

PHILIPS

Play HDMI Sync Box

Hue

Sync lights with your TV and gaming

Connect up to 4 HDMI devices

Personalise your experience using the app

Requires Hue Bridge and Hue colour lights

8718699704803

Easy smart lighting

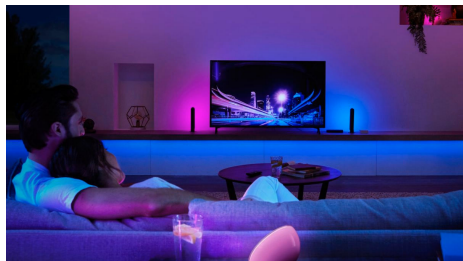

Sync your smart lights to the content on your TV screen with the Philips Hue Play HDMI Sync Box. Four HDMI ports allow you to connect your media devices to your Hue setup, resulting in a fast, seamless display of colourful smart light that responds to and reflects the content you watch or listen to.

Limitless possibilities

- Sync your Philips Hue lights to your TV screen
- Fast and seamless light experience
- Works with any Hue colour-capable light
- Connect up to 4 HDMI devices
- Personalise settings in the app
- Hue Bridge required
- Easy to install, set up and use
- Supports high-quality video formats

Highlights

Sync your Philips Hue lights to your TV screen

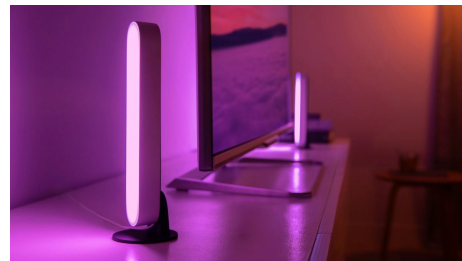

Create an immersive media experience with the Philips Hue Play HDMI Sync Box. Simply connect the sync box to an HDMI media device – including streaming devices, gaming consoles, set-top boxes and more – to watch streaming services such as Netflix and Amazon Prime. Your lights will dim, brighten and change colour in sync with the content on your TV screen.

Fast and seamless light experience

Experience no delay as your lights sync to your TV screen — whether you're playing films, music, or games — creating a truly immersive media experience. Watch your favourite content like never before with the sync box.

Works with any Hue colour-capable light

The sync box works with all Philips Hue White and colour ambience bulbs or fixtures. Add up to 10 Philips Hue colour-capable lights to your Entertainment area, and then watch as each light individually responds to your on-screen TV content to bring your media to life with surround lighting.

Connect up to 4 HDMI devices

The sync box features four HDMI inputs to which you connect media devices, such as games consoles and streaming devices, which allows you to sync the content on your TV screen to your Philips Hue lights. The sync box is not compatible with smart TV apps, as the content must first pass through the sync box via an HDMI device.

Personalise settings in the app

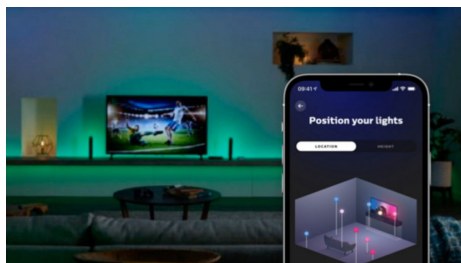

Make your entertainment media experience your own. Use the app to change your light settings, such as the brightness and speed of the effects, as well as define default start-up settings.

Hue Bridge V2 and colour lights required

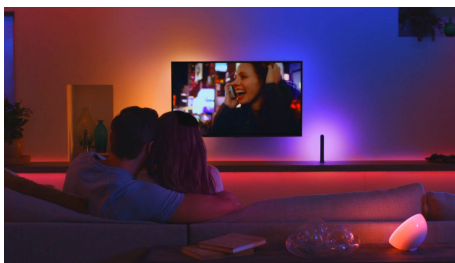

The Hue Bridge*, the heart of your smart lighting system, connects your Hue White and colour ambience smart lights to your app and the sync box, allowing you to customise and save your light settings when syncing. *The sync box is only compatible with the square-shaped Hue Bridge V2.

Easy to install, set up and use

A simple set-up allows you to easily connect to your Hue Bridge and use your sync box with any TV and HDMI device. Control your entertainment experience and sync box any way you want: with the app, on-product control button, any infrared TV remote, or your voice via Amazon Alexa, Siri and the Google Assistant.

Supports high-quality video formats

The Philips Hue Play HDMI Sync Box is compatible with 4K, Dolby Vision and HDR10+, letting you enjoy the highest quality picture you can get at home – all while your Philips Hue smart lights sync to give you surround lighting.

Specifications

Design and finishing

- Colour: Black
- Material: Synthetic, Metal

Durability

- Nominal lifetime: 10,000

Environmental

- Operational humidity: 5% <H<95% (non-condensing)
- Operational temperature: 0 °C - 40 °C

Packaging information

- EAN: 8718699704803

Power

- Power Supply: 100 - 240 V

Power consumption

- Adapter voltage: 24
- Standby power consumption: 1.5
- Power Consumption: 7.3

Product dimensions and weight

- Net weight: 0.455 kg
- Overall height: 23 mm
- Overall length: 99 mm
- Overall width: 182 mm

Service

- Warranty: 2 year(s)
