ULTIMATE

200Hz

A 200Hz refresh rate is more than triple the industry standard of 60Hz. Unleash the full potential of your graphics card: with screen tearing and motion blur and stuttering all eradicated, your game will finally flow like it was meant to, and your skills can reach new heights.

2ms

A pixel response time of 2ms GtG means speed without the smear for an enhanced experience. Fast-moving action and dramatic transitions will be rendered smoothly without the effects of ghosting.

G-Sync Ultimate

The premium class of monitors takes your gaming experience to the next level of realism: on top of the tear-free, perfectly smooth picture provided by the standard G-Sync technology, the G-Sync Ultimate adds a manifold range of colours to your game. The HDR feature with 1000 nits creates breath-taking sceneries with detailed nuances in luminosity. Stay on top of your game while emerging in the life-like atmosphere.

Vesa Certified DisplayHDR™ 1000

High Dynamic Range (HDR) increases the colour gamut, resulting in remarkably sharper details, richer colour saturation, and highlighting. With a peak luminance of 1000 cd/m², effects in games and films become ultrarealistic. This feature has been VESA-certified guaranteeing the highest quality standards. Together with local dimming technology, which means that the backlight of the monitor will bright differently depending on the requirements that every picture displayed on the screen needs.

WQHD

With 3440 x 1440 resolution, Wide Quad HD (WQHD) offers superior picture quality and crisp imagery that reveals every detail. The widescreen 21:9 aspect ratio is perfect for watching movies in an expansive format or immersing yourself in the latest game, plus it offers more space when it's time to work. True 8-bit color provides a broad color palette for vibrant, natural-looking images.

Curved

Curved design wraps around you putting you at the center of the action and provides an immersive gaming experience.

Quantum Dot

Utilising semiconductor nanocrystals, this technology converts light emissions so efficiently that it can create almost any colour within the visible spectrum. Bring your games and movies to life with extremely vivid, ultra-realistic colours.

General
