# PowerEdge Servers Error and Event Messages (EEMs)

Updated on: July/19/2025.

This Reference Guide has information about Error and Event Messages (EEMs) pertaining to 12G, 13G, 14G, 15G, 16G, and 17G PowerEdge servers. These EEMs are displayed on User Interface (UI), Command-Line Interface (CLI), Rest API, and sometimes stored in the data log files. EEMs are displayed or stored as a result of user action, automatic event occurrence, or for data logging purposes. This Reference Guide lists EEMs pertaining to PowerEdge Servers programs such as iDRAC, iSM, OpenManage tools, and OMSA. EEMs are prefixed with an event type to help in identification. For example PSU, STOR, and VLT representing Power Supply Unit, Storage, and Voltage categories respectively.

This guide serves as a vital tool for IT administrators and support personnel to diagnose, respond to, and resolve system alerts efficiently, ensuring optimal server performance and reliability. An EEM has three elements:

- **Message**—Indicates the message, and possible causes, where available.
  - **Recommended Response Action**—Indicates the remedial tasks to be performed by you to resolve an issue. Where applicable, the iDRAC UI, RACADM, or Redfish methods of resolving an issue are described .
  - **Detailed Description**—Provides more information about the error or event, where available.
-  **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

Here is a list of message categories that are provided in this guide along with their acronyms:

## Topics:

- [Alert category definition](#)
- [ACC—Accelerator Event Messages](#)

## Alert category definition

- **System Health:** Represents all the alerts that are related to hardware within the system chassis. For example, temperature errors, voltage errors, and device errors.
- **Storage Health:** Represents alerts that are related to the storage subsystem. For example, controller errors, hard drive errors, and virtual drive errors.
- **Configuration:** Represents alerts that are related to hardware, firmware, and software configuration changes. For example, PCI-e card added or removed, RAID configuration changed, and iDRAC license changed.
- **Audit:** Category represents the audit log. Examples include, user login/logout information, Password authentication failures, session info, power states.
- **Update:** Represents alerts that are generated because of firmware or driver upgrades and downgrades. This does not represent firmware inventory.

## ACC—Accelerator Event Messages

### ACC0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Graphic Processing Unit (GPU) baseboard has saved log data related to critical events.
<b>Detailed Description</b>	The Graphic Processing Unit (GPU) baseboard has saved log data related to critical events.
<b>Recommended Response Action</b>	Collect the Technical Support Report (TSR) log data. To obtain more information about the GPU baseboard critical events, select the GPU Debug option. All the critical events are bundled as a part of the TSR log data.
<b>Category</b>	System Health (ACC = Accelerator)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3761
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ACC0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Graphics Processing Unit (GPU) Baseboard has detected arg1 GPUs that are incorrectly located. The GPUs located in slots arg2 must be relocated.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Number</li><li>• arg2 = Slot_Indexes</li></ul>
<b>Detailed Description</b>	The Graphics Processing Unit (GPU) Baseboard has detected GPUs that are incorrectly located as identified in the message. The GPUs located in slots as identified in the message must be relocated.
<b>Recommended Response Action</b>	To relocate the GPUs to the compatible slots, contact the Technical Support team.
<b>Category</b>	System Health (ACC = Accelerator)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ACC0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC has successfully configured arg1 SerDes retimers that operate in arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Number</li><li>• arg2 = Mode</li></ul>
<b>Detailed Description</b>	iDRAC has successfully configured the SerDes retimers on the GPU baseboard that operate in the mode identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (ACC = Accelerator)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ACC0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure the SerDes retimer because iDRAC is unable to communicate with the device.
<b>Detailed Description</b>	iDRAC is unable to communicate with the SerDes retimer on the GPU baseboard and unable to set the configuration mode.

<b>Recommended Response Action</b>	Perform a server Cold Reboot operation in the iDRAC UI by clicking Configuration > Power Management > Power Control > Power Cycle System (cold boot). Or, run the following RACADM command at the CLI: racadm serveraction powercycle. If the issue persists, contact your Technical Support team.
<b>Category</b>	System Health (ACC = Accelerator)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## AMP—Amperage Event Messages

### AMP0300

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board arg1 current is less than the lower warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2178
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

### AMP0301

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board arg1 current is less than the lower critical threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2177
<b>LCD Message</b>	System board <name> current is outside of range. Contact Support

<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## AMP0302

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board arg1 current is greater than the upper warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	Product documentation contains information on correct configuration. The failure could also be caused by a faulty component or related cabling. System performance may be degraded.
<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2178
<b>LCD Message</b>	The system board <name> current is outside of range.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## AMP0303

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board arg1 current is greater than the upper critical threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	Product documentation contains information on correct configuration. The failure could also be caused by a faulty component or related cabling. System performance may be degraded.
<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2177
<b>LCD Message</b>	System board <name> current is outside of range. Contact Support
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## AMP0304

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board arg1 current is outside of range.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	Product documentation contains information on correct configuration. The failure could also be caused by a faulty component or related cabling. System performance may be degraded.
<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2177
<b>LCD Message</b>	System board <name> current is outside of range. Contact Support
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## AMP0305

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board arg1 current is within range.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2179
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## AMP0306

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Disk drive bay arg1 current is less than the lower warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	No detailed description available.

<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2178
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## AMP0307

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Disk drive bay arg1 current is less than the lower critical threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.
<b>Category</b>	System Health (AMP = Amperage)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2177
<b>LCD Message</b>	Disk drive bay <name> current is outside of range. Contact Support
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## AMP0308

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Disk drive bay arg1 current is greater than the upper warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	Product documentation contains information on correct configuration. The failure could also be caused by a faulty component or related cabling. System performance may be degraded.
<b>Recommended Response Action</b>	Review system power policy, check system logs for power related failures, and review system configuration changes.

## ASR—Auto System Reset Event Messages

### ASR0000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer expired.
<b>Detailed Description</b>	The operating system or potentially an application failed to communicate to the baseboard management controller (BMC) within the timeout period.
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.

<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer reset the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate to the baseboard management controller (BMC) within the timeout period. The system was reset per the configured setting.
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>LCD Message</b>	The watchdog timer reset the system.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer powered off the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate to the baseboard management controller (BMC). The system powered off per the configured setting.
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer power cycled the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate to the baseboard management controller (BMC). The system powered cycled per the configured setting.
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer interrupt was initiated.
<b>Detailed Description</b>	The operating system or an application failed to communicate to the baseboard management controller (BMC) within the timeout period. The BMC invoked a system interrupt. (IPMI sensor type code 23h - offset 00h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system returned from a watchdog timer event.
<b>Detailed Description</b>	The system is communicating to the baseboard management controller (BMC).
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (ASR = Auto System Reset)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0100

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The BIOS watchdog timer reset the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate to the system board within the timeout period. The system was reset per the configured setting. (IPMI sensor type code 23h offset 01h event 3:0 - 2h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS watchdog timer reset the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate within the timeout period. System was reset. (IPMI sensor type code 23h offset 01 - event 3:0 - 3h if booting 4h if running).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS watchdog timer shutdown the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate within the timeout period. The system was shutdown. (IPMI sensor type code 23h offset - 02h event 3:0 - 4h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS watchdog timer powered down the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate within the timeout period. The system was powered down. (IPMI sensor type code 23h offset - 02h event 3:0 - 4h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS watchdog timer powered cycle the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate within the timeout period. The system was powered cycled. (IPMI sensor 23h offset - 03h event 3:0 - 4h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)

<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS watchdog timer powered off the system.
<b>Detailed Description</b>	The operating system or an application failed to communicate within the timeout period. The system was powered off. (IPMI sensor type code 23h offset - 02h event 3:0 - 4h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS watchdog timer expired.
<b>Detailed Description</b>	The operating system or an application failed to communicate within the timeout period. No action was taken. (IPMI sensor type code 23h - offset 00h event 3:0 - 4h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The OS watchdog timer pre-timeout interrupt was initiated.
<b>Detailed Description</b>	The operating system or an application failed to respond to a pre-notification with-in the timeout period. (IPMI sensor type code 11h - offset 07h).
<b>Recommended Response Action</b>	Check the operating system, application, hardware, and system event log for exception events.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2233
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## ASR0108

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system returned from an OS watchdog timer event.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## ASR200

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer expired at arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = day month date hh:mm:ss yyyy</li></ul>
<b>Detailed Description</b>	The watchdog timer has expired at the date and time identified in the message, because iDRAC did not receive a response within the specified time.
<b>Recommended Response Action</b>	To determine the correct cause of the exception, contact your service provider.
<b>Category</b>	System Health (ASR = Auto System Reset)

<b>Severity</b>	Critical
<b>OMSA Event ID</b>	5006
<b>OMSA Trap ID</b>	5006
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## ASR201

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer restarted the system at arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = day month date hh:mm:ss yyyy</li> </ul>
<b>Detailed Description</b>	The watchdog timer has restarted the system at the date and time identified in the message, because the operating system has crashed or hung.
<b>Recommended Response Action</b>	To determine the correct cause of the exception, contact your service provider.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>OMSA Event ID</b>	5006
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## ASR202

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer turned off the system at arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = day month date hh:mm:ss yyyy</li> </ul>
<b>Detailed Description</b>	The watchdog timer has turned off the system after the specified time at the date and time identified in the message, because the operating system has crashed or hung.
<b>Recommended Response Action</b>	To determine the correct cause of the exception, contact your service provider.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>OMSA Event ID</b>	5006
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## ASR203

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The watchdog timer performed an AC power cycle on the system at arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = day month date hh:mm:ss yyyy</li> </ul>
<b>Detailed Description</b>	The watchdog timer has performed an AC power cycle on the system after the specified time at the date and time identified in the message, because the operating system has crashed or hung.
<b>Recommended Response Action</b>	To determine the correct cause of the exception, contact your service provider.
<b>Category</b>	System Health (ASR = Auto System Reset)
<b>Severity</b>	Critical
<b>OMSA Event ID</b>	5006
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## ASR8500

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Watchdog timer is disabled.
<b>Detailed Description</b>	Watchdog timer is disabled. The watchdog timer is an internal mechanism used to monitor the health of the Chassis Management Controller. The watchdog timer could be disabled as part of a troubleshooting operation and can be enabled by restarting the Chassis Management Controller.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	System Health (ASR = Auto System Reset)

## BAR—Backup/Restore Event Messages

### BAR001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Export System Profile requested.
<b>Detailed Description</b>	A system profile export operation has been requested.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Validating vFlash Backup partition.
<b>Detailed Description</b>	The system profile Backup partition detection operation is in progress.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Preparing vFlash Backup partition.
<b>Detailed Description</b>	The Backup partition is being created for storing the backup file.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Collecting Hardware Inventory information.
<b>Detailed Description</b>	Hardware Inventory data is being collected and copied into the backup file.
<b>Recommended Response Action</b>	No response action is required.

<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Collecting Lifecycle Controller data.
<b>Detailed Description</b>	The Lifecycle Controller data is being collected and copied into the backup file.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Finalizing Backup file.
<b>Detailed Description</b>	The system profile backup file is being finalized and closed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Export System Profile completed.
----------------	----------------------------------

<b>Detailed Description</b>	System profile export operation is successfully completed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid Backup file passphrase provided.
<b>Detailed Description</b>	The passphrase provided is invalid.
<b>Recommended Response Action</b>	Verify the request parameters and retry. Check passphrase for rule validity. NOTE: A valid passphrase contains 8 to 32 characters. It must include a combination of uppercase and lowercase letters, numbers, and symbols without spaces.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Valid vFlash media not present.
<b>Detailed Description</b>	The vFlash media is not present on the system.
<b>Recommended Response Action</b>	Insert the appropriate vFlash media in the designated vFlash portal, enable and initialize it, and retry.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create Backup partition on vFlash media.
<b>Detailed Description</b>	The Backup partition creation operation did not complete successfully.
<b>Recommended Response Action</b>	Make sure that the vFlash media is not write-protected. Enable and initialize the vFlash media, retry backup. If that fails Try new vFlash media or use the Network Share option(s).
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to collect Hardware Inventory information.
<b>Detailed Description</b>	Hardware Inventory data collection and export did not complete successfully.
<b>Recommended Response Action</b>	Enter Lifecycle Controller GUI by pressing F10 during boot, and select exit and reboot option in the GUI to instantiate the database, if Collect System Inventory on Restart (CSIOR) is not enabled. If the hardware inventory database is present, restart the Integrated Remote Access Controller (iDRAC) and retry.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to collect Lifecycle Controller data.
<b>Detailed Description</b>	Lifecycle Controller data collection and export has failed.
<b>Recommended Response Action</b>	Do the following: 1) Download and apply the Dell Update Package (DUP) for Lifecycle Controller/Unified Server Configurator (USC). 2) Run System Services to update the database if CSIOR is not enabled. 3) Reboot the system and retry. If the issue persists after performing these operations, download the Field Service Repair software and repair the Lifecycle Controller. Download and install all the DUPs for Lifecycle Controller/USC, diagnostics, driver packs, and device firmware of all the devices of the host system.
<b>Category</b>	Configuration (BAR = Backup/Restore)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Host System Shutdown unsuccessful.
<b>Detailed Description</b>	The request to shut the Host system down did not complete successfully.
<b>Recommended Response Action</b>	Restart the Integrated Remote Access Controller (iDRAC) and retry the operation.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backup file or partition access error.
<b>Detailed Description</b>	Unable to access the server profile Backup file and the operation cannot continue. This can be due to a media error or loss of connectivity.
<b>Recommended Response Action</b>	If using vFlash media replace media and try again. If a network share, make sure there is connectivity to and existence of the destination.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backup file data processing error.
----------------	------------------------------------

<b>Detailed Description</b>	The Backup file information was not properly processed and the operation cannot continue. This can be due to resource constraints within the processing environment. If the network share is read only, this error will be thrown also.
<b>Recommended Response Action</b>	If this is backup to network share, check to make sure network share is read/write accessible. Restart the Integrated Remote Access Controller (iDRAC) and retry the operation.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## BAR034

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to Restore Integrated Remote Access Controller firmware.
<b>Detailed Description</b>	The Integrated Remote Access Controller(iDRAC) firmware import did not complete successfully.

<b>Recommended Response Action</b>	Download the firmware for the Integrated Remote Access Controller(iDRAC) and apply it.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAR035

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to Restore Integrated Remote Access Controller configuration.
<b>Detailed Description</b>	The Integrated Remote Access Controller (iDRAC) Configuration import did not complete successfully.
<b>Recommended Response Action</b>	Manually reset the Integrated Remote Access Controller (iDRAC) configuration.
<b>Category</b>	Configuration (BAR = Backup/Restore)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## BAT—Battery Event Event Messages

### BAT0000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board battery is low.
<b>Detailed Description</b>	System settings may be preserved if input power is not removed from the power supplies.
<b>Recommended Response Action</b>	Check the system board battery at the next service window.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2226
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

### BAT0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board battery is operating normally.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2227
<b>OMSA Event ID</b>	5702
<b>OMSA Trap ID</b>	5702
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## BAT0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board battery has failed.
<b>Detailed Description</b>	System settings may be preserved if input power is not removed from the power supplies.
<b>Recommended Response Action</b>	Check the system board battery.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2225
<b>LCD Message</b>	System board battery has failed. Check battery
<b>OMSA Event ID</b>	5704;5705
<b>OMSA Trap ID</b>	5704
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, Chassis Event Proxy*

## BAT0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system board battery is present.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2227
<b>Redfish Event Type</b>	Alert

## BAT0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The storage battery is low.
<b>Detailed Description</b>	To charge the battery, the system has to remain powered on.
<b>Recommended Response Action</b>	Allow the PERC RAID controller battery to charge. If the issue persists, contact technical support. Refer to the product documentation to choose a convenient contact method.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2226
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAT0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The storage battery is operating normally.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2227
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAT0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The storage battery has failed.
<b>Detailed Description</b>	The PERC RAID controller battery may have failed because of thermal exceptions.
<b>Recommended Response Action</b>	1) Verify the PERC RAID controller battery installation. 2) Check the system logs for thermal related issues.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2225
<b>LCD Message</b>	Storage battery has failed. Check battery.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAT0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The storage battery is present.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	2227
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAT0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The storage battery is absent.
<b>Detailed Description</b>	The PERC RAID controller battery may report absent due to disconnect or thermal exceptions.
<b>Recommended Response Action</b>	1) Verify the PERC RAID controller battery installation. 2) If installed, reseal or reconnect the battery and cables. 3) Check the system logs for thermal related issues.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Critical

<b>Trap/EventID</b>	2225
<b>LCD Message</b>	Storage battery is absent. Check battery.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BAT0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The storage battery for disk drive bay arg1 is low.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = bay</li> </ul>
<b>Detailed Description</b>	To charge the battery, the system has to remain powered on.
<b>Recommended Response Action</b>	Allow the PERC RAID controller battery for the associated bay to charge. If the issue persists, contact technical support. Refer to the product documentation to choose a convenient contact method.
<b>Category</b>	System Health (BAT = Battery Event)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2226
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log, Power Off, Power Cycle, Reset

## BAT1004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Transparent Learn Cycle (TLC) operation of the energy pack on arg1 has timed out.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = controller Name</li></ul>
<b>Detailed Description</b>	The Transparent Learn Cycle (TLC) operation of the energy pack on has timed out because of one of the following reasons.1. The controller energy pack must be fully charged before the learn cycle can begin. The energy pack may be unable to maintain a full charge causing the learn cycle to timeout.2. The energy pack must be able to maintain cached data for a specified period of time in the event of a power loss. For example, some energy packs maintain cached data for 24 hours. If the energy pack is unable to maintain cached data for the required period of time, then the Learn cycle will timeout.
<b>Recommended Response Action</b>	Do one or more of the following:1. Perform a Power Cycle operation on the server and check the status of energy pack by using iDRAC User Interface or running the following RACADM command: racadm serveraction powercycle.2. If energy pack status is not ready replace the energy pack.3. If still the energy pack is unable to maintain a full charge.Review the Energy Pack Transparent Learn Cycle (TLC) within the Dell PowerEdge Raid Controller User Guide for additional information. Contact the service provider if the issue persists.

## BAT1024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	One or more issues are detected in the energy pack on the arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = controllerName</li> </ul>
<b>Detailed Description</b>	One of more issues are detected in the energy pack on the controller identified in the message.
<b>Recommended Response Action</b>	Do the following:1. Verify that the energy pack is present and then check the cabling between controller and battery.2. Do a power cycle and check the energy pack status.3. If still errors are occurring on energy pack contact your Technical Support Team and get the energy pack replaced.

## BAT1025

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 is unable to recover cached data from the Battery Backup Unit (BBU).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = controller name</li> </ul>
<b>Detailed Description</b>	The controller was unable to recover data from the cache. This may indicate data loss has occurred.
<b>Recommended Response Action</b>	Do one or all of the following: 1) Ensure that the PERC firmware version is updated. 2) Check the battery health. If there are battery issues, replace the battery. Else, replace the PERC card.

## BAT1033

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The battery on arg1 was removed.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = controller name</li></ul>
<b>Detailed Description</b>	The controller cannot communicate with the battery. Either the battery was removed, or the contact point between the controller and the battery is degraded.
<b>Recommended Response Action</b>	Make sure that the battery is present and properly connected. If the battery is present, wait for a few minutes and re-check if the battery is detected. If the contact point between the battery and the controller is degraded, you must replace the battery, the controller, or both. Refer to the storage hardware documentation for information on how to safely access, or remove. Contact technical support if the issue persists.

## BIOS0045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to authenticate the digital signature of the CPLD firmware because the current CPLD firmware version does not support the authentication process.
<b>Detailed Description</b>	The digital signature of the CPLD firmware cannot be authenticated because the current CPLD is not running Dell authentic firmware.
<b>Recommended Response Action</b>	Download the latest CPLD version from the support site, update the CPLD version, and then retry the operation. For information about updating a CPLD firmware, see the CPLD Release Notes available on the Drivers and Downloads page of the support site.
<b>Category</b>	Audit (BIOS = BIOS Management)
<b>Severity</b>	Critical
<b>LCD Message</b>	Failed CPLD authentication. Update CPLD firmware.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD

**Applicable Event or Alert Types** CMC—Filter Visibility, LC Log\*, LCD

## BIOS0046

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	PCIe Segment arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = segment</li></ul>
<b>Detailed Description</b>	This event indicates PCIe segment of the system.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>LCD Message</b>	PCIe Segment <segment>.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Mismatch in AttributeName and AttributeValue count
<b>Detailed Description</b>	The number of AttributeName and AttributeValue parameters do not match.
<b>Recommended Response Action</b>	Enter the same number of parameters for AttributeName and AttributeValue. Refer to documentation for method input parameter details.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Configuration job already created, cannot set attribute on specified target until existing job is completed or is cancelled.
<b>Detailed Description</b>	A configuration job is already created on the specified target. No further command is allowed until the existing job succeeds or the job is cancelled.

<b>Recommended Response Action</b>	Wait for the job to complete. To continue with more set operations on the specified target, cancel the job and proceed.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Configuration job already created, cannot create another configuration job on specified target until existing job is completed or is cancelled.
<b>Detailed Description</b>	A configuration job is already created on the specified target. No further command is allowed until the existing job succeeds or the job is cancelled.
<b>Recommended Response Action</b>	Wait for the job to complete. To continue with more set operations on the specified target, cancel the job and proceed.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No pending data present to create a Configuration job.
<b>Detailed Description</b>	No changes are available between the previous configuration and the current configuration. To create a configuration job, at least one attribute should be changed.
<b>Recommended Response Action</b>	Change the configuration of one or more attributes and then create a configuration job.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Lifecycle Controller is currently in use.
<b>Detailed Description</b>	Lifecycle Controller cannot gain access to internal storage because of use by another application or operation.
<b>Recommended Response Action</b>	Wait for the current Lifecycle Controller operation to complete. Verify that the system is 1) Not currently in Lifecycle Controller Unified Server Configurator utility 2) Waiting for user intervention at F1/F2 POST error 3) Not in any of the device or controller Option ROMs and retry the operation.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Lifecycle Controller is not enabled, cannot create Configuration job.
<b>Detailed Description</b>	For 11G systems: System Services must be enabled to perform the requested operation. System Services has been disabled through the iDRAC configuration utility accessed by pressing CTRL+E on boot up or through a remote operation. For 12G and above generations: Lifecycle Controller must be enabled to perform the requested operation. Lifecycle Controller has been disabled by pressing F2 Setup, selecting iDRAC Configuration, and selecting Lifecycle Controller Settings on boot up or through a remote operation.
<b>Recommended Response Action</b>	For 11G systems: Use the iDRAC configuration utility to enable the System Services by pressing on the CTRL+E option on boot up at the targeted system. For 12G and above generations: Use F2 Setup, select iDRAC Configuration, and select Lifecycle Controller Settings, to enable the Lifecycle Controller on boot up of the targeted system.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Configuration job already created, pending data cannot be deleted.
<b>Detailed Description</b>	Configuration job already created on the specified target. No further command is allowed until the existing job is completed.

<b>Recommended Response Action</b>	Cancel the configuration job or wait for the job to complete. Refer to documentation on job cancellation.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No pending data to delete.
<b>Detailed Description</b>	No changes to BIOS attribute data are available between the previous configuration and the current configuration.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid AttributeName arg1
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = attribute name</li> </ul>
<b>Detailed Description</b>	An unknown AttributeName was specified in the operation.
<b>Recommended Response Action</b>	Enter the correct AttributeName available in the system. Refer to the enumeration response for desired attribute.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid AttributeValue for AttributeName: arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = attribute name</li></ul>
<b>Detailed Description</b>	AttributeValue may be invalid because of the following causes: 1) Length of new AttributeValue is not within required minimum length and maximum length 2) Value of new AttributeValue is not within required LowerBound and UpperBound 3) Value of new AttributeValue is not one of the possible values.
<b>Recommended Response Action</b>	Refer to the documentation on valid Attribute values.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	AttributeValue cannot be changed to read only AttributeName arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = attribute name</li></ul>
<b>Detailed Description</b>	A set attribute operation was attempted on a read only attribute.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	AttributeValue cannot be changed for disabled AttributeName arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = attribute name</li></ul>
<b>Detailed Description</b>	A set attribute operation was attempted on a disabled attribute.
<b>Recommended Response Action</b>	No response action is required.

<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete vFlash pending one-time boot configuration
<b>Detailed Description</b>	Unable to delete vFlash pending one-time boot configuration.
<b>Recommended Response Action</b>	Remove AC power from system and after restoring AC power, retry the operation.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid BIOS Password.
<b>Detailed Description</b>	The BIOS password specified in the operation is not valid. A valid BIOS password must be made from the following: 0 to 32 characters in length, numbers 0 to 9, lowercase letters a to z, special characters <> -,+./:[\].
<b>Recommended Response Action</b>	Retry the operation with a BIOS password that conforms with system BIOS password requirements.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cannot authenticate BIOS password.
<b>Detailed Description</b>	The old BIOS password specified in the change BIOS password operation was incorrect.
<b>Recommended Response Action</b>	Retry the operation with correct old BIOS password.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cannot set the BIOS password. Password is disabled due to a jumper setting on the motherboard.
<b>Detailed Description</b>	The BIOS password is disabled in the hardware using a jumper and can not be set. See the system owners manual for jumper location.
<b>Recommended Response Action</b>	Change the jumper setting on the system board to enable changing the BIOS password.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cannot perform the operation due to an unknown error in iDRAC.
<b>Detailed Description</b>	An unrecoverable error occurred in the operation while communicating with iDRAC.
<b>Recommended Response Action</b>	Retry the operation. If the issue continues, reset the iDRAC.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the operation is not allowed when the Secure Boot Policy is in Standard mode.
<b>Detailed Description</b>	The operation cannot be completed because the operation is not allowed when the Secure Boot Policy is in Standard mode.
<b>Recommended Response Action</b>	Make sure that the BIOS.Setup.1-1:SecureBootPolicy is set to Custom and then retry the operation. For information about SecureBootPolicy, see the Redfish API Guide available on the support site.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Recovery operation successfully initiated.
----------------	--

<b>Detailed Description</b>	The Recovery operation is successfully initiated. For information about the status of recovery operation, view the Lifecycle logs.
<b>Recommended Response Action</b>	No response action is required. However, the server will be automatically powered off, and becomes unresponsive for approximately five minutes. During this period, do not disconnect the power from the server.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BIOS101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to read or change any of the system BIOS configuration settings.
<b>Detailed Description</b>	The system configuration data that BIOS exposes to Server Administrator is malformed or not available and Server Administrator is unable to read or change any of the system BIOS configuration settings.
<b>Recommended Response Action</b>	Power cycle the system and retry the operation. If the problem persists, reinstall the BIOS firmware Update Package.
<b>Category</b>	Configuration (BIOS = BIOS Management)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## BIOS102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A system BIOS update is scheduled that requires a reboot.
<b>Detailed Description</b>	A BIOS update job is scheduled through the remote access controller, and the system must be rebooted to apply the update.
<b>Recommended Response Action</b>	Reboot the system to apply the BIOS update.
<b>Category</b>	Audit (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	5002
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## BIOS103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A previously scheduled system BIOS update is canceled.
<b>Detailed Description</b>	A previously scheduled BIOS update job is cancelled.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (BIOS = BIOS Management)
<b>Severity</b>	Informational
<b>OMSA Event ID</b>	5003
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## BOOT—BOOT Control Event Messages

### BOOT001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The command was successful.
<b>Detailed Description</b>	The command was successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

### BOOT002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Resource allocation error.
<b>Detailed Description</b>	Unable to allocate required memory to perform the operation.
<b>Recommended Response Action</b>	Power cycle system and reapply firmware packages for Lifecycle Controller and iDRAC.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## BOOT003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Method not supported.

**Detailed Description** This operation is not supported on the current configuration.

**Recommended Response Action** This operation is not supported on the current configuration, check documentation and try again.

**Category** Configuration (BOOT = BOOT Control)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## BOOT004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Invalid number of Boot Source arguments

**Detailed Description** An invalid number of source arguments was passed to the method.

**Recommended Response Action** Check documentation and try again (details).

**Category** Configuration (BOOT = BOOT Control)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## BOOT005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Missing required parameter.

**Detailed Description** One or more of the invoked methods required parameters are missing.

**Recommended Response Action** Check documentation for the method in question and try again.

<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid Boot Source InstanceID
<b>Detailed Description</b>	One or more of the Boot Source instance IDs does not contain valid data.
<b>Recommended Response Action</b>	Verify that all of the Boot Source instance IDs being entered are as they appear in the DCIM_BootSourceSetting enumeration.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Boot Source does not belong to specified Boot Configuration
<b>Detailed Description</b>	One or more of the Boot Source instance IDs does not belong to the affected Boot Configuration.
<b>Recommended Response Action</b>	ChangeBootOrderByInstanceID only accepts Boot Sources from the impacted Boot Configuration. Verify that all source arguments belong to the desired Boot Configuration.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Source argument contains more devices than are present on the system
----------------	--

<b>Detailed Description</b>	More source arguments were provided than are available for the impacted Boot Configuration.
<b>Recommended Response Action</b>	Verify that all of the Boot Source instance IDs being entered are as they appear in the DCIM_BootSourceSetting enumeration.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Boot Sources cannot be found for this Boot Configuration
<b>Detailed Description</b>	No Boot Sources could be found for the desired Boot Configuration.
<b>Recommended Response Action</b>	Verify that Boot Sources for the indicated Boot Configuration are displaying when enumerating DCIM_BootSourceSetting. Power cycle system and reapply firmware packages for Lifecycle Controller and iDRAC.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Could not locate vFlash partition index
<b>Detailed Description</b>	The provided vFlash partition index could not be found on the system.
<b>Recommended Response Action</b>	Verify that a vFlash partition with the desired index exists on the System.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Failed to set vFlash partition for one time boot
<b>Detailed Description</b>	The provided vFlash partition could not be set for one time boot.
<b>Recommended Response Action</b>	Power cycle system and reapply firmware packages for Lifecycle Controller and iDRAC.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Job started to attach and set vFlash SD card partition for OneTime boot.
<b>Detailed Description</b>	A job was created to configure a OneTime boot to the specified vFlash SD card partition. If this partition was not attached to the system, the job attaches it as well.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cannot make changes to non-active boot list.
<b>Detailed Description</b>	The boot list is currently not active. Changes cannot be made to boot list that is not active.
<b>Recommended Response Action</b>	Alter boot mode to set the boot list active and retry the operation.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Virtual media not ready.
<b>Detailed Description</b>	The systems SD card has been removed or is in use.
<b>Recommended Response Action</b>	Verify that the SD card is inserted and that another operation is not in progress, and try again.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Set operation successful for the boot partition.
<b>Detailed Description</b>	The boot partition configuration request was successful. An unattached vFlash partition was configured for one-time boot using the ChangeBootOrderByInstanceID method. The method creates a job (to attach the vFlash partition and set the partition for one-time boot.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Input source argument value for the boot device is incorrect or not found among the boot devices on the system.
----------------	---

<b>Detailed Description</b>	The input source argument value referring to the boot device is incorrect or empty. The boot device identifier must match the InstanceID for the Boot Source Setting instance that represents the boot device.
<b>Recommended Response Action</b>	Use the correct source argument value for the boot device and retry the operation.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Source argument does not support enable or disable mode.
<b>Detailed Description</b>	The boot device(s) specified in the source argument used in the operation cannot be enabled or disabled. This behavior applies to BCV devices and one-time boot.
<b>Recommended Response Action</b>	Refer to the documentation on validity of operation for the boot device specified. For more information on the operation, see Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Specified Boot Control List is read-only
<b>Detailed Description</b>	The Boot Control List specified in the operation is read-only and cannot be modified.
<b>Recommended Response Action</b>	Refer to the documentation on validity of operation for the Boot Control List specified. For more information on the operation, see Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to run the ChangeBootOrderByInstanceId command because the BIOS Export operation is in progress.
<b>Detailed Description</b>	The ChangeBootOrderByInstanceId command cannot be run because the BIOS Export operation is in progress.
<b>Recommended Response Action</b>	Wait for the BIOS Export operation to complete and retry the operation.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to run the ChangeBootOrderByInstanceId command because the BIOS Import operation is in progress.
<b>Detailed Description</b>	The ChangeBootOrderByInstanceId command cannot be run because the BIOS Import operation is in progress.
<b>Recommended Response Action</b>	Wait for the BIOS Import operation to complete and retry the operation.
<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## BOOT8500

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change the BIOS boot order for the Server arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = slot number</li></ul>
<b>Detailed Description</b>	Unable to change the BIOS boot order for the server because of a broken communication between the CMC and iDRAC, or iDRAC is rebooting.
<b>Recommended Response Action</b>	Reset iDRAC or wait until iDRAC reboots, and retry the operation.

<b>Category</b>	Configuration (BOOT = BOOT Control)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CAPP—Application Event Messages

### CAPP0102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SMTP Alert configuration modified.
<b>Detailed Description</b>	SMTP Alert configuration modified.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CAPP0103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SNMP Alert configuration modified.
<b>Detailed Description</b>	SNMP Alert configuration modified.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CAPP0104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Syslog Alert configuration modified.
<b>Detailed Description</b>	Syslog Alert configuration modified.

<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Test SNMP trap sent by arg1 to arg2 from arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = user name</li> <li>• arg2 = target IP</li> <li>• arg3 = IP Address</li> </ul>
<b>Detailed Description</b>	Test SNMP alert sent by user identified in the message to the target IP address from the source IP address.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0178

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Console setting arg1 modified.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = setting name</li> </ul>
<b>Detailed Description</b>	The console setting identified in the message is updated.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0188

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Secure Syslog certificate uploaded.
<b>Detailed Description</b>	Secure Syslog certificate uploaded successfully.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0189

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Secure Syslog certificate upload failed.
<b>Detailed Description</b>	Secure Syslog certificate upload failed.
<b>Recommended Response Action</b>	Please upload a valid certificate.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0190

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid SNMPv3 configuration.
<b>Detailed Description</b>	One of the SNMPv3 configurations is missing required elements: UserName, AuthenticationType, AuthenticationPassphrase, PrivacyType, and PrivacyPassphrase.
<b>Recommended Response Action</b>	Ensure that all required attributes are included in the SNMPv3 configuration and retry the operation.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0191

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The IsSnmpv3Enabled flag is required.
<b>Detailed Description</b>	Invalid SNMPv3 configuration.

<b>Recommended Response Action</b>	Ensure that the IsSnmpv3Enabled flag is properly defined. Retry the operation after correcting the settings.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0192

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SNMPv3 configuration limit exceeded.
<b>Detailed Description</b>	Only four SNMPv3 configurations are allowed.
<b>Recommended Response Action</b>	Only four SNMPv3 configurations are allowed.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0193

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid authentication type specified.
<b>Detailed Description</b>	Supported types are: MD5, SHA, SHA-224, SHA-256, SHA-384, SHA-512, or NONE.
<b>Recommended Response Action</b>	Provide a valid authentication type from the list provided and retry the operation.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0194

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid privacy type specified.
<b>Detailed Description</b>	Supported types are: DES, AES, AES-192, AES-256, or NONE.
<b>Recommended Response Action</b>	Provide a valid privacy type from the list provided and retry the operation.
<b>Category</b>	Configuration (CAPP = Application)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0195

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid SNMPv3 configuration input.
<b>Detailed Description</b>	The SNMP configuration provided is invalid.
<b>Recommended Response Action</b>	Ensure your input meets the required format and includes valid values.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0196

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The following fields cannot be null when IsModified is not set: UserName, AuthenticationType, AuthenticationPassphrase, PrivacyType, and PrivacyPassphrase.
<b>Detailed Description</b>	Ensure that all required fields contain valid values.
<b>Recommended Response Action</b>	Provide values for all mandatory fields and retry the operation.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0197

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The following fields cannot be null when IsModified is true: UserName, AuthenticationType, AuthenticationPassphrase, PrivacyType, and PrivacyPassphrase.
<b>Detailed Description</b>	Ensure that all required fields contain valid values.
<b>Recommended Response Action</b>	Provide values for all mandatory fields and retry the operation.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0198

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	UserName cannot be null when IsModified is false.
<b>Detailed Description</b>	Provide a valid UserName.
<b>Recommended Response Action</b>	Enter a UserName and retry the operation.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0199

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Duplicate SNMPv3 username found.
<b>Detailed Description</b>	Duplicate SNMPv3 username found.
<b>Recommended Response Action</b>	Provide a different username that is not already in use and retry the operation.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0200

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Authentication conflict detected.
<b>Detailed Description</b>	Authentication passphrase cannot be entered when authentication type is set to NONE.
<b>Recommended Response Action</b>	Set the authentication type to a valid option that requires a passphrase or remove the passphrase if the type is NONE.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0201

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Privacy type and authentication type conflict detected.
<b>Detailed Description</b>	Privacy type must be set to NONE when authentication type is NONE.
<b>Recommended Response Action</b>	Set the privacy type to NONE if the authentication type is set to NONE.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0202

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Privacy type and privacy passphrase conflict detected.
<b>Detailed Description</b>	Privacy phrase must be empty when privacy type is NONE.
<b>Recommended Response Action</b>	Ensure the privacy passphrase is left empty if the privacy type is set to NONE.
<b>Category</b>	Configuration (CAPP = Application)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CAPP0203

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	One or more entries do not have a valid username as the username is not found in the database.
<b>Detailed Description</b>	Ensure that the usernames are registered in the database.
<b>Recommended Response Action</b>	Verify that all usernames are correct and exist in the database before retrying the operation.

## CAPP1101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to test the SMTP Settings because of an error.

**Detailed Description** An error occurred while attempting to test the SMTP settings.

**Recommended Response Action** Make sure the entered SMTP settings are correct and retry the operation.

**Category** Configuration (CAPP = Application)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CAPP1104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update the SMTP settings because the entered port number arg1 is invalid.

**Arguments**

- arg1 = port

**Detailed Description** The SMTP settings cannot be updated because the entered port number identified in the message is invalid.

**Recommended Response Action** Enter a port number between 10 and 65535 and retry the operation.

**Category** Configuration (CAPP = Application)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CAPP1105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update the SMTP settings because the Destination Address is invalid or missing.

**Detailed Description** The SMTP settings cannot be updated because the Destination Address is invalid or missing.

**Recommended Response Action** Enter valid IP address or FQDN and retry the operation.

**Category** Configuration (CAPP = Application)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CAPP1106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update the SMTP settings because the entered credential is invalid or empty.

**Detailed Description** The SMTP settings cannot be updated because the entered credential is invalid or empty.

**Recommended Response Action** Either enter valid credentials or disable the Use Credentials option and retry the operation.

**Category** Configuration (CAPP = Application)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CAPP1107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update the SNMP settings because the request contains an invalid number of configurations. The request must contain no more than arg1 configurations but contains arg2.

**Arguments**

- arg1 = expected
- arg2 = actual

**Detailed Description** The SNMP settings cannot be updated because the request contains an invalid number of configurations as identified in the message.

**Recommended Response Action** Enter only the required number of configurations as identified in the message and retry the operation.

**Category** Configuration (CAPP = Application)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CAPP1108

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update the Syslog settings because the request contains an invalid number of configurations. The request must contain no more than arg1 configurations but contains arg2.

**Arguments**

- arg1 = expected
- arg2 = actual

**Detailed Description** The Syslog settings cannot be updated because the request contains an invalid number of configurations as identified in the message.

<b>Recommended Response Action</b>	Enter only the required number of configurations as identified in the message and retry the operation.

# CBL—Cable Event Messages

## CBL0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backplane arg1 power cable disconnected.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Bay ID</li> </ul>
<b>Detailed Description</b>	A backplane signal cable was detected, but the accompanying power cable was not present.

<b>Recommended Response Action</b>	Reconnect or replace the power cable. If the issue persists, contact your service provider.
<b>Category</b>	System Health (CBL = Cable)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CBL0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backplane arg1 signal cable disconnected.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Bay ID</li> </ul>
<b>Detailed Description</b>	A backplane power cable was detected, but the accompanying signal cable was not present.
<b>Recommended Response Action</b>	Reconnect or replace the signal cable for the backplane identified in the message. If the issue persists, contact your service provider.
<b>Category</b>	System Health (CBL = Cable)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CBL0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backplane arg1 arg2 cable is disconnected.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Bay ID</li> <li>arg2 = Connector Name</li> </ul>
<b>Detailed Description</b>	The backplane cable identified in the message is disconnected or no cable is detected.
<b>Recommended Response Action</b>	Reconnect or replace the cable identified in the message. If the issue persists, contact your service provider.
<b>Category</b>	System Health (CBL = Cable)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2393
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, LC Log*, LCD, Chassis Event Proxy*

## CBL0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 cable is incorrectly connected to backplane arg2 connector arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Cable Name</li><li>• arg2 = Bay ID</li><li>• arg3 = Connector Name</li></ul>
<b>Detailed Description</b>	The cable identified in the message is incorrectly connected to the backplane connector.
<b>Recommended Response Action</b>	Make sure the cable identified in the message is cabled correctly. If the issue persists, contact your service provider.
<b>Category</b>	System Health (CBL = Cable)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CBL0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backplane arg1 arg2 connector incorrectly connected to the motherboard SATA controller.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Bay ID</li><li>• arg2 = Connector Name</li></ul>
<b>Detailed Description</b>	The backplane connector identified in the message is incorrectly connected to the motherboard SATA controller.
<b>Recommended Response Action</b>	Make sure the cable identified in the message is cabled correctly. If the issue persists, contact your service provider.
<b>Category</b>	System Health (CBL = Cable)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CBL0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unsupported backplane arg1 configuration: Multiple RAID controllers cannot be connected to the same backplane.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Bay ID</li></ul>

<b>Detailed Description</b>	Each server model only supports a certain set of backplane configurations. For unified backplanes or split mode capable backplanes that are in unified mode, multiple controllers cannot be connected to the same backplane. In unified backplane situations any controller besides the first will not be operational.
<b>Recommended Response Action</b>	Make sure that only one RAID controller is connected to the backplane. If the issue persists, contact your service provider.
<b>Category</b>	System Health (CBL = Cable)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CBL0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backplane arg1 arg2 cable and backplane arg3 arg4 cable are swapped.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Bay ID</li> <li>• arg2 = Cable Name</li> <li>• arg3 = Bay ID</li> <li>• arg4 = Cable Name</li> </ul>
<b>Detailed Description</b>	The backplane cables identified in the message need to be connected to the correct backplane bays.
<b>Recommended Response Action</b>	Make sure the cables identified in the message are cabled correctly. If the issue persists, contact your service provider.
<b>Category</b>	System Health (CBL = Cable)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## CBL0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	One or more cables are missing from arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = controller name</li> </ul>
<b>Detailed Description</b>	One or more cables have been detected as missing from the Fault Tolerant storage controller identified in the message.
<b>Recommended Response Action</b>	Make sure all cables are properly connected. For information about cabling, see the Owners Manual available at the support site.
<b>Category</b>	Storage (CBL = Cable)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert

<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CBL8500

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SAS cable arg1 to expander arg2 is not connected.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = cable id</li> <li>• arg2 = expander id</li> </ul>
<b>Detailed Description</b>	SAS cables are not connected to the expander correctly.
<b>Recommended Response Action</b>	Check whether or not the SAS cables are connected to the expander. Reconnect the cables and retry the operation.
<b>Category</b>	Storage (CBL = Cable)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

# CDEV—Devices Event Messages

## CDEV0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve inventory information for the device.
<b>Detailed Description</b>	Inventory information is not available for the requested device.
<b>Recommended Response Action</b>	Retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV0024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update Services Configuration arg1 for arg2 because of arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = version</li><li>• arg2 = type</li><li>• arg3 = reason</li></ul>
<b>Detailed Description</b>	Unable to update Services Configurations due to reason mentioned in message.
<b>Recommended Response Action</b>	Retry operation after sometime. If issue persists, contact your service provider.
<b>Category</b>	Audit (CDEV = Devices)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV0100

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Proxy settings modified.
<b>Detailed Description</b>	Proxy settings modified.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV0102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to complete the requested operation because an invalid JSON file is entered.

**Detailed Description** The requested operation cannot be completed because an invalid JSON file is entered.

**Recommended Response Action** Enter a valid JSON file name and retry the operation. For more information about supported file types, see the OpenManage Enterprise-Modular Users Guide available on the support site.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV0103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to complete the request to remove the chassis arg1 from the Multi-chassis Management group arg2.

**Arguments**

- arg1 = Chassis Service Tag
- arg2 = groupName

**Detailed Description** The request to remove the chassis from the Multi-chassis Management group identified in the message.

**Recommended Response Action** Retry the operation. If the issue persists, contact your service provider. For more information see the OpenManage Enterprise-Modular Users Guide available on the support site.

**Category** Configuration (CDEV = Devices)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV0104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** LCD Override PIN modified.

**Detailed Description** LCD Override PIN is modified successfully.

**Recommended Response Action** No response action required.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A request to send an email was successfully completed. The request came from arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	An email send request was successfully completed.
<b>Recommended Response Action</b>	N/A.
<b>Category</b>	Audit (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A request to send an email failed. The origin of the request came from arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = name</li> </ul>
<b>Detailed Description</b>	An email send request failed.
<b>Recommended Response Action</b>	Verify that the SMTP configuration is valid in your appliance alert settings and make sure that the remote SMTP destination is available.
<b>Category</b>	Audit (CDEV = Devices)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1040

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Power usage details are not applicable for this device.
<b>Detailed Description</b>	Power usage information cannot be displayed because it is not applicable to this device.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1108

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the Multi Chassis Management domain group.
<b>Detailed Description</b>	The Multi Chassis Management domain group could not be created.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1109

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the Multi Chassis Management domain group because no chassis was found.
<b>Detailed Description</b>	The Multi Chassis Management domain group cannot be created because no chassis was found.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists contact your system administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1111

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve arg1 information for Multi Chassis Management.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = data</li> </ul>
<b>Detailed Description</b>	The information identified in the message cannot be retrieved.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1112

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to add members to the Multi Chassis Management group because no group is available.

**Detailed Description** New members cannot be added to the Multi Chassis Management group because no group is available.

**Recommended Response Action** Create a Multi Chassis Management group and retry the operation.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1113

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to add the member chassis to the Multi-chassis Management group.

**Detailed Description** The member chassis could not be added to the Multi-chassis Management group.

**Recommended Response Action** Retry the operation. If the issue persists, contact your system administrator.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1114

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to add the member chassis to the Multi-chassis Management group because only the lead chassis can approve requests for joining.

**Detailed Description** The member chassis cannot be added to the Multi-chassis Management group because only the lead chassis can approve requests for joining.

**Recommended Response Action** Retry the operation by using the lead chassis of the Multi-chassis Management group.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1115

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to approve the join request from the member chassis.

**Detailed Description** The join request from the member chassis could not be approved.

**Recommended Response Action** Retry the operation. If the issue persists, contact your system administrator.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1116

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to broadcast the Multi Chassis Management group creation over mDNS.

**Detailed Description** The Multi Chassis Management group creation could not be broadcast over mDNS.

**Recommended Response Action** Retry the operation. If the issue persists, contact your network administrator.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1117

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to join the Multi-chassis Management group.

**Detailed Description** Unable to join the Multi-chassis Management group.

**Recommended Response Action** Make sure the Multi-chassis Management group is available and retry the operation. If the issue persists, contact your system administrator.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1118

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to join the Multi-chassis Management group arg1 because the chassis is already a member.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = group UUID</li></ul>
<b>Detailed Description</b>	Unable to join the Multi-chassis Management group identified in the message because the chassis is already a member.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1119

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to join the Multi-chassis Management group because discovered groups are unavailable.
<b>Detailed Description</b>	Unable to join the Multi-chassis Management group because discovered groups are unavailable.
<b>Recommended Response Action</b>	Make sure the requested group is available and retry the operation. If the issue persists, contact your network administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV1120

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to join the Multi-chassis Management group because the entered lead group arg1 is unavailable.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = lead group</li></ul>
<b>Detailed Description</b>	The Multi-chassis Management group cannot be joined because the entered lead chassis IP is unavailable.
<b>Recommended Response Action</b>	Make sure the lead group identified in the message is available and retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1121

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to retrieve the status of requests opened for joining the Multi-chassis Management group.

**Detailed Description** The status of requests opened to join the Multi-chassis Management group cannot be retrieved.

**Recommended Response Action** Retry the operation. If the issue persists, contact your system administrator.

## CDEV1122

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The chassis is unable to complete the network operation arg1 because of internal issues. Fabric Manager message: arg2. Internal message ID: arg3.

**Arguments**

- arg1 = operation Name
- arg2 = message
- arg3 = error Event Message Code

**Detailed Description** The chassis is unable to complete the network operation identified in the message.

**Recommended Response Action** Wait for few minutes and retry the operation. If the issue persists, contact your service provider.

**Category** Configuration (CDEV = Devices)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV1123

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to perform operation, because the fabric manager was not reachable.

**Detailed Description** The given operation failed, because the fabric manager was not reachable.

**Recommended Response Action** Make sure of the following and retry the operation: 1) There is at least one advanced I/O Module in power-on mode. For example, MX9116n Ethernet Switch and MX5108n Ethernet Switch. However, if an advanced I/O Module is available in the power-on mode, make sure that the network profile is not set when the fabric manager is in the switch-over mode. 2) If the issue persists, wait for few minutes and retry the operation.

## CDEV6012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access the file on the remote share either because of network connection issues or credentials are not saved to provide access rights.
<b>Detailed Description</b>	The file on the remote share cannot be accessed either because of network connection issues or credentials are not saved to provide access rights.
<b>Recommended Response Action</b>	Make sure that the share path and credentials are correct and that the share is accessible and retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to write to the local file or temp file either because the file path is invalid or a file with the same name already exists in the folder.
<b>Detailed Description</b>	Cannot write to the local file or temp file either because the file path is invalid or a file with the same name already exists in the folder.
<b>Recommended Response Action</b>	Make sure that the correct file path is entered and that a file with the same name does not already exist in the folder.
<b>Category</b>	Configuration (CDEV = Devices)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to read the remote file arg1 either because the file is not available on the remote share or the share is not accessible.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = fileName</li> </ul>
<b>Detailed Description</b>	Cannot read the remote file either because the file is not available on the remote share or the share is not accessible.
<b>Recommended Response Action</b>	Make sure that the file exists on the remote share and that the share is accessible.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to read the remote file arg1 because the remote file is not available.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = file name</li> </ul>
<b>Detailed Description</b>	Cannot read the remote file because the remote file is not available.
<b>Recommended Response Action</b>	Make sure the file exists on the remote location or URL and retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to read the remote file because the file path or URL arg1 is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = path</li> </ul>
<b>Detailed Description</b>	Cannot read the remote file because the file path or URL is invalid.

<b>Recommended Response Action</b>	Make sure that the file path or URL is valid and retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access the URL arg1 because of restricted permissions.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = URL</li> </ul>
<b>Detailed Description</b>	The URL cannot be access because of restricted permissions.
<b>Recommended Response Action</b>	Make sure that necessary user access rights are provided and retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6028

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to execute the command because the target device IP is not reachable: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = message</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the target device IP is not reachable.
<b>Recommended Response Action</b>	Make sure that the target device is available and retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6029

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to start network connection because a communication error occurred.
<b>Detailed Description</b>	The network connection cannot be started because a communication error occurred.

<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your network administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV6030

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process action because the operation is not supported by the target device.
<b>Detailed Description</b>	The operation cannot be completed because it is not supported by the target device.
<b>Recommended Response Action</b>	Make sure the requested action is supported and retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

## CDEV6152

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Detected previous lead chassis arg1 online, transitioned it to member of the Multi-Chassis Management arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = service tag</li><li>• arg2 = group</li></ul>
<b>Detailed Description</b>	Former Lead Chassis was detected and transitioned to Member role.
<b>Recommended Response Action</b>	None.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV6153

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Detected previous lead chassis arg1 online, transitioned it to a standalone and out of the Multi-Chassis Management arg2.

**Arguments**

- arg1 = service tag
- arg2 = group

**Detailed Description** Detected Former Lead and transitioned it as a standalone, out of the group.

**Recommended Response Action** Unable to transition the old lead chassis to member of the Multi-Chassis Management, so removed it from the group. This transition may cause loss of fabric management functionality if any fabrics existed on the old lead chassis. Review fabric management and re-configure as needed.

**Category** Configuration (CDEV = Devices)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV6154

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Detected multiple lead chassis arg1 for the same Multi-Chassis Management arg2, unable to perform automatic recovery.

**Arguments**

- arg1 = service tag
- arg2 = group

**Detailed Description** Detected Multiple Leader Chassis in Group, Unable to recover.

**Recommended Response Action** Perform the following steps for each old lead chassis1. Disconnect the stacking cable from the chassis.2. Execute racadm racresetcfg -forceAfter the above 2 steps, the old lead chassis will be transitioned to a standalone chassis and does not interfere with the functions of the existing lead chassis.

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update the uplink arg1 for fabric arg2. arg3.

**Arguments**

- arg1 = uplink
- arg2 = fabric
- arg3 = message

**Detailed Description** The uplink cannot be updated for the fabric identified in the message.

**Recommended Response Action** Enter valid uplink parameters and retry the operation.

**Category** Configuration (CDEV = Devices)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV6195

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to delete the uplink arg1 for fabric arg2. arg3.

**Arguments**

- arg1 = uplink
- arg2 = fabric
- arg3 = message

<b>Detailed Description</b>	The uplink cannot be deleted for the fabric identified in the message.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.

## CDEV9990

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The operation to validate VLAN profile(s) is successful.

**Detailed Description** The operation to validate VLAN profile(s) is successful.

**Recommended Response Action** No response action required.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV9991

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The operation to validate VLAN profile(s) failed. Retry the operation.

**Detailed Description** The operation to validate VLAN profile(s) failed. Retry the operation.

**Recommended Response Action** Retry the operation. If the issue persists, contact your system administrator.

**Category** Configuration (CDEV = Devices)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV9992

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The job created to import all valid VLAN profile(s) is successful.

**Detailed Description** The job created to import all valid VLAN profile(s) is successful.

**Recommended Response Action** No response action required.

**Category** Configuration (CDEV = Devices)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CDEV9993

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The export operation to retrieve VLAN profile(s) failed. Retry the operation.
<b>Detailed Description</b>	The export operation to retrieve VLAN profile(s) failed. Retry the operation.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV9994

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The export operation to retrieve VLAN profile(s) is successful.
<b>Detailed Description</b>	The export operation to retrieve VLAN profile(s) is successful.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV9995

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The job created to import all valid VLAN profile(s) failed. Retry the operation.
<b>Detailed Description</b>	The job created to import all valid VLAN profile(s) failed. Retry the operation.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV9996

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to initiate replication of applicable chassis configuration settings to all supported IOMs.
<b>Detailed Description</b>	Unable to initiate replication of applicable chassis configuration settings to all supported IOMs.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV9997

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Replication of applicable chassis configuration settings to all supported IOMs has been initiated successfully.
<b>Detailed Description</b>	Replication of applicable chassis configuration settings to all supported IOMs has been initiated successfully.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV9998

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Date and time change operation has been initiated.
<b>Detailed Description</b>	Date and time change operation has been initiated.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDEV9999

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Reset to defaults is not supported on a lead chassis in the MCM group.
<b>Detailed Description</b>	The lead group properties cannot be reset.
<b>Recommended Response Action</b>	Dissolve the lead group and retry the operation.
<b>Category</b>	Configuration (CDEV = Devices)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS—Discovery Event Messages

### CDIS2001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update connection profile because an invalid profile type is entered.
<b>Detailed Description</b>	The creation or update of the connection profile cannot be done because an invalid profile type is entered.
<b>Recommended Response Action</b>	Enter a valid profile type and retry the operation. Profile type should be Inventory or Discovery.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CDIS2002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because an invalid credential type provided.
<b>Detailed Description</b>	The operation cannot be completed because the entered credential type is invalid.
<b>Recommended Response Action</b>	Enter a valid credential type and retry the operation.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS2004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to save credentials because the provided credential is null or the entered ID does not exist.
<b>Detailed Description</b>	The credentials cannot be saved because the provided credential is null or the entered ID does not exist.
<b>Recommended Response Action</b>	Make sure that all credential fields are valid and retry the operation.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS2006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update or delete connection profile because the profile ID arg1 does not exist.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = id</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the connection profile ID identified in the message does not exist.
<b>Recommended Response Action</b>	Enter a valid connection profile ID and retry the operation.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS2007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve connection profile information.
<b>Detailed Description</b>	Unable to retrieve connection profiles because an error occurred.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to discover the device(s) arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = target</li></ul>
<b>Detailed Description</b>	The specified device(s) cannot be discovered.
<b>Recommended Response Action</b>	Make sure the targets are available and retry the operation.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Discovery job with name arg1 created successfully.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = job id</li></ul>
<b>Detailed Description</b>	Discovery job successfully created.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4046

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Discovery job with name arg1 modified successfully.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = job id</li></ul>
<b>Detailed Description</b>	Discovery job successfully modified.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4047

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Discovery job with name arg1 deleted successfully.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = job id</li></ul>
<b>Detailed Description</b>	Discovery job successfully deleted.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4048

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to group component switches with the chassis ID arg1 because the Service Tag of the chassis cannot be obtained.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = chassis Id</li></ul>
<b>Detailed Description</b>	The switches cannot be grouped with the chassis because the Service Tag of the chassis cannot be obtained. The discovery operation uses the Service Tag of a chassis to associate switches to the chassis.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4049

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the discovery operation because the address range is more than the maximum arg1 permitted per discovery task.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = count</li></ul>
<b>Detailed Description</b>	Unable to discover the device because the address range is more than the maximum permitted per discovery task identified in the message.
<b>Recommended Response Action</b>	Enter a discovery range value that is less than the maximum permitted per task. For more information about maximum devices that can be discovered per task, see the OpenManage Enterprise-Modular Users Guide available on the support site.
<b>Category</b>	Configuration (CDIS = Discovery)

<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4050

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to associate an IP address to a hostname during the device operation.
<b>Detailed Description</b>	The IP address cannot be associated to a hostname during the device operation.
<b>Recommended Response Action</b>	Enter a valid IP address or hostname and retry the operation.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4051

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Global Exclusion List with name arg1 created successfully.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = job id</li> </ul>
<b>Detailed Description</b>	Global Exclusion List successfully created.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4052

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The global exclusion list of devices, with the job name arg1, is successfully removed from OpenManage Enterprise.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = job Name</li> </ul>
<b>Detailed Description</b>	The global exclusion list of devices, with the job name identified in the message, is successfully removed from OpenManage Enterprise.
<b>Recommended Response Action</b>	No response action required.

<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4053

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The server-initiated discovery operation arg1 is successfully completed.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = operation Name</li> </ul>
<b>Detailed Description</b>	The server-initiated discovery operation identified in the message is successfully completed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4054

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A notification is successfully received from iDRAC about the server-initiated discovery.
<b>Detailed Description</b>	A notification is successfully received from iDRAC about the server-initiated discovery.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4055

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Discovery job submitted for server initiated discovery.
<b>Detailed Description</b>	Discovery job submitted either automatically or manually for server initiated discovery.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CDIS = Discovery)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4056

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Credentials uploaded for server initiated discovery.
<b>Detailed Description</b>	Credentials uploaded for server initiated discovery.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CDIS4057

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Target was deleted from server initiated discovery.
<b>Detailed Description</b>	Target was deleted from server initiated discovery.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CDIS = Discovery)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

# CERT—Certificate Event Messages

## CERT330

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The validity of arg1 certificate will expire on arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = certificateType</li> <li>arg2 = expirationDate</li> </ul>
<b>Detailed Description</b>	The validity of the certificate will expire on the date identified in the message.

<b>Recommended Response Action</b>	Do one of the following: 1) Import a new valid certificate to iDRAC specific to the feature from any iDRAC interface. For example, for Webserver SSL, on the iDRAC GUI, click Settings > Services > Webserver > SSL/TLS Certificate Signing Request. 2) For Webserver SSL certificate, configure the Automatic Certificate Enrollment (ACE) feature or restart iDRAC to obtain a self-signed certificate.
<b>Category</b>	Audit (CERT = Certificate)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	9442
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CERT331

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The validity of arg1 certificate is expired.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = certificateType</li> </ul>
<b>Detailed Description</b>	The validity of the certificate identified in the message has expired.
<b>Recommended Response Action</b>	Do one of the following: 1) Import a new valid certificate to iDRAC specific to the feature from any iDRAC interface. For example, for Webserver SSL, on the iDRAC GUI, click Settings > Services > Webserver > SSL/TLS Certificate Signing Request. 2) For Webserver SSL certificate, configure the Automatic Certificate Enrollment (ACE) feature or restart iDRAC to obtain a self-signed certificate.
<b>Category</b>	Audit (CERT = Certificate)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	9441
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CFWS—Setup Event Messages

### CFWS6501

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The data is successfully transferred.
<b>Detailed Description</b>	The data is successfully transferred.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Miscellaneous (CFWS = Setup)
<b>Severity</b>	Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6502

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to transfer data because arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = reason</li> </ul>
<b>Detailed Description</b>	The data cannot be transferred because of the issue identified in the message.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Miscellaneous (CFWS = Setup)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6503

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The data transfer operation is in progress.
<b>Detailed Description</b>	The data transfer operation is in progress.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Miscellaneous (CFWS = Setup)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6505

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the file transfer because network connection could not be established with Connectivity Services.
<b>Detailed Description</b>	The operation cannot be performed because network connection could not be established with Dell Connectivity Services.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Critical

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6506

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the file transfer because of an error in communication to the Dell Connectivity Services: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = scgErrorCode</li> </ul>
<b>Detailed Description</b>	The request cannot be processed because of an error in communication to the Dell Connectivity Services.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6507

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because Forwarder id: arg1 is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = forwarderId</li> </ul>
<b>Detailed Description</b>	The request cannot be processed as the requested forwarder id is invalid.
<b>Recommended Response Action</b>	Check the requested Forwarder Id. Refer to the OpenManage Enterprise Users Guide for more information about resource URI and its properties.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6508

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because Forwarder id: arg1 is disabled.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = forwarderId</li> </ul>
<b>Detailed Description</b>	The request cannot be processed as the requested forwarder id is disabled.
<b>Recommended Response Action</b>	Forwarder need to beEnabled to perform this operation.Refer to the OpenManage Enterprise Users Guide for more information about Enabling the Forwarder.

<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6509

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the request because Data sync History Id:arg1 is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = dataSyncHistoryId</li> </ul>
<b>Detailed Description</b>	The request cannot be processed as the requested Data sync History Id is invalid.
<b>Recommended Response Action</b>	Retry the operation with valid Data Sync History Id. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6510

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the action because the values entered for Data Sync Configuration :arg1 is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = arg1</li> </ul>
<b>Detailed Description</b>	The request cannot be processed as the requested Data Sync Configuration is invalid.
<b>Recommended Response Action</b>	Retry the operation with valid Data Sync Configurations. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6511

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the request because Data sync Configuration Id:arg1 is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = configId</li> </ul>
<b>Detailed Description</b>	The request cannot be processed as the requested Data sync Configuration Id is invalid.

<b>Recommended Response Action</b>	Retry the operation with valid Data Sync Configuration Id. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6512

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Data transfer failed because services are busy. Next data transfer will contains the cumulative information.
<b>Detailed Description</b>	Data transfer failed due to internal server error. Next scheduled data transfer will transferthe cumulative data.
<b>Recommended Response Action</b>	No Action required.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6513

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the Forwarder configuration.
<b>Detailed Description</b>	The Forwarder configuration cannot be updated because of an unknown internal issue.
<b>Recommended Response Action</b>	Entervalid configuration data and retry the operation. If the issue persists,contact your system administrator.
<b>Category</b>	Audit (CFWS = Setup)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6520

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the action because the current on-demand sync request falls under threshold of arg1 min(s). Try again later.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = arg1</li> </ul>

<b>Detailed Description</b>	The request cannot be processed as the current on-demand sync request falls under threshold.
<b>Recommended Response Action</b>	Retry the operation after required threshold. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CFWS6521

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the action because data transfer is in progress for arg1 and arg2. Try again later.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = arg1</li> <li>• arg2 = arg2</li> </ul>
<b>Detailed Description</b>	The request cannot be processed as data transfer is in progress for the requested category.
<b>Recommended Response Action</b>	Retry the operation after some time. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CFWS = Setup)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## CGEN—Generic Event Messages

### CGEN1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the user is not authenticated.
<b>Detailed Description</b>	The operation cannot be completed because the user is not authenticated.
<b>Recommended Response Action</b>	Log in with valid credentials and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the requested URI is invalid.
<b>Detailed Description</b>	The operation cannot be completed because the requested URI is invalid.
<b>Recommended Response Action</b>	Enter a valid URI and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because an empty payload is not allowed for this request.
<b>Detailed Description</b>	The operation cannot be completed because an empty payload is not allowed for this request.
<b>Recommended Response Action</b>	Enter a valid payload and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the requested action because the logged in user is not authorized to perform this operation.
<b>Detailed Description</b>	The operation cannot be completed because the logged in user is not authorized to perform this action.
<b>Recommended Response Action</b>	Log in with a user that has the correct permissions for this action and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the request because the resource URI does not exist or is not implemented.
<b>Detailed Description</b>	The request cannot be completed because the resource URI does not exist or is not implemented.
<b>Recommended Response Action</b>	Enter a valid URI and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the requested action because the value for arg1 in the arg2 entity is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = property</li><li>• arg2 = entity</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the property identified in the message is invalid.
<b>Recommended Response Action</b>	Enter a valid value for the property identified in the message and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because an error occurred.
<b>Detailed Description</b>	The operation cannot be completed because an error occurred.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the requested action because the device management endpoint authentication over arg1 failed.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = protocol</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the connection with the target device is not authenticated.
<b>Recommended Response Action</b>	Make sure the credentials associated with the device management endpoint are valid and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the requested action because a connection timeout occurred with device management endpoint over arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = protocol</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because a device connection timeout occurred.
<b>Recommended Response Action</b>	Make sure the device is available and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the requested action because the service is unavailable over arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = protocol</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the requested service is unavailable.
<b>Recommended Response Action</b>	Make sure the requested service is available and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CGEN1013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to connect to the device over arg1 because a connection error occurred.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = protocol</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because a connection error occurred while trying to connect to the device.
<b>Recommended Response Action</b>	Make sure that the target device is available and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because an invalid value is entered for the property arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = payload error information</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because an invalid value is entered for the property identified in the message.
<b>Recommended Response Action</b>	Enter a valid value for the property and retry the operation. For more information about valid values, see the OpenManage Enterprise-Modular Users Guide available on the support site.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because of an invalid property arg1 .
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = property</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because an invalid property is entered in the payload.
<b>Recommended Response Action</b>	Verify the identified property is valid in the message and retry the operation with valid payload.
<b>Category</b>	Configuration (CGEN = Generic)

<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because the value entered in the field Name supports only alphanumeric and space characters.
<b>Detailed Description</b>	The request cannot be processed because the Name field supports only alphanumeric and space characters.
<b>Recommended Response Action</b>	Make sure to enter a valid value for Name and then retry the operation. For information about supported characters, see the OpenManage Enterprise-Modular Users Guide.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because the value entered in the field Description supports only alphanumeric, space and period characters.
<b>Detailed Description</b>	The request cannot be processed because the Description field supports only alphanumeric, space and period characters.
<b>Recommended Response Action</b>	Make sure to enter a valid value for Description and then retry the operation. For information about supported characters, see the OpenManage Enterprise-Modular Users Guide.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because the internal services are either not started yet or could not be started due to unknown error.
<b>Detailed Description</b>	Internal services to process the request are not available at this time. This might be due to services are either not started yet or could not be started because of unknown error.

<b>Recommended Response Action</b>	Make sure that the services are started and retry operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1028

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because the entered device ID arg1 is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = device Id</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the entered device ID is invalid.
<b>Recommended Response Action</b>	Enter a valid device ID and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1029

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the configuration properties because either an invalid payload syntax or property attributes are entered arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 =</li> </ul>
<b>Detailed Description</b>	The configuration properties cannot be updated because either an invalid payload syntax or property attributes are entered.
<b>Recommended Response Action</b>	Enter valid payload syntax and property attributes, and then retry the operation. For information about resource URI and its properties, see the OpenManage Enterprise-Modular Users Guide available on the support site.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN1103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because arg1 is empty or missing.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = parameter</li> </ul>
<b>Detailed Description</b>	Unable to process the request because a parameter identified in the message is missing.
<b>Recommended Response Action</b>	Enter the missing value identified in the message and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN4017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because the mandatory field arg1 is null or empty.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = field name</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the mentioned field is mandatory for processing the request.
<b>Recommended Response Action</b>	Make sure that the field is not null or empty and then retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN4018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to process the request because the value entered in the field arg1 exceeds the maximum length of arg2 characters.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = fieldName</li> <li>arg2 = maxLength</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the value entered in the mentioned field exceeds the allowed character limit.
<b>Recommended Response Action</b>	Enter a value less than the specified character limit and retry the operation.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN4019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the LcdOverridePin value because the value entered is not a numeric of arg1 digits.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = GlobalLength</li></ul>
<b>Detailed Description</b>	The LcdOverridePin value cannot be set because the value entered is not a numeric that matches the specified pin length.
<b>Recommended Response Action</b>	Enter a valid LcdOverridePin value that matches the value of pin length specified in the message to set the pin or an empty string to reset the pin, and then retry the operation. For more information about setting the LcdOverridePin values, see the OpenManageEnterprise-Modular Users Guide available on the support site.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN4020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the LcdOverridePin value because the operation is not supported in the current LCD configuration mode.
<b>Detailed Description</b>	The LcdOverridePin value cannot be reset because the reset operation is not supported in the current LCD Configuration mode.
<b>Recommended Response Action</b>	Make sure that LCD is present to set or reset the LcdOverridePin, and then retry the operation. For more information about setting the LcdOverridePin values, see the OpenManage Enterprise-Modular Users Guide available on the support site.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGEN4021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the request because the input value for LcdPinLength is invalid.
<b>Detailed Description</b>	LcdPinLength is read only attribute and the value must be 6.
<b>Recommended Response Action</b>	Make sure the value for an attribute LcdPinLength is "6" and retry the operation. Refer to the OpenManage Enterprise-Modular Users Guide for more information about LcdPinLength.
<b>Category</b>	Configuration (CGEN = Generic)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CGEN4036

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process the request because the payload cannot be null.

**Detailed Description** The operation cannot be completed because the entered payload is null.

**Recommended Response Action** Enter a valid payload and retry the operation.

**Category** Configuration (CGEN = Generic)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CGEN9770

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to display the updated information from the service because the membership of the resource zone arg1 has changed on the service.

**Arguments**

- arg1 = Resource Zone ID

**Detailed Description** The updated information from the service cannot be displayed because the membership of the resource zone identified in the message has changed on the service. The resource zone has changed because resource blocks are either added to or removed from the resource zone.

**Recommended Response Action** Refresh the cached version of the resource zone and retry the operation.

**Category** Audit (CGEN = Generic)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CGEN9771

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process the composition request because the resource block arg1 cannot be a part of any new composition.

**Arguments**

- arg1 = resource Block ID

**Detailed Description** The composition request cannot be processed because the resource block identified in the message cannot be a part of any new composition.

**Recommended Response Action** Remove the resource block from the request and retry the operation.

**Category** Audit (CGEN = Generic)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CGEN9772

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to process the composition request because the chassis arg1 must be powered on.

**Arguments**

- arg1 = chassis ID

**Detailed Description** The composition request cannot be processed because the chassis identified in the message must be powered on.

<b>Recommended Response Action</b>	Power on the chassis and retry the operation.
<b>Category</b>	Audit (CGEN = Generic)

## CGRP—Groups Event Messages

### CGRP1345

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add or remove the user from the group because the user ID is invalid.
<b>Detailed Description</b>	The user cannot be added or removed from the group because the entered user ID is invalid.
<b>Recommended Response Action</b>	Enter a valid user ID and retry the operation.
<b>Category</b>	Configuration (CGRP = Groups)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CGRP1346

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid value provided for the parent id arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = pid</li> </ul>
<b>Detailed Description</b>	Invalid value provided for the parent id.
<b>Recommended Response Action</b>	Ensure that the value of the parent id is valid - it has to be an existing group id and has to conform to physical grouping hierarchy restrictions if applicable.
<b>Category</b>	Configuration (CGRP = Groups)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGRP1347

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Duplicate attribute definitions provided.
<b>Detailed Description</b>	Payload provided contains duplicate entries for group attributes.
<b>Recommended Response Action</b>	Payload for attributes cannot contain more than one instance of the same attribute.
<b>Category</b>	Configuration (CGRP = Groups)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGRP1348

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Group hierarchy restriction is not satisfied.
<b>Detailed Description</b>	The group cannot be created because the group tag hierarchy restrictions are not met.
<b>Recommended Response Action</b>	Ensure that the group hierarchy restriction in place is satisfied before adding a group in an existing hierarchy.
<b>Category</b>	Configuration (CGRP = Groups)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGRP1349

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Group attributes successfully updated.
<b>Detailed Description</b>	Group attributes successfully updated.
<b>Recommended Response Action</b>	No response required.
<b>Category</b>	Configuration (CGRP = Groups)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGRP1350

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Group tag name arg1 is not associated with owner id of arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li><li>• arg2 = id</li></ul>
<b>Detailed Description</b>	A group tag name or id was specified in the payload that was not associated with the owner id specified.
<b>Recommended Response Action</b>	Ensure that the tag name specified in the payload exists and it is associated with the owner id attempting to create the group.
<b>Category</b>	Configuration (CGRP = Groups)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGRP1351

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Retrieval of group with id arg1 failed.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = group Id</li></ul>
<b>Detailed Description</b>	Retrieval of the group with the given group ID failed with an internal error.
<b>Recommended Response Action</b>	Look at the appliance logs to determine the cause of the failure.
<b>Category</b>	Configuration (CGRP = Groups)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CGRP1352

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The owner id (arg1) specified for the group is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = id</li></ul>
<b>Detailed Description</b>	The owner id specified in the payload does not match the owner id of the group this operation affects.
<b>Recommended Response Action</b>	The owner id in the payload must match the owner id of the group this operation affects. The specification of the id owner is optional and if not provided the owner id of the group will be used for context validation purposes.
<b>Category</b>	Configuration (CGRP = Groups)

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CLIC0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to export the license file to arg1 because the connection to the share location is unsuccessful.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = address</li> </ul>
<b>Detailed Description</b>	The license file cannot be exported to the share location identified in the message because it is not reachable over the network by OpenManage Enterprise.
<b>Recommended Response Action</b>	Retry the operation using a share location that is reachable over the network by OpenManage Enterprise.
<b>Category</b>	Configuration (CLIC = License Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CLIC0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to import the license file from arg1 into OpenManage Enterprise because the file is protected with a password.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = fileName</li> </ul>
<b>Detailed Description</b>	The license file identified in the message cannot be imported because it is protected with a password.
<b>Recommended Response Action</b>	Retry the operation after archiving the license files without password protection.
<b>Category</b>	Configuration (CLIC = License Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CLIC0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to export the license file to arg1 because write permission to the share location is denied.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = address</li> </ul>
<b>Detailed Description</b>	The license file cannot be exported to the share location identified in the message because write permission to the share location is denied.
<b>Recommended Response Action</b>	Retry the operation using a share location that has write permission.
<b>Category</b>	Configuration (CLIC = License Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## CLIC0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the action because the target device arg1 is not discovered via the preferred protocol.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = deviceName</li> </ul>
<b>Detailed Description</b>	The license file cannot be deployed on the device because the device is not discovered using the preferred protocol. Please refer to the user guide for more information on how to discover the device using the preferred protocol.
<b>Recommended Response Action</b>	Retry the operation after discovering the device using the preferred protocol.
<b>Category</b>	Configuration (CLIC = License Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CLIC0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to deploy the license on the device arg1 because the device is not reachable.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = deviceName</li></ul>
<b>Detailed Description</b>	The license action cannot be performed on the device because the device is not reachable from OpenManage Enterprise.
<b>Recommended Response Action</b>	Retry the operation after ensuring network connectivity to the device from OpenManage Enterprise.
<b>Category</b>	Configuration (CLIC = License Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CLIC0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to deploy the license because the license arg1 is already installed on the device arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = entitlementId</li><li>• arg2 = deviceName</li></ul>
<b>Detailed Description</b>	The license cannot be deployed on the device because the same license is already deployed on the device.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CLIC = License Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CLIC0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to deploy the license because the device having the service tag arg1 is not discovered in OpenManage Enterprise.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = serviceTag</li></ul>
<b>Detailed Description</b>	The license cannot be deployed because the device having the bound service tag is not discovered in OpenManage Enterprise.
<b>Recommended Response Action</b>	Retry the operation after discovering the device having the service tag bound to the license.
<b>Category</b>	Configuration (CLIC = License Management)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CLIC0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to remove license arg1 from device arg2 because the license is not installed on the device.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = entitlementId</li> <li>• arg2 = deviceName</li> </ul>
<b>Detailed Description</b>	The license <entitlementId> cannot be removed from device <deviceName> because the license is not installed on the device. Ensure that the license is installed on the device before attempting to remove it.
<b>Recommended Response Action</b>	No response action required.

# CMC—Management Module Event Messages

## CMC001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The operation is successfully completed.
<b>Detailed Description</b>	The operation is successfully completed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because of an unknown issue.
<b>Detailed Description</b>	The operation cannot be successfully completed because of an unknown issue.
<b>Recommended Response Action</b>	Do one of the following: 1) Retry the operation. 2) Reset CMC and retry the operation.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the parameter arg1 is missing.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = parameter name</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the parameter identified in the message is missing.
<b>Recommended Response Action</b>	Enter the missing parameter and retry the operation. For information about the parameters, see the CMC Profile document available on the support site.
<b>Category</b>	Configuration (CMC = Management Module)

<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the parameter arg1 is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = parameter name</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the parameter identified in the message is invalid.
<b>Recommended Response Action</b>	Enter a valid parameter and retry the operation. For information about valid parameters, see the CMC Profile document available on the support site.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because of a mismatch between AttributeName and AttributeValue count.
<b>Detailed Description</b>	The operation cannot be completed because of a mismatch between AttributeName and AttributeValue count.
<b>Recommended Response Action</b>	Enter a valid AttributeName and AttributeValue count, and then retry the operation.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC1000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Notification arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = topic name</li> </ul>
<b>Detailed Description</b>	This message is defined for Redfish event only. It does not add to any log type. The message contains a notification given a topic name between management firmware.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The health of sled in the sled slot arg1 has changed.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = slot number</li> </ul>
<b>Detailed Description</b>	This is an internal message used within the Management Module. It is defined for Redfish event only. It does not add to any log type. The presence of this message indicates that the sled in the specified slot has changed its health.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC401

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Changing the Reserved QuickDeploy IP Addresses setting to arg1 may create an issue in the future if higher density server nodes are inserted in to the Chassis (for example, quarter-height servers). Press OK to continue.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = number of IP address</li> </ul>
<b>Detailed Description</b>	Changing the Reserved QuickDeploy IP Addresses setting to <number of IP address> may create an issue in the future if higher density server nodes are inserted in to the Chassis (for example, quarter-height servers).
<b>Recommended Response Action</b>	Select a higher number to accommodate future higher density server node additions, otherwise no response action is required.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## CMC8501

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Chassis Group Leader has synchronized this members configuration.
<b>Detailed Description</b>	Multi Chassis Management feature on CMC allows for pushing the lead chassis configuration data to its members. This message appears in the members log when the configuration data is successfully synchronized with the Chassis group leaders configuration data.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC8502

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access the IPv6 information of the server.
<b>Detailed Description</b>	CMC is unable to access the specified servers IPv6 information. Unable to display the specified servers Launch iDRAC link on the CMC Web interface.
<b>Recommended Response Action</b>	Enable IPv6 for the specified server using the CMC command line or CMC Web GUI interface, so that the link to launch iDRAC is displayed on the CMC Web interface. For the command line options or navigation for Web interface, see the Troubleshooting section in the CMC Users Guide.
<b>Category</b>	System Health (CMC = Management Module)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC8503

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access the IPv4 information of the server.
<b>Detailed Description</b>	CMC is unable to access the IPv4 information for the specified server. Unable to display the specified servers Launch iDRAC link on the CMC Web interface.

<b>Recommended Response Action</b>	Enable IPv4 on the specified slots iDRAC via the CMC command line or Web GUI interface, for the iDRACs launch point to show up on the CMC web GUI. For the command line options or navigation for Web interface, see the Troubleshooting section in the CMC Users Guide.
<b>Category</b>	System Health (CMC = Management Module)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMC8504

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access server: arg1, because the NIC is disabled on the identified server.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = slot number</li> </ul>
<b>Detailed Description</b>	The NIC is disabled on the server identified in the message, and the CMC is unable to display the link to launch the iDRAC web interface.
<b>Recommended Response Action</b>	Enable the NIC on the server identified in the message using the CMC command line or CMC Web interface, so that the link to launch iDRAC is displayed on the CMC Web interface. To enable the NIC for DHCP using RACADM, enter "racadm setniccfg -m server-<slot number> -d" where <slot number> is the server identified in the message. To enable the NIC using the Web interface, click Server Overview > select the identified server, go to Setup > select the Enable LAN check box.

## CMC8533

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to read the FRU information, status = arg1
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = status value</li></ul>
<b>Detailed Description</b>	Unable to read the header of the extended FRU information. This can occur if there is a problem in the communication between the CMC and the server.
<b>Recommended Response Action</b>	Remove and reinsert the server. The CMC will retry the read operation of the FRU information. If the issue persists, contact your service provider.

<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = slot number</li></ul>
<b>Detailed Description</b>	The health of the peripheral in the slot identified in the message is normal.
<b>Recommended Response Action</b>	No Response action required.
<b>Category</b>	Audit (CMC = Management Module)
<b>Severity</b>	Informational
<b>LCD Message</b>	Peripheral Health is Normal
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, LC Log*, LCD, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, Email Alert*, LCD, OS Log

## CMC8716

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Power loss detected on the Management Module at slot arg1 due to reboot or shutdown.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = slot number</li></ul>
<b>Detailed Description</b>	Management service has shutdown or rebooted on the Management Module at slot identified in the message.
<b>Recommended Response Action</b>	If the problem persists for several minutes then perform a Powercycle operation of the Management Module on slot identified in the message.
<b>Category</b>	System Health (CMC = Management Module)
<b>Severity</b>	Critical
<b>LCD Message</b>	Management service is critical for the Management Module.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC8731

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 operation is successfully completed.
<b>Arguments</b>	<ul style="list-style-type: none"><li>arg1 = operation name</li></ul>
<b>Detailed Description</b>	The operation identified in the message is successfully completed.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC8732

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 arg2 operation was not successful.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = operation name</li> <li>• arg2 = item name</li> </ul>
<b>Detailed Description</b>	The operation item identified in the message was not successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC8733

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure the settings of arg1 because the settings are already configured.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = attribute name</li> </ul>
<b>Detailed Description</b>	Settings of the attribute identified in the message cannot be configured because the settings are already configured.
<b>Recommended Response Action</b>	Reset the attribute to its default and retry the operation. For information about resetting, see the Reset MM Configuration White Paper available on the support site.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC8734

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to configure the settings of arg1 because of the reasons indicated in message arg2.
----------------	--

<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = attribute name</li> <li>• arg2 = message ID</li> </ul>
<b>Detailed Description</b>	Settings of the attribute cannot be configured because of the reasons indicated in message ID identified in the message.
<b>Recommended Response Action</b>	Refer to the Recommended Response Action section of the message ID specified in the message. For information about Error and Event messages, see the Event and Error Message Reference Guide for Dell EMC PowerEdge Servers available on the support site.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC9000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A serial session is initiated to the component arg1 at arg2 by using the arg3 mode.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = component name</li> <li>• arg2 = time</li> <li>• arg3 = binary mode</li> </ul>
<b>Detailed Description</b>	A serial session is initiated to the component at the time as identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC9001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A serial session to the component arg1 is ended at arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = component name</li> <li>• arg2 = time</li> </ul>
<b>Detailed Description</b>	A serial session is ended to the component at the time as identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMC9002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The DNS name of iDRAC in slot arg1 is changed from arg2 to arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = slot Name</li><li>• arg2 = name 1</li><li>• arg3 = name 2</li></ul>
<b>Detailed Description</b>	The DNS name of the iDRAC in the slot identified in the message has changed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CMC = Management Module)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CMET—Metrics Event Messages

### CMET0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to display metrics data because either there is no response from the device or an invalid value is entered for arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = metric</li></ul>
<b>Detailed Description</b>	The metrics data cannot be displayed because either there is no response from the device or an invalid value is entered for the metric.
<b>Recommended Response Action</b>	Enter valid values and retry the operation. For information about valid values, see the OpenManage Enterprise Users Guide available on the support site.
<b>Category</b>	Configuration (CMET = Metrics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CMET0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access the data or update data from the plugin application because the plugin feature is disabled.
----------------	--

<b>Detailed Description</b>	The data cannot be accessed or updated from the plugin application because the plugin feature is disabled.
<b>Recommended Response Action</b>	Enable the plugin application and retry the operation. For information about enabling a plugin application, see the Users Guide of the respective plugin on the support site.
<b>Category</b>	Configuration (CMET = Metrics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the interface of the Plugin Application is not registered.
<b>Detailed Description</b>	The operation cannot be completed because the interface of the Plugin Application is not registered.
<b>Recommended Response Action</b>	Register the Plugin Application and retry the operation. For information about registering a Plugin Interface, see the Users Guide of the respective Plugin available on the support site.
<b>Category</b>	Configuration (CMET = Metrics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The threshold value of arg1 is successfully configured for arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = entity ID</li> <li>• arg2 = Threshold Type</li> </ul>
<b>Detailed Description</b>	The threshold value is successfully configured for the entity ID identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CMET = Metrics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The metric data is successfully purged as per the setting by using the task arg1.
----------------	---

<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = task name</li> </ul>
<b>Detailed Description</b>	The metric data is successfully purged as per the setting by using the task identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CMET = Metrics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on arg1 has exceeded its lower threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = entity ID</li> </ul>
<b>Detailed Description</b>	The Temperature has exceeded its lower threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on arg1 has exceeded its upper threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = entity ID</li> </ul>
<b>Detailed Description</b>	The Temperature has exceeded its upper threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on arg1 has successfully returned to its normal state.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = entity ID</li> </ul>
<b>Detailed Description</b>	The Temperature has successfully returned to its normal state.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on arg1 has exceeded its lower threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = entity ID</li> </ul>
<b>Detailed Description</b>	The Temperature has exceeded its lower threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on arg1 has exceeded its upper threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = entity ID</li> </ul>
<b>Detailed Description</b>	The Temperature has exceeded its upper threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on GPU Device Card arg1 of device arg2 has exceeded its threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Slot</li> <li>• arg2 = DeviceName</li> </ul>
<b>Detailed Description</b>	The Temperature on GPU Device Card has exceeded its threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on GPU Device Card arg1 of device arg2 has successfully returned to its normal state.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Slot</li> <li>• arg2 = DeviceName</li> </ul>
<b>Detailed Description</b>	The Temperature on GPU Device Card has successfully returned to its normal state.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on GPU Device Card arg1 of device arg2 has exceeded its threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Slot</li> <li>• arg2 = DeviceName</li> </ul>
<b>Detailed Description</b>	The Temperature on GPU Device Card has exceeded its threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on CPU Device Card arg1 of device arg2 has exceeded its threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Slot</li><li>• arg2 = DeviceName</li></ul>
<b>Detailed Description</b>	The Temperature on CPU Device Card has exceeded its threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0022

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on CPU Device Card arg1 of device arg2 has successfully returned to its normal state.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Slot</li><li>• arg2 = DeviceName</li></ul>
<b>Detailed Description</b>	The Temperature on CPU Device Card has successfully returned to its normal state.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMET0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Temperature on CPU Device Card arg1 of device arg2 has exceeded its threshold value.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Slot</li><li>• arg2 = DeviceName</li></ul>
<b>Detailed Description</b>	The Temperature on CPU Device Card has exceeded its threshold value.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CMET = Metrics)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON—Monitoring Event Messages

### CMON0160

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to acknowledge or remove the alert(s) because the field arg1 contains an invalid value arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = field ID</li> <li>• arg2 = invalid values</li> </ul>
<b>Detailed Description</b>	The alert(s) cannot be acknowledged or removed because the request contains an invalid value as identified in the message.
<b>Recommended Response Action</b>	Enter a valid value for the field identified in the message and retry the operation.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CMON0165

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve information about the message because a record does not exist for the message ID entered.
<b>Detailed Description</b>	Information about the message cannot be retrieved because a record does not exist for the message ID entered.
<b>Recommended Response Action</b>	Enter a valid message ID and retry the operation.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CMON0166

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The alert policy arg1 is successfully created.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = policy Name</li> </ul>

<b>Detailed Description</b>	The alert policy identified in the message is successfully created.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0167

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The alert policy arg1 is successfully modified.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = policy Name</li> </ul>
<b>Detailed Description</b>	The alert policy identified in the message is successfully modified.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0168

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The alert policy arg1 is successfully deleted.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = policy Name</li> </ul>
<b>Detailed Description</b>	The alert policy identified in the message is successfully deleted.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0169

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The alert policy arg1 is enabled.
----------------	-----------------------------------

<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = policy Name</li> </ul>
<b>Detailed Description</b>	The alert policy identified in the message is enabled.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0170

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The alert policy arg1 is disabled.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = policy Name</li> </ul>
<b>Detailed Description</b>	The alert policy identified in the message is disabled.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0173

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The number of alerts has exceeded the threshold value arg1. Previous alerts are automatically deleted from the logs when the total number of alerts reaches arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = warningSizeLimit</li> <li>arg2 = maxSizeLimit</li> </ul>
<b>Detailed Description</b>	The number of alerts has exceeded the warning threshold value identified in the message. Previous alerts are automatically deleted from the logs when the total number of alerts reaches the maximum threshold value.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0174

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1 alerts are exported to the file arg2. The exported alerts can be downloaded from the Archived Alerts page.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Number</li><li>• arg2 = fileName</li></ul>
<b>Detailed Description</b>	Alerts are exported to the file as identified in the message. The exported alerts can be downloaded from the Archived Alerts page.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0175

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The status for alert(s) with ID(s) arg1 has been updated to the status arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = IDs</li><li>• arg2 = status</li></ul>
<b>Detailed Description</b>	The status of alert(s) is updated to the status as identified in the message.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON0176

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The alert(s) with ID(s) arg1 are deleted.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = id</li></ul>
<b>Detailed Description</b>	The alert(s) identified in the message are deleted.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON1030

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to modify the alert policy arg1 because the alert policy is a default policy.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = policy Id</li> </ul>
<b>Detailed Description</b>	The alert policy identified in the message cannot be modified because the alert policy is a default policy. Default policies cannot be modified. For a list of default policies provided, see the OpenManage Enterprise-Modular Users Guide. Also, click the F1 key to view the Online Help on the OpenManage Enterprise-Modular Graphical User Interface (GUI).
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CMON = Monitoring)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CMON1031

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete the alert policies because the list contains one or more default policies.
<b>Detailed Description</b>	The alert policies cannot be deleted because the list contains one or more default policies.
<b>Recommended Response Action</b>	Remove the default policy and retry the operation. For a list of default policies provided, see the OpenManage Enterprise-Modular Users Guide. Also, click the F1 key to view the Online Help on the OpenManage Enterprise-Modular Graphical User Interface (GUI).
<b>Category</b>	Configuration (CMON = Monitoring)

## CPU0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU arg1 is stuck in POST.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = number</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	1) Turn off the server and disconnect input power for one minute. Re-apply input power and turn system on. 2) Reduce system configuration to minimum memory and remove all PCI devices. If system completes POST, update system BIOS. Re-install memory and PCI one component at a time to meet the original configuration. 3) If the issue still persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

<b>Message</b>	The Machine Check system address reported by the processor is arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = registerReading</li> </ul>
<b>Detailed Description</b>	The Machine Check system address reported by the processor is indicated in the message.
<b>Recommended Response Action</b>	This event contains a system address of a component related to a failure reported by the CPU. Map this address to a component in the system to find the source of the error.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU4002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A processor Machine Check event occurred because the CPU detected an error in an external device (arg1, arg2).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = component_name</li> <li>arg2 = register reading</li> </ul>
<b>Detailed Description</b>	A processor Machine Check event occurred because the CPU detected an error in an external device as identified in the message.
<b>Recommended Response Action</b>	If the CPU4001 message is reported after CPU4002, map the address reported in CPU4001 to a system component. Update the component driver and firmware. Else, no response action is required.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU4003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A Machine Check event error occurred because the CPU received invalid data (arg1, arg2).
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = component_name</li><li>• arg2 = register reading</li></ul>
<b>Detailed Description</b>	A Machine Check event error occurred because the CPU received invalid data as identified in the message.
<b>Recommended Response Action</b>	If the CPU4001 message is reported after CPU4003, map the address reported in CPU4001 to a system component. Update the component driver and firmware. Else, no response action is required.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU4004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A Machine Check event error occurred because of a timeout while the CPU accessed an external device or component: (arg1, arg2).
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = component_name</li><li>• arg2 = register reading</li></ul>
<b>Detailed Description</b>	A Machine Check event error occurred because of a timeout while the CPU accessed an external device or component as identified in the message.
<b>Recommended Response Action</b>	If the CPU4001 message is reported after CPU4004, map the address reported in CPU4001 to a system component. Update the component driver and firmware. Else, no response action is required.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU4005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A Machine Check error was reported by the CPU: (arg1, arg2).
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = component_name</li><li>• arg2 = register reading</li></ul>

<b>Detailed Description</b>	A Machine Check error was reported by the CPU.
<b>Recommended Response Action</b>	Update the UEFI BIOS. If the issue persists, contact the TechnicalSupport team.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU5199

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An unknown diagnostic event occurred in the High Bandwidth Memory device at arg1. (Extended ID: arg2).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	An unknown diagnostic event occurred in the High Bandwidth Memory device at the location identified in the message.
<b>Recommended Response Action</b>	Update iDRAC firmware to the latest version available during the next maintenance cycle. If the issue persists, contact your service provider, and then provide this message number (CPU5199) and the extended ID displayed in the event message.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU6104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A diagnostic warning event occurred in the High Bandwidth Memory device at arg1. Perform a cold reboot operation. (Extended ID: arg2).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A diagnostic warning event occurred in the High Bandwidth Memory device at location identified in the message. System will attempt to perform self-healing or self-correction.
<b>Recommended Response Action</b>	Perform a cold reboot to allow server to attempt self-healing or self-correction. If a cold reboot has already occurred subsequent to this message then no further action is required. If the issue persists, contact your service provider, and then provide this message number (CPU6104) and the extended ID displayed in the event message.
<b>Category</b>	System Health (CPU = Processor)

<b>Severity</b>	Warning
<b>Trap/EventID</b>	2242
<b>LCD Message</b>	Warning event at <location>. Perform a cold reboot operation.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU6114

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A diagnostic warning event occurred in the High Bandwidth Memory device at arg1. (Extended ID: arg2).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	A diagnostic warning event occurred in the High Bandwidth Memory device at the location identified in the message.
<b>Recommended Response Action</b>	Contact your service provider for assistance. Provide this message number (CPU6114) and the debug code displayed in the event message.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2242
<b>LCD Message</b>	Warning event at <location>. Perform a cold reboot operation.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU6199

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An unknown diagnostic Warning event occurred in the High Bandwidth Memory device at arg1. (Extended ID: arg2).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = location</li> <li>• arg2 = code</li> </ul>
<b>Detailed Description</b>	An unknown diagnostic Warning event occurred in the High Bandwidth Memory device at the location identified in the message.
<b>Recommended Response Action</b>	Update iDRAC firmware to the latest version available during the next maintenance cycle. If the issue persists, contact your service provider, and then provide this message number (CPU6199) and the extended ID displayed in the event message.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Warning

<b>Trap/EventID</b>	2242
<b>LCD Message</b>	Unknown warning event at <location>.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU7114

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A diagnostic critical event occurred in the High Bandwidth Memory device at arg1. (Extended ID: arg2).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = location</li> <li>arg2 = code</li> </ul>
<b>Detailed Description</b>	A diagnostic critical event occurred in the High Bandwidth Memory device at the location identified in the message.
<b>Recommended Response Action</b>	Contact your service provider for assistance. Provide this message number (CPU7114) and the extended ID displayed in the event message.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2241
<b>LCD Message</b>	Critical event at <location>. Perform a cold reboot operation.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log, Power Off, Power Cycle, Reset
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU7199

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An unknown diagnostic Critical event occurred in the High Bandwidth Memory device at arg1. (Extended ID: arg2).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = location</li> <li>arg2 = code</li> </ul>
<b>Detailed Description</b>	An unknown diagnostic Critical event occurred in the High Bandwidth Memory device at the location identified in the message.
<b>Recommended Response Action</b>	Update iDRAC firmware to the latest version available during the next maintenance cycle. If the issue persists, contact your service provider, and then provide this message number (CPU7199) and the extended ID displayed in the event message.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2241

<b>LCD Message</b>	Unknown critical event at <location>.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, IPMI Alert*, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU9000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An OEM diagnostic event occurred.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU9001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU interconnect arg1 has a correctable error.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = CPU number</li> </ul>
<b>Detailed Description</b>	A correctable error was detected in propagation of signals between processors.
<b>Recommended Response Action</b>	Do the following: 1) Restart the server and verify whether or not the issue persists. 2) If yes, reseal the processors, and then restart the server. 3) If the issue persists, contact your server provider.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2242
<b>LCD Message</b>	CPU interconnect <CPU number> has a correctable error.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU9002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A link width degradation has occurred in the CPU interconnect arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = number</li></ul>
<b>Detailed Description</b>	A link width degradation has occurred in the CPU interconnect identified in the message. The system performance may be degraded or the system may stop operating.
<b>Recommended Response Action</b>	Do the following: 1) Restart the server and verify whether or not the issue persists. 2) If yes, reseal the processors, and then restart the server. 3) If the issue persists, contact your server provider.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	2242
<b>LCD Message</b>	CPU interconnect link width has degraded.
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CPU9003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to read the Processor Information ROM (PIROM) data of the CPU arg1 because of communication error.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = CPU SlotNum</li></ul>
<b>Detailed Description</b>	The Processor Information ROM (PIROM) data of the CPU identified in the message cannot be read because of communication error or the CPU is not returning the PIROM data. This condition can cause degradation in the monitoring capability of the system.
<b>Recommended Response Action</b>	Do the following and retry the operation: 1) Power off the server and disconnect the input power. 2) Make sure the CPU is correctly installed if the processor is removable. 3) Connect the input power and power on the server. 4) If the issue persists, contact technical support. To select a contact mode, see the Installation and Service Manual on the support site.
<b>Category</b>	System Health (CPU = Processor)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	2241

## CPWR—Power Configuration Event Messages

### CPWR0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Power Management settings is successfully saved.
<b>Detailed Description</b>	The Power Management settings is successfully saved.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to save the Power Management settings because of internal issues.
<b>Detailed Description</b>	The Power Management settings cannot be saved because of internal issues.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your OpenManage Enterprise administrator.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The following power management job is unsuccessful. Job Name: arg1, Job Type: arg2, Job ID: arg3, Job Status: arg4, Invalid Input: arg5.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = jobName</li> <li>• arg2 = jobType</li> <li>• arg3 = jobID</li> <li>• arg4 = jobStatus</li> <li>• arg5 = Attribute</li> </ul>
<b>Detailed Description</b>	The power management job identified in the message is unsuccessful.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your OpenManage Enterprise administrator.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The following power management job is successful. Job Name: arg1, Job Type: arg2, Job ID: arg3, Job Status: arg4.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = jobName</li><li>• arg2 = jobType</li><li>• arg3 = jobID</li><li>• arg4 = jobStatus</li></ul>
<b>Detailed Description</b>	The power management job identified in the message is successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The group arg1 is successfully added for monitoring the arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = group ID</li><li>• arg2 = group Type</li></ul>
<b>Detailed Description</b>	The group is successfully added for monitoring the group type identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The group arg1 is successfully deleted from list of arg2 monitoring.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = group ID</li><li>• arg2 = group Type</li></ul>
<b>Detailed Description</b>	The group is successfully deleted from the group type identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CPWR = Power Configuration)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Power Management settings is successfully saved.
<b>Detailed Description</b>	The Power Management settings is successfully saved.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to save the Power Management settings because of internal issues.
<b>Detailed Description</b>	The Power Management settings cannot be saved because of internal issues.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your OpenManage Enterprise administrator.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The following devices are not anymore monitored by the Power Manager application because the OpenManage Enterprise license has expired: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = device Names</li> </ul>
<b>Detailed Description</b>	The devices identified in the message are not anymore monitored by the Power Manager application because OpenManage Enterprise the license has expired.
<b>Recommended Response Action</b>	To continue monitoring the devices, procure a valid OpenManage Enterprise license. For license information, see the OpenManage Enterprise Users Guide available on the support site.
<b>Category</b>	Configuration (CPWR = Power Configuration)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the specified group because the number of groups monitored for power management in the dashboard is more than three.
<b>Detailed Description</b>	The specified groups cannot be added because the number of groups monitored for power management in the dashboard is more than three.
<b>Recommended Response Action</b>	Make sure that the number of groups is less than three, and then retry the operation. To reduce the number of groups, remove it from the existing list. To set the group number, do the following: 1) In OpenManage Enterprise, click Add Groups. In the Add group(s) to dashboard dialog box, in the Selected group(s) section, select the group and click the remove symbol. 2) By using the REST API command, enter the group ID and run the command.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The properties of group arg1 for power management and monitoring are successfully updated.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = groupNames</li> </ul>
<b>Detailed Description</b>	The properties of the groups identified in the message are successfully updated for power management and monitoring.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0012

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The group membership properties of the following groups are successfully updated: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = groups names</li> </ul>

<b>Detailed Description</b>	The group membership properties of the following groups are successfully updated as identified in the message.
<b>Recommended Response Action</b>	For optimized power performance, it is recommended that you re-evaluate the power policies applied to these groups.
<b>Category</b>	System Health (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0013

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The power policy arg1 of the group arg2 is violated because of the devices added to the group.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = policy name</li> <li>• arg2 = group name</li> </ul>
<b>Detailed Description</b>	The power policy of the group identified in the message is violated because of the devices added to the group.
<b>Recommended Response Action</b>	Reevaluate the power policy based on the newly added devices, and update the power cap value, if necessary.
<b>Category</b>	System Health (CPWR = Power Configuration)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The violation on the power policy arg1 of the group arg2 is now rectified.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = policy name</li> <li>• arg2 = group name</li> </ul>
<b>Detailed Description</b>	The violation on the power policy of the group identified is now rectified.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or modify the power policy arg1 because a power policy already exists with the same name.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Power Policy Name</li></ul>
<b>Detailed Description</b>	The power policy cannot be created or updated because a power policy already exists with the same name.
<b>Recommended Response Action</b>	Enter a unique power policy name and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create policy because some of the target devices do not have capability arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = CapabilityType</li></ul>
<b>Detailed Description</b>	Policy cannot be created because some of the target devices do not have capability as identified in the message.
<b>Recommended Response Action</b>	Make sure that all the target devices have the required capability and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the power policy because some of the target devices are not part of the group arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = groupName</li></ul>
<b>Detailed Description</b>	The power policy cannot be created because some of the target devices are not part of the group identified in the message.
<b>Recommended Response Action</b>	Enter a device name that belong to the group, and then retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because the entity arg1 is currently not monitored and managed for power.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = entity ID</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the entity identified in the message is not monitored and managed for power.
<b>Recommended Response Action</b>	Ensure that the specified entity is monitored and managed for power and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Power Cap value arg1 is successfully applied on arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = power cap value</li> <li>arg2 = target name</li> </ul>
<b>Detailed Description</b>	The Power Cap value is successfully applied on the target identified in the message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0020

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to apply the Power Cap value arg1 on arg2 because the device is either unreachable or does not have the necessary license or the supplied power cap value is not applicable for the device.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = power cap value</li> <li>arg2 = target name</li> </ul>

<b>Detailed Description</b>	The Power Cap value cannot be applied on the device identified in the message because the device is either unreachable or does not have the necessary license or the supplied power cap value is not applicable for the device.
<b>Recommended Response Action</b>	Make sure that the target is reachable and has the required license and the power cap value is within supported range, and then retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0021

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Power Cap feature is disabled on the target arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = target device name</li> </ul>
<b>Detailed Description</b>	The Power Cap value is disabled on the target identified in the message.
<b>Recommended Response Action</b>	No response action is required.

## CPWR0062

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 policy and other policies are successfully enabled for power management and monitoring.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = policyName</li></ul>
<b>Detailed Description</b>	The policy identified in the message and other policies are successfully enabled for power management and monitoring. For more information, see the Policies page in the Power Management feature.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0063

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 policy and other policies are successfully disabled for power management and monitoring.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = policyName</li></ul>
<b>Detailed Description</b>	The policy identified in the message and other policies are successfully disabled for power management and monitoring. For more information, see the Policies page in the Power Management feature.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0064

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Emergency Power Reduction feature that was earlier enabled on the arg1 group, by using the temperature-triggered policy arg2, is now automatically disabled.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = group name</li><li>• arg2 = policy name</li></ul>
<b>Detailed Description</b>	The Emergency Power Reduction feature that was earlier enabled on the group, by using the temperature-triggered policy identified in the message, is now automatically disabled. The feature is disabled because one or more of the following reasons: 1) The issue of temperature of the group, exceeding the threshold temperature set by the temperature-triggered policy, is successfully resolved. 2) The temperature-triggered policy is disabled or deleted.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (CPWR = Power Configuration)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0065

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Power consumed by the arg1 group is arg2 which has exceeded the power capacity arg3 allocated by the user for the group.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = group Name</li> <li>• arg2 = power Consumption</li> <li>• arg3 = power Allocation</li> </ul>
<b>Detailed Description</b>	Power consumed by the group identified in the message has exceeded the power allocated by the user for the group.
<b>Recommended Response Action</b>	Make sure that sufficient Power Supply Units (PSUs) are available. If necessary, update the power allocated for the group.
<b>Category</b>	System Health (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0066

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Power consumed by the arg1 group, which had exceeded the power capacity arg2 allocated by the user for the group, is now within the set limit.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = group Name</li> <li>• arg2 = power Allocation</li> </ul>
<b>Detailed Description</b>	Power consumed by the group, which had exceeded the allocated power capacity, is now within the user allocated limit as identified in the message.
<b>Recommended Response Action</b>	No response action is required.

## CPWR0096

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to add the device arg1, or other devices to the group arg2 because: 1) Device ID is not valid. 2) Device is not rack-mountable. 3) Device is already added to a group. 4) Size details of the device does not exist or is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = device Name</li> <li>arg2 = rack Name</li> </ul>
<b>Detailed Description</b>	One or more devices cannot be added to the group identified in the message because: 1) Device ID is not valid. 2) Device is not rack-mountable. 3) Device is already added to a group. 4) Size details of the device does not exist or is invalid.
<b>Recommended Response Action</b>	Make sure that the device ID is valid and have valid size information associated to them, and then retry the operation. For information about valid rack-mountable devices, see the OpenManage Enterprise Users Guide available on the support site.
<b>Category</b>	Configuration (CPWR = Power Configuration)

## CPWR0098

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to assign the outlet arg1 to the device arg2 because the device ID entered does not belong to a Power Distribution Unit (PDU).

**Arguments**

- arg1 = outletNum
- arg2 = deviceID

**Detailed Description** The outlet to the device identified in the message cannot be assigned because the device ID entered does not belong to a Power Distribution Unit (PDU).

**Recommended Response Action** Enter a valid Power Distribution Unit (PDU) device ID and retry the operation.

**Category** Configuration (CPWR = Power Configuration)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CPWR0099

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to assign the outlet arg1 to the device arg2 because the Power Distribution Unit (PDU) device ID entered is invalid.

**Arguments**

- arg1 = outletNum
- arg2 = deviceID

**Detailed Description** The outlet to the device identified in the message cannot be assigned because the Power Distribution Unit (PDU) device ID entered is invalid.

**Recommended Response Action** Enter a valid Power Distribution Unit (PDU) device ID and retry the operation.

**Category** Configuration (CPWR = Power Configuration)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CPWR0100

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to assign the outlet arg1 to the device arg2 because the Power Distribution Unit (PDU) outlet is already associated to another device.

**Arguments**

- arg1 = outletNum

- arg2 = deviceId or deviceName

<b>Detailed Description</b>	The outlet to the device identified in the message cannot be assigned because the Power Distribution Unit (PDU) outlet is already associated to another device.
<b>Recommended Response Action</b>	Enter a valid and free (unoccupied) outlet number and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to assign the outlet arg1 to the device arg2 because the Power Distribution Unit (PDU) and the device to be associated with the outlet is not in the same group.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = outletNum</li> <li>• arg2 = deviceId</li> </ul>
<b>Detailed Description</b>	The outlet to the device identified in the message cannot be assigned because the Power Distribution Unit (PDU) and the device to be associated with the outlet is not in the same group.
<b>Recommended Response Action</b>	Make sure that the device and the Power Distribution Unit (PDU) are from the same group, and then retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to assign the outlet arg1 to the device arg2 because the Power Distribution Unit (PDU) and the device to be associated with the outlet does not have the minimum required Power Supply Units (PSUs).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = outletNum</li> <li>• arg2 = deviceId</li> </ul>
<b>Detailed Description</b>	DevicesPSUs are already occupied so cannot assign outlet to device.
<b>Recommended Response Action</b>	Devices PSU is already occupied by PDU outlet, Clear the existing assignment using REST API /api/PowerService/PowerDevices/Actions/PowerDevices.DissociateDevices and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)

## CPWR0103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to disassociate the device from the Power Distribution Unit (PDU) because the device ID entered does not belong to a Power Distribution Unit (PDU).
<b>Detailed Description</b>	The outlet to the device identified in the message cannot be disassociated from the PDU because the device ID entered does not belong to a Power Distribution Unit (PDU).
<b>Recommended Response Action</b>	Enter a valid Power Distribution Unit (PDU) device ID and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to disassociate the device from the Power Distribution Unit (PDU) because the PDU is not associated with any rack.
<b>Detailed Description</b>	The outlet to the device identified in the message cannot be disassociated from the PDU because the PDU is not associated with any rack.
<b>Recommended Response Action</b>	Enter a valid Power Distribution Unit (PDU) device ID and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to clear the Power Distribution Unit (PDU) outlet arg1 because the PDU outlet is not assigned to any device.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = outletNum</li></ul>
<b>Detailed Description</b>	The outlet identified in the message cannot be cleared because the Power Distribution Unit (PDU) outlet is not assigned to any device.
<b>Recommended Response Action</b>	Enter a valid occupied Power Distribution Unit (PDU) outlet and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CPWR0106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to assign the Power Distribution Unit (PDU) arg1 to the rack because the PDU can be assigned to only one rack at any given time.

**Arguments**

- arg1 = deviceId

**Detailed Description** The Power Distribution Unit (PDU) device ID identified in the message cannot be assigned to rack because the PDU can be assigned to only one rack at any given time.

**Recommended Response Action** Enter a valid unassigned Power Distribution Unit (PDU) device ID and retry the operation.

**Category** Configuration (CPWR = Power Configuration)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CPWR0107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to associate the Power Distribution Unit (PDU) arg1 to the rack because the PDU cannot be placed in the rack slot.

**Arguments**

- arg1 = deviceId

**Detailed Description** The Power Distribution Unit (PDU) cannot associated to the rack because the PDU cannot be placed in the rack slot.

**Recommended Response Action** Enter a valid value(zero or null) for the rack slot and retry the operation.

**Category** Configuration (CPWR = Power Configuration)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CPWR0108

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to assign Power Distribution Unit (PDU) arg1 to rack because PDU is already associated with given rack.

**Arguments**

- arg1 = deviceId

**Detailed Description** The Power Distribution Unit (PDU) device identified in the message cannot be associated to rack because the PDU is already associated to rack.

<b>Recommended Response Action</b>	Enter a valid free (Unassociated) Power Distribution Unit (PDU) device ID and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0109

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve Power Distribution Unit (PDU) outlet assignment details because the PDU with given ID does not exist.
<b>Detailed Description</b>	The Power Distribution Unit (PDU) outlet assignment details cannot be retrieved because the PDU with the given ID does not exist.
<b>Recommended Response Action</b>	Enter a valid existing Power Distribution Unit (PDU) device ID and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0110

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update details of the device arg1 because device PSU count is lesser than the total Power Distribution Unit (PDU) outlet assigned to it.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = deviceID</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the device identified in the message has more Power Distribution Unit (PDU) outlet assignment than the PSU count.
<b>Recommended Response Action</b>	Make sure that PSU count of the device is same or more than the total Power Distribution Unit (PDU) outlet assigned to it.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CPWR0111

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to move the device arg1 to other rack because device is assigned to Power Distribution Unit (PDU) outlet.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = deviceId</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because device identified in the message is assigned to Power Distribution Unit (PDU) outlet.
<b>Recommended Response Action</b>	Clear the outlet assignments of the device identified in the message and retry the operation.
<b>Category</b>	Configuration (CPWR = Power Configuration)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

## CSAE0023

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The Services Configurations version arg1 of type arg2 is successfully updated.

**Arguments**

- arg1 = version
- arg2 = type

**Detailed Description** The Services Configurations version is successfully updated.

**Recommended Response Action** No response action required.

**Category** Audit (CSAE = SupportAssist Enterprise)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CSAE0024

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update Services configurations version arg1 of type arg2 due to arg3.

**Arguments**

- arg1 = version
- arg2 = type
- arg3 = reason

**Detailed Description** Unable to update Services configurations due to reason identified in the message.

<b>Recommended Response Action</b>	Retry operation after sometime. If issue persists, contact your service provider.
<b>Category</b>	Audit (CSAE = SupportAssist Enterprise)

## CSEC—Security Event Messages

### CSEC0002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to login from arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = session type</li> </ul>
<b>Detailed Description</b>	The user using the session type identified in the message cannot be logged in.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Audit (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### CSEC0053

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Local user arg1 deleted.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = user name</li> </ul>
<b>Detailed Description</b>	Local user deleted.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC0056

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Directory Group arg1 is deleted.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = user name 1</li></ul>
<b>Detailed Description</b>	The Directory Group identified in the message is deleted.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC0057

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Directory Group user arg1 configuration arg2 is successfully modified.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = userName</li><li>• arg2 = configuration</li></ul>
<b>Detailed Description</b>	The Directory Group configuration of the user identified in the message is successfully modified.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change the password because an invalid password is entered.
<b>Detailed Description</b>	The password cannot be changed because an invalid password is entered.
<b>Recommended Response Action</b>	Enter a valid password and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password matches one of arg1 previously used passwords.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = arg1</li></ul>
<b>Detailed Description</b>	The password cannot be set because the entered password matches one of the previously used passwords.
<b>Recommended Response Action</b>	Enter a password that has not been previously used and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains the word arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = word</li></ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains the word identified in the message.
<b>Recommended Response Action</b>	Enter a password that does not contain a dictionary word and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains the reversed word arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = word</li></ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains the reversed word identified in the message.
<b>Recommended Response Action</b>	Enter a password that does not contain a reversed dictionary word and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains an invalid pattern arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = pattern</li> </ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains an invalid pattern as identified in the message.
<b>Recommended Response Action</b>	Enter a password that does not contain the invalid pattern and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password does not match the pattern arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = pattern</li> </ul>
<b>Detailed Description</b>	The password cannot be set because the entered password does not match the specified pattern identified in the message.
<b>Recommended Response Action</b>	Enter a password that matches the specified pattern and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1011

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains the invalid character arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = character</li> </ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains the invalid character identified in the message.

<b>Recommended Response Action</b>	Enter a password without an invalid character and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1014

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains the invalid alphabetical sequence arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = sequence</li> </ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains the invalid alphabetical sequence identified in the message.
<b>Recommended Response Action</b>	Enter a password without an invalid alphabetical sequence and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1015

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains the invalid numerical sequence arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = sequence</li> </ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains the invalid numerical sequence identified in the message.
<b>Recommended Response Action</b>	Enter a password without an invalid numerical sequence and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains the user ID arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = user ID</li> </ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains the user ID identified in the message.
<b>Recommended Response Action</b>	Enter a password without the user ID and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password contains the user ID arg1 in reverse.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = user ID</li> </ul>
<b>Detailed Description</b>	The password cannot be set because the entered password contains the user ID in reverse as identified in the message.
<b>Recommended Response Action</b>	Enter a password without the user ID in reverse and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password because the entered password cannot contain whitespace characters.
<b>Detailed Description</b>	The password cannot be set because the entered password contains whitespace characters.
<b>Recommended Response Action</b>	Enter a password without whitespace characters and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CSEC1019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the password/passphrase because the entered values must contain at least arg1 uppercase letters.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = number</li></ul>
<b>Detailed Description</b>	The password/passphrase cannot be set because the entered values must contain uppercase letters as identified in the message.
<b>Recommended Response Action</b>	Enter a password/passphrase that contains at least the specified number of uppercase letters and retry the operation.
<b>Category</b>	Configuration (CSEC = Security)

## CTL114

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The encryption key of arg1 matches with its peer controller.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = controller name</li></ul>
<b>Detailed Description</b>	The encryption key for the controller identified in the message matches with its peer.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Storage (CTL = Storage Controller)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	4331
<b>LCD Message</b>	ENcryption key Matches
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, LCD, OS Log
<b>Applicable Event or Alert Types</b>	CMC—Filter Visibility, SNMP Alert*, Email Alert*, Remote System Log*, LC Log*, LCD, OS Log

## CTL115

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform Secure Drive related operations because a key mismatch was detected between peer controllers.
<b>Detailed Description</b>	The Secure Drive related operations cannot be performed because a key mismatch was detected between peer controllers.
<b>Recommended Response Action</b>	Make sure that the encryption key for the peer controllers matches by using controller security operations such as creating a security key, modifying a security key, deleting a security key, and then retry the operation.
<b>Category</b>	Configuration (CTL = Storage Controller)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, WS Eventing, Redfish Eventing*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CTL116

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to unlock secure foreign locked drives because already unlocked drives are detected that are neither imported nor deleted.
<b>Detailed Description</b>	The secure foreign locked drives cannot be unlocked because already unlocked drives are detected which have secure locked configuration that are neither imported nor erased.

<b>Recommended Response Action</b>	The unlock command should be followed by an import config command to import a secure foreign locked configuration or by a cryptographic erase command. If the unlocked drives are not imported or erased, then further unlock operations on locked drives will be blocked. To import already unlocked drives on a controller, run the RACADM command at the command line interface (CLI): "racadm raid importconfig:<Controller FQDD>" where <Controller FQDD> is the FQDD identifier of the target controller. In order to erase the data on the unlocked drive, run the command: "racadm raid cryptographicerase:<Drive FQDD>" where <Drive FQDD> is the FQDD identifier of the target drive.
<b>Category</b>	Configuration (CTL = Storage Controller)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, WS Eventing, Redfish Eventing*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CTL117

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because an invalid passphrase is passed for the controller arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = controller name</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because an invalid passphrase is passed for the controller identified in the message.
<b>Recommended Response Action</b>	Enter a valid passphrase and retry the operation.
<b>Category</b>	Storage (CTL = Storage Controller)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	4331
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Email Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*, OS Log

## CTL40

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A multi-bit Error Correction Code (ECC) error is detected on the arg1. Part number: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = controllerName</li> <li>arg2 = Part_Number</li> </ul>
<b>Detailed Description</b>	An error involving multiple bits is detected during the Read or Write operation. The error correction algorithm recalculates parity data during read/write operations. If the issue involves a single bit, the algorithm will correct and maintain parity data. In case of multiple bits, the data may be lost. However, in some multi-bit error cases, if issue occurs during Read operation, the data on the drive may be retained. However the data is lost during a Write operation.
<b>Recommended Response Action</b>	Replace the controller. For information about replacing the controller, see the respective PERC Users Guide available on the support site.

## CTL48

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A foreign configuration was detected on arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = controller name</li></ul>
<b>Detailed Description</b>	The controller has physical disks that were moved from another controller or have been removed and replaced on the current configuration. These physical disks contain virtual disks that were created on the current or other controller. See the storage hardware documentation for Import Foreign Configuration and Clear Foreign Configuration for more information. Foreign configuration is seen when a controller is replaced.
<b>Recommended Response Action</b>	Import or clear the detected foreign configuration using a configuration tool or utility.

## CTL49

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The NVRAM has corrupted data on arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Controller name</li></ul>
<b>Detailed Description</b>	The NVRAM has corrupted data. This may occur after a power surge, a battery failure, or for other reasons. The controller is reinitializing the NVRAM.
<b>Recommended Response Action</b>	No response action is required as the controller is taking the required corrective action. However, If this message is generated often (such as during each reboot), then replace the controller.

## CUPD3040

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the entered Compliance Update value is invalid.
<b>Detailed Description</b>	The update job cannot be created because the entered Compliance Update value is invalid.
<b>Recommended Response Action</b>	Make sure the entered Compliance Update value is true or false and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3041

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the entered Sign Verify value exceeds the maximum allowed length.
<b>Detailed Description</b>	The update job cannot be created because the entered Sign Verify value exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a Sign Verify value less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3042

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the entered signVerify value is invalid.
<b>Detailed Description</b>	The update job cannot be created because the entered signVerify value is invalid.
<b>Recommended Response Action</b>	Make sure the entered signVerify value is true or false and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3043

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the entered Staging value exceeds the maximum allowed length.
<b>Detailed Description</b>	The update job cannot be created because the entered Staging value exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a Staging value less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3044

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the entered Staging value is invalid.
<b>Detailed Description</b>	The update job cannot be created because the entered Staging value is invalid.
<b>Recommended Response Action</b>	Make sure the entered Staging value is true or false and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the provided job parameters are empty.
<b>Detailed Description</b>	The update job cannot be created because the entered job parameters are empty.
<b>Recommended Response Action</b>	Enter valid job parameters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3046

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the Key attribute is missing from a job parameter.
<b>Detailed Description</b>	The update job cannot be created because the Key attribute is missing from a job parameter.
<b>Recommended Response Action</b>	Make sure all job parameters have the Key attribute and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3047

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create the update job because the Value attribute is missing from a job parameter.
<b>Detailed Description</b>	The update job cannot be created because the Value attribute is missing from a job parameter.
<b>Recommended Response Action</b>	Make sure all job parameters have the Value attribute and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3048

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the entered repository name exceeds the maximum allowed length.
<b>Detailed Description</b>	The catalog cannot be created or updated because the entered repository name exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a repository name less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3049

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the entered repository description exceeds the maximum allowed length.
<b>Detailed Description</b>	The catalog cannot be created or updated because the entered repository description exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a repository description less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3050

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the entered repository username exceeds the maximum allowed length.
<b>Detailed Description</b>	The catalog cannot be created or updated because the entered repository username exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a repository username less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3051

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the entered repository domain name exceeds the maximum allowed length.
<b>Detailed Description</b>	The catalog cannot be created or updated because the entered repository domain name exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a repository domain name less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3052

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to create or update the catalog because the entered Check Certificate value is invalid.

**Detailed Description** The catalog cannot be created or updated because the entered Check Certificate value is invalid.

**Recommended Response Action** Make sure the entered Check Certificate value is true or false and retry the operation.

**Category** Updates (CUPD = Firmware)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3053

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to create or update the catalog because the entered repository type is invalid.

**Detailed Description** The catalog cannot be created or updated because the entered repository type is invalid.

**Recommended Response Action** Enter a valid repository type and retry the operation.

**Category** Updates (CUPD = Firmware)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3054

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to create or update the catalog because the repository name is missing.

**Detailed Description** The catalog cannot be created or updated because there is no value entered for repository name.

**Recommended Response Action** Enter the repository name and retry the operation.

**Category** Updates (CUPD = Firmware)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3055

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the repository type is missing.
<b>Detailed Description</b>	The catalog cannot be created or updated because there is no value entered for repository type.
<b>Recommended Response Action</b>	Enter the repository type and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3056

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the repository source is missing.
<b>Detailed Description</b>	The catalog cannot be created or updated because there is no value entered for repository source.
<b>Recommended Response Action</b>	Enter the repository source and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3057

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the baseline because the entered Downgrade Enabled value is invalid.
<b>Detailed Description</b>	The baseline cannot be created or updated because the entered Downgrade Enabled value is invalid.
<b>Recommended Response Action</b>	Make sure the entered Downgrade Enabled value is true or false and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3058

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the repository username or password is missing.
<b>Detailed Description</b>	The catalog cannot be created or updated because the repository username or password is missing.
<b>Recommended Response Action</b>	Enter the repository username and password and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3059

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the baseline because the entered baseline name exceeds the maximum allowed length.
<b>Detailed Description</b>	The baseline cannot be created or updated because the entered baseline name exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a baseline name less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3060

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the baseline because the entered baseline description exceeds the maximum allowed length.
<b>Detailed Description</b>	The baseline cannot be created or updated because the entered baseline description exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a baseline description less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3061

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the baseline because the entered Is64Bit value is invalid.
<b>Detailed Description</b>	The baseline cannot be created or updated because the entered Is64Bit value is invalid.
<b>Recommended Response Action</b>	Make sure the entered Is64Bit value is true or false and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3062

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the catalog source or file name is missing.
<b>Detailed Description</b>	The catalog cannot be created or updated because there is no value entered for catalog source or filename.
<b>Recommended Response Action</b>	Enter the catalog source and filename and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3063

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because an Online Repository already exists.
<b>Detailed Description</b>	The catalog cannot be created or updated because an Online Repository already exists.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3064

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because a repository with the same name already exists.
<b>Detailed Description</b>	The catalog cannot be created or updated because a repository with the same name already exists.
<b>Recommended Response Action</b>	Enter a different name and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3065

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to retrieve the list of associated baselines because no device IDs were provided.
<b>Detailed Description</b>	The list of associated baselines cannot be retrieved because no target IDs were provided.
<b>Recommended Response Action</b>	Enter a valid device ID and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3066

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog because the entered repository password exceeds the maximum allowed length.
<b>Detailed Description</b>	The catalog cannot be created or updated because the entered repository password exceeds the maximum limit of 255 characters.
<b>Recommended Response Action</b>	Enter a repository password less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3067

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the catalog or baseline because the entered job type does not exist.
<b>Detailed Description</b>	The catalog or baseline cannot be created or updated because the entered job type does not exist.
<b>Recommended Response Action</b>	Enter a valid job type and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3068

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to update the firmware because an exception occurred during the update process.
<b>Detailed Description</b>	The firmware cannot be updated because an exception occurred during the update process.
<b>Recommended Response Action</b>	Make sure the device is available and retry the operation. If the issue persists, contact your system administrator.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3101

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to remove update file because the field(s) arg1 cannot be null or empty.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = field names</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the mentioned field(s) are mandatory.
<b>Recommended Response Action</b>	Make sure all mandatory fields are provided and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to generate a report for the specified target(s) because the user arg1 does not have sufficient privileges to generate a report.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = current user name</li></ul>
<b>Detailed Description</b>	The report for the specified target(s) cannot be generated because the user identified in the message does not have sufficient privileges to generate the report.
<b>Recommended Response Action</b>	Retry the operation by logging in as a user with sufficient privileges.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create or update the baseline because the entered name is invalid.
<b>Detailed Description</b>	The baseline cannot be created or updated either because the entered name exceeds the maximum allowed length or there is no name entered.
<b>Recommended Response Action</b>	Enter a baseline name less than 255 characters and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3104

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** The catalog ID entered is not associated with any firmware baseline.

**Detailed Description** The catalog ID entered is not associated with any firmware baseline.

**Recommended Response Action** No response action required.

**Category** Updates (CUPD = Firmware)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3105

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to update the entered baseline because it is currently being refreshed.

**Detailed Description** The baseline cannot be updated because a job associated with the baseline is running.

**Recommended Response Action** Wait until the associated job is complete and retry the operation.

**Category** Updates (CUPD = Firmware)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3106

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to create or update the catalog because an Online Repository already exists.

**Detailed Description** Unable to create or update the catalog because an Online Repository already exists.

**Recommended Response Action** Unable to create or update the catalog because an Online Repository already exists.

**Category** Updates (CUPD = Firmware)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3107

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to complete the operation because a catalog with the same release identifier : arg1 already exists.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = release identifier</li></ul>
<b>Detailed Description</b>	Unable to complete the operation because a catalog with the same release identifier already exists.
<b>Recommended Response Action</b>	No response action required.

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUPD3113

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid release identifier provided, unable to create or update catalog for validated firmware solution baseline.
<b>Detailed Description</b>	The request cannot be processed because the provided release identifier is invalid.
<b>Recommended Response Action</b>	Refer to RESTAPI guide to retrieve validated catalog versions and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3114

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to create catalog for validated firmware solution baseline as automatic or manual update is only applicable for latest release identifier arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = latest release identifier</li></ul>
<b>Detailed Description</b>	The request cannot be processed because the provided release identifier is invalid.
<b>Recommended Response Action</b>	Use the latest release identifier that supports automatic or manual updates and retry the operation. The latest release identifier can be availed by calling get validated catalog version API.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3115

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Backup option is only applicable for latest release identifier of validated firmware solution baseline.
<b>Detailed Description</b>	The request cannot be processed because the provided release identifier is invalid.
<b>Recommended Response Action</b>	Use the latest release identifier by calling get validated catalog version API and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUPD3116

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Invalid input parameter : arg1 provided, unable to update the catalog.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = input parameter name</li></ul>
<b>Detailed Description</b>	Invalid input parameter provided, unable to update the catalog.
<b>Recommended Response Action</b>	Provide valid input parameter and retry the operation.
<b>Category</b>	Updates (CUPD = Firmware)

# CUSR—Users Event Messages

## CUSR0001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully logged in from arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = session type</li></ul>
<b>Detailed Description</b>	The user successfully logged in using the session type identified in the message.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR0004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The session from arg1 has expired.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = session type</li></ul>
<b>Detailed Description</b>	The session of the session type identified in the message has expired.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR0005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The arg1 session for arg2 from arg3 has been terminated.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = session Type</li><li>• arg2 = user name</li><li>• arg3 = ipAddress</li></ul>
<b>Detailed Description</b>	The session of the user identified in the message has been terminated.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Audit (CUSR = Users)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR0054

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Access from IP arg1 is locked out for arg2 seconds.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = ipaddress</li> <li>• arg2 = seconds</li> </ul>
<b>Detailed Description</b>	Lockout Policy enabled by IP Address identified in the message for the time duration identified in the message.
<b>Recommended Response Action</b>	Retry the operation after the time duration identified in the message.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR0055

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Access from User arg1 is locked out for arg2 seconds.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = username</li> <li>• arg2 = seconds</li> </ul>
<b>Detailed Description</b>	Lockout Policy enabled by Username identified in the message for the time duration identified in the message.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to change the password because an invalid password is entered.
<b>Detailed Description</b>	The password cannot be changed because an invalid password is entered.

<b>Recommended Response Action</b>	Enter a valid password and retry the operation.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1032

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the user arg1 does not have valid privileges.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = username</li> </ul>
<b>Detailed Description</b>	The user identified in the message does not have sufficient privileges to perform the operation.
<b>Recommended Response Action</b>	Retry the operation with a user name having sufficient privileges.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1200

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to perform the operation because the Session ID input is invalid.
<b>Detailed Description</b>	The operation could not be performed because the Session ID input is invalid.
<b>Recommended Response Action</b>	Please select a valid session and try again.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1201

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	An unknown session service error has occurred.
<b>Detailed Description</b>	An unknown session service error has occurred.
<b>Recommended Response Action</b>	No response action required.

<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1202

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete any of the sessions in the list because they are not active sessions.
<b>Detailed Description</b>	None of the sessions in the list were deleted because they are not active sessions.
<b>Recommended Response Action</b>	Verify the sessions to be deleted are active (logged in) sessions.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1203

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete some sessions in the list because they are currently not active.
<b>Detailed Description</b>	Some of the sessions in the list failed to be deleted because they are currently not active sessions.
<b>Recommended Response Action</b>	Verify the sessions to be deleted are active sessions.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1204

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete user session(s) because the current user session is expired.
<b>Detailed Description</b>	The user session(s) could not be deleted because the current user session is expired.
<b>Recommended Response Action</b>	Retry the operation after logging in .
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1205

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to delete sessions because of insufficient privileges.
<b>Detailed Description</b>	The sessions cannot be deleted because of insufficient privileges.
<b>Recommended Response Action</b>	Log in as a user with sufficient privileges to delete other users sessions and try again.
<b>Category</b>	Audit (CUSR = Users)

## CUSR1207

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to authenticate the user because username not provided.
<b>Detailed Description</b>	The user could not be authenticated because a user name is not provided.
<b>Recommended Response Action</b>	Enter a user name and try again.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR1208

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to login because a password was not provided.

**Detailed Description** Unable to login because a password was not provided.

**Recommended Response Action** Enter a valid password and retry the operation.

**Category** Audit (CUSR = Users)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR1209

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to create a new session because the maximum number of sessions for this user has been reached.

**Detailed Description** Unable to create a new session because the maximum number of sessions for this user has been reached.

**Recommended Response Action** Logout of one of this users sessions and retry creating a new session for this user.

**Category** Audit (CUSR = Users)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR1210

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to create a new session because the maximum number of sessions has been reached.

**Detailed Description** Unable to create a new session because the maximum number of sessions has been reached.

**Recommended Response Action** Logout of at least one existing session and retry the operation.

**Category** Audit (CUSR = Users)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR1212

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to delete session(s) because no sessions selected.

**Detailed Description** One or more sessions could not be deleted because no sessions were selected.

**Recommended Response Action** Select session(s) to delete and try again.

**Category** Audit (CUSR = Users)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR1218

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to perform the operation: arg1 because the user does not have the required privileges.

**Arguments**

- arg1 = request URI

**Detailed Description** The user identified in the message does not have the privileges to perform the operation identified.

**Recommended Response Action** Retry the operation with a different user or update the current users privileges.

**Category** Audit (CUSR = Users)

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1232

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The number of concurrent sessions allowed for arg1 is not a configurable item.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = name</li></ul>
<b>Detailed Description</b>	The number of concurrent sessions is not a configurable item.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (CUSR = Users)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1233

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The number of allowed concurrent sessions for arg1 must be between arg2 and arg3 sessions.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = arg1</li><li>• arg2 = arg2</li><li>• arg3 = arg3</li></ul>
<b>Detailed Description</b>	Number of concurrent sessions must be in range.
<b>Recommended Response Action</b>	Enter values in the correct range and retry the operation.
<b>Category</b>	Configuration (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR1234

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The session timeout for arg1 is not configurable.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = arg1</li></ul>
<b>Detailed Description</b>	The session timeout range cannot be set because the value entered is invalid.
<b>Recommended Response Action</b>	Enter a session timeout range between 1 and 1,440 minutes, and then retry the operation.
<b>Category</b>	Configuration (CUSR = Users)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR1235

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to set the session timeout range of arg1 because the timeout range must be between arg2 and arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = device Name</li><li>• arg2 = from TimeOut Range</li><li>• arg3 = to TimeOut Range</li></ul>
<b>Detailed Description</b>	The session timeout range of the device cannot be set because the timeout range must be between the range identified in the message.
<b>Recommended Response Action</b>	Enter a valid timeout range within the timeout value identified in the message and retry the operation. For more information about valid timeout ranges, see the OpenManage Enterprise-Modular Users Guide available on the support site.
<b>Category</b>	Configuration (CUSR = Users)

## CUSR5045

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to log in by using the Graphical User Interface (GUI) because the OpenID Connect provider arg1 time settings and the server time settings are different.

**Arguments**

- arg1 = name

**Detailed Description** Cannot log in by using the Graphical User Interface (GUI) because the OpenID Connect provider time settings and the server time settings are different as identified in the message.

**Recommended Response Action** Make sure that the time settings of OpenID Connect provider and server time settings are same, and then retry the operation.

**Category** Audit (CUSR = Users)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR5046

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to log in by using the Graphical User Interface (GUI) because the OpenID Connect providers arg1 Discovery URI arg2 is not reachable.

<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = name</li> <li>• arg2 = discovery URI</li> </ul>
<b>Detailed Description</b>	Cannot log in by using the Graphical User Interface (GUI) because the OpenID Connect providers Discovery URI is not reachable.
<b>Recommended Response Action</b>	Make sure that the OpenID Connect providers Discovery URI is reachable and, and then retry the operation.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR5047

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to log in by using the Graphical User Interface (GUI) because of insufficient user privileges. User name=arg1, SUB=arg2, ISS=arg3, and User ID hash=arg4.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = userName</li> <li>• arg2 = sub</li> <li>• arg3 = iss</li> <li>• arg4 = hash</li> </ul>
<b>Detailed Description</b>	Cannot log in by using the Graphical User Interface (GUI) because of insufficient user privileges.
<b>Recommended Response Action</b>	Check the "dxcua or dxcub" Claims configuration in the OpenID Connect Provider.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## CUSR5048

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to log in by using the Graphical User Interface (GUI) because either the JSON Web Signature (JWS) algorithm or OpenID Connect Provider arg1 configuration is incorrect.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = name</li> </ul>
<b>Detailed Description</b>	Cannot log in by using the Graphical User Interface (GUI) because either the JSON Web Signature (JWS) algorithm or OpenID Connect Provider <name> configuration is incorrect.
<b>Recommended Response Action</b>	Make sure that the following are correct, and then retry the operation: 1) Check the JSON Web Signature (JWS) algorithm configuration in OpenID Connect Provider. The recommended algorithm is RS256. 2) The OpenID Connect Provider configuration settings.
<b>Category</b>	Audit (CUSR = Users)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR5049

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to log in by using the Graphical User Interface (GUI) because Callback information arg1 is altered.

**Arguments**

- arg1 = name

**Detailed Description** Cannot log in by using the Graphical User Interface (GUI) because of internal issues.

**Recommended Response Action** Retry the operation. If the issue persists, contact your service provider.

**Category** Audit (CUSR = Users)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR5050

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to log in by using the Graphical User Interface (GUI) because arg1.

**Arguments**

- arg1 = reason

**Detailed Description** Cannot log in by using the Graphical User Interface (GUI) because of issues identified in the message.

**Recommended Response Action** Check the audit logs and retry the operation. If the issue persists, contact your server administrator.

**Category** Configuration (CUSR = Users)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## CUSR5051

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to log in to the Graphical User Interface (GUI) using arg1 because of configuration errors in the OpenID Connect provider. Check the logs on the OpenID Connect provider.

**Arguments**

- arg1 = client

**Detailed Description** Unable to log in by using the Graphical User Interface (GUI) because of configuration errors in the OpenID Connect provider.

**Recommended Response Action** Check the logs on the OpenID Connect provider.

## CXL—CXL devices Event Messages

### CXL1000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A Downstream Port Containment event was detected on the CXL device at PCIE segment arg1, slot arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = seg</li> <li>• arg2 = slot</li> </ul>
<b>Detailed Description</b>	An error has triggered a Downstream Port Containment event on the CXL device at the location identified in the message. The operating system is automatically notified about this to make an attempt to recover from the issue.
<b>Recommended Response Action</b>	Do the following: 1) Make sure the device, BIOS, and iDRAC are updated to the latest firmware. 2) Perform an AC power-cycle operation on the server by doing the following: a) Disconnect the power cords. b) Wait 30 seconds. c) Reconnect the power cords. 3) If the issue persists, contact your service provider.
<b>Category</b>	System Health (CXL = CXL devices)
<b>Severity</b>	Warning
<b>Trap/EventID</b>	3778
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## CXL1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	A Downstream Port Containment event was detected on the CXL device at drive or module bay arg1, slot arg2, segment arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = bay</li><li>• arg2 = number</li><li>• arg3 = seg</li></ul>
<b>Detailed Description</b>	An error has triggered a Downstream Port Containment event on the CXL device at the location identified in the message. The operating system is automatically notified about this to make an attempt to recover from the issue.
<b>Recommended Response Action</b>	Do the following: 1) Make sure the device, BIOS, and iDRAC are updated to the latest firmware. 2) Perform an AC power-cycle operation on the server by doing the following: a) Disconnect the power cords. b) Wait 30 seconds. c) Reconnect the power cords. 3) If the issue persists, contact your service provider.

## CXL2102

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Out-of-Band management interface is unresponsive on the CXL device installed at PCIe segment arg1, slot arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = seg</li> <li>• arg2 = slot</li> </ul>

<b>Detailed Description</b>	The CXL device location identified in the message has an issue or does not support an Out-of-Band management interface. This results in a loss of security, thermal management, error handling, and other device management features.
<b>Recommended Response Action</b>	Verify if the device is supported by the server model in the Installation and Service Manual available on the support site. Do the following: 1) If the installed device is supported, contact your service provider. 2) Else, replace it with a supported device.
<b>Category</b>	System Health (CXL = CXL devices)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3777
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## CXL2103

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The Out-of-Band management interface is unresponsive on the CXL device installed at drive or module bay arg1, slot arg2, segment arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = bay</li> <li>• arg2 = number</li> <li>• arg3 = seg</li> </ul>
<b>Detailed Description</b>	The CXL device location identified in the message has an issue or does not support an Out-of-Band management interface. This results in a loss of security, thermal management, error handling, and other device management features.
<b>Recommended Response Action</b>	Verify if the device is supported by the server model in the Installation and Service Manual available on the support site. Do the following: 1) If the installed device is supported, contact your service provider. 2) Else, replace it with a supported device.
<b>Category</b>	System Health (CXL = CXL devices)
<b>Severity</b>	Critical
<b>Trap/EventID</b>	3777
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, WS Eventing, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DCI—Dry Contact Input Event Messages

### DCI1000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Dry contact input arg1 is transitioned to Open state.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = input index</li> </ul>

<b>Detailed Description</b>	The dry contact input state of the contact identified in the message is changed to "Open".
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (DCI = Dry Contact Input)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	3267
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DCI1001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Dry contact input arg1 is transitioned to Close state.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = input index</li> </ul>
<b>Detailed Description</b>	The dry contact input state of the contact identified in the message is changed to "Close".
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (DCI = Dry Contact Input)
<b>Severity</b>	Informational
<b>Trap/EventID</b>	3267
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, SNMP Alert, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DDCC—cloud unit Event Messages

### DDCC002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The system is unable to read cloud unit information CloudUnit=arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = args</li> </ul>
<b>Detailed Description</b>	The system is unable to perform read/write operation on cloud unit.
<b>Recommended Response Action</b>	If the problem persists, contact support or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> .
<b>Category</b>	Cloud (DDCC = cloud unit)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert

**Applicable Event or Alert Types** No alerts are applicable for this message

## DDCLO—cloud Event Messages

### DDCLO001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to access provider for cloud unit arg1.CloudUnit=arg2 Cause=arg3.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = args1</li><li>• arg2 = args2</li><li>• arg3 = args3</li></ul>
<b>Detailed Description</b>	The cloud unit is unavailable for read/write operations until access is restored to the cloud provider.
<b>Recommended Response Action</b>	Ensure the cloud provider is accessible from the DD system. If the problem persists, contact support or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> .
<b>Category</b>	Cloud (DDCLO = cloud)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### DDCLO002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to start cloud unit arg1.unit-name= arg2 Cause=Error during cloud unit startup.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = args1</li><li>• arg2 = args2</li></ul>
<b>Detailed Description</b>	The cloud unit encountered an error during startup. Until this error is corrected, read/write operations cannot be performed against the cloud unit.
<b>Recommended Response Action</b>	Ensure the cloud provider is accessible from the DD system. Restart the file system. If the problem persists, contact support or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> .
<b>Category</b>	Cloud (DDCLO = cloud)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

### DDCLO004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The imported CA certificate of cloud provider arg1 referenced by cloud unit arg2 is unusable Cause=arg3.
----------------	--

<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = args1</li> <li>• arg2 = args2</li> <li>• arg3 = args3</li> </ul>
<b>Detailed Description</b>	All cloud units using this cloud profile will be unable to perform read/write operations until the CA Certificate is re-imported.
<b>Recommended Response Action</b>	Resolve the issue with the CA certificate before reattempting the import operation. If the problem persists, contact support or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> .
<b>Category</b>	Cloud (DDCLO = cloud)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DDCLO005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to write data to cloud unit arg1 using cloud provider arg2 Cause= arg3.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = args1</li> <li>• arg2 = args2</li> <li>• arg3 = args3</li> </ul>
<b>Detailed Description</b>	All cloud units using this cloud profile will be unavailable for writing until the issue is resolved.
<b>Recommended Response Action</b>	Ensure that space is available from the cloud provider. Then clear the cloud unit state. If the problem persists, contact support or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> .
<b>Category</b>	Cloud (DDCLO = cloud)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DDENC—encryption Event Messages

### DDENC010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Successfully changed the system passphrase.
<b>Detailed Description</b>	The system passphrase has been changed.
<b>Recommended Response Action</b>	Ensure this is an authorized operation.
<b>Category</b>	Filesystem (DDENC = encryption)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

# DDHDR—HD\_RDB Event Messages

## DDHDR002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Historical metadata database backup failed.
<b>Detailed Description</b>	If the primary historical metadata database fails without a recent backup present, some or all of the historical data can be lost when the primary historical database is restored from its backup and log files. Data in the historical metadata database is used for some system reports, but it is not required for proper system functioning.
<b>Recommended Response Action</b>	Contact your contracted support provider or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> to help debug the problem.
<b>Category</b>	System maintenance (DDHDR = HD_RDB)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DDHDR003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Historical metadata database upgrade failed.
<b>Detailed Description</b>	Saving of new historical metadata fields will be disabled, which may result in some UI reports being incomplete or unavailable. However, this change is not expected to impact the system otherwise.
<b>Recommended Response Action</b>	Contact your contracted support provider or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> to help debug the problem and upgrade the historical metadata database.
<b>Category</b>	System maintenance (DDHDR = HD_RDB)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DDHDR004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Historical metadata database pruning failed.
<b>Detailed Description</b>	Pruning ensures the historical database does not consume more than its allocated disk space.
<b>Recommended Response Action</b>	Contact your contracted support provider or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> to help debug the problem.
<b>Category</b>	System maintenance (DDHDR = HD_RDB)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## DDHDR005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** All existing historical metadata has been lost, and the system is running without a historical database.

**Detailed Description** Data in the historical database is used for some system reports, but it is not required for proper system functioning. If the recovery process fails to create a new primary historical database from the shelf database files during head swap processing, or if the database has become corrupted, this failure will occur. Currently, the system is operating without a historical database due to the failed attempt to create a new one.

**Recommended Response Action** Contact your contracted support provider or visit us online at <https://www.dell.com/support> to debug this problem and possibly attempt recovery of the lost historical data.

**Category** System maintenance (DDHDR = HD\_RDB)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## DDHDR006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Historical metadata database failover failed.

**Detailed Description** Historical database failover failed.

**Recommended Response Action** Contact your contracted support provider or visit us online at <https://www.dell.com/support> to help debug the problem.

**Category** System maintenance (DDHDR = HD\_RDB)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## DDHDR007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Historical metadata database space usage has exceeded the limited threshold.

**Detailed Description** Historical metadata database has consumed more than the allocated disk space.

**Recommended Response Action** If the problem persists, contact your contracted support provider or visit us online at <https://www.dell.com/support>.

**Category** System maintenance (DDHDR = HD\_RDB)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** No alerts are applicable for this message

## DDHDR008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Database Handler failed to recover arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = arg</li></ul>
<b>Detailed Description</b>	The Historical metadata database failed to recover space, which could cause it to continue growing and result in a filesystem shutdown.
<b>Recommended Response Action</b>	If the problem persists, contact your contracted support provider or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> .
<b>Category</b>	System maintenance (DDHDR = HD_RDB)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DDSMS—System management service Event Messages

### DDSMS001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The System Management Service has been unresponsive for over 5 minutes.
<b>Detailed Description</b>	The System Management Service has reached the maximum number of concurrent requests and has been unresponsive for over five minutes. This situation could potentially signify a critical issue that might require intervention from our support team. Consequently, the system is unable to accept additional commands.
<b>Recommended Response Action</b>	If the problem persists, contact your contracted support provider or visit us online at <a href="https://www.dell.com/support">https://www.dell.com/support</a> .
<b>Category</b>	System maintenance (DDSMS = System management service)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Alert
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

# DH—Certificate Management Event Messages

## DH001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Resource needed to perform the operation is unavailable.
<b>Detailed Description</b>	Resource temporarily unavailable.
<b>Recommended Response Action</b>	Try again. If the error persists, use RACADM command racreset to clear the issue.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Internal I/O failure.
<b>Detailed Description</b>	Internal I/O failure.
<b>Recommended Response Action</b>	Try again. If the error persists, use RACADM command racreset to clear the issue.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH003

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Service tag could not be read.
<b>Detailed Description</b>	Service Tag Missing.
<b>Recommended Response Action</b>	Try again. If the error persists, use RACADM command racreset to clear the issue.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Warning

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH004

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	iDRAC does not have sufficient free resources to generate keys.
<b>Detailed Description</b>	Error generation Keys.
<b>Recommended Response Action</b>	Boot the OS. If the error persists, contact technical support.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH005

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CA Cert is corrupted, expired, or does not have signing privileges.
<b>Detailed Description</b>	Invalid CA Cert.
<b>Recommended Response Action</b>	Close other iDRAC sessions and activities. Try again.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH006

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Not the right passphrase for the private key (need to re-write).
<b>Detailed Description</b>	Invalid Passphrase.

<b>Recommended Response Action</b>	Validate that the certificate parameter matches the certificate contents; the certificate can be validated using OpenSSL tools.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH007

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The password unlocked the private key but it was the wrong private key.
<b>Detailed Description</b>	CA private key/CA Certificate mismatch.
<b>Recommended Response Action</b>	Check that the private key parameter is correct. The passphrase can be validated against the private key, passphrase, and certificate can be validated using OpenSSL tools.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH008

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	There was a problem saving the certificate to persistent storage.
<b>Detailed Description</b>	Unable to save the provided client certificate to internal persistent storage.
<b>Recommended Response Action</b>	Try again. If the error persists, use RACADM command racresetcfg to clear the issue.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH009

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The operation did not complete successfully because of an unexpected internal problem.
<b>Detailed Description</b>	An unexpected internal problem has occurred and the operation did not complete successfully.
<b>Recommended Response Action</b>	Remove AC power from the system and re-apply AC power to the system. After the server restarts, retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DH010

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Reset iDRAC to apply new certificate. Until iDRAC is reset, the old certificate will be active.
<b>Detailed Description</b>	The iDRAC must be reset to apply a new certificate. Until the iDRAC has reset, the old certificate will be active.
<b>Recommended Response Action</b>	Reset the iDRAC. The iDRAC can be reset by pressing the Identify button for 15 seconds. Using the RACADM command line utility, run "racadm racreset".
<b>Category</b>	Configuration (DH = Certificate Management)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

# DIAG—Diagnostics Event Messages

## DIAG0000

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Pass.
<b>Detailed Description</b>	All Tests passed.
<b>Recommended Response Action</b>	OK, life is good.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0111

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** CPU arg1 : arg2 exception occurred.

**Arguments**

- arg1 = CPU Number
- arg2 = Exception Type

**Detailed Description** No detailed description available.

**Recommended Response Action** Issue is on system board. Recommend flash the latest BIOS and retry the diagnostics.

**Category** System Health (DIAG = Diagnostics)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0112

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** CPU arg1 - Machine check exception detected.

**Arguments**

- arg1 = CPU Number

**Detailed Description** No detailed description available.

**Recommended Response Action** Issue is on system board. Recommend flash the latest BIOS and retry the diagnostics.

**Category** System Health (DIAG = Diagnostics)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0114

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to start application processor(s). :OR: CPU arg1 (ID 0xarg2) did not reach test step arg3.:OR: CPU arg4 (ID 0xarg5) recorded unknown test result 0xarg6.:OR: CPU arg7 (ID 0xarg8) data error at address 0xarg9. Expected arg10.

**Arguments**

- arg1 = Decimal

- arg2 = Hex
- arg3 = Decimal
- arg4 = Decimal
- arg5 = Hex
- arg6 = Hex
- arg7 = Decimal
- arg8 = Hex
- arg9 = Hex
- arg10 = Hex

<b>Detailed Description</b>	Depends on <Error Reason>. If it is "Unable to start" it usually indicates a software problem. "Cache integrity" could signal a processor cache hardware problem. The other CPU messages could result from hardware or from overheating, if for instance, the fans are marginal or airflow is blocked.
<b>Recommended Response Action</b>	Check temperatures in System Health tab for abnormally high temperatures and make sure airflow baffles are properly installed in the system, if any. Check fan RPM in System Health tab and verify actual fans are properly installed.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0115

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	CPU Stress Thermal condition. Limit arg1C, Actual arg2C.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Degrees</li> <li>• arg2 = Degrees</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Check fans. Check for obstructed air vents. Check for excessive amounts of dust.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0121

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Memory errors detected, but successfully resolved.
<b>Detailed Description</b>	No detailed description available.

<b>Recommended Response Action</b>	MemRx is enabled and repaired all memory errors that were found. DIMM replacement is optional.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0122

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Memory errors detected. Limit exceeded. Additional errors will not be resolved.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	MemRx is enabled and detected too many errors for safe resolution. Recommend DIMM replacement.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0123

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	UEFI: Memory error detected. :OR: LEGACY: Memory - integrity test discrepancy.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	MemRX not enabled or not supported. Servers UEFI: Power down system and re-seat DIMMS. Retry test and if no error occurs it was a DIMM connection issue. Client LEGACY: Power down system and re-seat DIMMS. Retry test and if no error occurs it was a DIMM connection issue. Check for latest BIOS.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0124

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	arg1, arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Timestamp</li><li>• arg2 = Log message</li></ul>
<b>Detailed Description</b>	Log message is different for the log type supported by the system. An IPMI log may refer to "SEL", other log types also exist.
<b>Recommended Response Action</b>	Depends on <Log message>.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0125

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The event log indicates degraded or disabled ECC functionality. Memory testing cannot continue until the problems are corrected, the log cleared and the system rebooted.
<b>Detailed Description</b>	IPMI System Event Log is full for various reasons or logging has stopped because too many ECC errors have occurred.
<b>Recommended Response Action</b>	Clear the log and reboot and retest.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0126

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	The event log(s) must be cleared before testing can continue.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Clear the log, reboot, and retest.
<b>Category</b>	System Health (DIAG = Diagnostics)

<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0131

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Battery - The battery is not installed.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Install the battery but check for debris or damaged contacts.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0132

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Battery - The battery is reaching the end of its usable life.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Replace the battery.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0133

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Battery - The battery cannot provide sufficient power.
<b>Detailed Description</b>	No detailed description available.

<b>Recommended Response Action</b>	Check battery contacts, plugs and cables. May need to replace battery.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0134

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Battery - Charge cycles exceeded maximum limit. :OR: Charger - Charge cycles exceeded maximum limit.
<b>Detailed Description</b>	Message "Charger -" changed to "Battery -" in 2/8/2016.
<b>Recommended Response Action</b>	Battery health data indicates the maximum number of charge cycles has been reached. Replace the battery.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0135

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Battery - Not a Dell battery. System will not charge this battery.
<b>Detailed Description</b>	This is a new battery error code that was added when the detection of non-Dell batteries was added to ePSA.
<b>Recommended Response Action</b>	Replace battery with a Dell branded battery.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DIAG0137

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Charger - Unexpected charge condition detected.
<b>Detailed Description</b>	This replaced the older error code of 2000-0135.
<b>Recommended Response Action</b>	Charger detection changed state when it was not expected to. Re-run the diagnostic with the charger attached as directed by the test.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DIAG0141

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hard Drive - No Hard Drive detected.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Hard drives are not required on all systems so this message is usually a warning. Desktops and Servers: If the system has a hard disk, power down system and check the signal and power connections to it. Rerun the diagnostic. If no error occurs then it was a cable or connector issue.
<b>Category</b>	Storage (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0142

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hard Drive arg1 - S/N arg2, arg3 self test unsuccessful arg4.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Drive Location</li> <li>• arg2 = Serial Number</li> <li>• arg3 = DST Short, DST Long</li> <li>• arg4 = Error Reason</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	If <Error Reason> is "terminated" then the disk controller terminated the test so a retry of the test is advisable. Otherwise the hard drive should be replaced. {In the factory, this test type may also be DEFT, in addition to DST Short and DST Long. The "terminated" case should not occur in the field, only in development due to software issues}.
<b>Category</b>	Storage (DIAG = Diagnostics)

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0143

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Hard Drive arg1 - SMART read command unsuccessful.

**Arguments**

- arg1 = Drive Location

**Detailed Description** Mainly seen with very old hard drives.

**Recommended Response Action** No response action is required.

**Category** Storage (DIAG = Diagnostics)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0144

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Hard Drive arg1 - self test not supported.

**Arguments**

- arg1 = Drive Location

**Detailed Description** Mainly seen with very old hard drives.

**Recommended Response Action** No response action is required.

**Category** Storage (DIAG = Diagnostics)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0145

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Hard Drive arg1 - S/N arg2, self test did not complete.

**Arguments**

- arg1 = Drive Location
- arg2 = Serial Number

**Detailed Description** No detailed description available.

<b>Recommended Response Action</b>	Desktops and Servers: Power down the system and check the signal and power connections to the hard drive. Rerun the diagnostic. If no error occurs then it was a cable or connector issue.
<b>Category</b>	Storage (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0146

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hard Drive arg1 - S/N arg2, self test log contains previous error(s).
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Drive Location</li> <li>• arg2 = Serial Number</li> </ul>
<b>Detailed Description</b>	Prior failure checking removed, is now obsolete.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0147

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Optical Drive arg1 - Self test: arg2.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Nth Drive</li> <li>• arg2 = Error Reason</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	This typically is a user error since these drives can be disconnected from the system. If disconnected, reconnect the optical drive to system board. Check BIOS setup to make sure the SATA port the drive is connected and has not been disabled. Rerun the diagnostic. If errors persist the optical drive is defective.
<b>Category</b>	Storage (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0148

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Hard/Optical Drive arg1 - incorrect status: arg2 arg3.

**Arguments**

- arg1 = Nth Drive
- arg2 = Hex
- arg3 = Error Reason

**Detailed Description** No detailed description available.

**Recommended Response Action** No response action is required.

**Category** Storage (DIAG = Diagnostics)

**Severity** Critical

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0149

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Optical Drive - no drive detected.

**Detailed Description** No detailed description available.

**Recommended Response Action** No response action is required.

**Category** Storage (DIAG = Diagnostics)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0150

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Hard Drive - No Hard Drive detected, or disk controller not supported.

**Detailed Description** No detailed description available.

**Recommended Response Action** Hard drives on desktops should be found if connected to the chipset disk controller but PERC/SCU/SAS Adapters are not supported by legacy ePSA so if the hard drive is connected

to these controllers this message is just a warning. If the system has a hard disk connected to the System Board chipset disk controller, power down the system and check the signal and power connections to it. Rerun the diagnostic. If no error occurs then it was a cable or connector issue.

<b>Category</b>	Storage (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

## DIAG0151

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hard Drive arg1 - S/N arg2, incorrect status = arg3\narg4.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Drive Location</li><li>• arg2 = Serial Number</li><li>• arg3 = 80000000000000??</li><li>• arg4 = Error Reason</li></ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	SMART Predictive Failure indicates the hard drive has failed SMART and maybe nearing the end of its life. Other types of <Error Reason> in this category may indicate an intermittent or firmware problem, rerun the test again. Desktops, servers: Check the hard disk drive cables and connections. All systems: If error persists, make sure that hard disk drive firmware and BIOS are current. The <80000000000000??> value is an EFI error code returned by the driver.
<b>Category</b>	Storage (DIAG = Diagnostics)

## DIAG0323

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Unable to detect inverter lamp status.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0324

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	LCD panel - User reported LCD BIST colors were not displayed.
----------------	---

<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Possible user error, make sure that the BIOS is current and retry diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0325

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	LCD panel - User provided no input for LCD BIST.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Possible user error, make sure that the BIOS is current and retry diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0326

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	LCD panel - Unable to turn lamp on or off.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0327

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	LCD panel - Unable to use BIOS interface.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Make sure that the BIOS is current and retry diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0328

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	LCD panel - Unable to detect variance in ambient light sensor.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Make sure that the BIOS is current and retry diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0331

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Video controller - No video controller detected.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Make sure that the BIOS is current and retry diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0332

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Video memory - Video memory integrity test discrepancy.

**Detailed Description** No detailed description available.

**Recommended Response Action** Make sure that the BIOS is current and retry diagnostics.

**Category** System Health (DIAG = Diagnostics)

**Severity** Warning

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0333

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Video - User provided no input for graphics test.

**Detailed Description** No detailed description available.

**Recommended Response Action** No response to a diagnostic prompt and a timeout occurred. Retry the diagnostics.

**Category** System Health (DIAG = Diagnostics)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0334

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Video - User reported the patterns were not displayed.

**Detailed Description** No detailed description available.

**Recommended Response Action** Possible user error. Otherwise, make sure that BIOS is current and retry diagnostics.

**Category** System Health (DIAG = Diagnostics)

**Severity** Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0412

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cables - arg1 not detected.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = AUX LCD Name</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0413

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	LCD Cable - LCD cable is not installed.
----------------	---

<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0414

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cables - arg1 not detected.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Inverter Name</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0415

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cables - Check the following cable, jumper, connection, or sensor: arg1.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Name</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Connect the described cable, jumper, sensor, or connection and retry the diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0511

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Fan - The (arg1) fan failed to respond correctly.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Name</li></ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	The fan may be faulty, check for obstructions to the fan and vents. Make sure that BIOS is current and retry the diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0512

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Fan - The (arg1) fan is running faster than expected.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Name</li></ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Retry the diagnostics; if the problem persists, the fan is faulty. Make sure that the BIOS is current and retry the diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0620

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Network arg1 - arg2.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Number</li><li>• arg2 = Failure Message</li></ul>
<b>Detailed Description</b>	UEFI Driver provides a DIAGNOSTIC protocol and this protocol supplies a test that failed. Failure Message may be "Packet loopback test failed" or "Register test failed" or something else. Provided by driver not ePSA.
<b>Recommended Response Action</b>	The Network (Ethernet) device may be faulty. Check for bent pins in the Ethernet connector. Make sure that Network device firmware is current. Retry test, if still fails, replace the NIC/NDC/LOM

	Network device. This may be on the motherboard, or an adapter, or a daughter card, depending on the system.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0621

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Network arg1 - Driver version arg2 outdated. Version arg3 or newer required for "arg4".
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Number</li> <li>• arg2 = Hex</li> <li>• arg3 = Hex</li> <li>• arg4 = EFI Driver Name</li> </ul>
<b>Detailed Description</b>	Test only warns because UEFI Network Driver is old and has known false failures.
<b>Recommended Response Action</b>	Update Network firmware.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0711

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Thermal - Thermal trip detected.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	System detected repeated thermal trips due to excessive heat. Check for obstructions to the fan and vents. Make sure BIOS is current and rerun diagnostics. If error persists replace thermal heat sink, CPU and motherboard.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0712

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Fan - The fan failed to respond correctly.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS detected repeated issues when setting the fan speed. The fan may be faulty, check for obstructions to the fan and vents. Make sure the BIOS is current and rerun diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0713

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Sensor - Error accessing thermal sensor.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS error when reading the systems thermal sensor. Make sure the BIOS is current and rerun diagnostics. If error persists, replace the motherboard.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0714

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Heat Sink - Heat sink clip not installed.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS detected that the heat sink clip was not installed. Connect the heat sink clip properly.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG0715

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Memory - Memory error detect.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS detected an issue configuring the DIMM. Check for latest BIOS. Power down system and reseal DIMMs. Retry test; if no error occurs it was a DIMM connection issue. If error persists, replace the DIMM.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0716

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Cables - Check the following cable, arg1.
<b>Arguments</b>	<ul style="list-style-type: none"><li>• arg1 = Cable Name</li></ul>
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS detected a cable that was not installed. Connect the cable that is described in the string portion of the message.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0721

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Battery - Battery issue detected.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS detected a battery that is not functioning properly. Remove and replace the battery. Rerun the diagnostics on the new battery once it is charged.

<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0722

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Memory - Previous uncorrectable memory error.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS detected an un-correctable memory issue on a prior boot. Update to the latest BIOS. Power down system and reseal DIMMs. Retry test; if no error occurs it was a DIMM connection issue. If error persists, replace the DIMM.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG0723

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Hard Drive - Drive error detected.
<b>Detailed Description</b>	BIOS error reported through ePSA.
<b>Recommended Response Action</b>	BIOS detected a hard drive issue. Make sure hard drive connection is good, and the drive firmware and system BIOS are current. If error persists, replace the hard drive.
<b>Category</b>	Storage (DIAG = Diagnostics)
<b>Severity</b>	Critical
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG8001

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No BIOS support for software interrupt arg1h, function(ah) arg2h.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Hex</li> <li>• arg2 = Hex</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Should not occur.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG8002

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	No BIOS support for SMI interface function(ah) arg1h.;Sensor arg2 exceeded thermal zone arg3. Peak zone was arg4.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Hex Function</li> <li>• arg2 = Name</li> <li>• arg3 = Decimal</li> <li>• arg4 = Decimal</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	System thermal sensor is indicating a high value. Clear any blockage to internal fans and heat sinks. Make sure that BIOS is current and rerun the diagnostics.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG8016

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Battery - unable to retrieve battery health.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Software error, should not normally occur in field.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG8017

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Battery - BIOS has no support for battery health.

**Detailed Description** No detailed description available.

**Recommended Response Action** Software error, should not normally occur in field.

**Category** System Health (DIAG = Diagnostics)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG8018

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Fatal: The module reported multiple test results.

**Detailed Description** No detailed description available.

**Recommended Response Action** Software error, should not normally occur in field.

**Category** System Health (DIAG = Diagnostics)

**Severity** Informational

**Redfish Event Type** Not Applicable

**Applicable Event or Alert Types** iDRAC—Filter Visibility, Remote System Log, Redfish Eventing\*, LC Log\*

**Applicable Event or Alert Types** CMC—Not Applicable

## DIAG8019

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

**Message** Unable to log to NVRAM.

**Detailed Description** No detailed description available.

**Recommended Response Action** Software error, should not normally occur in field.

**Category** System Health (DIAG = Diagnostics)

**Severity** Informational

<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG8020

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Low memory. arg1k bytes free.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>arg1 = Decimal</li> </ul>
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Software error, should not normally occur in field.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG8021

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	SMBIOS DIMM configuration did not match.
<b>Detailed Description</b>	No detailed description available.
<b>Recommended Response Action</b>	Software error, should not normally occur in field.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
<b>Applicable Event or Alert Types</b>	CMC—Not Applicable

## DIAG8138

**NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Charger - The AC power adapter wattage and type cannot be determined. The battery may not charge.
----------------	---

<b>Detailed Description</b>	Added 01/18/2016 to ePSA code.
<b>Recommended Response Action</b>	A bad charger or a non-Dell charger is being used on the system. Replace the charger.
<b>Category</b>	System Health (DIAG = Diagnostics)
<b>Severity</b>	Warning
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	No alerts are applicable for this message

## DIAG8154

 **NOTE:** Event or Alert types that are enabled by default are identified using an asterisk (\*) symbol in the **Applicable Event or Alert Types** section.

<b>Message</b>	Tape Drive arg1 - S/N arg2, ULTRIUM arg3 media found but drive requires ULTRIUM arg4 for arg5.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• arg1 = Drive Location</li> <li>• arg2 = Serial Number</li> <li>• arg3 = Generation</li> <li>• arg4 = Generation</li> <li>• arg5 = writes</li> </ul>
<b>Detailed Description</b>	Each generation of ULTRIUM Tape drives usually supports the previous generation but not newer generation tape media.
<b>Recommended Response Action</b>	Install the correct tape media.
<b>Category</b>	Storage (DIAG = Diagnostics)
<b>Severity</b>	Informational
<b>Redfish Event Type</b>	Not Applicable
<b>Applicable Event or Alert Types</b>	iDRAC—Filter Visibility, Remote System Log, Redfish Eventing*, LC Log*
