- Timers encourage thorough 2 minutes of brushing

Provides a superior clean

- Better plaque removal to help reduce cavities
- Angled neck to help tackle cleaning in tough areas

Innovative technology

- Philips Sonicare's advanced sonic technology

Highlights

Say goodbye to plaque

Densely-packed, high-quality bristles remove up to 7x more plaque than a manual toothbrush.

Helps reduce cavities

Provides better plaque removal and access to back teeth; brushing twice a day every day with this brush can help reduce cavities

The only true sonic technology

Philips Sonicare electric toothbrush's unique dynamic action gently and effectively reaches deep between teeth and along the gumline.

Safe and gentle

Whatever your specific needs, you can be sure of a safe brushing experience with the 2 Series plaque control. Our sonic technology is suitable for use with braces, fillings, crowns and veneers, and can even be used in the daily treatment of gum disease.

Reach those tricky spots

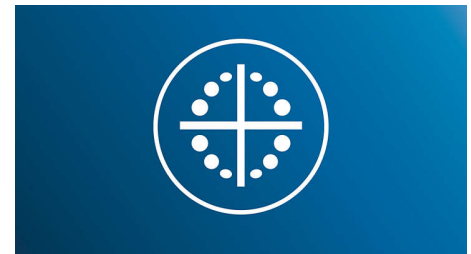

The unique shape of your 2 Series toothbrush handle combined with our brush heads means that even tricky spots like back teeth get a thorough clean.

Ease into your new routine

Starting something new can take some getting used to. Our easy-start program gives you the option of a gradual, gentle increase in brushing power with the first 14 uses with your new toothbrush.

QuadPacer and Smartimer

It takes just 2 minutes to thoroughly brush your teeth. Our QuadPacer lets you know when you've spent the optimal amount of time on each section of your mouth while our Smartimer signals when your total time is up. Together they help you reach your recommended brushing time, every time.
