## PWR2262

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Intel Management Engine has reported an internal system error.
<b>Detailed Description</b>	The Intel Management Engine is unable to utilize the PECI over DMI facility.
<b>Recommended Response Action</b>	Look for the PWR2264 "normal system operation" message in the Lifecycle Log after the PWR2262 entry. It may take 30 seconds for the message to be logged. If the PWR2264 message does not appear, do the following: Disconnect power from the server and reconnect power. Turn on the server. If the issue persists, contact your service provider.

## PWR8670

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to turn on serverarg1 because the required power arg2 AC Watts exceeds the subsystem Connector Limit arg3 AC Watts for IO modules, Blowers and Servers.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = slot ID</li> <li>• arg2 = power level</li> <li>• arg3 = power limit</li> </ul>
<b>Detailed Description</b>	The server identified in the message cannot be turned on if the Connector Limit for the subsystems identified in the message is exceeded .
<b>Recommended Response Action</b>	Make sure the system operates within the subsystem Connector Limit for the components specified. To review power budget information select Chassis Overview -> Power -> Budget Status. Turn off unused components within the subsystem to make power available for the server to turn on or turn off low priority servers and try the operation again.
<b>Category</b>	Audit (PWR = Power Usage)

## PWR8672

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The server in slot arg1 does not have a arg2 mezzanine card in slot arg3.
----------------	---

<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = server slot number</li> <li>• arg2 = card type</li> <li>• arg3 = mezzanine position number</li> </ul>
<b>Detailed Description</b>	The server identified in the message does not have a card in the Mezzanine slot as identified in the message. A mezzanine card position is identified with the following numbers: For quarter-width server, the position number is 1. For half-width server mezzanine C & B maps to position numbers 1 & 2 respectively. For full-width server, mezzanine C & B on the upper- or left part of the server maps to position numbers 1 & 2 respectively. Mezzanine C & B on the lower- or right part of the server maps to position numbers 3 & 4 respectively.
<b>Recommended Response Action</b>	Insert a mezzanine card in the slot identified in the message.

## RAC—RAC Event Event Messages

### RAC001

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The command was successful.

**Detailed Description** The command was successful.

**Recommended Response Action** No response action is required.

**Category** Configuration (RAC = RAC Event)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

### RAC002

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** General failure.

**Detailed Description** An unknown error occurred.

<b>Recommended Response Action</b>	Do one of the following: 1) Rerun the command. 2) Reset iDRAC and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Missing required parameter arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = parameter name</li> </ul>
<b>Detailed Description</b>	One or more required parameters for the method are missing.
<b>Recommended Response Action</b>	Refer to the profile document and provide the required parameters.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid parameter value for arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = parameter</li> </ul>
<b>Detailed Description</b>	The parameter value for the given parameter is invalid.
<b>Recommended Response Action</b>	Provide a valid parameter value for specified parameter.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Mismatch in AttributeName and AttributeValue count.
<b>Detailed Description</b>	The name value pairs do not match in the input specified in the method invocation parameters.
<b>Recommended Response Action</b>	Provide a valid (AttributeName, AttributeValue) pair.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The attribute value cannot be changed because it is of read-only type.
<b>Detailed Description</b>	The attribute value cannot be changed because it is of read-only type.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## RAC0218

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The maximum number of user sessions is reached.
<b>Detailed Description</b>	A maximum of 4 iDRAC Web GUI sessions can be open at any time.
<b>Recommended Response Action</b>	Make sure that the number of active sessions is less than or equal to the threshold limit. To end a current session and start a new session, do one of the following: 1) Log out of iDRAC by using a Graphical User Interface (GUI). 2) End any unused session by running the following RACADM command at the Command Line Interface (CLI): <code>racadm closessn -i [session id]</code> . Warning: Ending a session may abruptly stop any running operation on that specific iDRAC session.

**Applicable Event or Alert Types** CMC—Not Applicable

## RAC030

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** This attribute is dependent on a related attribute that has an incorrect value.

**Detailed Description** This attribute is dependent on a related attribute that has an incorrect value. The related attribute is the parent in a parent-child value dependency relationship and has an affect on what values the child attribute can have.

**Recommended Response Action** Refer to the Lifecycle Controller - Remote Services User Guide or the DCIM iDRAC Card Profile to determine the required values for the related attribute and retry the operation with the appropriate value.

<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## RAC0513

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	There are no virtual disks to be displayed.
<b>Detailed Description</b>	There are no virtual disks to be displayed. There may be no virtual disks created, the controller(s) may not be in RAID mode, or there may be pending creation or deletion jobs that have not completed.
<b>Recommended Response Action</b>	Check the following: 1) Check if the server is turned off. If the server is turned off, turn it on and wait until POST completes. 2) If create virtual disk operation(s) are in a pending state, complete the creation process. To complete the virtual disk(s) creation, go to the Pending Operations page and create a configuration job on the appropriate controller. 3) If delete virtual disk operation(s) are in pending state, then cancel the operation. To cancel delete virtual disk pending operation(s), go to the Pending Operations page and delete all pending operation(s) on the appropriate controller. 4) If the Controller(s) are in HBA mode, switch the controller(s) to RAID mode. To switch controller(s) to RAID mode using the F2 System Setup utility, go to Device Settings > RAID Controller > Controller Management > Advanced Controller Management > Switch to RAID mode.

## RAC0561

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC to CMC/MM communication link is not functioning for agent free monitoring of chassis PCIe slots.
<b>Detailed Description</b>	iDRAC lost connection with CMC/MM proxy component that enables agent free monitoring of PCIe slots. Agent free monitoring will not be supported for Chassis PCIe slots while this connection is not functioning.
<b>Recommended Response Action</b>	Do the following: 1) Check the Lifecycle Log for the subsequent RAC0562 communications restored message that will indicate the link was re-established automatically. 2) If there is no subsequent RAC0562 message in the Lifecycle Log, restart the iDRAC. The iDRAC can be restarted by using the RACADM command line utility and entering "racadm racreset". 3) After the iDRAC has restarted, if the communications link is still not functioning, restart the CMC/MM and check the Lifecycle Log for this link error after the CMC/MM has restarted. 4) If the issue persists, contact your service provider.

## RAC0693

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Pending operations are created for the selected operations on the selected physical disk drives.
<b>Detailed Description</b>	Pending operations are created for the selected operations on the selected physical disk drives.
<b>Recommended Response Action</b>	To view the pending operations, click the Pending Operations button.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC0694

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure the attributes of the selected controller, because Lifecycle Controller is not enabled.
<b>Detailed Description</b>	Unable to configure the attributes of the selected controller, because Lifecycle Controller is not enabled.
<b>Recommended Response Action</b>	To enable Lifecycle Controller, reboot the server. During server startup, press F2 to enter System Setup. Go to iDRAC Settings -> Lifecycle Controller, select Enable, and save the changes. Retry the operation after the server has restarted.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC0695

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform security key operations on the selected controller, because Lifecycle Controller is not enabled.
<b>Detailed Description</b>	Unable to perform security key operations on the selected controller, because Lifecycle Controller is not enabled.
<b>Recommended Response Action</b>	To enable Lifecycle Controller, reboot the server. During server startup, press F2 to enter System Setup. Go to iDRAC Settings -> Lifecycle Controller, select Enable, and save the changes. Retry the operation after the server has restarted.
<b>Category</b>	Configuration (RAC = RAC Event)

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC0696

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the hardware overview information because the server is turned off.
<b>Detailed Description</b>	The iDRAC is unable to retrieve hardware overview related information while the server is turned off.
<b>Recommended Response Action</b>	Turn the server on to view the hardware overview information.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC0697

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Choose to create a job from the existing successful pending operations.
<b>Detailed Description</b>	Choose to create a job from the existing successful pending operations.
<b>Recommended Response Action</b>	Do one of the following: 1) Click Pending Operations button to view pending operations. 2) Click Create Job button to create a configuration job. 3) Click Cancel button to quit job creation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC0698

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to modify USB management settings because the USB device is currently in use.
<b>Detailed Description</b>	Unable to modify USB management settings because the USB device is currently in use.
<b>Recommended Response Action</b>	Wait for the current USB operations to complete and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC0699

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid value for Minimum Fan Speed.
<b>Detailed Description</b>	The value for Minimum Fan Speed must be within the range identified in the Recommended Response Action.
<b>Recommended Response Action</b>	Enter a value between <min>-<max>.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC070

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The SSL Web-Server certificate was successfully restored to factory defaults.
<b>Detailed Description</b>	The SSL Web-Server certificate was successfully restored to factory defaults.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)

## RAC1178

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A USB device is attached to the iDRAC and a configuration XML import operation is in progress.
<b>Detailed Description</b>	A USB device is attached to the iDRAC and a configuration XML import operation is in progress.
<b>Recommended Response Action</b>	Wait until the configuration XML import operation has completed before attempting another operation. Verify the status of the configuration XML import operation by running the RACADM command "racadm jobqueue view".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1179

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete requested operation because an Type A/A USB cable is connected to the front panel USB port and the iDRAC is emulating a NIC device.
<b>Detailed Description</b>	Unable to complete requested operation because a Type A/A USB cable is connected to the front panel USB port and the iDRAC is emulating a NIC device.
<b>Recommended Response Action</b>	To change the USB Management Port mode setting, remove the Type A/A USB cable from the front panel USB port and change the port mode settings.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1180

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A USB device is inserted in the front panel USB Management port and is in use by the server operating system.
<b>Detailed Description</b>	A USB Device inserted in the front panel USB Management port and is in use by the server operating system. The device needs to not be in use in order to change the port mode settings.
<b>Recommended Response Action</b>	Remove and reinsert the USB device and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1181

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change USB Management Port mode.
<b>Detailed Description</b>	USB Management Port state cannot be changed because of an unknown hardware or firmware issue.
<b>Recommended Response Action</b>	To change the Management Port mode settings do the following: If a device is present, remove and reinsert the USB device from the front panel USB Management port and retry the operation. If the issue persists restart the iDRAC and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1182

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve information for the Power group or attribute because the server is not PMBus capable.
<b>Detailed Description</b>	The server instrumentation can not provide any information related to power because PMBus capability is not present or the PSU(s) with PMBus capability have been removed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1183

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to assign IP addresses 169.254.0.3 and 169.254.0.4 to the device OSBMC USBNIC because the IP addresses entered are reserved for the iDRAC Direct feature.
<b>Detailed Description</b>	The IP addresses 169.254.0.3 and 169.254.0.4 cannot be assigned to the device identified in the message because the IP addresses entered are reserved for the iDRAC Direct feature.
<b>Recommended Response Action</b>	Enter another appropriate IP address, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)

## RAC1253

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to run the RACADM command because the user name entered is too long.
<b>Detailed Description</b>	The RACADM command cannot be run because the user name entered is too long.
<b>Recommended Response Action</b>	Make sure that the user name is less than 320 characters and retry the operation.

<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1254

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to run the RACADM command because the password entered is too long.
<b>Detailed Description</b>	The RACADM command cannot be run because the password entered is too long.
<b>Recommended Response Action</b>	Make sure that the password is less than 64 characters and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1255

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The HTTPS Boot Certificate for the BIOS Boot device is successfully exported.
<b>Detailed Description</b>	The HTTPS Boot Certificate for the BIOS Boot device successfully exported.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1256

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The HTTPS Boot Certificate import operation for the BIOS Boot device is scheduled successfully.
----------------	---

<b>Detailed Description</b>	The HTTPS Boot Certificate import operation for the BIOS Boot device is scheduled successfully.
<b>Recommended Response Action</b>	For changes to become effective, restart the host server.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RAC1257

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The HTTPS Boot certificate delete for BIOS Boot device scheduled successfully. For changes to become effective, restart the host server.
<b>Detailed Description</b>	The HTTPS Boot certificate delete for BIOS boot device scheduled successfully.
<b>Recommended Response Action</b>	For changes to become effective, restart the host server.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** CMC—Not Applicable

## RAC999

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The object DNSFromDHCP6 cannot be enabled.

**Detailed Description** DNSFromDHCP6 cannot be enabled if iDRAC IPv6 AutoConfig is disabled.

**Recommended Response Action** Enable IPv6 AutoConfig using "racadm set iDRAC.IPv6.AutoConfig < 1 | Enabled >" command, and retry the operation.

**Category** Configuration (RAC = RAC Event)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## RDU—Redundancy Event Messages

### RDU0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The fans are redundant.

**Detailed Description** No detailed description available.

**Recommended Response Action** No response action is required.

**Category** System Health (RDU = Redundancy)

**Severity** Informational

**Trap/EventID** 2475

**OMSA Event ID** 5304

**OMSA Trap ID** 5304

**Redfish Event Type** Alert

**Applicable Event or Alert Types** iDRAC—Filter Visibility, IPMI Alert\*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing\*, LC Log\*, OS Log

**Applicable Event or Alert Types** CMC—Not Applicable

## RDU0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Fan redundancy is lost.
<b>Detailed Description</b>	One of more fans have failed or have been removed or a configuration change occurred which requires additional fans.
<b>Recommended Response Action</b>	Remove and re-install failed fans or install additional fans.
<b>Category</b>	System Health (RDU = Redundancy)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2473
<b>LCD Message</b>	Fan redundancy is lost. Check fans.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RDU0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Fan redundancy is degraded.
<b>Detailed Description</b>	One of more fans have failed or have been removed or a configuration change occurred which requires additional fans.
<b>Recommended Response Action</b>	Remove and re-install failed fans or install additional fans.
<b>Category</b>	System Health (RDU = Redundancy)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2474
<b>OMSA Event ID</b>	5305
<b>OMSA Trap ID</b>	5305
<b>Redfish Event Type</b>	Alert

<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RDU0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The fans are not redundant.
----------------	-----------------------------

<b>Detailed Description</b>	One of more fans have failed or have been removed or a configuration change occurred which requires additional fans.
<b>Recommended Response Action</b>	Remove and re-install failed fans or install additional fans.
<b>Category</b>	System Health (RDU = Redundancy)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2475
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RDU0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The fans are not redundant. Insufficient resources to maintain normal operations.
<b>Detailed Description</b>	One of more fans have failed or have been removed or a configuration change occurred which requires additional fans.
<b>Recommended Response Action</b>	Remove and re-install failed fans or install additional fans.
<b>Category</b>	System Health (RDU = Redundancy)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2473
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RDU0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The power supplies are redundant.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (RDU = Redundancy)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2475
<b>OMSA Event ID</b>	5304
<b>OMSA Trap ID</b>	5304
<b>Redfish Event Type</b>	Alert

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*

## RDU0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Power supply redundancy is lost.
<b>Detailed Description</b>	The current power operational mode is non-redundant because of a power supply exception, a power supply inventory change, or a system power inventory change. The system was previously operating in a power redundant mode.
<b>Recommended Response Action</b>	Check the event log for power supply failures. Review system configuration and power consumption.
<b>Category</b>	System Health (RDU = Redundancy)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2473
<b>LCD Message</b>	Lost PSU redundancy. Check PSU cables
<b>OMSA Event ID</b>	5306
<b>OMSA Trap ID</b>	5306
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*

## RDU0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Power supply redundancy is degraded.
<b>Detailed Description</b>	The current power operational mode is non-redundant because of a power supply exception, a power supply inventory change, or a system power inventory change. The system was previously operating in a power redundant mode.
<b>Recommended Response Action</b>	Check the event log for power supply failures. Review system configuration and power consumption.

## RED023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Lifecycle Controller in use. This job will start when Lifecycle Controller is available.
<b>Detailed Description</b>	The Lifecycle Controller is unable to access internal storage currently in use by another operation.
<b>Recommended Response Action</b>	Make sure all other Lifecycle Controller operations are finished and retry the operation. Using the iDRAC Web UI, select Server (on 12th and 13th Generation servers) or Maintenance (on 14th Generation Servers) and then Job Queue, check the job queue for unfinished jobs and wait for the jobs to finish before retrying the operation. Also, check whether there are update packages being executed in the server OS and wait for these operations to finish before retrying the operation. For remote web services API access, make sure that the GetRemoteServicesAPIStatus method returns Ready status, and then retry the operation. If OS Deploy has been enabled then boot the server into LC UI to clear. Always exit LC UI using "Exit" and not by removing power.

## RED149

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the job because a CPLD firmware job and non-CPLD job cannot be performed at the same time.
<b>Detailed Description</b>	The firmware cannot be updated on the devices in the list because it has both CPLD and non-CPLD firmware types.
<b>Recommended Response Action</b>	1) Select the check box corresponding to the firmware to be updated, and then click Install. The selected firmware is installed. If the list has both types of firmware update packages then either CPLD or non-CPLD firmware is grayed out based on the type of firmware first listed. For example, if a CPLD-based firmware is listed first in the Update Details section, then subsequent non-CPLD based firmware will be grayed out and cannot be selected. 2) After successfully updating the selected firmware, retry updating the firmware that was earlier grayed out. 3) Make sure there is no other Job already running if you are updating the CPLD firmware.

## RRDU—IDSDM Redundancy Event Messages

### RRDU0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Internal Dual SD Module is redundant.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (RRDU = IDSDM Redundancy)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2491
<b>OMSA Event ID</b>	5304
<b>OMSA Trap ID</b>	5304
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### RRDU0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Internal Dual SD Module redundancy is lost.
<b>Detailed Description</b>	Either one of the SD card or both the SD cards are not functioning properly.
<b>Recommended Response Action</b>	Replace the failed SD card.
<b>Category</b>	System Health (RRDU = IDSDM Redundancy)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2489
<b>LCD Message</b>	Internal Dual SD Module redundancy lost. Check SD cards

<b>OMSA Event ID</b>	5306
<b>OMSA Trap ID</b>	5306
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## RRDU0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Internal Dual SD Module redundancy is degraded.
<b>Detailed Description</b>	Either one of the SD card or both the SD cards are not functioning properly.
<b>Recommended Response Action</b>	Replace the failed SD card.
<b>Category</b>	System Health (RRDU = IDSMD Redundancy)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2490
<b>LCD Message</b>	Internal Dual SD Module redundancy is degraded.
<b>OMSA Event ID</b>	5305
<b>OMSA Trap ID</b>	5305
<b>Redfish Event Type</b>	Alert

# SAEP—StorageFabric Alert End Point Event Messages

## SAEP0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Host arg2, is added arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = HostID</li><li>• arg3 = registrationType</li></ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Host identified in the message is added.

<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Host arg2, properties are modified arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = HostID</li> <li>• arg3 = registrationType</li> </ul>
<b>Detailed Description</b>	The properties of Central Discovery Controller Instance:Host identified in the message is modified.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Host arg2, is deleted.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = HostID</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Host identified in the message is deleted.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Subsystem arg2, is added arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = SubsystemID</li> <li>• arg3 = registrationType</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Subsystem identified in the message is added.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Subsystem arg2, is modified arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = SubsystemID</li> <li>• arg3 = registrationType</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Subsystem identified in the message is modified.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Subsystem arg2 , is deleted.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = SubsystemID</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Subsystem identified in the message is deleted.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: the the Direct Discovery Controller arg2, is added.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = DDC ID</li></ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Direct Discovery Controller identified in the message is added.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: the the Direct Discovery Controller arg2, is modified.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = DDC ID</li></ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Direct Discovery Controller identified in the message is modified.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: the the Direct Discovery Controller arg2 , is deleted.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = DDC ID</li></ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance:Direct Discovery Controller identified in the message is deleted.
<b>Recommended Response Action</b>	No Action Required.

<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Host arg2, is registered by using arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = HostID</li> <li>• arg3 = registrationType</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller Instance:Host is registered by using registrationType identified in the message.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Host arg2, is deregistered by using arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = HostID</li> <li>• arg3 = DeregistrationType</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller Instance:Host is deregistered by using deregistrationType identified in the message.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to register the Centralized Discovery Controller Instance arg1: Host arg2, by using the registration type arg3 because arg4.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = instanceID</li> <li>• arg2 = hostID</li> <li>• arg3 = registrationType</li> <li>• arg4 = reason</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller Instance:Host cannot be registered because of the reasons identified in the message.
<b>Recommended Response Action</b>	Read through the cause of the issue provided in the Message section, and initiate necessary action to resolve this issue.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Subsystem arg2, is registered by using arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceID</li> <li>• arg2 = SubsystemID</li> <li>• arg3 = registrationType</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller Instance:Subsystem is registered by using registrationType identified in the message.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Subsystem arg2, is deregistered by using arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceID</li> <li>• arg2 = SubsystemID</li> <li>• arg3 = DeregistrationType</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller Instance:Subsystem is deregistered by using deregistrationType identified in the message.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)

<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAEP0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Centralized Discovery Controller Instance arg1: Subsystem arg2: registration arg3, is failed because of arg4.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = SubsystemID</li> <li>• arg3 = registrationType</li> <li>• arg4 = reason</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller Instance:Subsystem:Registration is by using registrationType cannot be registered because of the reason identified in the message.
<b>Recommended Response Action</b>	No Action Required.

## SAEP0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Centralized Discovery Controller Instance arg1: Entry ID arg2, License token is unavailable.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Instanceld</li> <li>• arg2 = EID</li> </ul>
<b>Detailed Description</b>	The Centralized Discovery Controller Instance:Entry ID License token identified in the message is not available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SAEP = StorageFabric Alert End Point)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAEP0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The connection is started with the End Point Manger ID arg1: Entry ID arg2, IP arg3: Port arg4.

**Arguments**

- arg1 = InstanceId
- arg2 = EID
- arg3 = IPAddr
- arg4 = port

**Detailed Description** The connection is started with End Point Manger ID, Entry ID:IP: Port identified in the message.

**Recommended Response Action** No response action is required.

**Category** Configuration (SAEP = StorageFabric Alert End Point)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAEP0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The connection is ended to the End Point Manager ID arg1: Entry ID arg2, IP arg3: Port arg4.

**Arguments**

- arg1 = InstanceId
- arg2 = EID
- arg3 = IPAddr
- arg4 = port

**Detailed Description** The connection is ended to the End Point Manager ID: Entry ID, IP:Port identified in the message.

**Recommended Response Action** No response action is required.

**Category** Configuration (SAEP = StorageFabric Alert End Point)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAEP0022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Due to EPM-ID mismatch, Proxy service will be restarted to recover Instance arg1: Old EPM-ID arg2: New EPM-ID arg3.

**Arguments**

- arg1 = InstanceId

- arg2 = OldEpmID
- arg3 = NewEpmID

<b>Detailed Description</b>	Due to the EMP-ID mismatch as specified in the message proxy service will be restarted.
<b>Recommended Response Action</b>	No recommended action is required.

# SAFM—StorageFabric Alert Fabric Manager Event Messages

## SAFM0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the configuration because remote procedure call is not initialized.
<b>Detailed Description</b>	The remote procedure call is not initialized.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persist contact system administrator.
<b>Category</b>	Configuration (SAFM = StorageFabric Alert Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAFM0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process Smart Fabric Storage Services credentials because of incorrect credentials.

**Detailed Description** Invalid SmartFabric Storage Services credentials.

**Recommended Response Action** Retry the operation with valid SmartFabric Services credentials.

**Category** Configuration (SAFM = StorageFabric Alert Fabric Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAFM0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process the instance configuration.

**Detailed Description** Instance Configuration failed.

**Recommended Response Action** Retry the operation after sometime. If the issue persist contact system administrator.

**Category** Configuration (SAFM = StorageFabric Alert Fabric Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAFM0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process configuration because Smart Fabric Services not reachable.

**Detailed Description** The SmartFabric Storage Services is not reachable.

**Recommended Response Action** Retry the operation after sometime. If the issue persist contact system administrator.

**Category** Configuration (SAFM = StorageFabric Alert Fabric Manager)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAFM0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process configuration because database write is unsuccessful.
<b>Detailed Description</b>	The Database write is unsuccessful.
<b>Recommended Response Action</b>	Retry the operation after sometime. If the issue persists contact system administrator.
<b>Category</b>	Configuration (SAFM = StorageFabric Alert Fabric Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SALM—StorageFabric Lifecycle Manager Event Messages

### SALM0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The SmartFabric Storage Software license is validated and successfully downloaded.
<b>Detailed Description</b>	The SmartFabric Storage Software license is validated and successfully downloaded.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SALM = StorageFabric Lifecycle Manager)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### SALM0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to validate the SmartFabric Storage Software license because arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = failure reason</li></ul>
<b>Detailed Description</b>	The SmartFabric Storage Software license cannot be validated because of the reasons identified in the message.
<b>Recommended Response Action</b>	Read through the cause of the issue provided in the Message section, and initiate necessary action to resolve this issue.
<b>Category</b>	Configuration (SALM = StorageFabric Lifecycle Manager)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SALM0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Evaluation version of the SmartFabric Storage Software license has expired on arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = expiryDate</li> </ul>
<b>Detailed Description</b>	The Evaluation version of the SmartFabric Storage Software license has expired on date identified in the message.
<b>Recommended Response Action</b>	Contact your service provider to purchase a valid Perpetual license. For information about licenses types, see SmartFabric Storage Software RESTful API Guide.
<b>Category</b>	Configuration (SALM = StorageFabric Lifecycle Manager)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## SAZN0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Central Discovery Controller Instance arg1 is in the Default Zone Permit mode.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li></ul>
<b>Detailed Description</b>	Default Zone Permit is applied on the Central Discovery Controller instance identified in the message.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Central Discovery Controller Instance arg1 is in the Default Zone Deny.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li></ul>
<b>Detailed Description</b>	Default Zone Deny is applied on the Central Discovery Controller instance identified in the message.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Central Discovery Controller Instance arg1: Pending Zone Group arg2, is deactivated.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = Zone Group Key</li></ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance: Pending Zone Group identified in the message is deactivated.
<b>Recommended Response Action</b>	No Action Required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Central Discovery Controller Instance arg1: Pending Zone Group arg2, is created.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = Zone Group Key</li></ul>
<b>Detailed Description</b>	The Pending Zone Group of the Central Discovery Controller Instance identified in the message is created.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Central Discovery Controller Instance arg1: Pending Zone Group arg2, is Deleted.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = Zone Group Key</li></ul>
<b>Detailed Description</b>	The Pending Zone Group of the Central Discovery Controller Instance identified in the message is deleted.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to activate the Zone Group on the Central Discovery Controller Instance arg1: Zone Group arg2, because the given Zone Group does not exist.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = Zone Group Key</li> </ul>
<b>Detailed Description</b>	The Zone Group on the Central Discovery Controller Instance identified in the message cannot be activated because the entered Zone Group does not exist.
<b>Recommended Response Action</b>	Retrieve all the available Zone Groups, make sure that the Zone Group you entered exists, and then retry the operation.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the operation state of the Zone Group on the Central Discovery Controller Instance arg1: Zone Group arg2, because data cannot be written to the database.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = Zone Group Key</li> </ul>
<b>Detailed Description</b>	The operation state of the Zone Group on the Central Discovery Controller Instance identified in the message cannot be updated because data cannot be written to the database.
<b>Recommended Response Action</b>	Contact the system administrator to resolve the issue, and retry the operation.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to deactivate the Zone Group on the Central Discovery Controller Instance arg1: Zone Group arg2, because the entered Zone Group does not exist.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = Zone Group Key</li> </ul>
<b>Detailed Description</b>	The Zone Group on the Central Discovery Controller Instance identified in the message cannot be deactivated because the entered Zone Group does not exist.
<b>Recommended Response Action</b>	Retrieve all the available Zone Groups, make sure that the Zone Group you entered exists, and then retry the operation.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the Zone Group on the Central Discovery Controller Instance arg1: Zone Group arg2, because the operational database cannot be updated.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceID</li> <li>• arg2 = Zone Group Key</li> </ul>
<b>Detailed Description</b>	The operation state of the Zone Group on the Central Discovery Controller Instance identified in the message cannot be updated because the operational database cannot be updated.
<b>Recommended Response Action</b>	Contact the system administrator to resolve the issue, and retry the operation.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Central Discovery Controller Instance arg1: Zone Member arg2, is added.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = Zone Member Key</li> </ul>
<b>Detailed Description</b>	The zone member identified in the message is added to the Central Discovery Controller Instance.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAZN0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The Central Discovery Controller Instance arg1: Zone Member arg2, is deleted.

**Arguments**

- arg1 = InstanceId
- arg2 = Zone Member Key

**Detailed Description** The zone member identified in the message is deleted from the Central Discovery Controller Instance.

**Recommended Response Action** No response action is required.

**Category** Configuration (SAZN = StorageFabric Alert Zone)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAZN0022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Central Discovery Controller Instance arg1: Zone Member arg2 is Updated.

**Arguments**

- arg1 = InstanceId
- arg2 = Zone Member Key

**Detailed Description** The Central Discovery Controller Instance : Zone Member identified in the message is updated.

**Recommended Response Action** No recommended response action is required.

**Category** Configuration (SAZN = StorageFabric Alert Zone)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## SAZN0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Central Discovery Controller Instance arg1: Zone Alias Member arg2 is Updated.

**Arguments**

- arg1 = InstanceId
- arg2 = Zone Alias Member Key

**Detailed Description** The Central Discovery Controller Instance : Zone Alias Member is given in the message is updated.

**Recommended Response Action** No recommended response action is required.

<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Central Discovery Controller Instance arg1: Zone arg2 has zone member with mismatch Address Family type.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = Zone Key</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance <InstanceId>:Zone<Zone Key> has zone member with mismatch Address Family type.
<b>Recommended Response Action</b>	Enter a valid zone configuration.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Central Discovery Controller Instance arg1: Zone arg2 has zone member with mismatch Transport type.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = Zone Key</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance <InstanceId>:Zone<Zone Key> has zone member with mismatch Transport type.
<b>Recommended Response Action</b>	Enter a valid zone configuration.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0026

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Central Discovery Controller Instance arg1: Default Zone Permit with Endpoints has Address Family Type Mismatch.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance <InstanceId>: DefaultZone Permit with Endpoints has Address Family Type Mismatch.
<b>Recommended Response Action</b>	Enter a valid zone configuration.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0027

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Central Discovery Controller Instance arg1: Default Zone Permit with Endpoints hasTransport Type Mismatch.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> </ul>
<b>Detailed Description</b>	The Central Discovery Controller Instance <InstanceId>: DefaultZone Permit with Endpoints has Transport Type Mismatch.
<b>Recommended Response Action</b>	Enter a valid zone configuration.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0028

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Central Discovery Controller Instance arg1: Zone Group arg2 is created via Fabric Zoning.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = InstanceId</li> <li>• arg2 = Zone Group Key</li> </ul>
<b>Detailed Description</b>	The Zone Group mentioned in the message is created on specified Central DiscoveryController instance.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SAZN0029

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Central Discovery Controller Instance arg1: Zone Group arg2 is Deleted via Fabric Zoning.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = InstanceId</li><li>• arg2 = Zone Group Key</li></ul>
<b>Detailed Description</b>	The Zone Group mentioned in the message is deleted on the specified Central Discovery Controller instance.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SAZN = StorageFabric Alert Zone)

# SCV—Secured Component Verification Event Messages

## SCV001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the required key related to the key pair is not available in the system.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the required key related to key pair is not available in the system.
<b>Recommended Response Action</b>	Retry the operation by creating a new Certificate Signing Request (CSR), and then uploading the certificate. Refer to the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform Secured Component Verification (SCV) operation because the required key related to key pair in the system is not matching with the certificate.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the required key related to key pair in the system is not matching with the certificate.
<b>Recommended Response Action</b>	Retry the operation by creating a new Certificate Signing Request (CSR), and then uploading the certificate. Refer to the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the certificate is not valid.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the certificate is not valid.
<b>Recommended Response Action</b>	Retry the operation by creating a new Certificate Signing Request (CSR), and then uploading the certificate. Refer to the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the certificate uploaded is not signed by the root Certificate Authority (CA).
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the certificate provided is not signed by the root Certificate Authority (CA).
<b>Recommended Response Action</b>	Retry the operation by uploading the certificate signed by the root Certificate Authority (CA).
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the certificate file size is too big.
<b>Detailed Description</b>	The Secured Component Verification operation cannot be completed because the certificate file size is too big.
<b>Recommended Response Action</b>	Make sure that the file size is less than 2 MB, and then retry the operation. See the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the Secured Manufacturing Mode (SMM) is not enabled.
----------------	---

<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the Secured Manufacturing Mode (SMM) is not enabled.
<b>Recommended Response Action</b>	Retry the operation by enabling the Secured Manufacturing Mode (SMM).
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the uploaded Certificate Signing Request (CSR) has an invalid signature.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the uploaded Certificate Signing Request (CSR) has an invalid signature.
<b>Recommended Response Action</b>	Upload a valid Certificate Signing Request (CSR) and retry the operation. For more information about CSRs, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the uploaded Certificate Signing Request (CSR) has an invalid format.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the uploaded Certificate Signing Request (CSR) has an invalid format.
<b>Recommended Response Action</b>	Upload a Certificate Signing Request (CSR) with a valid format and retry the operation. For more information about CSRs, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## SCV009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform Secured Component Verification (SCV) operation because the inventory present in the certificate is not matching with the Certificate Signing Request (CSR).
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the inventory present in the certificate is not matching with the Certificate Signing Request (CSR).
<b>Recommended Response Action</b>	Retry the operation by uploading the certificate with inventory that matches the Certificate Signing Request (CSR). Make sure that correct generated CSR is signed and then upload the certificate.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the "delete" operation is not permitted on the SCV Factory Certificate.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the "delete" operation is not permitted on the SCV Factory Certificate.
<b>Recommended Response Action</b>	No response action is required. However, make sure that the certificate is not of the SCV Factory type.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the uploaded certificate has an invalid signature.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the uploaded certificate has an invalid signature.

<b>Recommended Response Action</b>	Retry the operation by uploading the certificate with a valid signature.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because of an OpenSSL error.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because of an OpenSSL error.
<b>Recommended Response Action</b>	Upload a proper inventory Certificate Signing Request (CSR) and retry the operation. For more information about CSRs, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform Secured Component Verification (SCV) operation because the Hardware Root Key (HRK) is not enabled.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the Hardware Root Key (HRK) is not enabled.
<b>Recommended Response Action</b>	Retry the operation by enabling the Hardware Root Key (HRK). For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the uploaded certificate extensions do not match with the extensions in SCV Certificate Signing Request (CSR).
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the uploaded certificate extensions do not match with the extensions in SCV Certificate Signing Request (CSR).
<b>Recommended Response Action</b>	Upload a new Certificate Signing Request (CSR) and retry the operation. For more information about CSRs, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## SCV015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) Challenge Proof of Possession operation because the request payload data is invalid.
<b>Detailed Description</b>	The Secured Component Verification (SCV) Challenge Proof of Possession operation cannot be completed because the request payload data is invalid.
<b>Recommended Response Action</b>	Retry the operation with a valid request payload data. Refer to the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because no certificate exists in the system to download.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because no certificate exists in the system to download.
<b>Recommended Response Action</b>	Retry the operation by creating a new Certificate Signing Request (CSR), uploading the certificate and then download the certificate. For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.

<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable toperform the Secured Component Verification (SCV) operation because the certificate present in the system is corrupted.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the certificate present in the system is corrupted.
<b>Recommended Response Action</b>	Create a new Certificate Signing Request (CSR), upload the certificate, and then download the certificate. For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the size of the Delta certificate file is more than 100 KB.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the size of the Delta certificate file is more than 100 KB.
<b>Recommended Response Action</b>	Make sure that the file size in less than 100 KB, and then retry the operation. For more information about SCV, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because of insufficient drive space in the system to upload the Delta certificate.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because of insufficient drive space in the system to upload the Delta certificate.
<b>Recommended Response Action</b>	Remove the existing Delta certificate, upload the latest certificate that has the consolidated data, and then retry the operation. For more information about SCV, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because a replacement certificate cannot be uploaded when a SCV certificate is already available on the system.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because a replacement certificate cannot be uploaded when a SCV certificate is already available on the system.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the inventory data is not yet ready, and the Inventory Data Collection Refresh operation is still in progress. This is because of the following status: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = iDRAC Ready</li></ul>
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the inventory data is not yet ready and the Inventory Data Collection Refresh operation is still in progress.

<b>Recommended Response Action</b>	Make sure the host system is powered on and retry the operation after two minutes.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because a Delta certificate is already available on the system.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because a Delta certificate is already available on the system.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the certificate is not signed by the authorized signing server.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be completed because the certificate is not signed by the authorized signing server.
<b>Recommended Response Action</b>	Make sure that the certificate is signed by the authorized signing server, and then retry the operation. For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the SCV factory certificate is not available on the system.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the SCV factory certificate is not available on the system.
<b>Recommended Response Action</b>	Make sure that the SCV factory certificate is available on the system, and then retry the operation. For more information, refer to the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the required key is already present in the system.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the required key is already present in the system.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV026

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the Certificate Signing Request (CSR) could not be generated and an internal issue is observed.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the Certificate Signing Request (CSR) could not be generated and a transient internal breakdown issue is observed.
<b>Recommended Response Action</b>	Retry the operation a few more times with an interval of three minutes. If the issue persists, reboot the iDRAC or Management Module.

<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV027

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) Challenge Proof of Possession operation because the SCV App version is earlier than the arg1 version.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = SCVAppVersion</li> </ul>
<b>Detailed Description</b>	The Secured Component Verification (SCV) Challenge Proof of Possession operation cannot be performed because the SCV App version is earlier than the version identified in the message.
<b>Recommended Response Action</b>	Upgrade the SCV App version to greater than the version identified in the message and retry the operation. For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV028

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the system is powered off.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the system is powered off.
<b>Recommended Response Action</b>	Power on the system and retry the Secured Component Verification (SCV) operation.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV029

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because another SCV operation is running.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because another SCV operation is running.
<b>Recommended Response Action</b>	Wait for the current SCV operation to complete and retry the operation.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV030

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because iDRAC is not ready.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because iDRAC is not ready.
<b>Recommended Response Action</b>	Wait for few minutes and retry the operation. Or, by using RACADM run the following at the Command Line Interface (CLI): "racadm getremoteservicesstatus" and check for overall status to be ready.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the SCV platform and delta certificate download operation is unsuccessful.
<b>Detailed Description</b>	Unable to perform the Secured Component Verification (SCV) operation because the SCV platform and delta certificate download operation is unsuccessful.
<b>Recommended Response Action</b>	For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV032

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because of one of the following: 1) The Signature and Root of Trust 2) The Proof of Possession or 3) The Profile Version check has failed.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because of one of the following: 1) The Signature and Root of Trust 2) The Proof of Possession or 3) The Profile Version check has failed.
<b>Recommended Response Action</b>	Wait for some time and retry the operation. For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SCV033

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the Secured Component Verification (SCV) operation because the system inventory collection operation is unsuccessful.
<b>Detailed Description</b>	The Secured Component Verification (SCV) operation cannot be performed because the system inventory collection operation is unsuccessful.
<b>Recommended Response Action</b>	Restart iDRAC and retry the operation. For more information, see the Secured Component Verification (SCV) Reference Guide available on the support site.
<b>Category</b>	Configuration (SCV = Secured Component Verification)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

# SDK—iDRAC Extensibility SDK Event Messages

## SDK0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was successfully installed.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = name</li></ul>

<b>Detailed Description</b>	The iDRAC SDK Plugin identified in the message was successfully installed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	11275
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was successfully updated to version arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = name</li> <li>• arg2 = version</li> </ul>
<b>Detailed Description</b>	The iDRAC SDK plugin identified in the message was successfully updated to the version shown.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	11275
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was successfully removed.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = name</li> </ul>
<b>Detailed Description</b>	The iDRAC SDK plugin identified in the message was successfully removed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	11275
<b>Redfish Event Type</b>	Alert

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was successfully started.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	The iDRAC SDK plugin identified in the message was successfully started.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	11275
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was not started because its required hardware is not present in the system.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	The plugin identified in the message was not started because the required hardware is not present in the system.
<b>Recommended Response Action</b>	Review the plugins documentation for which hardware it supports. Install the required hardware or remove the plugin.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	11274
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was not started because the iDRAC firmware does not support this version of plugin.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	The plugin identified in the message was not started because the plugin version is not compatible with the running iDRAC version.
<b>Recommended Response Action</b>	Review the plugins documentation for which version of iDRAC firmware is required. Update the plugin or update the iDRAC firmware to achieve version compatibility.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	11274
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was enabled.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	The plugin identified in the message was enabled.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	11275
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was disabled.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	The plugin identified in the message was disabled.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	11275
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was not started because the plugin was disabled.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	The plugin identified in the message was not started because it was disabled.
<b>Recommended Response Action</b>	To allow the plugin to start, navigate to the plugin management page and enable the plugin.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	11274
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 stopped unexpectedly.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	The plugin identified in the message stopped unexpectedly.
<b>Recommended Response Action</b>	No response action is required. If the plugin continues to stop unexpectedly then update it to the latest version.
<b>Category</b>	System Health (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	3083
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD

**Applicable Event or Alert Types** CMC—Filter Visibility

## SDK0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 became unresponsive and was restarted.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	The plugin identified in the message became unresponsive and was restarted.
<b>Recommended Response Action</b>	No response action is required. If the plugin continues to be unresponsive then update it to the latest version.
<b>Category</b>	System Health (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	3083
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was not started because its hardware is being managed by a different plugin.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	The plugin identified in the message was not started because its supported hardware is being managed by a different plugin.
<b>Recommended Response Action</b>	Review all installed plugin documentation for their supported hardware. Remove or update plugins as needed to achieve the desired configuration.
<b>Category</b>	Configuration (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	11274
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 was disabled due to repeated failures.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = name</li> </ul>
<b>Detailed Description</b>	The plugin identified in the message encountered multiple failures so was disabled.
<b>Recommended Response Action</b>	Uninstall (remove) the plugin. Install a later version if available.
<b>Category</b>	System Health (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	3082
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility

## SDK0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SDK plugin arg1 encountered an integrity check failure.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = name</li> </ul>
<b>Detailed Description</b>	The plugin identified in the message encountered a runtime integrity check failure.
<b>Recommended Response Action</b>	Remove the plugin and re-install.
<b>Category</b>	System Health (SDK = iDRAC Extensibility SDK)
<b>Severity</b>	Warning

## SDPM—Software Defined Persistent Memory Event Messages

### SDPM5198

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A diagnostic event of undefined severity occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A diagnostic event of unknown severity occurred in the memory device at location identified in the message. iDRAC firmware must be updated to properly decode this event.
<b>Recommended Response Action</b>	Update iDRAC firmware to the latest version available during the next maintenance cycle. If the issue persists, contact your service provider, and then provide this message number (SDPM5198) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	3291
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### SDPM5199

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An unknown diagnostic event occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	An unknown diagnostic event occurred in the memory device at location identified in the message. iDRAC firmware must be updated to properly decode this event.

<b>Recommended Response Action</b>	Update iDRAC firmware to the latest version available during the next maintenance cycle. If the issue persists, contact your service provider, and then provide this message number (SDPM5199) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	3291
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDPM6101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A diagnostic warning event occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Check the device and system configuration. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A diagnostic warning event occurred in the memory device at location identified in the message. The device may be operating in a degraded state. Checking the device and system configuration is recommended for remediation.
<b>Recommended Response Action</b>	Review additional server health events available in the System Event Log. Ensure that the server and device is in the recommended configuration per the respective PowerEdge servers Installation and Service Manual available on the support site. If the issue persists, contact your service provider, and then provide this message number (SDPM6101) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	3290
<b>LCD Message</b>	Warning event at <location>. Check the device and system configuration.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDPM6199

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An unknown diagnostic warning event occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	An unknown diagnostic warning event occurred in the memory device at location identified in the message. iDRAC firmware must be updated to properly decode this event.

<b>Recommended Response Action</b>	Update iDRAC firmware to the latest version available. If the issue persists, contact your service provider, and then provide this message number (SDPM6199) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	3290
<b>LCD Message</b>	Unknown warning event at <location>.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDPM7101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A critical diagnostic event occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Check the device and system configuration. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A critical diagnostic event occurred in the memory device at location identified in the message. The device may be operating in a degraded state. Checking the device and system configuration is recommended for remediation.
<b>Recommended Response Action</b>	Ensure that the server and device is in the recommended configuration per the respective PowerEdge servers Installation and Service Manual available on the support site. If the issue persists, contact your service provider, and then provide this message number (SDPM7101) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3289
<b>LCD Message</b>	Critical event at <location>. Check the device and system configuration.
<b>Redfish Event Type</b>	Alert

<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDPM7106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A critical diagnostic event occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Contact service provider if issue persists. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A diagnostic critical event occurred in the memory device at location identified in the message.

<b>Recommended Response Action</b>	If the issue persists, contact your service provider, and then provide this message number (SDPM7106) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3289
<b>LCD Message</b>	Critical event at <location>. Contact service if persistent.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDPM7107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A critical diagnostic event occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Retry operation. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A critical diagnostic event occurred in the memory device at location identified in the message. The attempted operation on this device could not be completed. Retry operation.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your service provider, and then provide this message number (SDPM7107) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3289
<b>LCD Message</b>	Critical event at <location>. Retry operation.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDPM7108

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A critical diagnostic event occurred on the Software Defined Persistent Memory (SDPM) virtual DIMM located at arg1. Sanitize the device. Extended ID: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A critical diagnostic event occurred in the memory device at location identified in the message. The memory device has detected an error during startup that either cannot be recovered or has been moved from another server, which has resulted in a unusable configuration data.

<b>Recommended Response Action</b>	To recover, sanitize the memory device in BIOS Settings. Sanitizing will delete all data on the device. If the issue persists, contact your service provider, and then provide this message number (SDPM7108) and the extended ID displayed in the event message.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3289
<b>LCD Message</b>	Critical event at <location>. Sanitize the device.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDPM7197

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to arm the server because the fan configuration is not supported.
<b>Detailed Description</b>	The server cannot be armed because the fan configuration is not supported. A Software Defined Persistent Memory (SDPM) server requires very high performance fans.
<b>Recommended Response Action</b>	Replace the server fans by using very high performance fans and retry the operation.
<b>Category</b>	System Health (SDPM = Software Defined Persistent Memory)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3289
<b>Redfish Event Type</b>	Alert

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = xml-message</li></ul>

<b>Detailed Description</b>	The Software Defined Storage subsystem on the host Operating System has reported a failure.
<b>Recommended Response Action</b>	Verify the health status of the hard drive identified in the message and retry the operation. To check the health status by using the iDRAC GUI, on the iDRAC dashboard, click Storage > Physical Disks. To run a RACADM command, enter "racadm raid get pdisks -o -p status" at the Command Line Interface (CLI).
<b>Category</b>	Storage (SDS = Software Defined Storage)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	4761
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SDS0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = xml-message</li> </ul>
<b>Detailed Description</b>	The Software Defined Storage subsystem on the host Operating System has reported a failure.
<b>Recommended Response Action</b>	Verify the health status of the hard drive identified in the message and retry the operation. To check the health status by using the iDRAC GUI, on the iDRAC dashboard, click Storage > Physical Disks. To run a RACADM command, enter "racadm raid get pdisks -o -p status" at the Command Line Interface (CLI).

## SEC—Security Event Event Messages

### SEC0000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The chassis is open.
<b>Detailed Description</b>	The chassis is open. System performance may be degraded, and security may be compromised.
<b>Recommended Response Action</b>	Close the chassis. Check system logs.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>LCD Message</b>	Intrusion detected. Check chassis cover
<b>OMSA Event ID</b>	5254
<b>OMSA Trap ID</b>	5254
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

### SEC0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The drive bay is open.
<b>Detailed Description</b>	The drive bay is open. A drive may be added or removed. System performance may be degraded.

<b>Recommended Response Action</b>	Close the drive bay. Check system logs.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The I/O card area is open.
<b>Detailed Description</b>	The I/O card area is open. I/O cards may be added or removed. System performance may be degraded.
<b>Recommended Response Action</b>	Close the I/O card area. Check system logs.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The processor area is open.
<b>Detailed Description</b>	The processor area is open. A drive may be added or removed. System performance may be degraded.
<b>Recommended Response Action</b>	Close the processor area. Check system logs.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The LAN is disconnected.
<b>Detailed Description</b>	The LAN is disconnected. Network performance may be degraded.
<b>Recommended Response Action</b>	If unintentional, connect network cable.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unauthorized docking is detected.
<b>Detailed Description</b>	A removable component may have been tampered with, or installed incorrectly, or does not meet system requirements.
<b>Recommended Response Action</b>	Check removable hardware components for correct installation. Review installation documentation.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The fan area is open.
<b>Detailed Description</b>	The fan area is open. System performance may be degraded.
<b>Recommended Response Action</b>	Close the fan area. Check system logs.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## SEC0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The chassis is closed.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2387
<b>OMSA Event ID</b>	5252
<b>OMSA Trap ID</b>	5252
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## SEC0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The drive bay is closed.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The I/O card area is closed.
----------------	------------------------------

<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The processor area is closed.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The LAN is connected.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The docking is authorized.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The fan area is closed.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 drive bay is open.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	The drive bay identified in the message is open.
<b>Recommended Response Action</b>	Close the drive bay as soon as possible. For information about drive bays, see the Installation and Service Manual of the respective server on the support site.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2387
<b>Redfish Event Type</b>	Alert

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 drive bay is closed.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	The drive bay identified in the message is closed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2387
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 drive bay is kept open for an extended period of time.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	The drive bay identified in the message is kept open for an extended period of time. This may result in excessive cooling of the components.
<b>Recommended Response Action</b>	Close the drive bay immediately. For information about drive bays, see the Installation and Service Manual of the respective server on the support site. if the issue persists contact your service provider.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>LCD Message</b>	The <name> drive bay is kept open for an extended period of time.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The chassis is open while the power is on.
<b>Detailed Description</b>	The chassis is open. System performance may be degraded, and security may be compromised.
<b>Recommended Response Action</b>	Close the chassis. Check system logs.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>LCD Message</b>	Intrusion detected. Check chassis cover
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## SEC0032

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The chassis is closed while the power is on.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2387
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## SEC0033

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The chassis is open while the power is off.
<b>Detailed Description</b>	The chassis is open while the power is off. System security may have been compromised.
<b>Recommended Response Action</b>	Close the chassis and verify hardware inventory. Check system logs.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical

<b>Trap/EventID</b>	2385
<b>LCD Message</b>	Intrusion detected. Check chassis cover
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## SEC0034

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The chassis is closed while the power is off.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2387
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## SEC0040

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A critical stop occurred during OS load.
<b>Detailed Description</b>	Operating system generated critical stop IPMI event. (Sensor type code = 20H).
<b>Recommended Response Action</b>	Check video and operating system logs for additional information.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0041

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	BIOS is unable to configure the Intel Trusted Execution Technology (TXT).
<b>Detailed Description</b>	TXT initialization cannot be completed because system configuration may have changed.
<b>Recommended Response Action</b>	Check system hardware inventory for TPM presence, clear and reconfigure TPM and TXT in BIOS setup menu.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>LCD Message</b>	Unable to configure TXT. Reconfigure TPM and TXT in BIOS.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0042

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Processor detected a problem while performing an Intel Trusted Execution Technology (TXT) operation.
<b>Detailed Description</b>	TXT CPU microcode boot cannot be completed because system configuration may have changed.
<b>Recommended Response Action</b>	Check system hardware inventory for TPM presence, clear and reconfigure TPM and TXT in BIOS setup menu.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>LCD Message</b>	Problem with TXT operation. Reconfigure TPM and TXT in BIOS.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0043

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	BIOS Authenticated Code Module detected an Intel Trusted Execution Technology (TXT) problem during POST.
<b>Detailed Description</b>	TXT POST cannot be completed because system configuration may have changed.

<b>Recommended Response Action</b>	Check system hardware inventory for TPM presence, clear and reconfigure TPM and TXT in BIOS setup menu.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>LCD Message</b>	TXT problem during POST. Reconfigure TPM and TXT in BIOS.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0044

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SINIT Authenticated Code Module detected an Intel Trusted Execution Technology (TXT) problem at boot.
<b>Detailed Description</b>	TXT initialization cannot be completed because system configuration may have changed.
<b>Recommended Response Action</b>	Check system hardware inventory for TPM presence, clear and reconfigure TPM and TXT in BIOS setup menu.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2385
<b>LCD Message</b>	TXT problem at boot. Reconfigure TPM and TXT in BIOS.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Intel Trusted Execution Technology (TXT) is operating correctly.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2387
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log

**Applicable Event or Alert Types** CMC—Not Applicable

## SEC0046

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The sled is inserted back into the chassis.
<b>Detailed Description</b>	The sled is inserted back into the chassis. Make sure that only an authorized person removes the sled out of the chassis slot.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2387
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0051

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to determine the redundancy status of the chassis intrusion sensor.
<b>Detailed Description</b>	The chassis may be open. This condition can lead to degraded system performance because of insufficient cooling and the system security may be compromised.
<b>Recommended Response Action</b>	Close the chassis.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Warning
<b>OMSA Event ID</b>	5251
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SEC0052

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Chassis intrusion sensor may have failed.
<b>Detailed Description</b>	The chassis intrusion sensor may have failed, because of this it cannot be determined whether the chassis is closed or opened. This condition can lead to degraded system performance because of insufficient cooling. The system security may be compromised.

<b>Recommended Response Action</b>	Replace the chassis intrusion sensor. For more information, contact your service provider.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SEC0053

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to verify identity certificate for arg1 in Slot arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Component name</li> <li>• arg2 = slot</li> </ul>
<b>Detailed Description</b>	The Factory Identity certificate for the component identified in the message cannot be verified because of some unknown error.
<b>Recommended Response Action</b>	Virtually reseal the component indicated in the message. If the issue persists, contact your service provider.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical

<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0610

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An Out-of-band password violation detected.
<b>Detailed Description</b>	This may apply to a remote access attempt.

<b>Recommended Response Action</b>	Check system logs for intrusion attempts, and ensure strong password policies.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0611

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An Out-of-band password violation was corrected.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0612

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The default username and password is currently in use. It is recommended to immediately change the default credentials.
<b>Detailed Description</b>	The default username and password is currently in use and unauthorized access to the iDRAC may occur because the default values are widely known. This is a severe security risk.
<b>Recommended Response Action</b>	To change the credentials using RACADM command, run the following at the command line interface (CLI): "racadm set iDRAC.Users.<index>.Password <new password string>". Alternately, to disable the default credential in use message, run "racadm config -g cfgRacTuning -o cfgRacTuneDefCredentialWarningEnable 0".
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2386
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, LC Log*, Chassis Event Proxy*

## SEC0613

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The default username and password is changed.
<b>Detailed Description</b>	The default username and password is changed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0700

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Warning: Default username and password are currently in use. It is strongly recommended to change the default password before configuring the property. Else, it causes a severe security risk for iDRAC.
<b>Detailed Description</b>	If the property name is configured without changing the default password, iDRAC may be accessible on the Internet. This causes a severe security risk for iDRAC.
<b>Recommended Response Action</b>	To change the password, run the following racadm command: racadm set iDRAC.Users.<index>.Password <new password string>.Alternatively, to avoid this warning message, run the following racadm command: racadm set iDRAC.Tuning.DefaultCredentialWarning Disable.
<b>Category</b>	Configuration (SEC = Security Event)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	10578
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0701

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Warning: Default username and password are currently in use. It is strongly recommended to change the default password immediately.
<b>Detailed Description</b>	This warning message is displayed when using the default username and password (root and calvin). Using the default password causes a severe security risk for iDRAC.
<b>Recommended Response Action</b>	To change the password, run the following racadm commands: racadm set iDRAC.Users.<index>.Password <new password string>.Alternatively, to avoid this warning message run the following racadm command: racadm set iDRAC.Tuning.DefaultCredentialWarning Disable.

<b>Category</b>	Configuration (SEC = Security Event)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0702

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Federal Information Processing Standards (FIPS) mode is enabled.
<b>Detailed Description</b>	The Federal Information Processing Standards (FIPS) mode is enabled.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0703

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Federal Information Processing Standards (FIPS) mode is disabled.
<b>Detailed Description</b>	The Federal Information Processing Standards (FIPS) mode is disabled.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SEC = Security Event)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0704

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The authentication check operation performed by iSM has failed for the following module or application because either the binary load path is incorrect or the binary or configuration file is tampered, replaced, or untrusted : arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = list of app and modules</li> </ul>
<b>Detailed Description</b>	The authentication check operation performed by iSM has failed for the following module or application because either the binary load path is incorrect or the binary or configuration file is tampered, replaced, or untrusted : < list of application and modules>.
<b>Recommended Response Action</b>	Reinstall the iDRAC Service Module (iSM) and retry the operation. For information about installing iSM, see the iSM Installation Guide available on the support site.
<b>Category</b>	System Health (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEC0705

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the default password is still in use and must be changed.
<b>Detailed Description</b>	The operation cannot be completed because the default password for the default user is still in use on the CMC.
<b>Recommended Response Action</b>	Update the default password of the default user by using one of the Chassis Management Controller (CMC) interfaces. For more information about updating default password on CMC, refer CMC RACADM User Guide or CMC WSMAN User Guide or CMC GUI User Guide available on the support site.
<b>Category</b>	Configuration (SEC = Security Event)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SEC0706

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The user arg1, changed the IPBlocking range with address arg2 and subnet mask arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = username</li> <li>arg2 = IPaddressRange</li> <li>arg3 = SubnetMaskRange</li> </ul>
<b>Detailed Description</b>	The IPBlocking configuration settings are changed by the user identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SEC = Security Event)
<b>Severity</b>	Informational

<b>Redfish Event Type</b>	Alert

## SEKM—Secure Enterprise Key Management Event Messages

### SEKM001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A test connection to the Key Management Server arg1 was successful.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = server name</li> </ul>
<b>Detailed Description</b>	A test connection to an Key Management Server was executed.successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### SEKM002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to connect to any Key Management Server because the SEKM configuration is incomplete.
<b>Detailed Description</b>	The iDRAC cannot perform either a Test SEKM connection operation or exchange key with the KMS server because all the required SEKM attributes are not configured on the iDRAC.
<b>Recommended Response Action</b>	Make sure that the required SEKM attributes are configured. For information about the required attributes, see the iDRAC Users Guide available on the support site.
<b>Category</b>	System Health (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to connect to any Key Management Server because the SEKM certificates are not uploaded to the iDRAC.
<b>Detailed Description</b>	The iDRAC cannot perform either a Test SEKM connection operation or exchange key with the Key Management Server because the required SEKM certificates are not uploaded to the iDRAC.
<b>Recommended Response Action</b>	Make sure that the required SEKM certificates are uploaded to the iDRAC. For information about the required SEKM certificates, see the iDRAC Users Guide available on the support site.
<b>Category</b>	System Health (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A Certificate Signing Request (CSR) is successfully generated for the Key Management Server.
<b>Detailed Description</b>	A Certificate Signing Request (CSR) is successfully generated for the Key Management Server.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The SEKM setting arg1 is changed from arg2 to arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = setting name</li><li>• arg2 = old value</li><li>• arg3 = new value</li></ul>
<b>Detailed Description</b>	The SEKM server setting is changed as identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SEKM = Secure Enterprise Key Management)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The SEKM feature on the iDRAC is disabled.
<b>Detailed Description</b>	The SEKM feature on the iDRAC is disabled.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Uploaded arg1 to iDRAC successfully.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = certificate name</li> </ul>
<b>Detailed Description</b>	A Certificate is uploaded to iDRAC. The certificate is one of the following:1. SEKM SSL Certificate.2. Key Management Server CA certificate.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A request to enable SEKM feature on the iDRAC was unsuccessful.
<b>Detailed Description</b>	A request to enable SEKM feature on the iDRAC was unsuccessful because of an issue with connecting to the Key Management Server using the provided settings.
<b>Recommended Response Action</b>	Check the Lifecycle Controller logs related to SEKM server connection for more information.
<b>Category</b>	Configuration (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Key Management Server arg1 has rejected the signed iDRAC SEKM certificate.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = server name</li> </ul>
<b>Detailed Description</b>	The Key Management Server identified in the message has rejected the signed iDRAC SEKM certificate.
<b>Recommended Response Action</b>	Make sure the iDRAC CSR is signed by a CA that is in the list of trusted CAs on the Key Management Server. For details about generating and uploading a signed CSR, see the iDRAC Users Guide available on the support site.
<b>Category</b>	System Health (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The iDRAC SEKM Client certificate will expire in arg1 days.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = number of days</li> </ul>
<b>Detailed Description</b>	The iDRAC SEKM Client Certificate will expire in few days as identified in the message.
<b>Recommended Response Action</b>	Do the following: 1) Generate a new Certificate Signing Request (CSR). 2) Get the CSR signed by the Key Management Server. 3) Upload the signed CSR to iDRAC. For procedures about generating and uploading a CSR on iDRAC, see the iDRAC Users Guide available on the support site.
<b>Category</b>	System Health (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to connect to the Key Management Server arg1 because either invalid server attributes are entered or invalid SEKM certificate is uploaded to the iDRAC. The KMIP error value arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = KMP ServerIP</li> <li>• arg2 = IP Error Value</li> </ul>
<b>Detailed Description</b>	Cannot connect to the Key Management Server identified in the message because either invalid server attributes are entered or invalid SEKM certificate is uploaded to the iDRAC. The KMIP error value is displayed in the message.
<b>Recommended Response Action</b>	Make sure of the following and retry the operation: 1) The SEKM settings on the iDRAC are correct. 2) A signed iDRAC CSR is uploaded to iDRAC. 3) A Key Management Server CA certificate is uploaded to the iDRAC. For information about setting up SEKM on iDRAC, see the iDRAC Users Guide available on the support site.
<b>Category</b>	System Health (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## SEKM013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Key Management Server arg1 rejected the iDRAC account user name and password credentials setup on this iDRAC.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = server name</li></ul>
<b>Detailed Description</b>	The Key Management Server identified in the message rejected the iDRAC account user name and password set up on this iDRAC.
<b>Recommended Response Action</b>	Enter the correct iDRAC Key Management Server user name and password that matches the account credentials created for this iDRAC on the Key Management Server, and then retry the operation. For information about valid iDRAC user name and password, see the iDRAC Users Guide available on the support site.
<b>Category</b>	System Health (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Critical

## SEKM045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC is unable to secure arg1 because the device is not currently supported by iDRAC.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = deviceName</li> </ul>
<b>Detailed Description</b>	iDRAC cannot secure the device identified in the message because either iDRAC does not support the device type, the device firmware is incompatible, or the device does not use the encryption protocol supported by iDRAC. For example, TCG Opal 2.0 or later using SMBUS. Therefore, iDRAC cannot secure the device.
<b>Recommended Response Action</b>	1) No response action is required if the device is to be used in a non-secure mode. 2) Otherwise ensure that the device has the correct firmware version that supports security or is of the type supported by iDRAC.

## SEKM088

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC is unable to communicate with the device arg1. Issue details: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = deviceName</li> <li>• arg2 = error Description</li> </ul>
<b>Detailed Description</b>	The iDRAC is unable to successfully communicate with the device identified by the device name via out of band. This can occur for several reasons which include: improper device seating, device firmware error or iDRAC firmware error.
<b>Recommended Response Action</b>	Make sure of the following and retry the operation:1) Device supports the security protocol by using SMBus (TCG Opal or TCG Enterprise).2) The Send and Receive commands of security are supported by SMBus.3)Ensure the device is operating correctly in the host Operating System.4)Ensure the device and iDRAC firmware are current.5)Run the following RACADM command at the Command Line Interface (CLI) and retry the operation: racadm racreset. 6)Ensure the device is properly installed.7)Ensure cabling is correctly installed.9)Contact technical support if the error persists.
<b>Category</b>	Audit (SEKM = Secure Enterprise Key Management)

## SEKM089

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC is unable to perform security operation on the device arg1 as no security mode has been enabled on iDRAC.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = device_description</li></ul>
<b>Detailed Description</b>	iDRAC has detected a device identified by the device description to be in a secured state but security has not been enabled on iDRAC. The device will remain in a locked or foreign state and no user data will be accessible.
<b>Recommended Response Action</b>	1) To unlock or secure the device enable Secure Enterprise Key Manager (SEKM) or iDRAC Local Key Management (iLKM) security mode on iDRAC. To enable SEKM or iLKM security mode on iDRAC refer to the iDRAC users guide.2) To use this device in an unsecured state disable security on the device. Note that disabling security could erase all user data on this device. For controllers perform a disable security operation whereas for SED perform a PSID based Revert operation using any of the iDRAC interfaces. Refer to the iDRAC user guide for the relevant command.3) To retain user data on the device move the device back to the original system.

## SEKM097

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC is unable to perform the requested operation because one or more devices on the server are secured by the oldest iDRAC key that will be purged out or made obsolete.
<b>Detailed Description</b>	The requested operation will purge the oldest key stored on iDRAC. One or more devices on the server are secured by the oldest iDRAC key. If these devices cannot be rekeyed then the devices will be locked by a key that will be purged by the requested operation resulting in these devices being locked out on the next server restart. To avoid this situation, iDRAC is unable to perform the requested operation.
<b>Recommended Response Action</b>	To allow iDRAC to rekey the device to the iDRACs current key, do one of the following: 1) Manually remove and reinsert the device to enable iDRAC to rekey it to the current iDRAC key. 2) Restart the server by running the following command at the Command Line Interface (CLI): racadm serveractionpowercycle. After the device is rekeyed to the current iDRAC key then retry the operation. If the device cannot be rekeyed to the current iDRAC key, back up data from the device, remove the device from the server, and then retry the operation.

## SEKM104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC is unable to cache the key arg1 because iDRAC could not obtain the key from the Key Management Server (KMS).
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = keyID</li></ul>
<b>Detailed Description</b>	iDRAC is unable to cache the identified key because iDRAC could not obtain the key from the Key Management Server (KMS). For more information about the possible causes, see the previous SEKM messages associated with this Lifecycle log.
<b>Recommended Response Action</b>	Make sure that iDRAC is able to connect to the Key Management Server and has permission to access the identified key.
<b>Category</b>	Audit (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The process of securing the drive arg1 is initiated.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = drive</li></ul>
<b>Detailed Description</b>	The drive identified in the message is secured successfully. An internal update operation is in progress.

<b>Recommended Response Action</b>	Check the lifecycle log for SEKM080 message for completion of the drive securing process.
<b>Category</b>	Audit (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Rekey mode has changed from arg1 to arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = current rekey mode</li> <li>• arg2 = new rekey mode</li> </ul>
<b>Detailed Description</b>	The Secure Enterprise Key Manager (SEKM) rekey mode has changed as identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SEKM = Secure Enterprise Key Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEKM107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to revoke the key on the Key Management server arg1 because either iDRAC does not have permission to revoke this key ID or the KMS server is unable to complete the revoke operation. The KMIP error value is arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = IP</li> <li>• arg2 = Error Value</li> </ul>
<b>Detailed Description</b>	The Key Management Server identified in the message cannot revoke the key because either the key ID is unavailable on the Key Management Server or iDRAC does not have permission to revoke this key ID. The KMIP error value is displayed in the message.
<b>Recommended Response Action</b>	Verify the SEKM server settings and retry the operation. 1) On the iDRAC GUI, click Storage > SEKM. 2) Under Services, expand iDRAC Key Management and ensure that the Key Management Service feature is set to SEKM. To verify the SEKM mode by using a RACADM command, run the following command at the CLI: racadm>>sekm getstatus.

## SEL1513

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The status of Chassis Controller has changed from critical to OK.
<b>Detailed Description</b>	The iDRAC communication link to Chassis Controller is restored. Any issues related to network communication between Chassis Controller and iDRAC, incorrectly seated Chassis Controller, or unavailability of Chassis Controller is now resolved successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SEL = System Event Log)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2379
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SEL1514

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to read the temperature from the inlet temperature sensor because of internal issues. This condition may impact server performance.
<b>Detailed Description</b>	The inlet temperature sensor measures the temperature of air entering the system. The inlet temperature is located on the front of the server, either in the control panel, right control panel or right rack ear, or front IO module. iDRAC is unable to read temperatures from this sensor because of an issue in the control panel, the cable that connects the control panel or the iDRAC firmware.
<b>Recommended Response Action</b>	Do one or all of the following: 1) Perform a virtual AC Cycle or disconnect and reconnect the input power cords. 2) Manually remove and reinstall the cable that connects the control panel, right control panel, and front IO module. 3) Update iDRAC firmware to the latest version available.
<b>Category</b>	System Health (SEL = System Event Log)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2377
<b>LCD Message</b>	The Inlet Temp sensor is not responding because it is damaged or has failed.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle

## SEL1515

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	One of the I2C sensor is not responding or is not working properly. The status of Sensor health is critical.
<b>Detailed Description</b>	An I2C sensor is not responding either because it is damaged, or because of damaged circuit lines for I2C bus, or a faulty sensor state.
<b>Recommended Response Action</b>	To find the sensor number that is not responding, type "racadm getsel -E" and check the Event Data Byte 1. To recover the sensor from the faulty state, do one of the following: 1) Reset iDRAC: a) By

using graphical user interface (GUI), click Overview > Server > Quick Launch Tasks > Reset iDRAC. b) by running RACADM command at the command line interface (CLI), enter racadm racreset. 2) Change the corresponding I2C sensor by contacting your service provider.

<b>Category</b>	System Health (SEL = System Event Log)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2377
<b>LCD Message</b>	An I2C sensor is not responding because it is damaged or has failed.

## SIOM—SAS IOM Event Messages

### SIOM0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SAS IOM arg1 could not establish communication with SAS IOM arg2 due to a communication fault.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = IOM name1</li> <li>• arg2 = IOM name2</li> </ul>
<b>Detailed Description</b>	The SAS IOM devices identified in the message could not communicate with each other via the inter IOM link.
<b>Recommended Response Action</b>	Reseat the SAS IOM devices one at a time and retry the operation. For information about managing SAS IOM devices, refer to the OpenManage Enterprise Modular Version Users Guide available on the support site.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The communication between SAS IOM arg1 and SAS IOM arg2 is restored.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = IOM name1</li><li>• arg2 = IOM name2</li></ul>
<b>Detailed Description</b>	The communication between the SAS IOM devices identified in the message is successfully restored. The PartnerInterconnectCommunicationFault event is resolved.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The SAS IOM is currently configured for redundancy but SAS IOM arg1 has a firmware mismatch with SAS IOM arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = IOM name1</li><li>• arg2 = IOM name2</li></ul>
<b>Detailed Description</b>	The SAS IOM is currently configured for redundancy but the firmware version of the SAS IOM devices identified in the message do not match.
<b>Recommended Response Action</b>	Update the firmware version and retry the operation. If the issue, persists, replace the SAS IOM. For information about managing SAS IOM devices, refer to OpenManage Enterprise Modular Version Users Guide available on the support site.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SAS IOM arg1 and SAS IOM arg2 firmware mismatch has been resolved.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = IOM name1</li><li>• arg2 = IOM name2</li></ul>
<b>Detailed Description</b>	The firmware version mismatch between the SAS IOM devices identified in the message is successfully resolved.
<b>Recommended Response Action</b>	No response action is required.

<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The SAS IOM device redundancy is degraded.
<b>Detailed Description</b>	This event indicates that the SAS IOM has been configured for dual domain operation but only one module is currently present.
<b>Recommended Response Action</b>	Insert a SAS IOM device into the empty slot and retry the operation. For information about managing SAS IOM devices, refer to OpenManage Enterprise Modular Version Users Guide available on the support site.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The SAS IOM device redundancy issue is resolved.
<b>Detailed Description</b>	The SAS IOM device redundancy issue is resolved. The specified number of IOMs are now present in the slots.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the firmware version of the device because of an internal error.
<b>Detailed Description</b>	Unable to update the firmware version of the device because of an internal error.
<b>Recommended Response Action</b>	Retry the firmware update operation. If the issue persists, contact your service provider. For information about updating devices, refer to OpenManage Enterprise Modular Version Users Guide available on the support site.

<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the firmware because the firmware image file is invalid.
<b>Detailed Description</b>	The firmware version cannot be updated because the firmware image file is invalid. This could indicate conditions such as corrupted or unsigned package.
<b>Recommended Response Action</b>	Use a valid firmware image file that is compatible with SAS IOM or storage enclosure hardware, and then retry the firmware update operation. For information about updating devices, refer to OpenManage Enterprise Modular Version Users Guide available on the support site.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Firmware update successful.
<b>Detailed Description</b>	The firmware is successfully updated.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to apply the storage assignment.
<b>Detailed Description</b>	The storage assignment cannot be applied.
<b>Recommended Response Action</b>	Retry the operation. For information about managing SAS IOM devices, refer to OpenManage Enterprise Modular Version Users Guide available on the support site.
<b>Category</b>	System Health (SIOM = SAS IOM)

<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The storage assignment is successfully applied.
<b>Detailed Description</b>	The storage assignment is successfully applied.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational

## SIOM0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Storage enclosure in Chassis Slot arg1 has expanders with different firmware.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Chassis Slot name</li> </ul>
<b>Detailed Description</b>	This event indicates that the expanders within a storage module have different firmware versions.
<b>Recommended Response Action</b>	Flash the Expanders with the latest firmware. For information about managing SAS IOM devices, refer to OpenManage Enterprise Modular Version Users Guide available on the support site.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Firmware mismatch on expanders within a storage enclosure in Chassis Slot arg1 has been cleared.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Chassis Slot name</li> </ul>
<b>Detailed Description</b>	This event indicates that the expanders within a storage module now have the same firmware.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hot swappable expander arg1 in storage enclosure in Chassis Slot arg2 is not functioning correctly.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = EMM name</li> <li>arg2 = Chassis Slot name</li> </ul>
<b>Detailed Description</b>	The hot-swappable expander identified in the message in the storage enclosure in Chassis slot is not functioning.

<b>Recommended Response Action</b>	Reseat the hot-swappable expander. If the issue persists, replace the hot-swappable expander.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hot swappable expander arg1 in storage enclosure in Chassis Slot arg2 is functioning correctly.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = EMM name</li> <li>arg2 = Chassis Slot name</li> </ul>
<b>Detailed Description</b>	The hot-swappable expander identified in the message in the storage enclosure in Chassis slot is functioning.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Storage enclosure in Chassis Slot arg1 has been added.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Chassis Slot name</li> </ul>
<b>Detailed Description</b>	The storage enclosure is inserted into the Chassis slot identified in the message. This is for hotplug only.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	ResourceAdded
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Storage enclosure in Chassis Slot arg1 has been removed.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Chassis Slot name</li> </ul>
<b>Detailed Description</b>	The storage enclosure is removed from the Chassis slot identified in the message. The enclosure will also be marked as removed if all SAS connectivity to the enclosure is lost.
<b>Recommended Response Action</b>	No response action is required if the enclosure was removed. If the enclosure was not physically removed confirm the enclosure is powered on and the expanders are installed, and not faulted.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	ResourceRemoved
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hot swappable expander arg1 has been added to storage sled in slot arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = EMM slot</li> <li>• arg2 = Insight slot</li> </ul>
<b>Detailed Description</b>	The hot-swappable expander identified in the message is inserted. This is for hot plug only.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	ResourceAdded
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hot swappable expander arg1 has been removed from storage sled in slot arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = EMM slot</li> <li>• arg2 = Insight slot</li> </ul>
<b>Detailed Description</b>	The hot-swappable expander identified in the message has been removed from the storage Enclosure.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	ResourceRemoved
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Reset has been initiated on storage enclosure in slot arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Chassis Slot name</li></ul>
<b>Detailed Description</b>	The Reset operation is initiated on the storage enclosure in the Chassis identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SIOM0025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SAS IOM arg1 has a configuration mismatch with SAS IOM arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = IOM name1</li><li>• arg2 = IOM name2</li></ul>
<b>Detailed Description</b>	There is a configuration mismatch between the SAS IOM devices identified in the message.
<b>Recommended Response Action</b>	The configuration mismatch could be due to incorrect SAS IOM movement. Choose the ForceActive option in OpenManage Enterprise - Modular to override the mismatch and use the local configuration, and then apply to both SAS IOMs.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert

## SIOM0026

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SAS IOM arg1 and SAS IOM arg2 now have the same configuration.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = IOM name1</li><li>• arg2 = IOM name2</li></ul>
<b>Detailed Description</b>	The configuration of both SAS IOM devices identified in the message is the same.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (SIOM = SAS IOM)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert

**Applicable Event or Alert Types** No alerts are applicable for this message

## SIOM0027

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** SAS IOM arg1 has a configuration that is not consistent with chassis.

**Arguments**

- arg1 = IOM name

**Detailed Description** This event indicates that the foreign SAS IOMs are inserted to the chassis.

**Recommended Response Action** The configuration mismatch could be due to incorrect switch movement. Do one of the following: 1) Replace the switch. 2) Run the ForceActive command at the command line interface to override the mismatch and use the local configuration, and then apply to both switches.

**Category** System Health (SIOM = SAS IOM)

**Severity** Critical

**Redfish Event Type** Alert

**Applicable Event or Alert Types** No alerts are applicable for this message

## SIOM0028

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The configuration of SAS IOM device arg1 is consistent with the configuration of Chassis.

**Arguments**

- arg1 = IOM name

**Detailed Description** The configuration of both SAS IOM device identified in the message is consistent with the configuration of Chassis.

**Recommended Response Action** No response action is required.

**Category** System Health (SIOM = SAS IOM)

**Severity** Informational

**Redfish Event Type** Alert

**Applicable Event or Alert Types** No alerts are applicable for this message

## SIOM0029

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** SAS IOM arg1 has inconsistent firmware versions in its components.

**Arguments**

- arg1 = IOM name

**Detailed Description** The SAS IOM device identified in the message has inconsistent firmware versions in its components such as SoC, IOC, and expander.

**Recommended Response Action** Update the SAS IOM with the latest firmware version.

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS Collector application is unable to communicate with IPMI library.
----------------	--

<b>Detailed Description</b>	An issue occurred while loading the OS Collector IPMI library. This may be because the OS collector binary images are not valid and need to be re-installed.
<b>Recommended Response Action</b>	Do the following: 1) Retry the operation. 2) If the issue persists, reinstall the latest OS Collector on the iDRAC, and then retry the operation.

# SSD—SSD Devices Event Messages

## SSD0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Write Endurance of Solid state drive (SSD) arg1 is less than the threshold value of Remaining Write Rated Endurance.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = drive FQDD</li></ul>
<b>Detailed Description</b>	The Write Endurance of solid state drive identified in the message is less than the threshold value of Remaining Write Rated Endurance.
<b>Recommended Response Action</b>	No action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	4370
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SSD0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Available Spare of solid state drive (SSD) arg1 is arg2 which is less than the threshold value arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = drive FQDD</li><li>• arg2 = available spare</li><li>• arg3 = Threshold spare</li></ul>
<b>Detailed Description</b>	The Available Spare of solid state drive identified in the message is less than the threshold value of Available Spare Alert.
<b>Recommended Response Action</b>	No action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	4370
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SSD1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Write-cache on arg1 is enabled.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = PCIe SSD name</li></ul>
<b>Detailed Description</b>	Write-cache is enabled on the PCIe solid state drive (SSD) identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Warning
<b>OMSA Event ID</b>	2427
<b>OMSA Trap ID</b>	90300
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Write-cache on arg1 is disabled.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = PCIe SSD name</li></ul>
<b>Detailed Description</b>	Write-cache is disabled on the PCIe solid state drive (SSD) identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Warning
<b>OMSA Event ID</b>	2428
<b>OMSA Trap ID</b>	90300
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 is ready for removal.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = PCIe SSD name</li></ul>
<b>Detailed Description</b>	The PCIe solid state drive (SSD) identified in the message is ready for removal.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)

<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2429
<b>OMSA Trap ID</b>	90100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Exported the arg1 log file.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = PCIe SSD name</li> </ul>
<b>Detailed Description</b>	The log file of the PCIe solid state drive (SSD) identified in the message is successfully exported.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2430
<b>OMSA Trap ID</b>	90100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully initialized arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = PCIe SSD name</li> </ul>
<b>Detailed Description</b>	The initialization of the PCIe solid state drive (SSD) identified in the message is complete.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2431
<b>OMSA Trap ID</b>	90100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 has reached arg2 of warranted device wear-out limit.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = PCIe solid state device name</li><li>• arg2 = percent</li></ul>
<b>Detailed Description</b>	The PCIe solid state device identified in the message is approaching the warranted wear-out limit.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2433
<b>OMSA Trap ID</b>	90100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 has reached or exceeded its warranted wear-out limit.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = PCIe solid state device name</li></ul>
<b>Detailed Description</b>	The solid state device identified in the message has either reached or exceeded the warranted wear-out limit.
<b>Recommended Response Action</b>	No action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2434
<b>OMSA Trap ID</b>	90300
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 is approaching read-only mode.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = PCIe solid state device name</li></ul>
<b>Detailed Description</b>	The PCIe solid state device identified in the message is between 90% and 100% of reaching read-only mode.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2435
<b>OMSA Trap ID</b>	90100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 is in read-only mode.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = PCIe solid state device name</li> </ul>
<b>Detailed Description</b>	The PCIe solid state device identified in the message is in read-only mode.
<b>Recommended Response Action</b>	Back up the data on the device, and contact your service provider for further instructions.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Critical
<b>OMSA Event ID</b>	2436
<b>OMSA Trap ID</b>	90400
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 is in a security locked state.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = PCIe solid state device name</li> </ul>
<b>Detailed Description</b>	The PCIe solid state device identified in the message is in a locked state, because an existing initialization task was interrupted due to a power failure or disk removal.
<b>Recommended Response Action</b>	Run Full Initialize operation on the device identified in the message.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Warning
<b>OMSA Event ID</b>	2432
<b>OMSA Trap ID</b>	90200
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Remaining Rated Write Endurance Threshold for PCIe SSDs is set to arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = value</li></ul>
<b>Detailed Description</b>	The Remaining Rated Write Endurance (RRWE) Threshold for PCIe solid state devices has been modified. A warning alert is generated when the RRWE for any PCIeSSD device falls below the user set RRWE Threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2449
<b>OMSA Trap ID</b>	10100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Remaining Rated Write Endurance Threshold for SAS and SATA SSDs is set to arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = value</li></ul>
<b>Detailed Description</b>	The Remaining Rated Write Endurance (RRWE) Threshold for SAS and SATA solid state devices has been modified. A warning alert when the RRWE for any SAS or SATA SSD falls below the threshold set by the user.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2448
<b>OMSA Trap ID</b>	10100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Available Spare Warning threshold for PCIe solid state drives (SSDs) is set to arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = value</li></ul>

<b>Detailed Description</b>	The Available Spare Warning threshold for PCIe solid state drives (SSDs) is set to the value identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	2452
<b>OMSA Trap ID</b>	10100
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## SSD1014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Available Spare value of PCI solid state drive arg1 is less than the Warning threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = PCIe SSD name</li> </ul>
<b>Detailed Description</b>	The Available Spare value of PCI solid state drive (SSDs) is less than the Warning threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (SSD = SSD Devices)

## STOR—Storage Event Messages

### STOR001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The command is successfully run.
<b>Detailed Description</b>	The command is successfully run.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## STOR003

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Missing parameter.

**Detailed Description** Required parameter is missing.

**Recommended Response Action** Refer to the RAID profile to determine required parameters.

**Category** Configuration (STOR = Storage)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## STOR004

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Invalid parameter value

**Detailed Description** Provided parameter value is not valid.

**Recommended Response Action** Refer to the RAID profile to determine the valid parameters values.

**Category** Configuration (STOR = Storage)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## STOR006

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to complete the operation.

**Detailed Description** The operation could not be completed because of one of the following:1) The device does not support the operation.2) There is an issue with the management controller (either the iDRAC or the Chassis Management Controller/Management Module (CMC/MM)) that is managing the storage.

**Recommended Response Action** Retry the operation.If the issue persists, the operation may not be supported.For more information, see the iDRAC Users Guide available on the support site.

**Category** Configuration (STOR = Storage)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to allocate resources.
<b>Detailed Description</b>	The operation could not be completed because of insufficient memory space on the management controller (either the iDRAC or the Chassis Management Controller/Management Module (CMC/MM)) managing the storage.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because either the Fully Qualified Device Descriptor (FQDD) entered did not match any virtual drive (VD), the physical drives available, or the operation is not supported on the physical drive (s).
<b>Detailed Description</b>	The operation cannot be completed because either the Fully Qualified Device Descriptor (FQDD) entered did not match any virtual drive (VD), the physical drives available, or the operation is not supported on the physical drive (s).
<b>Recommended Response Action</b>	Make sure of the following and retry the operation: 1) A physical drive or virtual drive with the FQDD entered exists. 2) The physical drive (s) supports the operation being tried. For more information about supported physical drives, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation either because the RAID level entered is not supported by the controller, or the current RAIDType of "MD Software RAID" does not allow the operation.
<b>Detailed Description</b>	The operation cannot be completed either because the RAID level entered is not supported by the controller, or the current RAIDType of "MD Software RAID" does not allow the operation.
<b>Recommended Response Action</b>	Enter a valid RAID level and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No RAID controller is displayed.
<b>Detailed Description</b>	No RAID controller data to display. The system is powered off, no RAID controller is present in the system, or the RAID controller is not connected to the system.
<b>Recommended Response Action</b>	Check if the server has power, RAID controller is available, and that a RAID controller is connected to the system.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No batteries are displayed.
<b>Detailed Description</b>	No battery data to display. The system is powered off, batteries are not present on the system, batteries are not connected to the RAID controller, or the batteries are depleted.
<b>Recommended Response Action</b>	Check if the server has power, batteries are available, and batteries are connected to the RAID controller.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No physical disks are displayed.
<b>Detailed Description</b>	No physical disk data to display. The system is powered off, physical disks are not present on the system, or physical disks are not connected to the enclosure or backplane.
<b>Recommended Response Action</b>	Check if the server has power, physical disks are available, and physical disks are connected to the enclosure or backplane.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No virtual disks are displayed.
<b>Detailed Description</b>	No virtual disk data to display. The system is powered off, physical disks are not present on the system, or virtual disks are not created.
<b>Recommended Response Action</b>	Check if the server has power, physical disks are available, and virtual disks are created.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No enclosures are displayed.
----------------	------------------------------

<b>Detailed Description</b>	No enclosure data to display. The system is powered off, enclosures are not present on the system, or enclosures are not connected to the RAID controllers.
<b>Recommended Response Action</b>	Check if the server has power, enclosures are available, and enclosures are connected to the RAID controllers.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Fans are not connected to enclosures or data about fans is unavailable.
<b>Detailed Description</b>	No fan data to display. The system is powered off, no fan enclosures are present in the system, or the fans are not connected to the enclosures.
<b>Recommended Response Action</b>	Check if the server has power, enclosure fan is available, and fan is connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	EMMs are not connected to enclosures or data about EMMs is unavailable.
<b>Detailed Description</b>	No EMMs data to display. The system is powered off, no enclosure EMMs are present, or the EMMs are not connected to the enclosures.
<b>Recommended Response Action</b>	Check if the server has power, EMMs are available, and EMMs are connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0108

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Temperature probes are not connected to enclosures or data about temperature is unavailable.
<b>Detailed Description</b>	No temperature data to display. The system is powered off, no enclosure temperature probes are present in the system, or the temperature probes are not connected to the enclosures.
<b>Recommended Response Action</b>	Check if the server has power, enclosure temperature probe is available, and temperature probe is connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0109

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Power supply unit is not connected to the enclosure or data about power supply unit is unavailable.
<b>Detailed Description</b>	No power supply unit data to display. The system is powered off, no power supply unit is present in the system, or the power supply unit is not connected to the enclosure.
<b>Recommended Response Action</b>	Check if the server has power, enclosure power supply unit is available, and power supply unit is connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Stripe size not supported on controller.
<b>Detailed Description</b>	The operation cannot be completed because the stripe size entered is not supported by the controller.
<b>Recommended Response Action</b>	Enter a valid stripe size and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## STOR0110

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Invalid Fully Qualified Device Descriptor (FQDD).

**Detailed Description** The specified Fully Qualified Device Descriptor (FQDDs) system component name is invalid.

**Recommended Response Action** Verify that the correct Fully Qualified Device Descriptor (FQDD) system component name is specified. See the help text (The help text for the raid subcommand can be obtained by running "racadm help raid") or documentation for valid FQDD system component names.

**Category** Storage (STOR = Storage)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## STOR0111

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Invalid reference key.

**Detailed Description** The specified reference key is invalid.

**Recommended Response Action** Verify that the correct reference key is specified. See the help text or documentation for valid reference keys.

**Category** Storage (STOR = Storage)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## STOR012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Provided Physical disk not valid for this operation.

**Detailed Description** One or more of the specified physical disks cannot be used for the operation requested. Physical disk protocol and media type, along with other physical disk characteristics like Secure Encryption and T10 protection, need to match the requirements of the requested operation.

<b>Recommended Response Action</b>	Make sure the specified physical disk has the appropriate protocol and media type for the requested operation. Specify a different physical disk with a state appropriate for the requested operation and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	One or more storage device(s) are not in a state where the operation can be completed.
<b>Detailed Description</b>	One or more storage device(s) are in a state that prevents the operation from completing.
<b>Recommended Response Action</b>	Make sure the specified storage devices are in a state appropriate for the requested operation and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Maximum virtual disks allowed for this controller has been reached.
<b>Detailed Description</b>	A new virtual disk cannot be created because the maximum number of virtual disks are already created.
<b>Recommended Response Action</b>	A new virtual disk cannot be created until one is deleted.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The physical disk specified is not large enough to be a hot spare for this virtual disk.
<b>Detailed Description</b>	The physical disk drive cannot be assigned as the hot-spare of this virtual disk because the capacity of the physical disk is not sufficient.
<b>Recommended Response Action</b>	Specify a physical disk with a larger capacity or replace the specified physical disk with one with more capacity, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## STOR017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The specified Virtual Disk is not valid for the operation.
<b>Detailed Description</b>	The virtual disk specified is not compatible with the requested operation or a specified operation parameter is not appropriate for the virtual disk type specified.
<b>Recommended Response Action</b>	Make sure the operation parameters are appropriate for the virtual disk type. Specify a compatible virtual disk for the requested operation and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No foreign configurations detected.
<b>Detailed Description</b>	This operation did not detect any foreign drives. This may be because no foreign drives are present or the only foreign drives are in a secured locked state.
<b>Recommended Response Action</b>	If the only foreign drives present are in a secured locked state, run a secure erase operation on the drives to securely erase data or unlock these drives and retry the operation. Otherwise the operation was not successful because there are no foreign drives.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Warning

## STOR031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Lifecycle Controller is not enabled.
<b>Detailed Description</b>	For 11G systems: System Services must be enabled to perform the requested operation. System Services has been disabled through the iDRAC configuration utility accessed by pressing CTRL+E on boot up or through a remote operation. For 12G and above generations: Lifecycle Controller must be enabled to perform the requested operation. Lifecycle Controller has been disabled by pressing F2 Setup, selecting iDRAC Configuration, and selecting Lifecycle Controller Settings on boot up or through a remote operation.
<b>Recommended Response Action</b>	For 11G systems: Use the iDRAC configuration utility to enable the System Services by pressing on the CTRL+E option on boot up at the targeted system. For 12G and above generations: Use F2 Setup, select iDRAC Configuration, and select Lifecycle Controller Settings, to enable the Lifecycle Controller on boot up of the targeted system.

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## STOR0506

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create virtual disk.
<b>Detailed Description</b>	The physical disk is unreadable or the RAID controller is not responding.
<b>Recommended Response Action</b>	Exit Lifecycle Controller, press the <F10> key to re-enter Lifecycle Controller, and retry the operation. If the problem persists, replace the physical disk or update the RAID controller firmware to the latest version, and retry the operation.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## STOR0507

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Insufficient physical disk space on selected RAID controller.
<b>Detailed Description</b>	The RAID controller does not have sufficient number of initialized physical disks or adequate disk space to create the requested virtual disk.
<b>Recommended Response Action</b>	Connect additional physical disks to the RAID controller, initialize the physical disks, and retry the operation. To initialize the physical disks, reboot the system and select Option ROM during system startup.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Enclosure configuration mode (Split/Unified) cannot be changed because there are already pending operations.
<b>Detailed Description</b>	The requested operation could not be completed because at least one other pending operation was found on the RAID controller. This operation needs exclusivity because it involves changing RAID backplane topology.
<b>Recommended Response Action</b>	Do one of the following: 1) Create a job to complete the pending operations, allow the job to complete, and then retry the operation. 2) Cancel any pending operations on the RAID controller, and then retry the operation.

## STOR311

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A firmware update was applied to a drive that requires a DC power cycle (cold boot). If the drive is in an external enclosure, the updated firmware will only be activated after a DC power cycle of the enclosure.
<b>Detailed Description</b>	A drive firmware update was applied but requires a DC power cycle (cold boot) to activate. If the drive is internal to the system performing the update, no further action is required. If the drive is in an external enclosure, the enclosure must be turned off and then turned on in order for the updated drive firmware to activate.
<b>Recommended Response Action</b>	If the drive is internal to the system performing the update, no further action is required. If the drive is in an external enclosure, the enclosure must be turned off and then turned on in order for the updated drive firmware to activate. After turning off the external enclosure, wait for drives to spin down before turning the enclosure back on. The drive firmware will activate after the enclosure is turned back on.

## STOR317

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the reconfiguration operation because the number of physical disks specified in the disk group is not as per the permitted range.
<b>Detailed Description</b>	A disk drive group has a limit on the minimum and maximum number of disk drives it can have on the basis of its Virtual Disk RAID level. When a reconfiguration operation is specified with additional physical disks the total number of physical disks should be in the disk groups permissible range.
<b>Recommended Response Action</b>	Enter the correct number of physical disks for the reconfiguration operation and retry the operation. The number of physical disks in a disk group must be within the disk groups permissible range. For information about the minimum and maximum possible physical disks in a disk group, see the Lifecycle Controller Users Guide available at the support site.

## STOR318

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the reconfiguration operation because the Virtual Disk size specified is invalid.
<b>Detailed Description</b>	Expansion of storage capacity of a Virtual Disk is limited by the disk space of its physical disks and the Virtual Disk RAID level. Based on these two values there is a maximum limit on the capacity expansion size of a Virtual Disk.
<b>Recommended Response Action</b>	Make sure that the Virtual Disk size specified for the reconfiguration operation is less than or equal to the maximum possible value. For information about the maximum possible value, see the Lifecycle Controller Users Guide available at the support site.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Critical

## STOR320

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to start the reconfiguration operation because the requested reconfiguration operation is invalid.
<b>Detailed Description</b>	The storage controller does not support online capacity expansion and RAID level migration of a Virtual Disk at the same time.
<b>Recommended Response Action</b>	There are two Reconfiguration operations possible on a Virtual Disk 1) Online Expansion of the storage capacity 2) RAID level migration . Only one of the above two operations can be specified in a Reconfiguration operation. Make sure that only one of the above two operation types is requested and retry the operation. Also make sure that if provided, the Virtual Disk size is at least 1% of the maximum expansion size possible. Also make sure that if provided, the new Virtual Disk RAID level is different from the existing raid level.

<b>Message</b>	Redundancy lost.arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = VD/Enclosure Name</li></ul>
<b>Detailed Description</b>	A virtual disk or enclosure has lost data redundancy. In the case of a virtual disk, one or more physical disks included in the virtual disk have failed. Due to the failed physical disk or disks, the virtual disk is no longer maintaining redundant (mirrored or parity) data. The failure of an additional physical disk will result in lost data. In the case of an enclosure, more than one enclosure component has failed. For example, the enclosure may have suffered the loss of all fans or all power supplies.
<b>Recommended Response Action</b>	Identify and replace the failed components. To identify the failed component, select the Storage object and click the Health subtab. The controller status displayed on the Health subtab indicates whether a controller has a failed or degraded component. Click the controller that displays a Warning or Failed status. This action displays the controller Health subtab which displays the status of the individual controller components. Continue clicking the components with a Warning or Failed status until you identify the failed component. See Storage Health for more information. See the enclosure documentation for information on replacing enclosure components and for other diagnostic information.

## STS—System Thermal Shutdown Event Messages

### STS001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A critical thermal state is reached resulting in an immediate server shutdown operation. For more information, see the Detailed Description.
<b>Detailed Description</b>	The server has reached a Critical thermal state resulting in a shutdown operation.
<b>Recommended Response Action</b>	A critical thermal condition is reached. Check system operating environment and review event log for fan failures first and If configured to shut down (check iDRAC alert configuration settings) and then contact the Technical Support if necessary.
<b>Category</b>	System Health (STS = System Thermal Shutdown)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3721
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Graceful Power OFF
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### STS002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system is no longer in thermal critical state. The shutdown operation has been averted.
<b>Detailed Description</b>	The system is no longer in thermal critical state. The shutdown operation has been averted.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (STS = System Thermal Shutdown)

# SUP—Firmware Update Job Event Messages

## SUP001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Insufficient parameters provided.
<b>Detailed Description</b>	Insufficient Parameters provided for the WSMAN command.
<b>Recommended Response Action</b>	Make sure the parameters are correct and in the right number and format and retry the action.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SUP002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Job creation failure.
<b>Detailed Description</b>	Could not create a new job because of a network error or an unresponsive iDRAC.
<b>Recommended Response Action</b>	Retry the action. If this fails, reboot the iDRAC.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SUP003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid URI, target or reboot flag.
<b>Detailed Description</b>	One of the uniform resource input (URI) string, target or reboot flag parameters is missing or exceeds the prescribed length.
<b>Recommended Response Action</b>	Verify that the URI, target or reboot flag parameter values are correct and retry the action.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SUP005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid reboot value.
<b>Detailed Description</b>	Reboot value specified is not supported.
<b>Recommended Response Action</b>	Verify the reboot value and retry the action. Current options available are 1)Power Cycle 2) Graceful shutdown without forced shutdown 3) Graceful shutdown with forced shutdown (~10 minutes wait time).
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## SUP006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Update package downloading - Delete failed.
<b>Detailed Description</b>	The DUP is being downloaded and the update cannot be deleted while the download is in progress.
<b>Recommended Response Action</b>	Wait until the update package is downloaded and retry the action. The download can take more than 5 minutes depending on network speed and size of the update package.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
