>	Routes cannot be added because Next Hop IP given in Routes is invalid.
<b>Recommended Response Action</b>	Enter a valid Next Hop IP in Routes and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0064

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add a route because an invalid metric value is entered.
<b>Detailed Description</b>	Routes cannot be added because Metric value given in Routes is invalid.
<b>Recommended Response Action</b>	Enter a valid Metric value in Routes and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0065

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update an interface because the configured MTU value is greater than the parent interface MTU.
<b>Detailed Description</b>	An interface cannot be created or updated because the configured MTU value is greater than the parent interface MTU.
<b>Recommended Response Action</b>	Make sure that the MTU value is less than or equal to the parent MTU value, and then retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0066

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update an interface because the MTU value is lesser than the child VLAN interface MTU value.
<b>Detailed Description</b>	The interface cannot be update because the entered MTU value is less than its child VLAN interface MTU value.
<b>Recommended Response Action</b>	Enter an MTU value that is greater than or equal to its child VLAN MTU value, and then retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0067

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change the password because the old password is not entered.
<b>Detailed Description</b>	The change password request is unsuccessful because old password is not entered.
<b>Recommended Response Action</b>	Enter a valid old password and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0068

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change the password because new password is not entered.
<b>Detailed Description</b>	The change password request is unsuccessful because new password is not entered.
<b>Recommended Response Action</b>	Enter a valid new password and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0069

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change the password because of invalid password complexity.
<b>Detailed Description</b>	The change password request is unsuccessful because of invalid password entered.
<b>Recommended Response Action</b>	Enter a valid password and retry the operation. Refer to the SmartFabric Storage Software API guide for a valid password.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0070

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change the password because of invalid user name.
<b>Detailed Description</b>	The change password request is unsuccessful because of invalid user name entered.
<b>Recommended Response Action</b>	Enter a valid username and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0071

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the IP Management operation because an IP Management operation is already in progress.
<b>Detailed Description</b>	The IP Management operation cannot be performed because an IP Management operation is already in progress.
<b>Recommended Response Action</b>	Wait for the current IP Management operation to complete, and then retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## SVLM0072

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because invalid BGP identifier is not entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because BGP Identifier is not entered.
<b>Recommended Response Action</b>	Enter a valid BGP Identifier and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0073

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because IP address family is not entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because IP address family is not entered.
<b>Recommended Response Action</b>	Enter a valid IP address family and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0074

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because local IP address is not entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because IP address is not entered.
<b>Recommended Response Action</b>	Enter a valid IP address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0075

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because invalid IPv4 address is entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because invalid IPv4 address is entered.
<b>Recommended Response Action</b>	Enter a valid IPv4 address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0076

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because invalid IPv6 address is entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because invalid IPv6 address is entered.
<b>Recommended Response Action</b>	Enter a valid IPv6 address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0077

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because local asn is not entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because local ASN is not entered.
<b>Recommended Response Action</b>	Enter a valid local ASN value and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0078

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because remote IP address is not entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because remote IP address is not entered.
<b>Recommended Response Action</b>	Enter a valid remote IP address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0079

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because invalid remote IPv4 address is entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because an invalid remote IPv4 address is entered.
<b>Recommended Response Action</b>	Enter a valid remote IPv4 address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0080

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because invalid remote IPv6 address is entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because an invalid remote IPv6 address is entered.
<b>Recommended Response Action</b>	Enter a valid remote IPv6 address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0081

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because remote asn is not entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because remote asn is not entered.
<b>Recommended Response Action</b>	Enter a valid remote asn and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0082

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because invalid IP address family is entered.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because invalid IP address family type is entered.
<b>Recommended Response Action</b>	Enter a valid IP Address family and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0083

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because entered local IP address is already exist.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because entered local IP address is already exist.
<b>Recommended Response Action</b>	Enter a unique local IP address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0084

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure BGP because entered remote IP address is already exist.
<b>Detailed Description</b>	The BGP configuration is unsuccessful because entered remote IP address is already exist.
<b>Recommended Response Action</b>	Enter a unique remote IP address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0086

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because of another restore operation is in progress.
<b>Detailed Description</b>	Cannotperform more than one restore at a given point in time.
<b>Recommended Response Action</b>	Retrythe operation after ongoing Restore operation is completed.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0087

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because Centralized Discovery Controller instances are present.
<b>Detailed Description</b>	Restore operation is not allowed when Centralized Discovery Controllerinstances present.
<b>Recommended Response Action</b>	No recommended response action is required.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0088

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add/update the Centralized Discovery Controller because invalid number of interfaces are entered.
<b>Detailed Description</b>	The number of interfaces given falls out the range of 1-16.
<b>Recommended Response Action</b>	The maximum allowed number of interface is 16. Make sure you have interfaces between 1 to 16 and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0089

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because parent interface is not disabled.
<b>Detailed Description</b>	VLAN interface cannot be created because parent interface is not disabled.
<b>Recommended Response Action</b>	Disable the parent interface and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0090

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because VLAN interfaces to the given interface already exists.
<b>Detailed Description</b>	Interface config type cannot be updated because VLAN interfaces to the given interface already exists.
<b>Recommended Response Action</b>	Delete VLAN interfaces for the given interface and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVLM0091

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because given IPv4 address is already configured.
<b>Detailed Description</b>	Cannot create or update the interface because given IPv4 address is already configured.
<b>Recommended Response Action</b>	Enter a unique IPv4 address and retry the operation.
<b>Category</b>	Configuration (SVLM = StorageFabric Validation Lifecycle Manager)

# SVRA—StorageFabric Validation Rest App Event Messages

## SVRA0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the image details because an invalid Centralized Discovery Controller Image was entered.
<b>Detailed Description</b>	The Centralized Discovery Controller image entered is invalid.
<b>Recommended Response Action</b>	Enter a valid Centralized Discovery Controller image and retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRA0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the SmartFabric Storage Software Application image details because an invalid ID was entered.

**Detailed Description** The SmartFabric Storage SoftwareApplication image entered is invalid.

**Recommended Response Action** Enter a valid SmartFabric Storage SoftwareApplication Image and retry the operation.

**Category** Configuration (SVRA = StorageFabric Validation Rest App)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRA0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the image details because an invalid Centralized Discovery Controller Instance ID was entered.

**Detailed Description** The Centralized Discovery ControllerInstance entered is invalid.

**Recommended Response Action** Enter a valid Centralized Discovery ControllerInstance and retry the operation.

**Category** Configuration (SVRA = StorageFabric Validation Rest App)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRA0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve details because the requested SmartFabric Storage Software Application was not available.

**Detailed Description** The SmartFabric Storage Software Application entered is invalid.

**Recommended Response Action** Enter a valid StorageFabric Storage Software Application and retry the operation.

**Category** Configuration (SVRA = StorageFabric Validation Rest App)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRA0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve event information because the event ID does not exist in the system.

**Detailed Description** The event ID cannot be retrieved because the event ID does not exist in the system.

**Recommended Response Action** Enter a valid event ID and retry the operation.

**Category** Configuration (SVRA = StorageFabric Validation Rest App)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRA0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Device Details because it is not available in the system.

**Detailed Description** The device information cannot be retrieved because it does not exist.

**Recommended Response Action** Retry after sometime. If the issue persist, contact your system administrator.

**Category** Configuration (SVRA = StorageFabric Validation Rest App)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRA0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the SmartFabric Storage Software license ID because it does not exist.

**Detailed Description** The SmartFabric Storage Software license ID cannot be retrieved because it does not exist.

**Recommended Response Action** Enter a valid SmartFabric Storage Software license ID, and then retry the operation.

**Category** Configuration (SVRA = StorageFabric Validation Rest App)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRA0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	There is no authentication sequence to retrieve because the authentication sequence is not configured.
<b>Detailed Description</b>	The authentication sequence cannot be retrieved because the authentication sequence is not configured.
<b>Recommended Response Action</b>	The Local authentication is enabled by default. No action is needed.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the requested remote authentication server instances because the authentication server is not configured.
<b>Detailed Description</b>	The requested remote authentication server instances cannot be retrieved because the server is not configured.
<b>Recommended Response Action</b>	Enter a valid IP address of the remote authentication server and retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve Interface list because it does not exist in the SmartFabric Storage Software.
<b>Detailed Description</b>	The Interface list cannot be retrieved because it does not exist in SmartFabric Storage Software.
<b>Recommended Response Action</b>	Make sure that the Interface is created and retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request beacuse Managment IP address not found.
<b>Detailed Description</b>	Unable to process the request beacuse Managment IP address not found.
<b>Recommended Response Action</b>	Enter valid a Management IP address and retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the restore ID details because the requested restore ID does not exist.
<b>Detailed Description</b>	The requested restore ID is not found.
<b>Recommended Response Action</b>	Enter a valid restore IDand retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the backup ID details because the requested restore ID does not exist.
<b>Detailed Description</b>	The requested backup ID is not found.
<b>Recommended Response Action</b>	Enter a valid backup IDand retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because requested Centralized Discovery Controller instance or SmartFabric Storage Software health status is not available.
<b>Detailed Description</b>	The requested Centralized Discovery Controller instance SmartFabric Storage Software health status is not available.
<b>Recommended Response Action</b>	Wait for few minutes and retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the status of the requested SosReport file because it does not exist.
<b>Detailed Description</b>	The requested SosReport file is not present in the system.
<b>Recommended Response Action</b>	Enter the SoSReport filename to retrieve the status. Use <a href="https://&lt;IP&gt;/redfish/v1/SFSSApp/SosReports">https://&lt;IP&gt;/redfish/v1/SFSSApp/SosReports</a> api to get the available SosReport filenames.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the user activity information because the user activity ID does not exist.
<b>Detailed Description</b>	The user activity cannot be retrieved because the user activity ID does not exist.
<b>Recommended Response Action</b>	Enter a valid user activity ID and retry the operation.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRA0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to fetch the requested BGP configuration because it is not found.
<b>Detailed Description</b>	The requested BGP configuration does not exist.
<b>Recommended Response Action</b>	Enter a valid BGP Identifier and retry the operations.
<b>Category</b>	Configuration (SVRA = StorageFabric Validation Rest App)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## SVRC1005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the subsystem information because the subsystem does not exist.
<b>Detailed Description</b>	The subsystem information cannot be retrieved because the subsystem does not exist.
<b>Recommended Response Action</b>	Enter a valid Subsystem Entry ID and retry the operation. For information about valid subsystem, query all the available subsystem by without giving any.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone DB information because the ZoneDB does not exist.

**Detailed Description** The ZoneDB information cannot be retrieved because the ZoneDB does not exist.

**Recommended Response Action** Enter a valid ZoneDB Type and retry the operation. The valid Zone DB types are config and active.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone Group information because the Zone Group does not exist.

**Detailed Description** The Zone Group information cannot be retrieved because the Zone Group does not exist.

**Recommended Response Action** Enter a valid Zone Group Entry ID and retry the operation. For information about valid Zone Group, query all the available Zone groups.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone Group information because the ZoneDB Type and Zone Group combination does not exist.

**Detailed Description** The Zone Group information cannot be retrieved because the ZoneDB Type and Zone Group combination does not exist.

**Recommended Response Action** Enter valid ZoneDB type and ZoneGroup Entry ID combination and retry the operation. For information about valid ZoneDB and Zone Group combination, query all the available Zone groups.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone information because the Zone does not exist.

**Detailed Description** The Zone information cannot be retrieved because the Zone does not exist.

**Recommended Response Action** Enter valid Zone Entry ID and retry the operation. For information about valid Zone Entries, query all the available zones.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone information because the ZoneDB type and Zone Group combination does not exist.

**Detailed Description** The Zone information cannot be retrieved because the ZoneDB type and Zone Group combination does not exist.

**Recommended Response Action** Enter valid ZoneDB type and ZoneGroup Entry IDcombination and retry the operation. For information about valid ZoneDB and Zone Group combination, query all the available Zone groups.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone Member information because the Zone Member does not exist.

**Detailed Description** The Zone Member information cannot be retrieved because the Zone Member does not exist.

**Recommended Response Action** Enter valid Zone Member Entry IDand retry the operation. For information about valid Zone Member, query all the available Zone members.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone Member information because the ZoneDB type or Zone Group or Zone or Zone Member does not exist.

**Detailed Description** The Zone Members information cannot be retrieved because the ZoneDB type or Zone Group or Zone does not exist.

**Recommended Response Action** Enter valid Zone DB type and Zone Group and Zone and Zone Member Entry ID and retry the operation. For information about valid Zone Members, query all the available Zone groups, zones, and Zone members.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone Alias information because the ZoneDB type or Zone Alias Entry ID does not exist.

**Detailed Description** The Zone Alias information cannot be retrieved because the ZoneDB type or Zone Alias Entry ID does not exist.

**Recommended Response Action** Enter valid Zone DB type and Zone Alias Entry ID and retry the operation. For information about valid Zone Alias, query all the available Zone aliases.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the Zone Alias information because the ZoneDB type and Zone Alias and Zone Alias Member combination does not exist.

**Detailed Description** The Zone Alias Member information cannot be retrieved because the ZoneDB type and Zone Alias combination does not exist.

**Recommended Response Action** Enter valid Zone DB type and Zone Alias and retry the operation. For information about valid Zone Alias, query all the available Zone DBs and Zone aliases.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the Zone Alias Member information because the Zone Alias Member does not exist.
<b>Detailed Description</b>	The Zone Alias Member information cannot be retrieved because the Zone Alias Member does not exist.
<b>Recommended Response Action</b>	Enter valid Zone Alias Member Entry ID and retry the operation. For information about valid Zone Alias Member, query all the available Zone Alias members.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the Zone Alias Member information because the ZoneDB type or Zone Alias Entry ID does not exist.
<b>Detailed Description</b>	The Zone Alias Members information cannot be retrieved because the ZoneDB type or Zone Alias Entry ID does not exist.
<b>Recommended Response Action</b>	Enter valid Zone DB type and Zone Alias and retry the operation.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to service the request because of an internal server error.
<b>Detailed Description</b>	The request could not be serviced due to internal server error.
<b>Recommended Response Action</b>	Retry the operation after some time. If the issue persists, contact the administrator.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)

<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because an invalid URL is entered.
<b>Detailed Description</b>	The request cannot be processed because an invalid URL is entered.
<b>Recommended Response Action</b>	Enter a valid URL and retry the operation. For information about valid URLs, refer to the SmartFabric Storage Software RESTful API Guide.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because Authorization header is not present in the request.
<b>Detailed Description</b>	The request cannot be processed because an invalid Authentication header data is entered.
<b>Recommended Response Action</b>	Enter valid Authentication header data in the Authorization header, and then retry the operation.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because authentication type mentioned in Authorization header is invalid.
<b>Detailed Description</b>	The request cannot be processed because an invalid Authentication type is entered in the Authentication header.
<b>Recommended Response Action</b>	Enter valid Authentication type in the Authorization header, and then retry the operation.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because the Bearer token provided in the Authorization header is invalid.
<b>Detailed Description</b>	The request cannot be processed because the Bearer token provided in the Authorization header is invalid.
<b>Recommended Response Action</b>	Provide a valid Bearer token and retry the operation again.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because token authentication is disabled.
<b>Detailed Description</b>	The request cannot be processed because the Bearer token authentication is disabled.
<b>Recommended Response Action</b>	Enter a valid Basic Authentication type in the authorization header and retry the operation.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVRC1025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve global policy because it does not exist.
<b>Detailed Description</b>	The global policy cannot be retrieved because it does not exist in SmartFabric Storage Software.
<b>Recommended Response Action</b>	Configure global policies and retry the operation.
<b>Category</b>	Configuration (SVRC = StorageFabric Validation Rest CDC)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVRC1026

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to write or modify data because the necessary user access rights are unavailable.

**Detailed Description** The write or modify data operation cannot be performed because the necessary user access rights are unavailable.

**Recommended Response Action** Make sure that you have necessary privileges and retry the operation.

**Category** Configuration (SVRC = StorageFabric Validation Rest CDC)

**Severity** Warning

**Redfish Event Type** Not Applicable

# SVZN—StorageFabric Validation Zone Event Messages

## SVZN0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to configure the zone because the zone database is not initialized.

**Detailed Description** The zone configuration cannot be performed because the zone database is not initialized.

**Recommended Response Action** Retry after some time. If the issue persists, contact your server administrator.

**Category** Configuration (SVZN = StorageFabric Validation Zone)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the zone group entered does not exist.
<b>Detailed Description</b>	The requested operation cannot be performed because the zone group entered does not exist.
<b>Recommended Response Action</b>	Enter a valid zone group and retry the operation. For information about existing zone group, query all available zone groups.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the entered zone does not exist.
<b>Detailed Description</b>	The requested operation cannot be performed because the zone identified in the message does not exist.
<b>Recommended Response Action</b>	Enter a valid zone name and retry the operation. For information about existing zone, query all available zones under a specific zone group.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the zone member name entered does not exist.
<b>Detailed Description</b>	The requested operation cannot be performed because the zone member identified in the message does not exist.
<b>Recommended Response Action</b>	Enter a valid zone member and retry the operation. For information about existing zone members under a zone , query all available zone members under a specific zone.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to deactivate the zone group because the zone group entered is invalid.
<b>Detailed Description</b>	The zone group cannot be deactivated because the an invalid data group is entered.
<b>Recommended Response Action</b>	Enter a valid active zone group name and retry the operation. For information about existing active zone group query all available active zone groups from the active zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to activate the zone group because the zone group entered is invalid.
<b>Detailed Description</b>	The zone group cannot be activated because the given zone group entered is invalid.
<b>Recommended Response Action</b>	Enter a valid configured zone group and retry the operation. For information about existing configuredzone groups, query all available configured zone groups from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the zone alias because it already exists.
<b>Detailed Description</b>	The zone alias cannot be added because it already exists.
<b>Recommended Response Action</b>	Enter a unique zone alias and retry the operation. For information about existing zone alias query all available zone alias from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the zone alias entered does not exist.
<b>Detailed Description</b>	The operation requested cannot be performed because the zone alias specified does not exist.
<b>Recommended Response Action</b>	Enter a valid zone alias and retry the operation. For information about existing zone aliases , query all available zone aliases from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the zone alias member because it already exists.
<b>Detailed Description</b>	The zone alias member cannot be added because it already exists.
<b>Recommended Response Action</b>	Enter a unique zone alias member and retry the operation. For information about existing zone alias members, query all available zone alias members from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the zone alias member entered does not exist.
<b>Detailed Description</b>	The operation requested cannot be performed because the zone alias member entered does not exist.
<b>Recommended Response Action</b>	Enter a valid zone alias member and retry the operation. For information about existing zone alias members , query all available zone alias members from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the zone member type entered is invalid.
<b>Detailed Description</b>	The operation requested cannot be performed because the zone member type entered is invalid.
<b>Recommended Response Action</b>	Enter a valid zone member type and retry the operation. The supported zone member types are NVMe Qualified Name, FullQualified Name, and ZoneAlias.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the zone member role entered is invalid.
<b>Detailed Description</b>	The requested operation cannot be performed because the zone member role entered is invalid.
<b>Recommended Response Action</b>	Enter a valid zone member role and retry the operation. The supported roles are Host and Subsystem.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to activate the zone group because the default zoning policy is "allow all".
<b>Detailed Description</b>	User can only activate a zone group when the default zoning policy is "deny all".
<b>Recommended Response Action</b>	Change the default zoning policy to "deny all" and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the default zoning policy to "allow all" because there are activated zone groups.
<b>Detailed Description</b>	User can only change the default zoning policy to "allow all" when all the zone groups are in the deactivated state.
<b>Recommended Response Action</b>	Deactivate all the zone groups and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the Global zoning policy because the Centralized Discovery Controller global database entry is unavailable.
<b>Detailed Description</b>	The Centralized Discovery Controller global database entry is unavailable, so user cannot update the Global zoning policy.
<b>Recommended Response Action</b>	Retry after some time. If the issue persists, contact your server administrator.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the zone group because it already exists.
<b>Detailed Description</b>	The zone group cannot be added because it already exists in the database.
<b>Recommended Response Action</b>	Enter a unique zone group and retry the operation. For information about existing zone group query all available zone groups from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the zone because it already exists.
<b>Detailed Description</b>	The zone cannot be added because it already exists in the database.
<b>Recommended Response Action</b>	Enter a unique zone and retry the operation. For information about existing zone query all available zones in zone group from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the zone member because it already exists.
<b>Detailed Description</b>	The zone member cannot be added because it already exists in the database.
<b>Recommended Response Action</b>	Enter a unique zone member and retry the operation. For information about existing zone members, query all available zone member in zone from config zone database.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete zone group because it is already activated.
<b>Detailed Description</b>	The zone group cannot be deleted because it is in activate state.
<b>Recommended Response Action</b>	Deactivate the zone group and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the zone member because Fully Qualified Name zone member Id format is invalid.
<b>Detailed Description</b>	The zone member cannot be created because of the invalid Fully Qualified Name zone member Id format.
<b>Recommended Response Action</b>	Enter a valid Fully Qualified Name and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the zone member because the NQN or Fully Qualified Name zone member Id format is invalid.
<b>Detailed Description</b>	The zone member cannot be created because NQN is invalid or invalid Fully Qualified Name zone member Id format.
<b>Recommended Response Action</b>	Enter a valid NQN and Fully Qualified Name zone member Id format retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the zone member because the TCP Port or Fully Qualified Name zone member Id format is invalid.
<b>Detailed Description</b>	The zone member cannot be created because the TCP Port is invalid or Fully Qualified Name zone member Id format is invalid.
<b>Recommended Response Action</b>	Enter valid TCP port and Fully Qualified Name zone member Id format and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the zone member because the IP address or address family or Fully Qualified Name zone member Id format is invalid.
<b>Detailed Description</b>	The zone member cannot be created because the IP address or address family or Fully Qualified Name zone member Id format is invalid.
<b>Recommended Response Action</b>	Enter valid IP address or address family and Fully Qualified Name zone member Id format and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the zone member because the PortId or Fully Qualified Name zone member Id format is invalid.
<b>Detailed Description</b>	The zone member cannot be created because the Port Id is invalid or Fully Qualified Name zone member Id format is invalid.
<b>Recommended Response Action</b>	Enter valid Port Id and Fully Qualified Name zone member Id format and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the zone member because the TSAS or Fully Qualified Name zone member Id format is invalid.
<b>Detailed Description</b>	The zone member cannot be created because the TSAS is invalid or Fully Qualified Name zone member Id format is invalid.
<b>Recommended Response Action</b>	Enter valid TSAS and Fully Qualified Name zone member Id format and retry the operation.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVZN0026

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to enable Fabric Zoning feature as default Zoning policy is enabled.

**Detailed Description** User can enable fabric zoning feature only when default zoning policy is enabled.

**Recommended Response Action** Disable default zoning policy and then enable the feature Fabric Zoning.

**Category** Configuration (SVZN = StorageFabric Validation Zone)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVZN0027

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to add Zone member type or Alias zone member type for Zone group created by Fabric Zoning.

**Detailed Description** For Zonegroup created via Fabric Zoning, the user is not allowed to add Zone members unsupported type mentioned in the message.

**Recommended Response Action** No response action is required.

**Category** Configuration (SVZN = StorageFabric Validation Zone)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVZN0028

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to enable default zoning policy as Fabric Zoning feature is enabled.

**Detailed Description** User can enable default zoning policy only when Fabric Zoning feature is disabled.

**Recommended Response Action** Disable Fabric zoning feature and re-enable default zoning policy.

**Category** Configuration (SVZN = StorageFabric Validation Zone)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SVZN0029

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to edit Zone Group as it is locked by remote.
<b>Detailed Description</b>	User cannot edit Zone Group that are locked by remote.
<b>Recommended Response Action</b>	User has to wait for remote end to unlock the Zone Group.It takes 30sec for lock to be automatically revoked when held by remote.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0030

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add Zone Member with NQNs of other subsystems because this operation is not allowed in Fabric Zoning.
<b>Detailed Description</b>	For Zone Group created by remote, the user is not allowed to add Zone members of type subsystem which are not registered by that remote entity.
<b>Recommended Response Action</b>	Enter valid configuration with Zone member values containing data registered by the subsystem.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to unlock Zone Group because this operation is not allowed in manual Zone Group.
<b>Detailed Description</b>	Unlock configuration is not applicable to manual Zone Group.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SVZN0032

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the requested operation because it is not supported.
<b>Detailed Description</b>	Invalid operation Unlock Zone Group disable is attempted. Only Unlock Zone Group enable is allowed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SVZN = StorageFabric Validation Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SWC—Software Config Event Messages

### SWC0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to save the network settings.
<b>Detailed Description</b>	The network cable may not be connected or an internal error occurred. For more information about the failure, see Lifecycle Log.
<b>Recommended Response Action</b>	Verify the network cable is connected and retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### SWC0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set Part Replacement policies.
<b>Detailed Description</b>	The Part Replacement policy configuration operation encountered an unexpected error while communicating with iDRAC.
<b>Recommended Response Action</b>	Retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to display the Lifecycle log.
<b>Detailed Description</b>	An unrecoverable error occurred while communicating with iDRAC.
<b>Recommended Response Action</b>	Retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add a work note to the Lifecycle Log.
<b>Detailed Description</b>	The operation to add a work note to the Lifecycle Log encountered an unexpected error while communicating with iDRAC.
<b>Recommended Response Action</b>	Retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to display the current hardware inventory.
<b>Detailed Description</b>	The view current hardware inventory operation encountered an unexpected error while communicating with iDRAC.

<b>Recommended Response Action</b>	Retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to display the As Shipped hardware inventory.
<b>Detailed Description</b>	The view As Shipped hardware inventory operation encountered an unexpected error while communicating with iDRAC.
<b>Recommended Response Action</b>	Retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to write the current hardware inventory to the specified destination.
<b>Detailed Description</b>	The export current hardware inventory operation did not complete because the destination: 1) does not have the specified folder, 2) does not have enough free space, or 3) is read-only.
<b>Recommended Response Action</b>	Retry the operation. If the problem persists, verify the following and retry the operation: 1) Destination has the specified folder. 2) Destination has enough free space. 3) Destination is not write-protected.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to write the As Shipped hardware inventory to the specified destination.
<b>Detailed Description</b>	The export As Shipped hardware inventory operation did not complete because the destination: 1) does not have the specified folder, 2) does not have enough free space, or 3) is read-only.
<b>Recommended Response Action</b>	Retry the operation. If the problem persists, verify the following and retry the operation: 1) Destination has the specified folder. 2) Destination has enough free space. 3) Destination is not write-protected.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully applied front panel security settings.
<b>Detailed Description</b>	The front panel security settings were successfully configured.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the front panel security settings.
<b>Detailed Description</b>	The operation to retrieve the front panel security settings encountered an unexpected error while communicating with iDRAC.
<b>Recommended Response Action</b>	Retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SWC0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to save the front panel security settings.

**Detailed Description** The operation to save the front panel security settings encountered an unexpected error while communicating with iDRAC.

**Recommended Response Action** Retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.

**Category** Configuration (SWC = Software Config)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SWC0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to set new date and time.

**Detailed Description** Unable to apply the changes to the date and time settings because an internal error occurred.

**Recommended Response Action** Exit the Date and Time wizard and retry the operation. If the problem persists, exit Lifecycle Controller and retry the operation.

**Category** Configuration (SWC = Software Config)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SWC0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the list of supported operating systems.

**Detailed Description** The operating system driver pack is missing or not accessible.

**Recommended Response Action** Update the system with the latest Lifecycle Controller OS Driver Pack. Obtain the OS Driver Pack from the service provider.

<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to initialize OS Deployment wizard.
<b>Detailed Description</b>	The operating system driver pack is missing or not accessible.
<b>Recommended Response Action</b>	Exit the OS Deployment wizard and retry the operation. If the problem persists, exit Lifecycle Controller and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the drivers for the selected operating system.
<b>Detailed Description</b>	An unrecoverable error occurred while retrieving the drivers.
<b>Recommended Response Action</b>	Exit the OS Deployment wizard and retry the operation. If the problem persists, exit Lifecycle Controller and perform an AC power cycle.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to apply the boot mode settings for BIOS.
----------------	--

<b>Detailed Description</b>	The BIOS boot mode settings could not be applied due to an internal error.
<b>Recommended Response Action</b>	Exit the OS Deployment wizard and retry the operation. If the problem persists, exit the Lifecycle Controller and perform an AC power cycle.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Test Network Connection operation completed with errors.
<b>Detailed Description</b>	The Test Network Connection ping test timed-out. The network cable is disconnected or the network is not configured correctly.
<b>Recommended Response Action</b>	Check the network cable connection and network configuration settings, then retry the operation. If the problem persists, reconfigure the network settings and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully configured encryption.
<b>Detailed Description</b>	Encryption configuration is successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Test Network Connection ping test timed-out.
<b>Detailed Description</b>	The Test Network Connection ping test timed-out. The network cable is disconnected or the network is not configured correctly.
<b>Recommended Response Action</b>	Check the network cable connection and network configuration settings, then retry the operation. If the problem persists, reconfigure the network settings and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0032

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully exported the Server Configuration Profile image file to the USB drive.
<b>Detailed Description</b>	Exporting the Server Configuration Profile image file to the USB drive was successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0033

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully exported the Server Configuration Profile image file to network share.
<b>Detailed Description</b>	Exporting the Server Configuration Profile image file to the network share was successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SWC0034

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to export the file to the network share.
<b>Detailed Description</b>	Lifecycle Controller is unable to export the file to the network share because it has insufficient free space.
<b>Recommended Response Action</b>	Make sure that the network share has sufficient free space then retry the operation. If the problem persists, check network settings and retry the operation.
<b>Category</b>	Configuration (SWC = Software Config)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SWC0035

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to initialize backup Server Profile operation.

**Detailed Description** The backup operation did not initialize because the system does not have a service tag.

**Recommended Response Action** Assign a service tag to the system and retry the operation. To assign the service tag, contact your service provider.

**Category** Configuration (SWC = Software Config)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SWC0036

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to launch hardware diagnostics.

**Detailed Description** Unable to launch hardware diagnostics because the Enterprise UEFI Diagnostics application is corrupt or iDRAC is not responding.

**Recommended Response Action** Retry the operation. If the problem persists, update the Enterprise UEFI Diagnostics using one of the following methods: 1) Use the Firmware Update feature in Lifecycle Controller. 2) Use the Server Update Utility. 3) Run the Update Package from the operating system. If the problem continues to persist, reset the iDRAC. For more information, contact your service provider.

**Category** Configuration (SWC = Software Config)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SWC0037

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to export the file to the network share.

<b>Detailed Description</b>	Lifecycle Controller is unable to export the file to the network share because the destination folder is not present or inaccessible.
<b>Recommended Response Action</b>	Make sure that the destination folder is present and accessible, then retry the operation. If the problem persists, check network settings and retry the operation.

## SWC0402

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The certificate of the 802.1X Authentication Server is invalid.
<b>Detailed Description</b>	The certificate of the 802.1X Authentication Server is invalid.
<b>Recommended Response Action</b>	The issue does not necessarily affect 802.1X authentication, but could indicate a misconfiguration of either the iDRAC or the network switch it is connected to, or that the Authentication Server has been compromised. Do the following: 1) Check the configuration of the etherswitch that the iDRAC is connected to. Ensure that it is using the expected 802.1X Authentication Server. 2) Verify that the certificate installed on the iDRAC for Authentication Server validation is correct and matches the signing authority for that Authentication Servers certificate, and that none of the certificates have expired. 3) Check the configuration and logs of the Authentication Server to ensure it is operating properly and no security issues exist.
<b>Category</b>	Audit (SWC = Software Config)

## SWC0727

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the entered attribute because the SNMP user authentication passphrase or SNMP user privacy passphrase is not configured.
<b>Detailed Description</b>	The entered attribute cannot be set because the SNMP user authentication passphrase or SNMP user privacy passphrase is not configured.
<b>Recommended Response Action</b>	Enter the authentication passphrase and privacy passphrase and retry the operation. To set the passphrase values by using the RACADM Command Line Interface (CLI), enter, "racadm set idrac.users.n.SNMPv3AuthenticationPassphrase value" and "racadm set idrac.users.n.SNMPv3PrivacyPassphrase value". Here, value is a string. To set by using the iDRAC GUI, click iDRAC Settings > Users > Local Users > Edit User.

## SWC5012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to power on the server because an unidentified cable or device is being disconnected. One or more components such as power, signal, and Slimline (SL) cables on the device using SLarg1, may not be fully seated.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = arg</li> </ul>
<b>Detailed Description</b>	The system cannot be powered on because the device associated with the SL (slimline PCIe data) cable identified in the message is removed, or missing a required SL cable, power cable, or signal cable. This may be a device seating issue, or a connectivity issue with a cable required by the device.
<b>Recommended Response Action</b>	Do the following:1) There is a cable or connection issue which requires correction. Begin by identifying the issue: 1a) Review the Lifecycle Log for any Hardware Configuration (HWC) events that may be reported shortly after this event. If the system can identify the cable or component causing this issue, it will report a configuration error. 1b) Reference the System Information Label on the chassis cover or the Cable Routing section in the Installation and Service Manual (ISM). If the HWC message was located, look for references to that connection, cable, or device. Else, use the SL cable referenced in the message to locate the connector on the motherboard. This will be used to trace the cable to the end device. 1c) If any maintenance or service work was recently completed and SWC5012 was not present before this activity, something is likely disconnected in that area.2) Proceed with correction: 2a) Disconnect the power cords. 2b) Use the information gathered above to locate the impacted cable or device. Else, locate the SL cable connector on the motherboard and trace the cable to the end device. 2c) Ensure that the device is firmly seated and, if it has any power, signal, and SL cables, ensure they are connected and firmly seated on both ends. 2d) Close the chassis cover and reconnect the power cords. 2e) If the issue persists, perform a SupportAssist Collection operation and contact your service provider.

<b>Category</b>	System Health (SWC = Software Config)

## SWC8564

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to clear the Boot Identity profile from the server in slot arg1 because there is no response from the server iDRAC.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = server slot number</li></ul>
<b>Detailed Description</b>	The Boot Identity profile from the server identified in the message cannot be cleared because there is no response from the server iDRAC. A MAC Address conflict is possible if the server retains virtual MAC Address values and they are also allocated to another server.

<b>Recommended Response Action</b>	Make sure that the server is not used until the Persistence Policy settings are returned to default values and the Virtual MAC Address settings have been cleared. Persistence Policy settings can be reset to default values by resetting the server iDRAC to factory default settings. If the iDRAC cannot be reset to default values, contact your service provider before attempting to use the server.

## SWC8627

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure the storage array in slot arg1, because there is no communication between Chassis Management Controller (CMC) and the storage device.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = slot number</li></ul>
<b>Detailed Description</b>	Unable to configure storage array. This could happen if CMC could not communicate with storage device.
<b>Recommended Response Action</b>	1) Reset iDRAC by using the graphical user interface (GUI): Click Chassis Overview > Troubleshooting > Reset Components. In the Reset Server section, from the Reset drop-down menu, select iDRAC Reset corresponding to the server iDRAC to be reset, and then click Apply Selection. Or, reset iDRAC by running the following command at the command line interface (CLI): racadm racreset -m server-n.2. Reset Chassis Management Controller (CMC) by using the GUI: Click Chassis Overview > Troubleshooting > Reset Components, and then click Reset/Failover CMC. Or, reset CMC by running the following command at the CLI: racadm racreset. For more information about the syntax and parameters used, see the iDRAC 8/7 v2.30.30.30 RACADM CLI Guide and the Chassis Management Controller Version 5.0 for Dell PowerEdge M1000e RACADM Command Line Reference Guide available on the support site.

## SWC9031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to start the LOM firmware authentication operation because iDRAC is configured via the LOM port. The authentication operation is skipped.
<b>Detailed Description</b>	The LOM firmware authentication operation is done only in a dedicated mode. To enable the LOM authentication, configure iDRAC via the dedicated port by running the following RACADM command at the RACADM Command Line Interface (CLI): racadm set idrac.nic.Selection Dedicated.
<b>Recommended Response Action</b>	No response action is required.

<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SWU8561

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to downgrade the firmware version because the current hardware configuration does not support rollback to the earlier firmware version.
<b>Detailed Description</b>	The firmware version selected for rollback does not support the current chassis hardware configuration.

<b>Recommended Response Action</b>	Make sure that firmware version selected for rollback is supported for the current hardware configuration, such as I/O modules, PSU modules, and servers. For example, a newer generation PSU may not work with an earlier iDRAC or CMC firmware. For more information, see the platform Owners Manual or CMC or iDRAC Release Notes for details.

## SYS—System Info Event Messages

### SYS001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The operation was successful.
<b>Detailed Description</b>	The operation requested successfully completed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation due to an unknown error in iDRAC.
<b>Detailed Description</b>	The operation did not complete successfully because of an unknown error in iDRAC.
<b>Recommended Response Action</b>	Retry the action. If the issue persists, reset iDRAC.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Missing parameters: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = parameter names</li></ul>
<b>Detailed Description</b>	One or more required parameters needed for the operation are missing.
<b>Recommended Response Action</b>	Refer to the Lifecycle Controller Remote Services documentation and retry the operation with the required parameters.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid parameter value for arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = parameter name</li></ul>
<b>Detailed Description</b>	The value provided for the specified parameter is invalid.
<b>Recommended Response Action</b>	Refer to the Lifecycle Controller Remote Services documentation and retry the operation with a valid value for the identified parameter.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SYS005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** AttributeName array and AttributeValue array element count mismatch.

**Detailed Description** The AttributeName input array and AttributeValue input array do not have the same number of elements.

**Recommended Response Action** Verify AttributeName and AttributeValue pairs match and are valid. Refer to the Lifecycle Controller Remote Services documentation.

**Category** Configuration (SYS = System Info)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SYS006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to set read only attribute: arg1

**Arguments**

- arg1 = attribute name

**Detailed Description** The attribute being set is currently read-only and cannot be changed.

**Recommended Response Action** Refer to the Lifecycle Controller Remote Services documentation for the specific attribute behavior.

**Category** Configuration (SYS = System Info)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SYS007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Input out of range for arg1.

**Arguments**

- arg1 = attribute name

<b>Detailed Description</b>	The input value for the attribute being set is not within the acceptable range for the attribute.
<b>Recommended Response Action</b>	Refer to the Lifecycle Controller-Remote Services documentation for the specific attribute and retry the operation with valid value within the range of the attribute.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid boolean in value for attribute: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = attribute name</li> </ul>
<b>Detailed Description</b>	The input value for the specified attribute is not a valid boolean value for the attribute.
<b>Recommended Response Action</b>	Refer to the Lifecycle Controller-Remote Services documentation and provide a valid boolean value for the specified attribute.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	String exceeds maximum length for attribute: arg1
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = attribute name</li> </ul>
<b>Detailed Description</b>	Length of string for specified attribute exceeded the maximum length allowed.
<b>Recommended Response Action</b>	Check Lifecycle Controller-Remote Services documentation and retry the command with string value length less than maximum length allowed.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid character in value for attribute: arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = attribute name</li></ul>
<b>Detailed Description</b>	The input value for the specified attribute is not valid.
<b>Recommended Response Action</b>	Refer to Lifecycle Controller-Remote Services documentation and provide valid attribute value for the specified attribute.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Pending configuration values are already committed, unable to perform another set operation.
<b>Detailed Description</b>	A configuration job is scheduled to apply pending set attribute operations. Set operations are not allowed if there is an existing configuration job for a component.
<b>Recommended Response Action</b>	Wait for the scheduled job to complete or delete the configuration jobs before attempting more set attribute operations.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	User privileges are not sufficient to perform operation.
<b>Detailed Description</b>	The user credentials provided do not have appropriate privileges to perform the operation requested.
<b>Recommended Response Action</b>	Retry operation using user credentials that have appropriate privileges to perform the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid attribute name: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = attribute name</li> </ul>
<b>Detailed Description</b>	The attribute name provided for the requested operation does not exist on the target system or is invalid.
<b>Recommended Response Action</b>	For more information, see Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid value for attribute: arg1
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = attribute name</li> </ul>
<b>Detailed Description</b>	The value provided for the identified attribute is invalid.
<b>Recommended Response Action</b>	For more information, refer to the Lifecycle Controller-Remote Services documentation and provide a valid value for the identified attribute.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Job created successfully.
----------------	---------------------------

<b>Detailed Description</b>	The requested job has been created.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Job completed with errors
<b>Detailed Description</b>	All the operations in the Job were attempted, but some did not complete successfully.
<b>Recommended Response Action</b>	Review the Job content and verify the values are correct. For more information, see Lifecycle Controller Remote Services documentation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Job did not complete successfully.
<b>Detailed Description</b>	The job did not complete successfully.
<b>Recommended Response Action</b>	Verify the reason for the unsuccessful completion of the job by inspecting the Lifecycle Log entries related to the job. Correct the underlying cause of the unsuccessful completion and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Job completed successfully.
<b>Detailed Description</b>	The submitted job completed successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Required dependency input not found.
<b>Detailed Description</b>	The input is missing a required dependency necessary for the operation.
<b>Recommended Response Action</b>	Provide the required dependency and retry. For more information, see Lifecycle Controller Remote Services documentation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid required Attribute value.
<b>Detailed Description</b>	The value provided for the required attribute is invalid.
<b>Recommended Response Action</b>	The value specified is not valid. Refer to the Lifecycle Controller Remote Services documentation for more information.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## SYS021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the value for arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = attribute name</li></ul>
<b>Detailed Description</b>	The operation did not complete successfully because of incorrect parameters or internal firmware issues.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, do one of the following: 1) verify the value being set is correct, 2) reset the iDRAC.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Resource allocation failure.
<b>Detailed Description</b>	The operation could not complete because of an internal resource allocation issue with the firmware.
<b>Recommended Response Action</b>	Reset the iDRAC and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No configuration changes pending.
<b>Detailed Description</b>	There are no pending values to change.
<b>Recommended Response Action</b>	Ensure there are pending values for the attributes that need to be set and retry the operation.

<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because attribute dependency checking did not complete successfully.
<b>Detailed Description</b>	Unable to complete the operation because attribute dependency checking did not complete successfully. This attribute is dependent on a related attribute that has an incorrect value. The related attribute is the parent in a parent-child value dependency relationship and has an affect on what values the child attribute can have.
<b>Recommended Response Action</b>	Make sure the dependency related attribute has the correct value and retry the operation. For more information on attribute dependency, Refer to the Dell Lifecycle Controller Remote Services Quick Start Guide and Profile Documents available at the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete pending configuration.
<b>Detailed Description</b>	There are no pending configurations to be deleted.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS026

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to run the method because required parameter not entered for network share: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Share Type</li></ul>
<b>Detailed Description</b>	The network share cannot be accessed because the parameter identified in the message is not entered.
<b>Recommended Response Action</b>	Enter the missing parameter and retry the operation. For information about valid parameters to access a network share, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS027

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access the network share because one or more invalid parameters are entered.
<b>Detailed Description</b>	The operation cannot be completed because invalid parameters are entered.
<b>Recommended Response Action</b>	Enter valid parameters and retry the operation. For information about valid parameters, see the Redfish API Guide available on the support site.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS028

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to start the export operation because arg1 operation is already running.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Method Name</li></ul>
<b>Detailed Description</b>	The export operation cannot be started because the operation identified in the message is already running.
<b>Recommended Response Action</b>	Wait for the current operation to complete, and then retry the operation.
<b>Category</b>	Audit (SYS = System Info)

<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS029

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unsupported parameter name arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = parameter name</li> </ul>
<b>Detailed Description</b>	The parameter name is not supported.
<b>Recommended Response Action</b>	Remove the unsupported parameter and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS030

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Collecting component configuration information.
<b>Detailed Description</b>	Collecting the data required for component configuration.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Updating component configuration.
----------------	-----------------------------------

<b>Detailed Description</b>	The configuration is being applied to a component.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS032

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Staged component configuration is complete.
<b>Detailed Description</b>	The staged component configuration update performed in the UEFI environment on the host system is complete.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS033

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Staged component configuration completed with errors.
<b>Detailed Description</b>	The staged component configuration update performed in the UEFI environment on the host system has completed, but there were errors.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS034

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Performing component configuration for: arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = device name</li></ul>
<b>Detailed Description</b>	The configuration operation for the specified device is in progress.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS035

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Some configuration values were not applied to: arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = device name</li></ul>
<b>Detailed Description</b>	The component configuration operation was completed, however some of the configuration values were not successfully applied.
<b>Recommended Response Action</b>	Retrieve and view configuration operation results in the Lifecycle Log. For more information to retrieve the configuration results see the Lifecycle Controller Remote Services Users Guide. Identify the unsuccessful configuration operations. Modify the input data as appropriate for the component and retry the configuration operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS036

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to apply the configuration to the component.
<b>Detailed Description</b>	The configuration settings could not be applied to the component. This may indicate configuration changes since the last system inventory collection was completed.
<b>Recommended Response Action</b>	Retry the operation or try the attribute set operation for the component.

<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS037

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Component update initialization failure.
<b>Detailed Description</b>	Operation validation is unsuccessful. The command, target and operation data are all validated before an update is performed. If any of them are missing or incorrect the operation does not complete successfully.
<b>Recommended Response Action</b>	Enable the Collect System Inventory on Restart attribute using Lifecycle Controller and restart the system. Retry the operation after the system restarts.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS038

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Missing or corrupt configuration information.
<b>Detailed Description</b>	Unable to locate the configuration data associated with the job.
<b>Recommended Response Action</b>	Retry the operation. If this issue persists, contact your service provider.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS039

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Verification of requested configuration changes failed.
<b>Detailed Description</b>	The requested configuration changes have not passed the component specific verification checks, and therefore the changes will not be applied.
<b>Recommended Response Action</b>	Check the scripts or related documentation and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS040

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The firmware update operation did not complete successfully.
<b>Detailed Description</b>	An operation to update the firmware of a component did not complete successfully.
<b>Recommended Response Action</b>	Check the Lifecycle Log for more details about the unsuccessful operation. Resolve the issue and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS041

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to apply some component configuration values.
<b>Detailed Description</b>	The configuration update is complete, however all of the values were not correctly applied.
<b>Recommended Response Action</b>	Check the Lifecycle Log for the values that were not set. Resolve the issues in the XML configuration input file and retry the operation. Alternatively, configure each of the attributes using the component service methods. For more information, see the Lifecycle Controller Users Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS042

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Component configuration successfully completed.
<b>Detailed Description</b>	The requested component configuration successfully completed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS043

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully exported Server Configuration Profile.
<b>Detailed Description</b>	The current configuration of the system components (BIOS, RAID, NIC, iDRAC, and so on) was written to a Server Configuration Profile and successfully copied to the specified location.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS044

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to export one or more component configurations.
<b>Detailed Description</b>	Unable to collect the configuration information for one or more components. An internal error occurred while processing component information.
<b>Recommended Response Action</b>	Enable Collect System Inventory On Restart (CSIOR) using Lifecycle Controller and restart the system. Make sure that inventory collection is complete before retrying the operation. For more information, see the Lifecycle Controller Users Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to copy the Server Configuration Profile to the network share.
<b>Detailed Description</b>	An error occurred while copying the Server Configuration Profile to the network share.
<b>Recommended Response Action</b>	If the file is being exported to an NFS share, make sure that it is accessible from iDRAC. If the file is being exported to a CIFS share, make sure that it is accessible from iDRAC by using share access credentials with the appropriate privileges. If the share is by using http or https protocol, make sure that you have correctly configured the share and it can be accessible by using iDRAC.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS046

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import the Server Configuration Profile from the network share.
<b>Detailed Description</b>	An error occurred while copying the Server Configuration Profile from the network share.
<b>Recommended Response Action</b>	If the file is being copied from an NFS share, make sure that it is accessible from iDRAC. If the file is being copied from a CIFS share, make sure that it is accessible from iDRAC using the share credentials provided. Test the network share access using the Test Network Connection method. For more information, see the Lifecycle Controller Users Guide.
<b>Category</b>	Configuration (SYS = System Info)

## SYS047

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Input file for import configuration is not compliant with the configuration schema.
----------------	---

<b>Detailed Description</b>	The input file is not compliant with the system configuration schema.
<b>Recommended Response Action</b>	Make sure that the input file is compliant with the system configuration schema published on delltechcenter.com/lc in the LC profile Schema Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS048

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Server Configuration Profile contains invalid characters, arg1 at line arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = character</li> <li>• arg2 = line</li> </ul>
<b>Detailed Description</b>	The operation expected a valid profile that is compliant with the system configuration schema. However, the Server Configuration Profile does not contain valid profile content.
<b>Recommended Response Action</b>	View the file in any Web browser to check for invalid characters. Remove the invalid characters and make sure that the file is a valid XML and is compliant with the system configuration schema published on delltechcenter.com/lc in the LC profile Schema Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## SYS050

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Server Configuration Profile for import configuration is not compliant with schema nesting checks.
<b>Detailed Description</b>	The Server Configuration Profile for the import configuration operation is not compliant with schema nesting checks. Only RAID controllers can have nested Component nodes up to a maximum nesting depth of three.
<b>Recommended Response Action</b>	Make sure that the Server Configuration Profile is compliant with the system configuration schema published on delltechcenter.com/lc in the LC profile Schema Guide. Only RAID controllers can have nested Component nodes.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SYS051

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The system could not be shut down within the specified time.

**Detailed Description** Sometimes, the operating system on the server may not allow a graceful shutdown or may not complete within the specified graceful shutdown timeout. This error indicates that the system could not be shutdown within the time specified. The default timeout value is 5 minutes and the maximum value allowed is 1 hour.

**Recommended Response Action** Retry the operation with a longer specified graceful shutdown timeout or with the system shutdown option.

**Category** Configuration (SYS = System Info)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SYS052

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Analyzing iDRAC, System, or Lifecycle Controller configuration for changes to be applied.

**Detailed Description** Configuration changes that do not require a system restart are currently being applied.

**Recommended Response Action** No response action is required.

**Category** Configuration (SYS = System Info)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

## SYS072

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Server Configuration Profile import operation timed-out.

**Detailed Description** The import of Server Configuration Profile did not complete as the operation took too long.

**Recommended Response Action** Review the state of the host server and ensure there is no user input required that has disrupted the SCP workflow. There could be one or more reasons for server to halt at POST.1. The BIOS ErrPrompt setting being Enabled can require manual interaction during POST.2. The iDRAC ServerBoot.1#FirstBootDevice being set to BIOS will boot the system to the BIOS F2 menu requiring manual interaction.3. Review any error listed in POST and take appropriate action mentioned on the screen.If the host booted completed but the operation timed-out, then review the LCL before retrying the operation.

## SYS258

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to transfer a file, arg1, because there is a problem with the remote host servers security certificate.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = filename</li></ul>
<b>Detailed Description</b>	The remote host server certificate was validated against the uploaded certificate and the validation did not succeed. The remote host server certificate does not correspond to the uploaded verification

certificate. The certificate subject name, CN part, may not match the domain name used. If the uploaded certificate is correct, the IP address of the remote host server may be incorrect, the certificate may be expired or this error could indicate a Man-In-The-Middle attack in progress.

<b>Recommended Response Action</b>	Make sure that the following are correct and retry the operation: a) the file transfer parameters b) the uploaded certificate corresponds to the remote host server c) the certificate subject name, CN part, matches the domain name used.

## SYS297

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to expand the compressed file because the password entered for ZipPassword attribute in the iDRAC does not match with the password used for protecting the compressed file. Or, the encryption type used is not supported by the iDRAC.
<b>Detailed Description</b>	The compressed file cannot be expanded because because the password entered for ZipPassword attribute in the iDRAC does not match with the password used for protecting the compressed file. Or, the encryption type used is not supported by the iDRAC.
<b>Recommended Response Action</b>	Make sure that the password entered for ZipPassword attribute on the iDRAC is same as the password used to encrypt the compressed file and use the default (ZipCrypto) encryption.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## SYS335

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A new hash value is created for the current system configuration.
<b>Detailed Description</b>	A new hash value is created for the current system configuration, and then saved as configuration data.
<b>Recommended Response Action</b>	No response action required.

<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	10627
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS336

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An existing hash value is updated because some system configuration items are changed.
<b>Detailed Description</b>	An existing hash value is updated because some system configuration items are changed. The updated hash value is changed as configuration data.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	10627
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS337

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A new hash value is created for the system software inventory and saved to the corresponding attribute.
<b>Detailed Description</b>	A new hash value is created for the system software inventory and saved to the corresponding attribute.
<b>Recommended Response Action</b>	Noresponse action required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	10627
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS338

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An existing hash value is updated because some system software inventory values are changed. The updated data is saved to the corresponding attribute.
<b>Detailed Description</b>	An existing hash value is updated because some system software inventory values are changed. The updated data is saved to the corresponding attribute.
<b>Recommended Response Action</b>	Noresponse action required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	10627
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS339

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A new hash value is created for the system hardware inventory and saved to the corresponding attribute.
<b>Detailed Description</b>	A new hash value is created for the system hardware inventory and saved to the corresponding attribute.
<b>Recommended Response Action</b>	Noresponse action required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	10627
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*

## SYS432

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the Power Cap value because the PowerCapSetting feature is disabled.
<b>Detailed Description</b>	The Power Cap value cannot be set because the PowerCapSetting feature is disabled.
<b>Recommended Response Action</b>	Enable the PowerCapSetting feature by using the PATCH operation on the Redfish OemAttributes URL, and then retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS433

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to upload the server configuration profile data because the file type used for the data file is not in the JSON or XML format.
<b>Detailed Description</b>	The server configuration profile data cannot be uploaded because the file type used for the data file is not in the JSON or XML format.
<b>Recommended Response Action</b>	Make sure that the file format used is of JSON or XML format, and then retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS434

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to upload the firmware image because the file extension is not supported.
<b>Detailed Description</b>	The operation cannot be completed because the uploaded firmware image file extension is not supported.
<b>Recommended Response Action</b>	Make sure to use a valid firmware image and retry the operation. For information about the supported file extension types, see the Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS435

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the BIOS configuration data either because the system inventory is not collected, Lifecycle Controller Wipe operation is performed, or because of a system error.
<b>Detailed Description</b>	The BIOS configuration data cannot be retrieved either because the system inventory is not collected, Lifecycle Controller Wipe operation is performed, or because of a system error.
<b>Recommended Response Action</b>	Enable the Lifecycle Controller CSIOR (Collect System Inventory on Restart) feature, collect the system inventory, and then retry the operation. To enable CSIOR and Lifecycle Controller respectively perform the PATCH operation for these attributes on the Redfish OemAttributes URL.
<b>Category</b>	Configuration (SYS = System Info)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SYS436

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the job because the Start Time entered is invalid.
<b>Detailed Description</b>	The job cannot be created because the Start Time entered is invalid.
<b>Recommended Response Action</b>	Enter the Start Time in the String format, and then retry the operation For example, YYYY-MM-DDTHH:MM:SS. For more information about recommended Start Time format, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## SYS8514

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure chassis because the input XML file for chassis configuration is not compliant with the XML schema.
<b>Detailed Description</b>	The chassis cannot be configured because the input XML file for chassis configuration is not compliant with the configuration XML schema.
<b>Recommended Response Action</b>	Make sure that the XML file schema used for chassis configuration is compliant with the schema defined in the Lifecycle Controller XML Schema Guide on the Tech Center support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SYS8515

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure chassis because the input XML file for chassis configuration contains invalid character arg1 at line arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = character</li> <li>• arg2 = line number</li> </ul>
<b>Detailed Description</b>	The chassis cannot be configured because the input XML file for chassis configuration is not compliant with the configuration XML schema.
<b>Recommended Response Action</b>	View the file in any Web browser to check for invalid characters. Delete the invalid characters and make sure that the file is a valid XML file, and is compliant with the configuration XML schema.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SYS8516

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not compliant with the schema nesting check parameters.
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not compliant with the schema nesting check parameters. Only RAID controllers can have nested Component nodes.

<b>Recommended Response Action</b>	Make sure that the XML file schema used for chassis configuration is compliant with the schema defined in the Lifecycle Controller XML Schema Guide on the Tech Center support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SYS8517

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not valid and does not contain the XML root element.
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not valid and does not contain the XML root element.
<b>Recommended Response Action</b>	Open the file in a Web browser to check for the presence of invalid content before an expected root element. Correct the invalid content and make sure that the chassis configuration XML file is compliant to the chassis configuration schema described in the Lifecycle Controller XML Schema Guide available on the Tech Center website.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SYS8518

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not valid and the XML root element is not closed.
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not valid and the XML root element is not closed.
<b>Recommended Response Action</b>	Open the file in a Web browser to check for the presence of invalid content before an expected root element. Correct the invalid content and make sure that the chassis configuration XML file is compliant with the chassis configuration schema described in the Lifecycle Controller XML Schema Guide available on the Tech Center support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SYS8519

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not valid at line arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = line number</li></ul>
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not valid at line identified in the message.
<b>Recommended Response Action</b>	Open the input file in a Web browser to check for the presence of invalid content at the line number identified in the message. Correct the invalid content and make sure that the chassis configuration XML file is compliant with the chassis configuration schema described in the Lifecycle Controller XML Schema Guide available on the Tech Center support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SYS8520

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import the configuration properties of chassis because either the input XML file for importing chassis configuration cannot be opened or is not found.
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because either the input XML file for importing chassis configuration cannot be opened or is not found.
<b>Recommended Response Action</b>	Reset the Chassis Management Controller (CMC) and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SYS8521

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 is not available in this software version.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Feature name</li></ul>
<b>Detailed Description</b>	The feature identified in the message is not available in the current software version.
<b>Recommended Response Action</b>	No response action is required.

## THRM—Thermal Event Messages

### THRM0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The server is currently ignoring the fan speed limit by enabling the Sound Cap thermal profile because of ambient temperature.
<b>Detailed Description</b>	The server is currently ignoring the fan speed limit by enabling the Sound Cap thermal profile because of the ambient temperature.
<b>Recommended Response Action</b>	Make sure that the server is operating within the recommended ambient temperature. After the ambient temperature reduces to the recommended value, the server will revert to the fan speed corresponding to the speed set by the Sound Cap thermal profile.
<b>Category</b>	Configuration (THRM = Thermal)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### THRM0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Sound Cap thermal profile driven fan speed limit has been reinstated because the ambient temperature is within recommended value.
<b>Detailed Description</b>	The Sound Cap thermal profile driven fan speed limit has been reinstated because the ambient temperature is now within the recommended value. To ensure Sound Cap thermal profile based fan speeds are applied, the server has to be operated within the recommended ambient temperature.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (THRM = Thermal)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## THRM0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The server is currently ignoring the fan speed limit that is set by enabling the Sound Cap thermal profile because of thermal cooling constraints.
<b>Detailed Description</b>	The server is currently ignoring the fan speed limit that is set by enabling the Sound Cap thermal profile because of thermal cooling constraints. The server is expected to reinstate the Sound Cap thermal profile based fan speed limit if the server power consumption and/or power management capabilities allows meeting system thermal requirement. PCIe adapters and storage drives are some sub-systems that do not have granular power controls and may limit overall server power reduction to meet server cooling requirements at the limited fan speed.
<b>Recommended Response Action</b>	No response action is required. However, if the situation persists, the system configuration and/or the operating environment is not favorable for this thermal profile. Consider disabling the Sound Cap thermal profile.
<b>Category</b>	Configuration (THRM = Thermal)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## THRM0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Sound Cap thermal profile driven fan speed limit is reinstated because the thermal cooling constraints are within recommended values.
<b>Detailed Description</b>	The System state (power and thermal) is now within compliance limits. Reinstatement of the fan speed limit that is set by the Sound Cap thermal profile is because of the changes in workload, configuration, environmental conditions.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (THRM = Thermal)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## THRM0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Sound Cap thermal profile is enabled.
----------------	---------------------------------------

<b>Detailed Description</b>	Sound Cap thermal profile is enabled. This thermal profile limits the maximum fan speed (less than permitted full fan speed) to limit the acoustical noise level of the server. The server performance will be compromised to maintain stability with limited cooling available in this mode. The server may automatically ignore the fan speed limit that is set by Sound Cap thermal profile temporarily if the server cooling is at risk. However, some configurations may not be covered by this thermal profile. Make sure to monitor log messages to take appropriate actions where necessary and confirm that the server is not under thermal risk while operating in this mode. PCIe device cooling is an example of the most significant risk when operating in the Sound Cap thermal profile.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (THRM = Thermal)

## THRM0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The thermal profile optimization settings is changed to arg1.

**Arguments**

- arg1 = Profile name

**Detailed Description** The thermal profile optimization settings is changed to the type identified in the message.

**Recommended Response Action** No response action is required.

**Category** Configuration (THRM = Thermal)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## THRM0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The type is changed to arg1.

**Arguments**

- arg1 = coolingType

**Detailed Description** The type is changed to as identified in the message. The permitted types are air cooling and liquid cooling.

**Recommended Response Action** No response action is required.

**Category** Configuration (THRM = Thermal)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## THRM0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The fan speed offset is changed to arg1.

**Arguments**

- arg1 = offset name

**Detailed Description** The fan speed offset is changed as identified in the message.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (THRM = Thermal)

## TMP0120

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system inlet temperature is greater than the upper warning threshold.
<b>Detailed Description</b>	Ambient air temperature is too warm.
<b>Recommended Response Action</b>	The maximum ambient temperature supported varies based on the server configuration. Do the following: See the event log data for information about fan failures. Verify the operating environment of the server by viewing the inlet temperatures of the chassis and sleds in the other slots, and also verify the site conditions to identify significant variations from the chassis temperature. Make sure that the iDRAC, BIOS and CPLD firmware versions are up-to-date. For configuration-specific guidance by adding chassis and sleds in the tool to model your server environment, visit the Enterprise Infrastructure Planning Tool page.

## TMP0136

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system is automatically turned off because of insufficient cooling.
----------------	---

<b>Detailed Description</b>	The system is automatically turned off because of insufficient cooling.
<b>Recommended Response Action</b>	Replace the fans that have stopped functioning, or add the minimum number of fans recommended. For more information, see the system Owners Manual available at the support site.
<b>Category</b>	System Health (TMP = Temperature)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2161
<b>LCD Message</b>	Insufficient system cooling detected. Check fans
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## TMP0137

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system cooling is working normally.
<b>Detailed Description</b>	The system cooling is working normally.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (TMP = Temperature)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2163

## TMP0141

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The chassis inlet temperature is greater than the upper warning threshold temperature.

**Detailed Description** The chassis inlet temperature is higher than the upper warning threshold temperature. Ambient air temperature is too warm or one or more fans may have failed.

<b>Recommended Response Action</b>	Review event log for fan failures. Maximum supported ambient temperature varies by configuration. Check system operating environment by assessing neighboring sleds and chassis inlet temperatures and site conditions for significant variations from chassis temperature. Verify that iDRAC and MM firmware are up-to-date.
<b>Category</b>	System Health (TMP = Temperature)

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 exceeded the maximum warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = tempsensor name</li> </ul>
<b>Detailed Description</b>	The enclosure is too hot. A variety of factors can cause the excessive temperature. For example, a fan may have failed, the thermostat may be set too high, or the room temperature may be too hot.
<b>Recommended Response Action</b>	Check for factors that may cause overheating. For example, verify that the enclosure fan is working. You should check the thermostat settings and examine whether the enclosure is located near a heat source. Make sure the enclosure has enough ventilation and that the room temperature is not too hot. Refer to the enclosure documentation for more diagnostic information.

## TMP1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 has crossed the minimum warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = tempsensor name</li> </ul>
<b>Detailed Description</b>	The enclosure is too cold.
<b>Recommended Response Action</b>	Check whether the thermostat setting is too low and whether the room temperature is too cool.
<b>Category</b>	Storage (TMP = Temperature)

## TMP1002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 has exceeded the maximum failure threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = tempsensor name</li> </ul>
<b>Detailed Description</b>	The enclosure is too hot. A variety of factors can cause the excessive temperature. For example, a fan may have failed, the thermostat may be set too high, or the room temperature may be too hot.
<b>Recommended Response Action</b>	Check for factors that may cause overheating. For example, verify that the enclosure fan is working. You should also check the thermostat settings and examine whether the enclosure is located near a heat source. Make sure the enclosure has enough ventilation and that the room temperature is not too hot. Refer to the enclosure documentation for more diagnostic information.

## TMP8500

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	I/O Module arg1 temperature exceeded operating range.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = iom slot name</li></ul>
<b>Detailed Description</b>	The temperature of the I/O Module identified in the message has increased beyond the operational range. Thermal protection shut down the I/O Module. Factors external to the I/O Module may have caused this situation.
<b>Recommended Response Action</b>	Check the chassis event log for fan issues and fix any issues present. If no fan issues are detected, check chassis ambient temperature and make sure the temperature is within operating range. Utilize the RACADM command "racadm getsensorinfo" to check the chassis ambient temperature.
<b>Category</b>	Audit (TMP = Temperature)

## UEFI—UEFI Event Event Messages

### UEFI0000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU Exception Type 0x00: Divide by Zero (Software).
<b>Detailed Description</b>	A CPU type 0x00, divide by zero exception, (type 0x00) occurred in the pre-boot UEFI environment. The software attempted to do a mathematical divide by zero, an illegal operation.
<b>Recommended Response Action</b>	Recently installed hardware or updated software may cause this exception. Update or remove the hardware or software.
<b>Category</b>	System Health (UEFI = UEFI Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2497
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### UEFI0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU Exception Type 0x03: Breakpoint (Software).
<b>Detailed Description</b>	A CPU software breakpoint exception (type 0x03) occurred in the pre-boot UEFI environment. The software used it for debugging purposes.
<b>Recommended Response Action</b>	Recently installed hardware or updated software may cause this exception. Update or remove the hardware or software.

<b>Category</b>	System Health (UEFI = UEFI Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2497
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## UEFI0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU Exception Type 0x06: Invalid Opcode (Software).
<b>Detailed Description</b>	A CPU invalid opcode exception (type 0x06) occurred in the pre-boot UEFI environment. The software attempted to execute invalid code.
<b>Recommended Response Action</b>	Recently installed hardware or updated software may cause this exception. Update or remove the hardware or software.
<b>Category</b>	System Health (UEFI = UEFI Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2497
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## UEFI0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU Exception Type 0x07: Math Coprocessor Not Available (Hardware).
<b>Detailed Description</b>	A CPU math coprocessor not available (type 0x07) exception occurred in the pre-boot UEFI environment.
<b>Recommended Response Action</b>	Recently installed hardware or updated software may cause this exception. Update or remove the hardware or software.
<b>Category</b>	System Health (UEFI = UEFI Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2497
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## UEFI0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU Exception Type 0x08: Double Fault (Software).
<b>Detailed Description</b>	A CPU double fault exception (type 0x08) occurred.
<b>Recommended Response Action</b>	Recently installed hardware or updated software may cause this exception. Update or remove the hardware or software.
<b>Category</b>	System Health (UEFI = UEFI Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2497
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## UEFI0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU Exception Type 0x09: Coprocessor Segment Overrun (Software).
<b>Detailed Description</b>	A CPU coprocessor segment overrun exception (type 0x09) occurred in the pre-boot UEFI environment.
<b>Recommended Response Action</b>	Recently installed hardware or updated software may cause this exception. Update or remove the hardware or software.
<b>Category</b>	System Health (UEFI = UEFI Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2497

<b>Message</b>	Unable to load the firmware from arg1 because of the Secure Boot policy.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = device name</li></ul>
<b>Detailed Description</b>	When the Secure Boot feature is enabled, the system BIOS authenticates each UEFI driver against the Secure Boot policy. If a UEFI driver does not meet the policy criteria, the system BIOS does not load or execute the UEFI driver and displays this message at the end of POST. The Secure Boot policy consists of authorized and unauthorized X.509 certificates; signed drivers must chain to an authorized certificate. The policy may also authorize hash values of individual UEFI driver images. Users can configure the Secure Boot feature and the Secure Boot policy in F2 System Setup > System BIOS > Security Settings page.
<b>Recommended Response Action</b>	If the Secure Boot feature is not desired, disable it in System Setup > System BIOS > Security Settings page. Otherwise, do the following: 1) Make sure the firmware on the failing device is up-to-date. 2) If subsequent failures occur, review the Secure Boot Policy Summary in System Setup > System BIOS > Security Settings page. The device firmware must be authorized by a public key or hash value in the Authorized Signature Database. The public key or hash value must not be present in the Forbidden Signature Database.

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Secure Boot policy has been modified since the last time the system was started.
<b>Detailed Description</b>	The system BIOS logs this message after detecting a change in Secure Boot policy settings. Such a change may result from user configuration or a system BIOS update. Changes to the following settings trigger this message: 1) Secure Boot (Enable/Disable) 2) Secure Boot Policy (Standard/Custom) 3) Platform Key 4) Key Exchange Keys 5) Authorized Signature Database (db) 6) Forbidden Signature Database (dbx).
<b>Recommended Response Action</b>	Review the Secure Boot policy settings in System Setup > System BIOS > Security Settings. If the BIOS was recently updated, check whether the BIOS release notes mention changes to the Secure Boot policy. If policy changes were expected, no action is necessary. Otherwise, modify the Secure Boot policy settings as needed.

## UEFI0284

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import Secure Boot policy data because the format of the data is incompatible with the Secure Boot databases.
<b>Detailed Description</b>	The BIOS cannot accept the Secure Boot policy data from the management console because the format of the data is incompatible with the BIOS Secure Boot databases. Secure Boot policy data consists of a Platform Key (PK), Key Exchange Key (KEK) database, Authorized Signature Database (db), and Forbidden Signature Database (dbx). The contents of PK and KEK must follow the Distinguished Encoding Rules (DER) X.509 certificate format. Each entry in db and dbx must follow the DER X.509 certificate format or consist of a hash value generated by a Secure Hash Algorithm (SHA-256, SHA-384, or SHA-512).
<b>Recommended Response Action</b>	Make sure certificates follow the Distinguished Encoding Rules (DER) X.509 certificate format. Hash values in the Secure Boot policy must be 32 bytes, 48 bytes, or 64 bytes in size. Also make sure the data for the Platform Key (PK) and Key Exchange Key (KEK) database contain only certificates, not hash values. If the import operation includes multiple policy objects (certificates or hash values), determine the failing object by retrying the operation with one object at a time.

## UEFI0285

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to send Secure Boot policy data to iDRAC because of an issue in the iDRAC Shared Memory Architecture (SMA) Intelligent Platform Management Interface (IPMI).
<b>Detailed Description</b>	The BIOS cannot send Secure Boot policy data (certificates and hash values) to iDRAC because of an issue in the iDRAC Shared Memory Architecture (SMA) Intelligent Platform Management Interface (IPMI). This means management consoles will not display the latest Secure Boot policy data because BIOS is not synchronized with iDRAC. Synchronization must occur before using management consoles to configure Secure Boot policy data.
<b>Recommended Response Action</b>	Do one of the following: 1) Remove input power from the system, wait for 30 seconds, and re-apply input power. Turn on the system. 2) Update the iDRAC firmware on the system.

<b>Message</b>	An add-in PCIe card with external USB ports that do not support the disabling of USB functionality is either detected or the BIOS is unable to disable the USB functionality. The Boot operation will continue without enforcing security on the card(s).
<b>Detailed Description</b>	An add-in PCIe card with external USB ports that do not support the disabling of USB functionality is either detected or the BIOS is unable to disable the USB functionality. The Boot operation will continue without enforcing security on the card(s).
<b>Recommended Response Action</b>	Do one of the following: 1) Turn off the server, 1a) Disconnect the input power, reinstall the add-in card, and then reconnect to the power source. 1b) Turn on the server. If the issue persists, Try again after updating the add-in card firmware to a latest version. If the issue still persists, the add-in card may not support disabling the USB ports functionality. Contact the card vendor, if necessary.

## UEFI0399

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the Transport Layer Security (TLS) or Secure Socket Layer (SSL) handshake operation. The issue information code: arg1, arg2, Library arg3, Function arg4, and Issue cause arg5.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Error Details State</li> <li>• arg2 = Issue Code</li> <li>• arg3 = Library Name</li> <li>• arg4 = Function Name</li> <li>• arg5 = Issue Reason</li> </ul>
<b>Detailed Description</b>	Unable to complete the Transport Layer Security (TLS) or Secure Socket Layer (SSL) handshake operation. Issue related information is as identified in the message. TLS (Transport Layer Security, whose predecessor is SSL) is the standard security technology for establishing an encrypted link between a web server and a web client, such as a browser or an app. A handshake is a process

that enables the TLS/SSL client and server to establish a set of secret keys with which they can communicate. During this process, the client and server: 1. Agree on the version of the protocol to use. 2. Select the cryptographic algorithm to be used. 3. Authenticate each other by exchanging and validating digital certificates. If the TLS/SSL handshake succeeds then the TLS/SSL client and server securely transfers data to each other. Else, if a TLS/SSL handshake failure occurs then the connection is ended.

<b>Recommended Response Action</b>	Do the following and retry the operation: 1) Read through the information provided in the message and initiate necessary action. 2) Make sure that the protocol used by the client is supported by the server. 3) Make sure that the client configuration matches the customer configuration saved on the server.

<b>Message</b>	When TLS is enabled, insecure HTTP boot without TLS is not allowed.
<b>Detailed Description</b>	System BIOS is unable to boot via HTTP protocol (HTTP without TLS) because TLS mode is currently enabled.
<b>Recommended Response Action</b>	It is recommended to use HTTP boot over TLS for better security. To enable HTTP over TLS, 1) Set TLS Authentication Mode from None to desired mode in Network Settings > HTTP Device Settings > TLS Authentication Configuration 2) Import appropriate certificate in Root Certificate Configuration under same page. 3) HTTP boot URI should starts with https:// and configure necessary network environment. Alternatively, change TLS Authentication Mode to None to disable TLS. However, please note that HTTP without TLS is not secure.

## UEFI0448

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to fully homogeneously interleave Compute Express Link (CXL) memory because the CXL hardware is incorrectly configured or has issues.
<b>Detailed Description</b>	BIOS cannot initialize the server to fully homogeneously interleave CXL memory together because the CXL hardware is incorrectly configured or has issues. The CXL memory is now operating in a mixed homogeneous interleave mode and may no longer be operating at optimal performance and capacity.
<b>Recommended Response Action</b>	Do the following: 1) Check the CXL memory configuration and ensure that it complies with the configurations in the Installation and Service Manual for your model. 2) Check for CXL event messages that may indicate hardware issues and follow the recommended actions for those messages.

## VDR—Virtual Disk Event Messages

### VDR1

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 failed.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = VD Name</li> </ul>
<b>Detailed Description</b>	A storage component such as a physical disk or an enclosure has failed. The failed component may have been identified by the controller while performing a task such as a rescan or a check consistency.
<b>Recommended Response Action</b>	Replace the failed component. You can identify which component has failed by locating the component that has a red "X" for its status. Perform a rescan after replacing the failed component.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	4353
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LCD, Chassis Event Proxy*

## VDR10

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Formatting the arg1 has started.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = VD Name</li></ul>
<b>Detailed Description</b>	This alert is provided for informational purposes.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	4355
<b>OMSA Event ID</b>	2059
<b>OMSA Trap ID</b>	120100

## VDR103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hot Spare Protection policy deviation with severity set at Critical level occurred for arg1.
----------------	--

<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk names</li> </ul>
<b>Detailed Description</b>	The number of hot spares available for the virtual disks identified in the message are not compliant with Hot Spare Protection policy, whose severity is set at Critical level.
<b>Recommended Response Action</b>	Make appropriate assignments of hotspares to meet the policy.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Critical
<b>OMSA Event ID</b>	2385
<b>OMSA Trap ID</b>	120400
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully secured arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk name</li> </ul>
<b>Detailed Description</b>	The secure virtual disk operation was successful on the security capable virtual disk identified in the message. A security capable virtual disk is created using only Self-Encrypting Drives (SED).
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2393
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VDR105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 on power save mode drives is available.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk name</li> </ul>
<b>Detailed Description</b>	Virtual Disk creation using power save mode drives successfully completed and the Virtual Disk identified in the message is ready for use.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational

<b>OMSA Event ID</b>	2403
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 on spun down power save mode drives is not available.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk name</li> </ul>
<b>Detailed Description</b>	This alert is generated after successfully configuring a virtual disk on at least one spundown drive. The virtual disk creation is not yet complete on the remaining spundown drives because the drives are still spinning up.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2404
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully resized Controller Enhanced cache (arg1).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk name</li> </ul>
<b>Detailed Description</b>	The Controller Enhanced cache identified in the message was successfully resized.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2412
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR108

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully created Controller Enhanced cache (arg1).
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = virtual disk name</li></ul>
<b>Detailed Description</b>	The Controller Enhanced cache identified in the message was successfully created.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2413
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR109

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully deleted Controller Enhanced cache (arg1).
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = virtual disk name</li></ul>
<b>Detailed Description</b>	The Controller Enhanced cache identified in the message was successfully deleted.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2414
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR11

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 has started initializing.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = virtual disk</li></ul>
<b>Detailed Description</b>	This message is generated after initialization of a virtual disk starts.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)

<b>Severity</b>	Informational
<b>Trap/EventID</b>	4355
<b>OMSA Event ID</b>	2061
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log

## VDR110

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unrecoverable storage medium error detected on arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk name</li> </ul>
<b>Detailed Description</b>	This alert is generated when an unrecoverable storage medium error is detected on the virtual disk. This error can be a prelude to the physical disk becoming non-functional.
<b>Recommended Response Action</b>	Make sure a hot spare to the Virtual Disk identified in the message is available and back up the data on the virtual disk.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Critical
<b>OMSA Event ID</b>	2417
<b>OMSA Trap ID</b>	120400
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR111

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Corrected disk storage medium error on arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk name</li> </ul>
<b>Detailed Description</b>	The controller corrected a disk storage medium error on one of the participating physical disks of the virtual disk identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2418
<b>OMSA Trap ID</b>	120100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR112

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Deleted the arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = virtual disk</li></ul>
<b>Detailed Description</b>	The controller removed a virtual disk because of a delete virtual disk operation or a reset configuration operation.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## VDR113

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Controller preserved cache was discarded by user for arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = virtual disk</li></ul>
<b>Detailed Description</b>	This message occurs if the controller pinned cache is discarded for a virtual disk by user.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>LCD Message</b>	Cache discarded for a virtual disk
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, LC Log*, LCD

## VDR50

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Background Initialization (BGI) completed with uncorrectable errors on arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk</li> </ul>
<b>Detailed Description</b>	The background initialization task encountered errors that cannot be corrected. The virtual disk contains physical disks that have unusable disk space or disk errors that cannot be corrected.
<b>Recommended Response Action</b>	Review other messages to identify whether the physical disk that has errors. If the virtual disk is redundant, you can replace the physical disk and continue using the virtual disk. If the virtual disk is non-redundant, you need to recreate the virtual disk after replacing the physical disk. After replacing the physical disk, run a consistency check to verify the data.
<b>Category</b>	Storage (VDR = Virtual Disk)

## VDR56

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Redundancy of arg1 has degraded.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = virtual disk</li></ul>
<b>Detailed Description</b>	This message occurs when a physical disk in the disk group was removed or when a physical disk included in a redundant virtual disk fails. Because the virtual disk is redundant (uses mirrored or parity information) and only one physical disk has failed, the virtual disk can be rebuilt. Typically, the virtual disk (E.g. RAID 6) has multiple redundant disks and there is a problem with one of them.
<b>Recommended Response Action</b>	Replace the missing or failed physical disk.

## VDR93

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The bad block table(s) is cleared because arg1 is initialized.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = VD name</li> </ul>
<b>Detailed Description</b>	The bad block table(s) is cleared because the virtual drive is initialized.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	4355
<b>OMSA Event ID</b>	2389
<b>OMSA Trap ID</b>	120100

<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LCD, Chassis Event Proxy*

## VDR94

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Controller preserved cache was recovered for arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = virtual disk</li> </ul>
<b>Detailed Description</b>	This message occurs if the controller pinned cache is recovered.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	4355
<b>OMSA Event ID</b>	2381
<b>OMSA Trap ID</b>	75100
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LCD, Chassis Event Proxy*

## VDR95

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to log block arg1.Bad block table on arg2 is full.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = arg</li> <li>arg2 = VD Name</li> </ul>
<b>Detailed Description</b>	This alert message occurs if the virtual disk has bad blocks.
<b>Recommended Response Action</b>	Replace the disk in the Virtual disk, generating this alert and restore from backup. You may have lost data.
<b>Category</b>	Storage (VDR = Virtual Disk)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	4354
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log

## VF—vFlash Media Event Messages

### VF001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Command successful.
<b>Detailed Description</b>	The command was successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	General failure.
<b>Detailed Description</b>	The operation did not complete successfully because of an internal issue with the firmware.
<b>Recommended Response Action</b>	Do one of the following: 1) Rerun the command after about 2 minutes 2) Reset iDRAC and rerun the command.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Missing required parameter: arg1
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = parameter name</li> </ul>
<b>Detailed Description</b>	The required input parameter identified in the message is missing.
<b>Recommended Response Action</b>	Refer the iDRAC and Lifecycle Controller User Guides for the required input parameters for this method.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid value for the parameter: arg1
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = parameter name</li> </ul>

<b>Detailed Description</b>	The value of the input parameter identified in the message is not a valid value.
<b>Recommended Response Action</b>	Refer the iDRAC and Lifecycle Controller User Guides for the required input parameters for this method.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Empty partition creation successful
<b>Detailed Description</b>	A partition with no image was created.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Empty partition creation failed
<b>Detailed Description</b>	Creating a partition without image failed.
<b>Recommended Response Action</b>	Do one of the following: 1) Rerun the command after about 2 minutes 2) Reset iDRAC and rerun the command.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF0060

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the requested operation. Make sure the SD card is inserted and enabled.
<b>Detailed Description</b>	The SD card was not detected. Therefore, the requested operation cannot be completed.
<b>Recommended Response Action</b>	Verify whether the SD card is inserted and enabled, then re-try.
<b>Category</b>	System Health (VF = vFlash Media)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Image partition creation successful
<b>Detailed Description</b>	A partition with an image was created.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Image partition creation did not complete successfully.
<b>Detailed Description</b>	Creating a partition with an image did not complete successfully.
<b>Recommended Response Action</b>	Do one of the following: 1) Rerun the command after about 2 minutes, 2) Reset iDRAC and rerun the command.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Partition formatting successful

**Detailed Description** The specified partition was formatted.

**Recommended Response Action** No response action is required.

**Category** Configuration (VF = vFlash Media)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Partition formatting did not complete successfully.

**Detailed Description** Formatting the specified partition did not complete successfully.

**Recommended Response Action** Do one of the following: 1) Rerun the command after about 2 minutes 2) Reset iDRAC and rerun the command.

**Category** Configuration (VF = vFlash Media)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Wrong password

**Detailed Description** The specified password was not correct.

**Recommended Response Action** Verify the password supplied.

**Category** Configuration (VF = vFlash Media)

**Severity** Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SD card not present
<b>Detailed Description</b>	There is no SD card detected.
<b>Recommended Response Action</b>	Check the SD card slot.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SD card locked
<b>Detailed Description</b>	The SD card is locked by another operation.
<b>Recommended Response Action</b>	Rerun the command after about 2 minutes.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	vFlash not disabled.
<b>Detailed Description</b>	Enabling vFlash was not successful because the vFlash feature is not disabled.

<b>Recommended Response Action</b>	The vFlash is enabled and any attempt to enable it will not be successful.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	vFlash not enabled.
<b>Detailed Description</b>	Disabling vFlash was not successful because the vFlash feature is not enabled.
<b>Recommended Response Action</b>	The vFlash is disabled and an attempts to disable it will not be successful.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SD card is read only
<b>Detailed Description</b>	The SD card is not writable.
<b>Recommended Response Action</b>	Check the write-protection tab of the SD card.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SD card not initialized
<b>Detailed Description</b>	The SD card is not initialized.
<b>Recommended Response Action</b>	In order to perform this operation, first initialize the SD Card.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid partition index
<b>Detailed Description</b>	The specified partition index is not valid for the command.
<b>Recommended Response Action</b>	Check that the partition exists.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Not enough space on SD card
<b>Detailed Description</b>	The SD card is full.
<b>Recommended Response Action</b>	Check all the partitions, delete the ones that are not necessary and try this operation again.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Exceeded maximum number of partitions
<b>Detailed Description</b>	The number of partitions exceeded the maximum number allowed on a SD card.
<b>Recommended Response Action</b>	This SD card has reached the partition limit. Delete any partitions that are not necessary and try again.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Exceeded maximum partition size of 4GB
<b>Detailed Description</b>	The size specified is greater than the maximum allowed for a partition.
<b>Recommended Response Action</b>	Try a partition size that is smaller than 4GB and the available space on the card.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Partition size below minimum
<b>Detailed Description</b>	The size specified is lower than the minimum allowed for a partition.
<b>Recommended Response Action</b>	Try a larger partition size.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Partition label not unique

**Detailed Description** Partition with this label exists. Duplicate labels are not supported.

**Recommended Response Action** Try a different partition label.

**Category** Configuration (VF = vFlash Media)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Partition locked

**Detailed Description** The partition is locked by another operation.

**Recommended Response Action** Wait for the partition to be unlocked and check the partition status to see if it is attached.

**Category** Configuration (VF = vFlash Media)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Partition is read only

**Detailed Description** Partition is read only.

**Recommended Response Action** To perform a write operation on this partition, change its access type to read-write and try this operation again.

**Category** Configuration (VF = vFlash Media)

**Severity** Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF026

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Partition index in use
<b>Detailed Description</b>	This partition index has already been used.
<b>Recommended Response Action</b>	This partition index has already been used. Try a different index.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF027

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Partition already attached
<b>Detailed Description</b>	This partition is attached and attempts to attach it will fail.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF028

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Partition already detached
<b>Detailed Description</b>	This partition is detached and attempts to detach it will fail.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF029

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Insufficient permission
<b>Detailed Description</b>	The user account credentials provided for this vFlash operation do not have the correct privileges. Virtual Media Access privilege is required to perform vFlash SD Card media operations.
<b>Recommended Response Action</b>	Use a different user account the has Virtual Media Access privilege.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF030

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid hash type
<b>Detailed Description</b>	The specified hash type is not a valid type.
<b>Recommended Response Action</b>	Provide a valid hash type.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid partition label.
<b>Detailed Description</b>	The specified partition label is not a valid label.
<b>Recommended Response Action</b>	Try a label that complies with the standards for an OS volume label.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF032

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid partition type.
<b>Detailed Description</b>	The specified partition type is not a valid type.
<b>Recommended Response Action</b>	Try a partition type that is supported.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF033

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid partition format type.
<b>Detailed Description</b>	The specified format type is not a valid type.
<b>Recommended Response Action</b>	Try a format type that is supported.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF034

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Invalid partition access type.

**Detailed Description** The specified partition access type is not a valid type.

**Recommended Response Action** Try a partition access type that is supported.

**Category** Configuration (VF = vFlash Media)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF035

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Invalid image.

**Detailed Description** The image file is not valid.

**Recommended Response Action** Check the image file provided.

**Category** Configuration (VF = vFlash Media)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VF036

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Attach partition successful.

**Detailed Description** The partition was attached.

**Recommended Response Action** No response action is required.

**Category** Configuration (VF = vFlash Media)

**Severity** Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VF037

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Attach partition operation did not complete successfully.
<b>Detailed Description</b>	The attaching partition operation did not complete successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## VFL—vFlash Event Event Messages

### VFL0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The vFlash SD Card operation is successful.
<b>Detailed Description</b>	The requested operation for the vFlash SD Card completed successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### VFL0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to query the vFlash media status.
<b>Detailed Description</b>	The status of vFlash SD Card or the vFlash media partition cannot be obtained, because some of the iDRAC services are busy.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, restart the iDRAC and retry the operation. If the issue continues to persist, contact your service provider.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## VFL0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Partition arg1 does not exist.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = partition number</li></ul>
<b>Detailed Description</b>	The partition number identified in the message cannot be queried, because identified partition does not exist.
<b>Recommended Response Action</b>	Use a partition number of an existing partition for the requested operation.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the vFlash media operation.
<b>Detailed Description</b>	The requested vFlash media operation could not be performed, because some of the iDRAC services are busy.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, restart the iDRAC and retry the operation. If the issue continues to persist, contact your service provider.
<b>Category</b>	Configuration (VFL = vFlash Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No vFlash partitions exist.
<b>Detailed Description</b>	There are no vFlash partitions available currently for the display.
<b>Recommended Response Action</b>	No response action is required.

<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0007

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No vFlash SD card is present.
<b>Detailed Description</b>	The operations could not be completed because a vFlash SD Card is not detected.
<b>Recommended Response Action</b>	Confirm an SD Card is present in the vFlash SD Card reader slot. Otherwise, insert an SD Card and retry the operation.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0009

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	vFlash media is currently in use by another operation.
<b>Detailed Description</b>	Unable to access the vFlash media, because another operation is currently using the vFlash media.
<b>Recommended Response Action</b>	Wait until the vFlash media is available for the requested operation, and then retry the operation.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0010

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An operation is in progress on the SD card.
----------------	---

<b>Detailed Description</b>	Another operation is currently in progress on the SD card.
<b>Recommended Response Action</b>	Wait until the current operation is completed, and then retry the requested operation.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	vFlash media is not disabled.
<b>Detailed Description</b>	The vFlash media is not disabled.
<b>Recommended Response Action</b>	Disable the vFlash media by running the command <code>racadm set idrac.vFlashSD.Enable 0</code> .
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	vFlash media is not enabled.
<b>Detailed Description</b>	The vFlash media is not enabled.
<b>Recommended Response Action</b>	Enable the vFlash media by running the command <code>racadm set idrac.vFlashSD.Enable 1</code> .
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The vFlash SD Card is in read-only mode.
<b>Detailed Description</b>	The request could not be successfully completed, because the vFlash SD Card is in read-only mode. Write operations cannot be performed on the card.
<b>Recommended Response Action</b>	Change the access mode on the vFlash SD Card to read-write.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The vFlash SD card is not initialized.
<b>Detailed Description</b>	The vFlash SD card is not initialized. Either the card is not properly formatted or it may not be supported.
<b>Recommended Response Action</b>	Format the vFlash SD card by running the command "racadm vflashsd initialize". Make sure that the card is supported by contacting your service provider for a list of supported SD card types.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	vFlash media partition is of read-only type.
<b>Detailed Description</b>	The request could not be successfully completed, because the vFlash SD Card partition is in read-only mode. Write operations cannot be performed on the card partition.
<b>Recommended Response Action</b>	Change the partition access type to read-write by running the command racadm set idrac.vFlashPartition.<index>.accesstype 1.
<b>Category</b>	Configuration (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VFL0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** vFlash media partition is already in attached state.

**Detailed Description** The requested vFlash media partition is already attached to the host operating system.

**Recommended Response Action** No response action is required.

**Category** Configuration (VFL = vFlash Event)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VFL0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to perform the vFlash media operation because the vFlash media partition is corrupted.

**Detailed Description** The file system on the specified vFlash media partition could not be recognized. Data on the partition may be corrupted.

**Recommended Response Action** Format the vFlash SD Card using the racadm vflashsd initialize command and retry the operation.

**Category** System Health (VFL = vFlash Event)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VFL0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The requested operation is in progress.

**Detailed Description** The requested operation is currently in progress.

**Recommended Response Action** Wait for the requested operation to complete.

<b>Category</b>	Configuration (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The vFlash media partition is already in detached state.
<b>Detailed Description</b>	The requested vFlash media partition is already detached from the host operating system.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	vFlash SD card is not ready.
<b>Detailed Description</b>	The vFlash SD card is currently in use by another operation.
<b>Recommended Response Action</b>	Wait for the current vFlash SD card operation to finish, and they retry.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VFL0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	One of the vFlash SD Card partitions is already attached to the host operating system.
----------------	--

<b>Detailed Description</b>	The requested operation cannot be performed if one of the vFlash SD cards is in an attached state.
<b>Recommended Response Action</b>	Detach the vFlash SD Card partitions by running the racadm command "racadm set iDRAC.vflashpartition.<partition number>.attachstate 0". and retry the operation.
<b>Category</b>	System Health (VFL = vFlash Event)

## VLT0231

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The mezzanine card arg1 arg2 voltage is less than the lower critical threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = number</li> <li>• arg2 = name</li> </ul>
<b>Detailed Description</b>	System hardware detected an over voltage or under voltage condition.If multiple voltage exceptions occur consecutively the system may power down in failsafe mode.
<b>Recommended Response Action</b>	1) Review system logs for power supply exceptions.2) Reseat the mezzanine card.3) If the problem persists, contact technical support. Refer to the product documentation to choose a convenient contact method.
<b>Category</b>	System Health (VLT = Voltage)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2169
<b>Redfish Event Type</b>	Alert

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VLT0232

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The mezzanine card arg1 arg2 voltage is greater than the upper warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = number</li> <li>• arg2 = name</li> </ul>
<b>Detailed Description</b>	System hardware detected an over voltage or under voltage condition.If multiple voltage exceptions occur consecutively the system may power down in failsafe mode.
<b>Recommended Response Action</b>	1) Review system logs for power supply exceptions.2) Reseat the mezzanine card.3) If the problem persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

## VLT0300

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU arg1 arg2 voltage is less than the lower warning threshold.
----------------	---

<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = number</li> <li>• arg2 = name</li> </ul>
<b>Detailed Description</b>	Low voltages may be the result of a problem with the voltage regulator or a problem with the processor. The low voltage may cause the processor to fail to operate.
<b>Recommended Response Action</b>	1) Turn system off and remove input power for one minute. Re-apply input power and turn system on. 2) Make sure the processor is seated correctly. 3) If the issue still persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

## VLT400

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 sensor has failed with a value arg2 Volts.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = sensor name</li> <li>arg2 = voltage</li> </ul>
<b>Detailed Description</b>	A voltage sensor identified in the message may have failed. This condition can cause system performance issues and degradation in the monitoring capability of the system.
<b>Recommended Response Action</b>	Do one of the following to resolve the issue: 1) Verify the Embedded System Management (ESM) Log for any sensor related faults. If there is a failed sensor, replace the system board. 2) Re-configure the system to a minimum configuration, and verify if the sensor displays a normal value, otherwise replace the system board. 3) If the sensor identified is a processor voltage sensor, remove the processor module and inspect processor socket, and replace if required. If the issue persists, contact your service provider.

## VME—Virtual Media Event Messages

### VME0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Virtual Console session started.
<b>Detailed Description</b>	Virtual Console session started.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (VME = Virtual Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### VME0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Virtual Media session started.
----------------	--------------------------------

<b>Detailed Description</b>	Virtual Media session started.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (VME = Virtual Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VME0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Virtual Console session fails to start.
<b>Detailed Description</b>	Virtual Console session fails to start.
<b>Recommended Response Action</b>	Retry the Virtual Console session initiation.
<b>Category</b>	Audit (VME = Virtual Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VME0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Virtual Media session fails to start.
<b>Detailed Description</b>	Virtual Media session fails to start.
<b>Recommended Response Action</b>	Retry the Virtual Media session initiation.
<b>Category</b>	Audit (VME = Virtual Media)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## VME0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Virtual Console session exited.
<b>Detailed Description</b>	Virtual Console session exited.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (VME = Virtual Media)

## VME0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Virtual Media session created.

**Detailed Description** Virtual Media session created.

**Recommended Response Action** No response action is required.

**Category** Audit (VME = Virtual Media)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VRM—Virtual Console Event Messages

### VRM0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** No Virtual Media devices are currently connected.

**Detailed Description** No virtual media was found to disconnect.

**Recommended Response Action** No response action is required.

**Category** System Health (VRM = Virtual Console)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

### VRM0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to disconnect Virtual Media devices.

**Detailed Description** The virtual media could not be disconnected. Possible reason is that it might be in use.

**Recommended Response Action** No response action is required.

<b>Category</b>	System Health (VRM = Virtual Console)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## VRM0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Virtual Media image server operation successful
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VRM = Virtual Console)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## VRM0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Remote Image is now Configured

**Detailed Description** The Remote Image is now configured and ready to use.

**Recommended Response Action** No response action is required.

**Category** System Health (VRM = Virtual Console)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VRM0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to determine current Remote Image state.

**Detailed Description** Racadm tool failed to obtain the data.

**Recommended Response Action** No response action is required.

**Category** System Health (VRM = Virtual Console)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## VRM0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Virtual Media is detached or Virtual Media devices are already in use.

**Detailed Description** Virtual Media is detached or Virtual Media devices are already in use.

**Recommended Response Action** Change the Virtual Media Attach Mode to Attach or Auto-Attach. Stop existing Virtual Media sessions and retry the operation.

**Category** System Health (VRM = Virtual Console)

**Severity** Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS—Witness Server Event Messages

### WNS0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The FAN module for cooling the Witness Server is missing from the Chassis.
<b>Detailed Description</b>	The FAN module for cooling the Witness Server is missing from the Chassis.
<b>Recommended Response Action</b>	Install the FAN module into the chassis to allow cooling of Witness Server.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3241
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### WNS0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The FAN module for cooling the Witness Server is installed.
<b>Detailed Description</b>	The FAN module for cooling the Witness Server is installed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	3243
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness Server CPU is throttled.
<b>Detailed Description</b>	The Witness Server processor temperature increased beyond the threshold value. The Processor thermal protection triggered the CPU throttle action. Factors external to the processor may have induced this issue.
<b>Recommended Response Action</b>	Do the following: 1) Review the LC or SEL log data to check if there is any fan failure. If yes, replace the fan. 2) Else, check the inlet temperature by running RACADM GetSensorInfo command or iDRAC GUI Temperature page.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The CPU of the Witness Server is operating normally.
<b>Detailed Description</b>	The CPU of the Witness Server is operating normally.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness Node CPU has a thermal trip (over-temperature) event.
<b>Detailed Description</b>	The Witness Server processor temperature increased beyond the threshold value. The Processor thermal protection triggered the system shut down. Factors external to the processor may have induced this issue.
<b>Recommended Response Action</b>	Do the following: 1) Review the LC or SEL log data to check if there is any fan failure. If yes, replace the fan. 2) Else, check the inlet temperature by running RACADM GetSensorInfo command or the iDRAC GUI Temperature page.
<b>Category</b>	System Health (WNS = Witness Server)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness Server Heart Beat failure is detected.
<b>Detailed Description</b>	The Witness Server OS is not responding to Heart Beat sent from Chassis Manager.
<b>Recommended Response Action</b>	Check the Witness Node is booted to OS. Make sure it boot to OS successfully by restarting it.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3241
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness Server POST code failure is detected.
<b>Detailed Description</b>	The Witness Server BIOS reported POST code failure.
<b>Recommended Response Action</b>	Do one of the following:1) Restart Witness Server using RACADM WitnessServerPowerAction reset command. Similarly iDRAC GUI or Redfish options can be found in iDRAC User Guide.2) If the failure persists, refer Platform Technical guide for Witness BIOS POST code description and take appropriate steps to resolve the issue.3) If the failure persists , reach out the tech support team.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3241
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness Server OS image failed to boot.
<b>Detailed Description</b>	The Witness Server OS image is not booting. This could be due to invalid/bad image.
<b>Recommended Response Action</b>	Restart Witness Server using RACADM WitnessServerPowerAction reset command. Similarly iDRAC GUI or Redfish option can be found in iDRAC User Guide. If the failure persists, call Tech support for reimaging the OS on M.2 device.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3241
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The fan of the Witness Server has detected an airflow direction mismatch with the chassis airflow.
<b>Detailed Description</b>	The fan of the Witness Server has detected an airflow direction mismatch with the chassis airflow.
<b>Recommended Response Action</b>	Install the FAN having matching airflow direction with Chassis Airflow. If the failure persists call Tech Support.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Witness Server detected an issue in its voltage.
<b>Detailed Description</b>	Witness Server detected an issue in its voltage.
<b>Recommended Response Action</b>	Restart the Witness Server by running the following RACADM command at the Command Line Interface (CLI): RACADM WitnessServerPowerAction reset. Similarly, iDRAC GUI or Redfish option can also be used to restart the Witness Server. If the issue persists, contact your service provider.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Critical

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness server recovered from a voltage failure issue.
<b>Detailed Description</b>	The Witness server recovered from a voltage failure issue.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness server recovered from a heartbeat issue.
<b>Detailed Description</b>	The Witness server recovered from a heartbeat issue.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness server recovered from a POST code failure issue.
<b>Detailed Description</b>	The Witness server recovered from a POST code failure issue.

<b>Recommended Response Action</b>	The Witness server recovered from a POST code failure issue.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness server operating system is not responding to the heartbeat triggered by the Chassis Manager.
<b>Detailed Description</b>	The Witness server operating system is not responding to the heartbeat triggered by the Chassis Manager.
<b>Recommended Response Action</b>	Make sure that the Witness server is booted to the operating system by restarting it.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The direction of flow of air in the Witness server is same as the direction in the Chassis.
<b>Detailed Description</b>	The direction of flow of air in the Witness server is same as the direction in the Chassis.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Power-on operation of the Witness server is started by a remote iDRAC user.
<b>Detailed Description</b>	The Power-on operation of the Witness server is started by a remote iDRAC user.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS1002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Power-off operation of the Witness server is started by a remote iDRAC user.
<b>Detailed Description</b>	The Power-off operation of the Witness server is started by a remote iDRAC user.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS1003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Hard Reset operation of the Witness server is started by a remote iDRAC user.
<b>Detailed Description</b>	The Hard Reset operation of the Witness server is started by a remote iDRAC user.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## WNS1004

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The Virtual Reseat operation of the Witness server is started by a remote iDRAC user.

**Detailed Description** The Virtual Reseat operation of the Witness server is started by a remote iDRAC user.

**Recommended Response Action** No response action is required.

**Category** Audit (WNS = Witness Server)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## WNS1005

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The Graceful Shutdown operation of the Witness server is started by a remote iDRAC user.

**Detailed Description** The Graceful Shutdown operation of the Witness server is started by a remote iDRAC user.

**Recommended Response Action** No response action is required.

**Category** Audit (WNS = Witness Server)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## WNS1006

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The Witness Server is not installed in the chassis.

**Detailed Description** The Witness Server is not installed in the chassis.

**Recommended Response Action** No response action is required.

**Category** Audit (WNS = Witness Server)

**Severity** Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## WNS1007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Witness Server is installed in the chassis.
<b>Detailed Description</b>	The Witness Server is installed in the chassis.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (WNS = Witness Server)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

## Getting help

You can get help with your Dell product by contacting Dell, or send feedback on product documentation.

### Topics:

- [Recycling or End-of-Life service information](#)
- [Contacting Dell](#)

## Recycling or End-of-Life service information

Take back and recycling services are offered for this product in certain countries. If you want to dispose of system components, visit the [How to Recycle](#) page and select the relevant country.

## Contacting Dell

Dell provides online and telephone based support and service options. If you do not have an active internet connection, you can find Dell contact information on your purchase invoice, packing slip, bill or Dell product catalog. The availability of services varies depending on the country and product, and some services may not be available in your area. To contact Dell for sales, technical assistance, or customer service issues:

### Steps

1. Go to the [Support](#) site.
2. Select your country from the drop-down menu on the lower right corner of the page.
3. For customized support:
  - a. Enter the system Service Tag in the **Enter a Service Tag, Serial Number, Service Request, Model, or Keyword** field.
  - b. Click **Submit**.  
The support page that lists the various support categories is displayed.
4. For general support:
  - a. Select your product category.
  - b. Select your product segment.
  - c. Select your product.  
The support page that lists the various support categories is displayed.
5. For contact details of Dell Global Technical Support:
  - a. Click [Contact Technical Support](#).
  - b. The **Contact Technical Support** page is displayed with details to call, chat, or e-mail the Dell Global Technical Support team.

## Documentation resources

This section provides information about the documentation resources for your system.

To view the document that is listed in the documentation resources table:

- From the Dell support site:
  1. Click the documentation link that is provided in the Location column in the table.
  2. Click the required product or product version.

 **NOTE:** To locate the product name and model, see the front of your system.

3. On the Product Support page, click **Manuals & documents**.
- Using search engines:
    - Type the name and version of the document in the search box.

**Table 1. Other documentation resources for your system**

Task	Document	Location
Setting up your system	For more information about installing and securing the system into a rack, see the Rail Installation Guide included with your rail solution.  For information about setting up your system, see the <i>Getting Started Guide</i> document that is shipped with your system.	<a href="#">PowerEdge Server Manuals</a>
Configuring your system	For information about the iDRAC features, configuring and logging in to iDRAC, and managing your system remotely, see the Integrated Dell Remote Access Controller User's Guide.  For information about understanding Remote Access Controller Admin (RACADM) subcommands and supported RACADM interfaces, see the RACADM CLI Guide for iDRAC.  For information about Redfish and its protocol, supported schema, and Redfish Eventing implemented in iDRAC, see the Redfish API Guide.  For information about iDRAC property database group and object descriptions, see the Attribute Registry Guide.  For information about Intel QuickAssist Technology, see the Integrated Dell Remote Access Controller User's Guide.	<a href="#">PowerEdge Server Manuals</a>
	For information about earlier versions of the iDRAC documents.  To identify the version of iDRAC available on your system, on the iDRAC web interface, click <b>? &gt; About</b> .	<a href="#">iDRAC Manuals</a>

**Table 1. Other documentation resources for your system (continued)**

Task	Document	Location
	For information about updating drivers and firmware, see the Methods to download firmware and drivers section in this document.	<a href="#">Drivers</a>
