

## Lenovo ThinkSystem SR655 Server

### Product Guide

The Lenovo ThinkSystem SR655 is a 1-socket 2U server that features the AMD EPYC 7002 "Rome" and AMD EPYC 7003 "Milan" families of processors. With up to 64 cores per processor and support for the PCIe 4.0 standard for I/O, the SR655 offers the ultimate in single-socket server performance. With up to 128 PCIe lanes, the server is ideal for workloads that can take advantage of GPU processing and high-performance NVMe drives.

Suggested uses: AI Inference, VDI, OLTP, Analytics, software-defined storage

Figure 1. Lenovo ThinkSystem SR655

### Did you know?

By using a high-performance server with only one processor installed, you can take advantage of lower software costs when the software licensing is using a per-socket model.

The SR655 has been designed to take advantage of the features of the EPYC 7002 and 7003 processors, such as the full performance of 280W 64-core processors, support for 3200 MHz memory and PCIe Gen 4.0 support. Competitive servers that are based on the older EPYC 7001 "Naples" designs may not be able to offer these performance features.

## Key features

Combining performance and flexibility, the SR655 server is a great choice for enterprises of all sizes. The server offers a broad selection of drive and slot configurations and offers high performance features that industries such as finance, healthcare and telco need. Outstanding reliability, availability, and serviceability (RAS) and high-efficiency design can improve your business environment and can help save operational costs.

### Scalability and performance

The SR655 offers numerous features to boost performance, improve scalability and reduce costs:

- Supports the AMD EPYC 7002 and EPYC 7003 families family of processors
- Supports processors with up to 64 cores and 128 threads, core speeds of up to 4.1 GHz, and TDP ratings of up to 280W.
- Support for up to 16 TruDDR4 memory DIMMs, with 8 memory channels and 2 DIMMs per channel. With 1 DIMM installed per channel (8 DIMMs total), memory operates at up to 3200 MHz. With 2 DIMMs per channel (16 DIMMs total), memory operating at up to 2933 MHz.
- Using 128GB 3DS DIMMs, the server supports up to 2TB of system memory.
- Supports 3 double-width GPUs up to 300W each, or 6 single-width GPUs up to 75W each. A 6:1 ratio of GPUs to CPUs means substantial processing power is available with just one CPU.
- Supports up to 32x 2.5-inch hot-swap drive bays, by using combinations of front-accessible (up to 24 bays), mid-accessible (up to 8), and rear-accessible (up to 4) drive bays.
- Supports 3.5-inch drive bays for lower-cost high-capacity storage. 2.5-inch and 3.5-inch drive bays can be mixed in several combinations.
- Supports 16x SATA drives using the onboard SATA controller (no additional adapter needed), enabling lower cost, high capacity storage solution for cold storage workloads.
- Supports up to 28x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity), or up to 32x NVMe drives with a 2:1 oversubscription. The use of NVMe drives maximizes drive I/O performance, in terms of throughput, bandwidth, and latency.
- Supports high-speed RAID controllers from Broadcom providing 12 Gb SAS connectivity to the drive backplanes. A variety of RAID adapters are available, with cache and support for up to 24 drives on a single controller.
- Supports M.2 drives for convenient operating system boot functions or data storage. Available M.2 adapters support either one M.2 drive or two M.2 drives in a RAID 1 configuration for performance and reliability.
- The server has a dedicated industry-standard OCP 3.0 small form factor (SFF) slot, with a PCIe 4.0 x16 interface, supporting a variety of Ethernet network adapters. Simple-swap mechanism with thumbscrews and pull-tab enables tool-less installation and removal of the adapter. Supports shared BMC network sideband connectivity to enable out-of-band systems management.
- The server offers PCI Express 4.0 I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 3.0 (16GT/s in each direction for PCIe 4.0, compared to 8 GT/s with PCIe 3.0). A PCIe 4.0 x16 slot provides 64 GB/s bandwidth, enough to support a 400GbE network connection.
- A total of up to 9 PCIe 4.0 slots (8 with rear access, 1 internal for a RAID adapter) plus a slot dedicated to the OCP adapter.

## Availability and serviceability

The SR655 provides many features to simplify serviceability and increase system uptime:

- The server uses ECC memory and supports memory RAS features including Single Device Data Correction (SDDC, also known as Chipkill), Patrol/Demand Scrubbing, DRAM Address Command Parity with Replay, and DRAM Uncorrected ECC Error Retry.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- The M.2 SATA RAID Boot Adapter supports RAID-1 which enables two installed M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and six hot-swap redundant fans to provide availability for business-critical applications.
- The power-source-independent light path diagnostics uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Solid-state drives (SSDs) offer more reliability than traditional mechanical HDDs for greater uptime.
- The built-in ASPEED AST2500 baseboard management controller (BMC) continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Proactive Platform Alerts: Voltage regulators, memory, fans, power supplies, server ambient and subcomponent temperatures. Alerts can be surfaced through the BMC to managers such as Lenovo XClarity Administrator. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- Web-based ThinkSystem System Manager (TSM) provides remote access to the BMC for remote management.
- Lenovo XClarity Provisioning Manager Lite (LXPM Lite) tool can be used to install an operating system on the server and perform system diagnostics.
- Three-year or one-year customer-replaceable unit and onsite limited warranty, 9 x 5 next business day. Optional service upgrades are available.

## Manageability and security

Systems management features simplify local and remote management of the SR655:

- Supports Lenovo XClarity Provisioning Manager Lite (LXPM Lite) for system setup and firmware upgrades.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Support for Lenovo XClarity Energy Manager, which captures real-time power and temperature data from the server and integrates with Redfish-based applications to provide automated controls to lower energy costs.
- Supports AMD Secure Root-of-Trust, Secure Run and Secure Move features to minimize potential attacks and protect data as the OS is booted, as applications are run and as applications are migrated from server to server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used.

- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.

### **Energy efficiency**

The SR655 offers the following energy-efficiency features to save energy, reduce operational costs, and increase energy availability:

- Energy-efficient planar components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Platinum and Titanium certifications
- Low-voltage 1.2 V DDR4 memory offers energy savings compared to 1.35 V and 1.5 V DDR3 DIMMs.
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.
- Optional Lenovo XClarity Energy Manager provides power and thermal monitoring to help achieve lower heat output and reduced cooling needs.

## Components and connectors

The following figure shows the front of the server.

Figure 2. Front view of the Lenovo ThinkSystem SR655

The following figure shows the components visible from the rear of the server. As shown, there are three different configurations available

Figure 3. Rear view of the Lenovo ThinkSystem SR655

The following figure shows the locations of key components inside the server.

Figure 4. Internal view of the Lenovo ThinkSystem SR655

## System architecture

The following figure shows the architectural block diagram of the SR655, showing the major components and their connections.

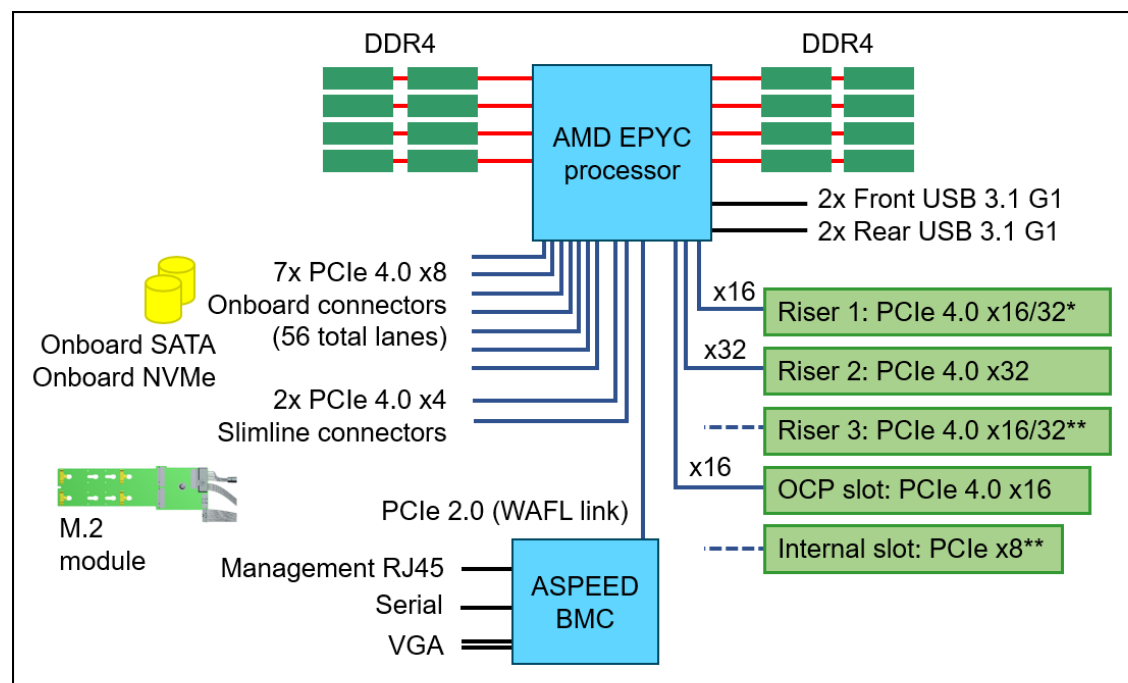

Figure 5. SR655 system architectural block diagram

\* Riser 1 has a x16 system board connection. For 32 lanes, the riser receives 16 lanes from two x8 onboard slimline connectors via cables

\*\* Riser 3 and Internal slot are connected to onboard connectors; no system board slots

## Standard specifications

The following table lists the standard specifications.

Table 1. Standard specifications

Components	Specification
Machine types	7Y00 - 1 year warranty 7Z01 - 3 year warranty
Form factor	2U rack.
Processor	One AMD EPYC 7002 Series processor (formerly codenamed "Rome") or AMD EPYC 7003 Series processors (formerly codenamed "Milan"). Supports processors up to 64 cores, core speeds of up to 4.1 GHz, and TDP ratings of up to 280W.
Memory	16 DIMM slots. The processor has 8 memory channels, with 2 DIMMs per channel. Lenovo TruDDR4 RDIMMs are supported. DIMMs are available in two speeds: 3200 MHz and 2933 MHz. With 3200 MHz memory, the server supports a 3200 MHz memory bus speed at 1 DIMM per channel (DPC) and 2933 MHz at 2 DPC. With 2933 MHz memory, the server supports a 2933 MHz memory bus speed at both 1 and 2 DPC.
Memory maximum	Up to 2TB with 16x 128GB 3DS RDIMMs

Components	Specification
Persistent memory	Not supported.
Memory protection	ECC, SDDC, Patrol/Demand Scrubbing, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, Post Package Repair
Disk drive bays	<p>Up to 20x 3.5-inch or 32x 2.5-inch hot-swap drive bays*:</p> <ul style="list-style-type: none"> <li>• Front: up to 12x 3.5-inch or 24x 2.5-inch, hot-swap bays</li> <li>• Mid (internal): up to 4x 3.5-inch or 8x 2.5-inch, hot-swap bays</li> <li>• Rear: up to 4x 3.5-inch or 4x 2.5-inch hot-swap bays</li> </ul> <p>With 2.5-inch drive bays, mid (internal) bays and rear drives are mutually exclusive. See <a href="#">Supported drive bay combinations</a> for details. Mid bays are hot-swap drive bays and are accessible by removing the top cover of the server. 4x 3.5-inch front drive bays can be configured as AnyBay supporting SAS, SATA or NVMe. 2.5-inch drive bays can be configured as NVMe, supporting 28x NVMe drives with direct connections (no oversubscription), or 32x NVMe drives with 2:1 oversubscription.</p> <p><b>* Note:</b> The server supports at most 32 drives, even though there are 36 physical 2.5-inch drive bays.</p>
Maximum internal storage	<ul style="list-style-type: none"> <li>• 2.5-inch drives: <ul style="list-style-type: none"> <li>◦ 245.76TB using 32x 7.68TB 2.5-inch SAS/SATA SSDs</li> <li>◦ 368.64TB using 24x 15.36TB 2.5-inch NVMe SSDs</li> <li>◦ 76.8TB using 32x 2.4TB 2.5-inch HDDs</li> </ul> </li> <li>• 3.5-inch drives: <ul style="list-style-type: none"> <li>◦ 360TB using 20x 18TB 3.5-inch HDDs</li> <li>◦ 153.6TB using 20x 7.68TB 3.5-inch SAS/SATA SSDs</li> <li>◦ 30.72TB using 4x 7.68TB 3.5-inch NVMe SSDs</li> </ul> </li> </ul>
Storage controller	<ul style="list-style-type: none"> <li>• Onboard SATA supporting up to 16 SATA drives (no RAID)</li> <li>• 12 Gb SAS/SATA RAID adapters: <ul style="list-style-type: none"> <li>◦ RAID 530i (cacheless) supports RAID 0, 1, 10, 5, 50</li> <li>◦ RAID 730-8i with 1GB cache supports RAID 0, 1, 10, 5, 50</li> <li>◦ RAID 730-8i with 2GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60</li> <li>◦ RAID 930-8i with 2GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60</li> <li>◦ RAID 930-16i and 24i with 4GB or 8GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60</li> </ul> </li> <li>• 12 Gb SAS/SATA non-RAID: 430-8i and 430-16i HBAs</li> </ul>
Optical drive bays	No internal optical drive.
Tape drive bays	No internal backup drive.
Network interfaces	Dedicated OCP 3.0 SFF slot with PCIe 4.0 x16 host interface. Supports a variety of 2-port and 4-port adapters with 1GbE, 10GbE and 25GbE network connectivity. One port can optionally be shared with the ASPEED management processor for Wake-on-LAN and NC-SI support.

Components	Specification
PCI Expansion slots	<p>A total of up to 9 PCIe 4.0 slots (8 with rear access, 1 internal for a RAID adapter) plus a slot dedicated to the OCP adapter. Slot availability is based on riser selection.</p> <p>Slot length is dependent on the use of a mid-chassis drive cage: If the mid drive cage is present then slots are half-length; if the mid drive cage is not present, then slots are full-length.</p> <ul style="list-style-type: none"> <li>• Riser 1: Slots 1, 2 and 3 - all FHHL or FHFL (16 or 32 lanes) <ul style="list-style-type: none"> <li>◦ Option 1*: 1=x16, 2=x8, 3=x8</li> <li>◦ Option 2*: 1=x16, 2=x16 (no slot 3)</li> <li>◦ Option 3: 3=x16 (no slot 1 or slot 2)</li> <li>◦ Option 4: 1=x16 (no slot 2 or slot 3)</li> </ul> </li> <li>• Riser 2: Slots 4, 5, and 6 - slot size varies (32 lanes) <ul style="list-style-type: none"> <li>◦ Option 1: 4=x16, 5=x8, 6=x8</li> <li>◦ Option 2: 4=x16, 5=x16 (no slot 6)</li> <li>◦ Option 3: 6=x16 (no slot 4 or slot 5)</li> </ul> </li> <li>• Riser 3: Slots 7 and 8 - both FHHL or FHFL (16 or 32 lanes) <ul style="list-style-type: none"> <li>◦ Option 1*: 7=x8, 8=x8</li> <li>◦ Option 2*: 7=x16, 8=x16</li> </ul> </li> <li>• Slot 9: Internal PCIe 4.0 x8 low-profile slot for internal drive controller</li> </ul> <p>* The use of 32 lanes with Riser 1 or the use of Riser 3 imposes restrictions on the use of the onboard SATA controller or the use of the M.2 Module or both. See the <a href="#">I/O expansion</a> section for details.</p>
Ports	<p>Front: Two USB 3.1 G1 (5 Gb/s) ports, optional VGA port.</p> <p>Rear: USB 3.1 G1 (5 Gb/s) ports, one VGA video port, one DB-9 serial port, and one RJ-45 1GbE systems management port.</p> <p>Internal: Optional M.2 module supporting up to two M.2 drives (for OS boot and drive storage support; not available in all configurations).</p>
Cooling	Five or six N+1 redundant hot swap 60 mm fans, configuration dependent. One fan integrated in each power supply.
Power supply	Up to two hot-swap redundant AC power supplies (all 80 PLUS Platinum certification): 550 W, 750 W, 1100 W and 1600 W AC options, supporting 220 V AC. 550 W, 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Also available is a 1100W power supply with a -48V DC input.
Video	Onboard graphics with 512 MB memory with 2D hardware accelerator, integrated into the ASPEED AST2500 BMC management processor. Maximum resolution is 1920x1200 at 60Hz, 32bpp
Hot-swap parts	Drives, power supplies, and fans.
Systems management	ASPEED AST2500 embedded management processor, XClarity Provisioning Manager Lite (LXPM Lite) for system setup and firmware upgrades. XClarity Administrator centralized infrastructure management, and XClarity Energy Manager centralized server power management. Light path diagnostics for local failure detection and reporting.
Security features	Power-on password, administrator's password, Trusted Platform Module (TPM), supporting TPM 2.0. In China only, optional Nationz TPM 2.0. Optional lockable front security bezel. Optional chassis intrusion switch.
Operating systems supported	Microsoft Windows Server, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi. See the <a href="#">Operating system support</a> section for specifics.

Components	Specification
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 764 mm (30.1 in.). See <a href="#">Physical and electrical specifications</a> for details.
Weight	Maximum: 35.4 kg (78.0 lb)

## Models

ThinkSystem SR655 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two base CTO models are available for the SR655 as listed in the following table, CTO1WW and CTOLWW:

- The CTO1WW base CTO model is for general business and is selectable by choosing **General Purpose** mode in DCSC.
- The CTOLWW base model is intended for High Performance Computing (HPC) and Artificial Intelligence (AI) configurations and solutions, including configurations for Lenovo Scalable Infrastructure (LeSI), and is enabled using either the **HPC & AI LeSI Solutions** mode or **HPC & AI ThinkSystem Hardware** mode in DCSC. CTOLWW configurations can also be built using [System x and Cluster Solutions Configurator \(x-config\)](#).

Preconfigured server models may also be available for the SR655, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem SR655 server.

Table 2. Base CTO models

Description	Machine Type/Model General purpose	Machine Type/Model for HPC and AI
ThinkSystem SR655 - 3 year Warranty	7Z01CTO1WW	7Z01CTOLWW
ThinkSystem SR655 - 1 year Warranty	7Y00CTO1WW	7Y00CTOLWW

Models of the SR655 are defined based on whether the server has 2.5-inch drive bays at the front (called the 24x 2.5" chassis) or whether it has 3.5-inch drive bays at the front (called the 12x 3.5" chassis). For models, the feature codes for these chassis bases are as listed in the following table.

Table 3. Chassis base feature codes

Feature code	Description
B5VK	ThinkSystem SR655 12x3.5" Chassis
B5VJ	ThinkSystem SR655 24x2.5" Chassis

The following tables list the available models, grouped by region.

- [Models for Australia and New Zealand](#)
- [Models for South East Asian countries \(ASEAN\)](#)
- [Models for Brazil](#)

- [Models for EMEA countries](#)
- [Models for Hong Kong, Taiwan, Korea \(HTK\)](#)
- [Models for India](#)
- [Models for Japan](#)
- [Models for Latin American countries \(except Brazil\)](#)
- [Models for USA and Canada](#)

Refer to the Specifications section for information about standard features of the server.

## Processor options

The SR655 supports processors in the AMD EPYC family of processors. The server supports one processor.

The table below lists the supported AMD processors.

All supported processors have the following characteristics:

- Third and second-generation AMD EPYC processors (formerly codenamed "Milan" and "Rome" respectively)
- 7 nm process technology
- Eight DDR4 memory channels
- 128 PCIe 4.0 I/O lanes

**Part numbers:** Processors do not include an option part number because there are no field upgrades supported.

Table 13. Processor options for the SR655

Feature code	Description

## Processor features

The following table lists the features of the supported processors.

**P suffix:** Processor models with a P suffix are designated as single-socket processors. They have identical features to the non-P equivalent processors.

The following table lists the features of the supported processors.

Table 14. Processor specifications

EPYC model**	Cores / Threads	Base Frequency	Max Boost Frequency†	L3 Cache	Memory channels	Memory bus	TDP
Third-generation AMD EPYC processors							
72F3	8 / 16	3.7 GHz	4.1 GHz	256 MB	8	3200 MHz	180 W

† The maximum single-core frequency at which the processor is capable of operating

\* This processor supports 8 memory channels at 3200 MHz, however performance is optimized for 4 channels at 2666 MHz

\*\* Processors with a P suffix are single-socket capable processors

## Memory options

The server uses Lenovo TruDDR4 memory operating at up to 3200 MHz. The processors have 8 memory channels and support 2 DIMMs per channel, for a total of 16 DIMMs.

The server supports up to 2TB of memory using 16x 128 GB 3DS RDIMMs.

The server supports these memory DIMMs:

- 2933 MHz DIMMs, that operate at 2933 MHz both at 1 DIMM per channel and 2 DIMMs per channel
- 3200 MHz DIMMs, that operate at 3200 MHz at 1 DIMM per channel, and at 2933 MHz at 2 DIMMs per channel

Note that if the processor selected has a memory bus speed of 2666 MHz, then all DIMMs will operate at 2666 MHz, even if the DIMMs are rated for a higher speed MHz.

The following table lists the memory options that are available for the server.

Lenovo TruDDR4 memory uses the highest quality components that are sourced from Tier 1 DRAM suppliers and only memory that meets the strict requirements of Lenovo is selected. It is compatibility tested and tuned to maximize performance and reliability. From a service and support standpoint, Lenovo TruDDR4 memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

Table 15. Supported memory options

Part number	Feature code	Description	Maximum supported
2933 MHz memory			
4ZC7A08739	B7MS	ThinkSystem 8GB TruDDR4 2933MHz (1Rx8 1.2V) RDIMM-A	16
4ZC7A08740	B7MT	ThinkSystem 16GB TruDDR4 2933MHz (1Rx4 1.2V) RDIMM-A	16
4ZC7A08741	B7MU	ThinkSystem 16GB TruDDR4 2933MHz (2Rx8 1.2V) RDIMM-A	16
4ZC7A08742	B7MV	ThinkSystem 32GB TruDDR4 2933MHz (2Rx4 1.2V) RDIMM-A	16
4ZC7A15123	B8NU	ThinkSystem 32GB TruDDR4 3200 MHz (2Rx8 1.2V) RDIMM-A	16
4ZC7A08744	B7MW	ThinkSystem 64GB TruDDR4 2933MHz (2Rx4 1.2V) RDIMM-A	16
4ZC7A15113	B587	ThinkSystem 128GB TruDDR4 2933MHz (4Rx4 1.2V) 3DS RDIMM	16
3200 MHz memory			
4ZC7A15121	B5XD	ThinkSystem 16GB TruDDR4 3200MHz (2Rx8 1.2V) RDIMM-A	16
4ZC7A15122	B5XE	ThinkSystem 32GB TruDDR4 3200MHz (2Rx4 1.2V) RDIMM-A	16
4ZC7A15124	B5XC	ThinkSystem 64GB TruDDR4 3200MHz (2Rx4 1.2V) RDIMM-A	16

The following rules apply when selecting the memory configuration:

- The server supports RDIMMs and 3DS RDIMMs
- Mixing of RDIMMs and 3DS RDIMMs is not supported
- Mixing x4 and x8 DIMMs is supported, but not in the same channel
- Mixing of DIMM rank counts is supported. Follow the required installation order installing the DIMMs with the higher rank counts first.
- Mixing of DIMM capacities is supported, however only two different capacities are supported all channels of the processor (eg 32GB and 64GB). Follow the required installation order installing the larger DIMMs first.
- Mixing of 3200 MHz and 2933 MHz DIMMs is supported, but not in the same channel
- Memory mirroring and memory rank sparing are not supported.
- When a GPU is added as a field upgrade, all empty DIMM slots must have a dummy DIMM blank installed in each DIMM slot, to ensure the optimal air flow. Ordering information is in the following table.

Table 16. ThinkSystem Dummy DIMM Kit

Part number	Feature code	Description	Quantity required
4M27A11810	BF5W	ThinkSystem Dummy DIMM Package Kit (contains 24 dummy memory DIMMs)	1

For best performance, consider the following:

- Ensure the memory installed is at least the same speed as the memory bus of the selected processor.
- Populate memory DIMMs in quantities of 8 or 16, so that all memory channels are used.
- Populate memory channels so they all have the same total memory capacity.

The following memory protection technologies are supported:

- ECC detection/correction
- SDDC (for x4-based memory DIMMs; look for "x4" in the DIMM description)
- Patrol/Demand Scrubbing
- DRAM Address Command Parity with Replay
- DRAM Uncorrected ECC Error Retry
- Post Package Repair

## Internal storage

The SR655 supports up to 20x 3.5-inch or 32x 2.5-inch drive bays, depending on the selected chassis and backplane configuration. Drives can be all SAS, all SATA, or all NVMe, or combinations of all three (not in the same RAID array, if configured). The server also supports configurations without any drive bays if desired.

All drives are hot-swap and are accessible from the front, from the rear, or from drive bays that are located in the middle of the server (accessible when you remove the top cover of the server).

The three drive zones are as follows:

- Front: up to 12x 3.5-inch or 24x 2.5-inch, hot-swap bays
- Mid (internal): up to 4x 3.5-inch or 8x 2.5-inch, hot-swap bays
- Rear: up to 4x 3.5-inch or 4x 2.5-inch hot-swap bays

The server also supports one or two M.2 drives, installed in an M.2 adapter.

In this section:

- [NVMe drive support](#)
- [Front drive bays](#)
- [Mid drive bays](#)
- [Rear drive bays](#)
- [Supported drive bay combinations](#)
- [Adapters selections](#)
- [Field upgrades](#)
- [M.2 drives](#)

## NVMe drive support

**PM983 hot-swap support:** To support hot-swap of PM983 NVMe drives, the server needs to have UEFI v2.0 (Build ID CFE108O) or later installed.

The SR655 supports NVMe drives to maximize storage performance, as follows:

- Up to 28 NVMe drives without oversubscription (that is, each x4 drive has a full x4 (4 lanes) connection to the processor)
  - 24 NVMe drives in the front bays
  - 4 NVMe drives in the rear bays
- Up to 32 NVMe drives with a 2:1 oversubscription (that is, each x4 drive has a x2 connection (2 lanes) to the processor)
  - 24 NVMe drives in the front bays
  - 8 NVMe drives in the mid bays
- Up to 4x NVMe drives in a 3.5-inch drive configuration
  - All installed in front bays

The specifics of these configurations plus other NVMe-rich configurations are covered in the [Supported drive bay combinations](#) and [Adapters selections](#) sections.

**15mm NVMe drives:** 15mm NVMe SSDs are not supported in the mid or rear drive bays due to thermal requirements. Only 7mm NVMe drives are supported in those zones.

## Front drive bays

The front drive bay zone supports the following configurations:

- 3.5-inch drive bays
  - No drives and no backplane (supports field upgrades)
  - 8x 3.5-inch SAS/SATA (no upgrades)
  - 12x 3.5-inch SAS/SATA (no upgrades)
  - 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay (AnyBay supports SAS or SATA or NVMe drives) (no upgrades)
- 2.5-inch drive bays
  - No drives and no backplane (supports field upgrades)
  - 8x 2.5-inch SAS/SATA (supports field upgrades to 16 or 24 drives)
  - 16x 2.5-inch SAS/SATA (supports field upgrades to 24 drives)
  - 24x 2.5-inch SAS/SATA (no upgrades)
  - 8x 2.5-inch NVMe (supports field upgrades to 16 or 24 drives)
  - 16x 2.5-inch NVMe (supports field upgrades to 24 drives)
  - 24x 2.5-inch NVMe (no upgrades)
  - 8x 2.5-inch NVMe + 8x 2.5-inch SAS/SATA (supports upgrade to 16x SAS/SATA)
  - 8x 2.5-inch NVMe + 16x 2.5-inch SAS/SATA (no upgrades)

These configurations are shown in the following figure.

Figure 6. SR655 front drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

Table 17. Backplanes for front drive bays

Part number	Feature code	Description	Maximum supported
Front 3.5-inch drive backplanes			
See note*	AUR6	ThinkSystem 2U 3.5" SATA/SAS 8-Bay Backplane (8-bay 3.5-inch SAS/SATA backplane)	1
See note*	AUR9	ThinkSystem 2U 3.5" SATA/SAS 12-Bay Backplane (12-bay 3.5-inch SAS/SATA backplane)	1
See note*	AUR8	ThinkSystem 2U 3.5" AnyBay 12-Bay Backplane (12-bay 3.5-inch backplane with 8x SAS/SATA bays + 4x AnyBay bays†)	1
Front 2.5-inch drive backplanes			
See note*	AURA	ThinkSystem 2U/Twr 2.5" SATA/SAS 8-Bay Backplane (8-bay 2.5-inch SAS/SATA backplane)	3
See note*	B4PC	ThinkSystem 2U 2.5" NVMe 8-Bay Backplane (8-bay 2.5-inch NVMe backplane)	3

\* Backplanes are available as part numbers for field upgrades using upgrade kits, as described in the [Field upgrades](#) section below.

† AnyBay bays support SAS or SATA or NVMe drives

The use of NVMe drives may limit the use of PCIe slots or M.2 drives as described in the [I/O expansion](#) section.

**280W processor support:** There are some restrictions regarding the use of some drive configurations with a 280W processor installed due to thermal restrictions. See the [Operating environment](#) section for details.

## Mid drive bays

The SR655 supports hot-swap drives installed in the middle of the server chassis. The drive bays are accessible by removing the top lid of the server and levering the mid drive chassis.

The following configurations are supported:

- 4x 3.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap NVMe drive bays

The drive bays in the open position are shown in the following figure.

**Note:** The figure shows an M.2 Module installed in the 2.5-inch drive bays, however installing the M.2 Module in this location is currently not supported

Figure 7. Mid-chassis drive bays

The backplanes used to provide these drive bays are listed in the following table.

Table 18. Backplanes for mid drive bays

Part number	Feature code	Description	Maximum supported
Mid - 3.5-inch drive backplane			
See note*	BCPB	ThinkSystem 1U 3.5" SATA/SAS 4-Bay Backplane	1
Mid - 2.5-inch drive backplanes			
See note*	B5VP	ThinkSystem SR655 2.5" SATA/SAS 4-Bay Middle Backplane	2‡
See note*	B5VN	ThinkSystem 2.5" NVMe 4-Bay Middle Backplane	2‡

\* Backplanes are available as part numbers for field upgrades using upgrade kits, as described in the [Field upgrades](#) section below.

‡ 2.5-inch drive backplanes for the mid-chassis area must be installed in pairs. NVMe and SAS/SATA cannot be mixed.

The use of drive bays in the mid-chassis area has the following configuration rules:

- Processors with TDP higher than 155W are not supported
- Full-length adapter cards are not supported
- GPUs (including low profile GPUs such as the T4) are not supported
- If 2.5-inch mid-chassis drive bays are configured then rear drive bays are not supported. See the [Supported drive bay combinations](#) section for more information.
- The use of NVMe drives in the mid bays requires to use of a PCIe retimer or switch

## Rear drive bays

The SR655 supports hot-swap drives installed at the rear of the server chassis. Supported configurations are as follows:

- 4x 3.5-inch hot-swap SAS/SATA drive bays
- 4x 2.5-inch hot-swap SAS/SATA drive bays
- 4x 2.5-inch hot-swap NVMe drive bays

The configurations are shown in the following figure.

Figure 8. Rear drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

Table 19. Backplanes for rear drive bays

Part number	Feature code	Description	Maximum supported
Rear - 3.5-inch drive backplane			
See note*	AUW8	ThinkSystem 3.5" SATA/SAS 4-Bay Backplane	1
Rear - 2.5-inch drive backplanes			
See note*	BCPD	ThinkSystem SR655 2.5" SATA/SAS 4-Bay Rear Backplane	1
See note*	BCPC	ThinkSystem SR655 2.5" NVMe 4-Bay Rear Backplane	1

\* Backplanes are available as part numbers for field upgrades using upgrade kits, as described in the [Field upgrades](#) section below.

The use of rear drive bays has the following configuration rules:

- Slots 7 and 8 are not available
- GPUs are not supported
- If 3.5-inch rear drive bays are configured then only slots 3 and 6 are available, as described in the [I/O expansion](#) section
- If 3.5-inch rear drive bays are configured then the intrusion switch is not supported
- The use of NVMe drives in rear bays requires to use of a PCIe retimer or switch

## Supported drive bay combinations

This section describes the various combinations of 3.5-inch and 2.5-inch drives that the server supports. The drive bay combinations are grouped based on the drive type at the front of the server, 3.5-inch or 2.5-inch.

### 3.5-inch drive bay chassis

The following table shows the supported combinations when the server is configured with a 3.5-inch chassis (where the front drive bays are 3.5-inch). In this configuration:

- When the front bays are 3.5-inch bays, the mid bays are also 3.5-inch bays, however the rear zone can be either 2.5-inch SAS/SATA or 3.5-inch SAS/SATA
- NVMe is only supported in the front bays, using the AnyBay backplane (which offers 4x NVMe-capable drive bays)

The choice of storage controller for each configuration is listed in the [Adapter selections](#) section.

Table 20. Drive bay combinations with 3.5-inch chassis (Blue cells = SAS/SATA, Purple cells = AnyBay)

Config	Total drives	Front bays (3.5")		Mid bays (3.5")	Rear bays (3.5" or 2.5")	
		SAS/SATA	AnyBay	SAS/SATA	3.5" SAS/SATA	2.5" SAS/SATA
3.5-inch chassis - SAS/SATA drives only						
A	8	8	0	0	0	0
B	12	12	0	0	0	0
C	16	12	0	0	4	0
D	16	12	0	0	0	4
E	20	12	0	4	4	0
F	20	12	0	4	0	4
3.5-inch chassis - SAS/SATA and AnyBay drives

H	16	8	4	0	4	0
I	16	8	4	0	0	4
J	20	8	4	4	4	0
K	20	8	4	4	0	4

### 2.5-inch drive bay chassis

The server has 36 drive bays in total, however up to 32 drives are supported in a configuration.

The following table shows the supported combinations when the server is configured with a 2.5-inch chassis (where the front drive bays are 2.5-inch). In this configuration:

- With the 2.5-inch chassis, all drive bays are 2.5-inch bays. No 3.5-inch drives are supported with the 2.5-inch chassis.
- Mid bays and Rear bays cannot be used concurrently

The choice of storage controller for each configuration is listed in the [Adapter selections](#) section.

Table 21. Drive bay combinations with 2.5-inch chassis (Blue cells = SAS/SATA, Red cells = NVMe)

Config	Total drives	Front bays (2.5")		Mid bays (2.5")		Rear bays (2.5")	
		SAS/SATA	NVMe	SAS/SATA	NVMe	SAS/SATA	NVMe
2.5-inch chassis - SAS/SATA drives only

R	28	0	24	0	0	0	4
S	32	0	24	8	0	0	0
T	32	0	24	0	8	0	0

## Adapter selections

The following tables lists the supported drive bay combinations plus the list of supported controller combinations supported by each of those drive bay combinations. Information about the controllers can be found in the [Controllers for internal storage](#) section.

General rules for adapters:

- The RAID 730-8i 1G cannot be used for connection to the rear drive bays
- Only the RAID 530-8i or the 430-8i HBA can be selected when a separate controller is needed for the rear drive bays
- The RAID 730-8i 2G cannot be used in the same server as the RAID 730-8i-1G or RAID 930-8i
- The M.2 Adapter is not supported in configurations of 16 or more 2.5-inch NVMe drives in the front bays
- For performance reasons, select the 1610-4P NVMe switch adapter instead of the 810-4P NVMe switch adapter, when available

Table 22. Drive bay combinations with 3.5-inch chassis (S/S = SAS/SATA) (Blue cells = SAS/SATA, Purple cells = AnyBay)

\* The use of the 810-4P results in PCIe lane oversubscription. For better NVMe drive performance without oversubscription, use a 1610-4P instead (not supported in configuration T)

## Field upgrades

The following table lists the option part numbers for the backplane kits that allow you to add additional drive bays as field upgrades. The table also lists what major components are included in each kit.

When adding drive bays, you will also need to add the appropriate storage controller(s). Consult the tables in the [Adapter selections](#) section to determine what controller sections are supported and what additional controllers you will need. Controllers are described in the [Controllers for internal storage](#) section.

Table 24. Drive backplane field upgrades

Part number	Description and contents of the upgrade kits	Maximum supported
Front - 3.5-inch drive backplanes (see <a href="#">Front drive bays</a> )		
4XH7A09829	ThinkSystem SR655 3.5" SATA/SAS 8-Bay Backplane Kit <ul style="list-style-type: none"> <li>1x 8-bay SAS/SATA backplane</li> <li>SATA Cable Kit (power and SATA cables)</li> <li>SAS/SATA Cable Kit (power cable, miniSAS-HD cable)</li> </ul>	1
4XH7A09830	ThinkSystem SR655 3.5" SATA/SAS 12-Bay Backplane Kit <ul style="list-style-type: none"> <li>1x 12-bay SAS/SATA backplane</li> <li>SATA Cable Kit (power and SATA cables)</li> <li>SAS/SATA Cable Kit (power cable, miniSAS-HD cable)</li> </ul>	1
4XH7A09831	ThinkSystem SR655 3.5" 4 Gen3 AnyBay 12-Bay BP Kit (12-bay 3.5-inch backplane with 8x SAS/SATA bays + 4x AnyBay bays†) <ul style="list-style-type: none"> <li>1x 12-bay AnyBay backplane</li> <li>SATA Cable Kit (power and SATA cables)</li> <li>SAS/SATA Cable Kit (power cable, miniSAS-HD cable)</li> <li>NVMe cable (x8-to-two-x4-slimline cable)</li> </ul>	1
Front - 2.5-inch drive backplanes (see <a href="#">Front drive bays</a> )		
4XH7A09832	ThinkSystem SR655 2.5" SATA/SAS 8-Bay Backplane Kit <ul style="list-style-type: none"> <li>1x 8-bay SAS/SATA backplane</li> <li>SATA Cable Kits (power and SATA cables)</li> <li>SAS/SATA Cable Kits (power cables, miniSAS-HD cables)</li> </ul>	3
4XH7A09833	ThinkSystem SR655 2.5" NVMe Gen4 8-Bay Backplane Kit <ul style="list-style-type: none"> <li>1x 8-bay NVMe backplane</li> <li>NVMe Cable Kits (power and x8 slimline cables)</li> </ul>	3
Mid - 3.5-inch drive backplane (see <a href="#">Mid drive bays</a> )		

Part number	Description and contents of the upgrade kits	Maximum supported
4XH7A09850	ThinkSystem SR655 3.5" SATA/SAS 4-Bay Middle Drive Kit <ul style="list-style-type: none"> <li>• Mid-chassis 3.5-inch drive cage</li> <li>• 4-bay 3.5-inch SAS/SATA backplane</li> <li>• 1U Performance Heatsink (replaces existing heatsink)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• Air baffle (replace existing baffle)</li> <li>• SAS/SATA Cable Kit (power cable, miniSAS-HD cable)</li> </ul>	1
Mid - 2.5-inch drive backplanes (see <a href="#">Mid drive bays</a> )		
4XH7A09854	ThinkSystem SR655 2.5" SATA/SAS 8-Bay Middle Drive Kit <ul style="list-style-type: none"> <li>• Mid-chassis 2.5-inch drive cage</li> <li>• 2x 4-bay 2.5-inch SAS/SATA backplane</li> <li>• 1U Performance Heatsink (replaces existing heatsink)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• Air baffle (replace existing baffle)</li> <li>• 2x SAS/SATA Cable Kits (power cable, miniSAS-HD cable)</li> </ul>	1
4XH7A09857	ThinkSystem SR655 2.5" NVMe Gen4 8-Bay Middle Drive Kit <ul style="list-style-type: none"> <li>• Mid-chassis 2.5-inch drive cage</li> <li>• 2x 4-bay 2.5-inch NVMe backplane</li> <li>• 1U Performance Heatsink (replaces existing heatsink)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• Air baffle (replace existing baffle)</li> <li>• 2x NVMe Cable Kits (power cable, signal cable)</li> </ul>	1
Rear - 3.5-inch drive backplane (see <a href="#">Rear drive bays</a> )		
4XH7A09851	ThinkSystem SR655 3.5" SATA/SAS 4-Bay Rear Drive Kit <ul style="list-style-type: none"> <li>• Rear 3.5-inch drive cage</li> <li>• 4-bay 3.5-inch SAS/SATA rear backplane</li> <li>• PCIe Riser 1 riser (provides x16 slot 3 only)</li> <li>• PCIe Riser 2 riser (provides x16 slot 6 only)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• SATA Cable Kit (power cable, SATA cable)</li> <li>• SAS/SATA Cable Kit (power cable, miniSAS-HD cable)</li> </ul>	1
Rear - 2.5-inch drive backplanes (see <a href="#">Rear drive bays</a> )		
4XH7A09855	ThinkSystem SR655 2.5" SATA/SAS 4-Bay Rear Drive Kit <ul style="list-style-type: none"> <li>• Rear 2.5-inch drive cage</li> <li>• 4-bay 2.5-inch SAS/SATA rear backplane</li> <li>• PCIe Riser 2 riser bracket (converts existing 3-slot riser to low profile slots)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• SATA Cable Kit (power cable, SATA cable)</li> <li>• SAS/SATA Cable Kit (power cable, miniSAS-HD cable)</li> </ul>	1

Part number	Description and contents of the upgrade kits	Maximum supported
4XH7A09858	ThinkSystem SR655 2.5" NVMe Gen4 4-Bay Rear Drive Kit <ul style="list-style-type: none"> <li>• Rear 2.5-inch drive cage</li> <li>• 4-bay 2.5-inch NVMe rear backplane</li> <li>• PCIe Riser 2 riser bracket (converts existing 3-slot riser to low profile slots)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• NVM Cable Kit (power cable, signal cables)</li> </ul>	1

† AnyBay bays support SAS or SATA or NVMe drives

If you plan to add one of the RAID adapters that includes a Flash power module (supercap) as a field upgrade, then you will also need to order a Supercap installation kit for the power module. For CTO orders, the components in the installation kit are automatically derived when you select the RAID adapter. The adapters that this applies to are as follows:

- ThinkSystem RAID 730-8i 2GB Flash PCIe 12Gb Adapter
- ThinkSystem RAID 930-8i 2GB Flash PCIe 12Gb Adapter
- ThinkSystem RAID 930-16i 4GB Flash PCIe 12Gb Adapter
- ThinkSystem RAID 930-24i 4GB Flash PCIe 12Gb Adapter

The power module installation kit list listed in the following table.

Table 25. RAID Flash Power Module installation kit

Part number	Feature code	Description
4XH7A09847	B72A	ThinkSystem SR635/SR655 Supercap Installation Kit <ul style="list-style-type: none"> <li>• 1x Bracket to hold two supercaps in their holders</li> <li>• 3x Supercap holders</li> </ul>

The following figure shows the location and use of the components of the option kit.

Figure 9. Supercap Installation Kit

If your existing server is configured with drive backplanes that are connected to onboard SATA ports and you wish to upgrade to a RAID adapter or SAS HBA, you will need to order the cable kit listed in the following table along with the adapter(s). The cable kit includes the additional cables you will need to connect the existing backplane to the new adapter. Note that the kit includes the cables needed for all supported combinations of backplanes; this means that some of the cables in the kit will not be used.

Table 26. RAID adapter cable kit for servers with backplanes

Part number	Feature code	Description
4X97A59750	BCCD	ThinkSystem SR655 SAS Cable Kit, contains four cables: <ul style="list-style-type: none"> <li>• Front BP SAS/SATA Combo Cable A, SC17A59349</li> <li>• 800mm MiniSAS-HD to MiniSAS-HD Cable C, SC17A50746</li> <li>• 600mm Slimline 4X RA to Slimline4X, SC17A50708</li> <li>• 445mm HBA HD to HD Cable A, SC17A50738</li> </ul>

The cables in the kit are used with existing backplanes as listed in the following table.

Table 27. Use of SR655 SAS Cable Kit

Existing backplane	Needed cables
Front 3.5-inch 8x SAS/SATA Backplane	Front BP SAS/SATA Combo Cable A, SC17A59349
Front 3.5-inch 12x SAS/SATA Backplane	Front BP SAS/SATA Combo Cable A, SC17A59349 800mm MiniSAS-HD to MiniSAS-HD Cable C, SC17A50746
Front 3.5-inch 8x SAS/SATA+4xAnyBay Backplane	Front BP SAS/SATA Combo Cable A, SC17A59349 600mm Slimline 4X RA to Slimline4X, SC17A50708
Front 2.5-inch 8x SAS/SATA Backplane (order 1 cable kit per 8-drive backplane installed)	Front BP SAS/SATA Combo Cable A, SC17A59349
Rear 3.5-inch 4x SAS/SATA Backplane	445mm HBA HD to HD Cable A, SC17A50738
Rear 2.5-inch 4x SAS/SATA Backplane	445mm HBA HD to HD Cable A, SC17A50738

## M.2 drives

The server supports one or two M.2 form-factor SATA drives for use as an operating system boot solution or as additional storage. The M.2 drives install into an M.2 module which is mounted horizontally in the server adjacent to the internal storage controller slot as shown in the [Components and connectors](#) section.

The use of M.2 drives in the SR655 requires the use of the performance fans for enhanced cooling. See the [Cooling](#) section for ordering information. In CTO orders, the performance fans will be automatically derived in the order.

**No M.2 support:** An M.2 Adapter is not supported in configurations of 16 or more 2.5-inch NVMe drives in the front bays.

There are two M.2 modules supported, as listed in the following table. The table also includes the cable kit needed for field upgrades.

**Field upgrades:** When ordering either option part number as a field upgrade, you will also need to order the M.2 Cable Kit which includes the necessary cables to connect the M.2 modules to the server. For CTO orders, the cable kit is not required; the cable and brackets are automatically included in the order. For field upgrades, you will also need to order the performance fans if they are not already installed in your server. See the [Cooling](#) section for ordering information.

Table 28. M.2 modules

Part number	Feature code	Description	Maximum supported
4Y37A09739	B5XH	ThinkSystem M.2 SATA 2-Bay RAID Enablement Kit	1
4Y37A09738	B5XJ	ThinkSystem M.2 SATA/NVMe 2-Bay Enablement Kit	1
4X97A59730	None	ThinkSystem SR635/SR655 M.2 Cable Kit (only needed for field upgrade to add 4Y37A09739 or 4Y37A09738) <ul style="list-style-type: none"> <li>• Bracket to mount the M.2 module</li> <li>• Bracket for two supercap modules</li> <li>• M.2 signal/power cable</li> </ul>	1

Supported drives are listed in the [Internal drive options](#) section.

The SATA RAID Enablement Kit has the following features:

- Supports one or two SATA M.2 drives
- Support 42mm, 60mm and 80mm drive form factors (2242, 2260 and 2280)
- RAID support via an onboard Marvell 88SE9230 SATA RAID Controller
- Support JBOD, RAID-0 and RAID-1 (RAID support requires two M.2 drives)
- PCIe 2.0 x2 host interface; 6Gbps SATA connection to the drives
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools

The SATA/NVMe Enablement Kit has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- When two drives installed, they must be either both SATA or both NVMe
- Support 42mm, 60mm and 80mm drive form factors (2242, 2260 and 2280)
- JBOD support only; no RAID support
- Either 6Gbps SATA or PCIe 3.0 x1 interface to the drives depending on the drives installed
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools

For further details about M.2 components, see the *ThinkSystem M.2 Drives and M.2 Adapters* product guide:

<https://lenovopress.com/lp0769-thinksystem-m2-drives-adapters>

## Controllers for internal storage

The SR655 offers a variety of controller options for internal drives:

- Onboard SATA ports for up to 16 SATA drives
- RAID adapters and HBAs for SAS/SATA drives
- Onboard NVMe ports (for up to 16 NVMe drives)

- NVMe adapters for configurations of 20 or more NVMe drives

The following table lists the adapters used for the internal storage of the server.

**RAID 530-8i firmware:** If you plan to use the RAID 530-8i in the SR655, it must have firmware 50.3.0-1032 or later applied before it can be used in the server. If the adapter you plan to use has older firmware (for example, you are using an adapter you previously purchased), it must first be upgraded by installing it in another server and upgrading the firmware there. For more information, see [Support tip HT509177](#).

Table 29. Internal Storage adapter support

Part number	Feature code	Description	Power module (supercap)	Slots supported	Maximum supported
<b>SAS/SATA RAID</b>					
7Y37A01082	AUNG	ThinkSystem RAID 530-8i PCIe 12Gb Adapter	No	9,1-6	4
7Y37A01083*	AUNH*	ThinkSystem RAID 730-8i 1GB Cache PCIe 12Gb Adapter	No	9,1-6	3
4Y37A09722	B4RQ	ThinkSystem RAID 730-8i 2GB Flash PCIe 12Gb Adapter	Included	9,1-6	3
7Y37A01084	AUNJ	ThinkSystem RAID 930-8i 2GB Flash PCIe 12Gb Adapter	Included	9,1-6	3
7Y37A01085	AUNK	ThinkSystem RAID 930-16i 4GB Flash PCIe 12Gb Adapter	Included	1-6	1
7Y37A01086	AUV1	ThinkSystem RAID 930-24i 4GB Flash PCIe 12Gb Adapter	Included	1-5**	1
<b>SAS/SATA HBA</b>					
7Y37A01088	AUNL	ThinkSystem 430-8i SAS/SATA 12Gb HBA	No	9,1-6	4
7Y37A01089	AUNM	ThinkSystem 430-16i SAS/SATA 12Gb HBA	No	1-6	2
<b>PCIe 3.0 NVMe Switch Adapters</b>					
CTO only	B22D	ThinkSystem 810-4P NVMe Switch Adapter	No	1,4,5,6	4
CTO only	BA4N	ThinkSystem 1610-4P NVMe Switch Adapter	No	1,4,5	3

\* The RAID 730-8i 1GB Cache adapter is not available in USA and Canada.

\*\* When 4x3.5" rear drive bays are configured, the 930-24i can only be installed in slot 3. When 4x2.5" rear drive bays are configured, the 930-24i can only be installed in slots 1 or 2.

**NVMe Switch Adapters and PCIe 4.0 drives:** The 810-4P and 1610-4P NVMe Switch Adapters operate at PCIe 3.0 speeds. When PCIe 4.0 NVMe drives are attached to an NVMe Switch Adapter, the drives will only operate at PCIe 3.0 speeds.

**Field upgrades:** If you are adding a RAID adapter to the SR655 as a field upgrade, you may need a Supercap Installation Kit as described in the [Field upgrades](#) section.

The following two tables compare the functions of the storage adapters.

Table 30. Comparison of internal storage controllers - RAID controllers

Feature	RAID 530-8i	RAID 730-8i 1GB**	RAID 730-8i 2GB	RAID 930-8i	RAID 930-16i
Adapter type	RAID controller	RAID controller	RAID controller	RAID controller	RAID controller
Part number	7Y37A01082	7Y37A01083	4Y37A09722	7Y37A01084	7Y37A01085 4Y37A09721
Form factor	PCIe HHHL	PCIe low profile	PCIe low profile	PCIe HHHL	PCIe HHHL
Controller chip	LSI SAS3408	LSI SAS3108	LSI SAS3108	LSI SAS3508	LSI SAS3516
Broadcom equivalent	MegaRAID 9440-8i	MegaRAID 9361-8i	MegaRAID 9361-8i	MegaRAID 9460-8i	MegaRAID 9460-16i
Host interface	PCIe 3.0x8	PCIe 3.0x8	PCIe 3.0x8	PCIe 3.0x8	PCIe 3.0x8
Port interface	12 Gb SAS	12 Gb SAS	12 Gb SAS	12 Gb SAS	12 Gb SAS
Number of ports	8	8	8	8	16
Port connectors	2x Mini-SAS HD x4 (SFF-8643)	2x Mini-SAS HD x4 (SFF-8643)	2x Mini-SAS HD x4 (SFF-8643)	2x Mini-SAS HD x4 (SFF-8643)	4x Mini-SAS HD x4 (SFF-8643)
Drive interface	SAS, SATA	SAS, SATA	SAS, SATA	SAS, SATA	SAS, SATA
Drive type	HDD, SED, SSD	HDD, SSD	HDD, SED, SSD	HDD, SED, SSD	HDD, SED, SSD
Hot-swap drives	Yes	Yes	Yes	Yes	Yes
Max devices	8	8	8	8	16
RAID levels	0, 1, 10, 5, 50	0, 1, 10, 5, 50	0, 1, 10, 5, 50, 6, 60	0, 1, 10, 5, 50, 6, 60	0, 1, 10, 5, 50, 6, 60
JBOD mode	Yes	Yes	Yes	Yes	Yes
Cache	None	1GB (Standard)	2GB (Standard)	2GB (Standard)	4GB or 8GB (Standard)
CacheVault cache protection	No	No	Yes (Flash)	Yes (Flash)	Yes (Flash)
Performance Accelerator (FastPath)	Yes	No	Yes	Yes	Yes
SSD Caching (CacheCade Pro 2.0)	No	No	No	No	No
SED support*	Yes	No	Yes	Yes	Yes

\* SAS HBAs support SEDs (self-encrypting drives) by using software on the server and simply passing SED commands through the HBA to the drives. SED support by RAID controllers is provided using the built-in MegaRAID SafeStore functionality of the adapter.

\*\* The RAID 730-8i 1GB Cache adapter is not available in USA and Canada.

Table 31. Comparison of internal storage controllers - HBAs and NVMe switches

Feature	430-8i	430-16i	810-4P NVMe	1610-4P NVMe
Adapter type	HBA	HBA	NVMe switch	NVMe switch
Part number	7Y37A01088	7Y37A01089	4Y37A09719	7Y37A01081
Form factor	PCIe low profile	PCIe low profile	PCIe low profile	PCIe low profile
Controller chip	LSI SAS3408	LSI SAS3416	Broadcom PEX9733	Broadcom PEX9733
Broadcom equivalent	HBA 9400-8i	HBA 9400-16i	P310W-4P	P310W-4P
Host interface	PCIe 3.0 x8	PCIe 3.0 x8	PCIe 3.0 x8	PCIe 3.0 x16
Port interface	12 Gb SAS	12 Gb SAS	PCIe NVMe	PCIe NVMe
Number of ports	8	16	4	4
Port connectors	2x Mini-SAS HD x4 (SFF-8643)	4x Mini-SAS HD x4 (SFF-8643)	4x Mini-SAS HD x4 (SFF-8643)	4x Mini-SAS HD x4 (SFF-8643)
Drive interface	SAS, SATA	SAS, SATA	NVMe	NVMe
Drive type	HDD, SSD, SED*	HDD, SSD, SED*	SSD	SSD
Hot-swap drives	Yes	Yes	Yes	Yes
Max devices	8	16	4	4
RAID levels	No RAID	No RAID	None	None
JBOD mode	Yes	Yes	Yes	Yes
Cache	No	No	None	None
CacheVault cache protection with Flash	No	No	No	No
Performance Accelerator (FastPath)	No	No	No	No
SSD Caching (CacheCade Pro 2.0)	No	No	No	No
SED support*	Yes	Yes	No	No

\* SAS HBAs support SEDs (self-encrypting drives) by using software on the server and simply passing SED commands through the HBA to the drives. SED support by RAID controllers is provided using the built-in MegaRAID SafeStore functionality of the adapter.

For more information about the adapters see the product guides in the RAID adapters or HBA sections of the Lenovo Press web site:

## Internal drive options

The following tables list the hard disk drive and solid-state drive options for the internal disk storage of the server.

### 2.5-inch hot-swap drives:

- [2.5-inch hot-swap 12 Gb SAS HDDs](#)
- [2.5-inch hot-swap 6 Gb SATA HDDs](#)
- [2.5-inch hot-swap 12 Gb SAS SSDs](#)
- [2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)
- [2.5-inch hot-swap PCIe 3.0 NVMe SSDs](#)

### 3.5-inch hot-swap drives:

- [3.5-inch hot-swap 12 Gb SAS HDDs](#)
- [3.5-inch hot-swap 6 Gb SATA HDDs](#)
- [3.5-inch hot-swap 12 Gb SAS SSDs](#)
- [3.5-inch hot-swap 6 Gb SATA SSDs](#)
- [3.5-inch hot-swap PCIe 3.0 NVMe SSDs](#)

### M.2 drives:

- [M.2 SATA drives](#)

**M.2 drive support:** The use of M.2 drives requires an additional adapter as described in the [M.2 drives](#) subsection.

Table 32. 2.5-inch hot-swap 12 Gb SAS HDDs

Part number	Feature	Description	Maximum supported
2.5-inch hot-swap HDDs - 12 Gb SAS 10K			
7XB7A00024	AULY	ThinkSystem 2.5" 300GB 10K SAS 12Gb Hot Swap 512n HDD	32
7XB7A00025	AULZ	ThinkSystem 2.5" 600GB 10K SAS 12Gb Hot Swap 512n HDD	32
7XB7A00026	AUM0	ThinkSystem 2.5" 900GB 10K SAS 12Gb Hot Swap 512n HDD	32
7XB7A00027	AUM1	ThinkSystem 2.5" 1.2TB 10K SAS 12Gb Hot Swap 512n HDD	32
7XB7A00028	AUM2	ThinkSystem 2.5" 1.8TB 10K SAS 12Gb Hot Swap 512e HDD	32
7XB7A00069	B0YS	ThinkSystem 2.5" 2.4TB 10K SAS 12Gb Hot Swap 512e HDD	32
2.5-inch hot-swap HDDs - 12 Gb SAS 15K			
7XB7A00021	AULV	ThinkSystem 2.5" 300GB 15K SAS 12Gb Hot Swap 512n HDD	32
7XB7A00022	AULW	ThinkSystem 2.5" 600GB 15K SAS 12Gb Hot Swap 512n HDD	32
7XB7A00023	AULX	ThinkSystem 2.5" 900GB 15K SAS 12Gb Hot Swap 512e HDD	32
2.5-inch hot-swap HDDs - 12 Gb NL SAS			
7XB7A00034	AUM6	ThinkSystem 2.5" 1TB 7.2K SAS 12Gb Hot Swap 512n HDD	32
7XB7A00035	AUM7	ThinkSystem 2.5" 2TB 7.2K SAS 12Gb Hot Swap 512n HDD	32
2.5-inch hot-swap SED HDDs - 12 Gb SAS 10K			
7XB7A00031	AUM5	ThinkSystem 2.5" 600GB 10K SAS 12Gb Hot Swap 512n HDD SED	32

Table 33. 2.5-inch hot-swap 6 Gb SATA HDDs

Part number	Feature	Description	Maximum supported
2.5-inch hot-swap HDDs - 6 Gb NL SATA			
7XB7A00036	AUUE	ThinkSystem 2.5" 1TB 7.2K SATA 6Gb Hot Swap 512n HDD	32

4XB7A10155	B2X4	ThinkSystem 2.5" 5200 1.92TB Entry SATA 6Gb Hot Swap SSD	32
4XB7A10157	B2X6	ThinkSystem 2.5" 5200 7.68TB Entry SATA 6Gb Hot Swap SSD	32
2.5-inch hot-swap SED SSDs - 6 Gb SATA - Mainstream (3-5 DWPD)			
4XB7A64222	BEMB	ThinkSystem 2.5" 5300 3.84TB Mainstream SATA 6Gb Hot Swap SSD SED	32
2.5-inch hot-swap SED SSDs - 6 Gb SATA - Entry (<3 DWPD)			
4XB7A38141	BE29	ThinkSystem 2.5" 5300 960GB Entry SATA 6Gb Hot Swap SSD SED	32

Table 36. 2.5-inch hot-swap PCIe 4.0 NVMe SSDs

Part number	Feature	Description	Maximum supported
2.5-inch SSDs - PCIe 4.0 NVMe - Mainstream (3-5 DWPD)			
4XB7A17152	BCFV	ThinkSystem U.2 Intel P5600 1.6TB Mainstream NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A17153	BCFR	ThinkSystem U.2 Intel P5600 3.2TB Mainstream NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A17154	BCFS	ThinkSystem U.2 Intel P5600 6.4TB Mainstream NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A64175	BE03	ThinkSystem U.3 Kioxia CM6-V 800GB Mainstream NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A17112	B96Z	ThinkSystem U.3 Kioxia CM6-V 1.6TB Mainstream NVMe PCIe4.0 x4 Hot Swap SSD	24*
4XB7A17113	B96T	ThinkSystem U.3 Kioxia CM6-V 3.2TB Mainstream NVMe PCIe4.0 x4 Hot Swap SSD	24*
4XB7A17114	B96P	ThinkSystem U.3 Kioxia CM6-V 6.4TB Mainstream NVMe PCIe4.0 x4 Hot Swap SSD	24*
2.5-inch SSDs - PCIe 4.0 NVMe - Entry (<3 DWPD)			
4XB7A17145	BCFT	ThinkSystem U.2 Intel P5500 1.92TB Entry NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A17146	BCFW	ThinkSystem U.2 Intel P5500 3.84TB Entry NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A17147	BCFU	ThinkSystem U.2 Intel P5500 7.68TB Entry NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A38196	BC4Y	ThinkSystem U.2 PM1733 1.92TB Entry NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A38197	BC4Z	ThinkSystem U.2 PM1733 3.84TB Entry NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A38283	BE2E	ThinkSystem U.2 PM1733 7.68TB Entry NVMe PCIe 4.0 x4 Hot Swap SSD	24*
4XB7A38284	BE2F	ThinkSystem U.2 PM1733 15.36TB Entry NVMe PCIe 4.0 x4 Hot Swap SSD	24*

\* All NVMe drives, with the exception of PM983 drives, are 15mm high and are only supported in the front drive bays due to thermal requirements

Table 37. 2.5-inch hot-swap PCIe 3.0 NVMe SSDs

Part number	Feature	Description	Maximum supported
2.5-inch SSDs - PCIe 3.0 NVMe - Mainstream (3-5 DWPD)			
4XB7A13936	B589	ThinkSystem U.2 Intel P4610 1.6TB Mainstream NVMe PCIe3.0 x4 Hot Swap SSD	24*
4XB7A13937	B58A	ThinkSystem U.2 Intel P4610 3.2TB Mainstream NVMe PCIe3.0 x4 Hot Swap SSD	24*
4XB7A13938	B58B	ThinkSystem U.2 Intel P4610 6.4TB Mainstream NVMe PCIe3.0 x4 Hot Swap SSD	24*
4XB7A08516	B21W	ThinkSystem U.2 Toshiba CM5-V 800GB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	24*
4XB7A08517	B21X	ThinkSystem U.2 Toshiba CM5-V 1.6TB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	24*
4XB7A08518	B21Y	ThinkSystem U.2 Toshiba CM5-V 3.2TB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	24*
4XB7A08519	B2XJ	ThinkSystem U.2 Toshiba CM5-V 6.4TB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	24*
2.5-inch SSDs - PCIe 3.0 NVMe - Entry (<3 DWPD)			
4XB7A10202	B58F	ThinkSystem U.2 Intel P4510 1.0TB Entry NVMe PCIe3.0 x4 Hot Swap SSD	24*
4XB7A10204	B58G	ThinkSystem U.2 Intel P4510 2.0TB Entry NVMe PCIe3.0 x4 Hot Swap SSD	24*
4XB7A10205	B58H	ThinkSystem U.2 Intel P4510 4.0TB Entry NVMe PCIe3.0 x4 Hot Swap SSD	24*
4XB7A08513	B58J	ThinkSystem U.2 Intel P4510 8.0TB Entry NVMe PCIe3.0 x4 Hot Swap SSD	24*
4XB7A10175	B34N	ThinkSystem U.2 PM983 1.92TB Entry NVMe PCIe 3.0 x4 Hot Swap SSD	32
4XB7A10176	B34P	ThinkSystem U.2 PM983 3.84TB Entry NVMe PCIe 3.0 x4 Hot Swap SSD	32
4XB7A10177	B4D3	ThinkSystem U.2 PM983 7.68TB Entry NVMe PCIe3.0 x4 Hot Swap SSD	32

\* All NVMe drives, with the exception of PM983 drives, are 15mm high and are only supported in the front drive bays due to thermal requirements

**Note:** NVMe PCIe SSDs support surprise hot removal and hot insertion, provided the operating system supports PCIe SSD hot-swap.

Table 38. 3.5-inch hot-swap 12 Gb SAS HDDs

Part number	Feature	Description	Maximum supported
3.5-inch hot-swap HDDs - 12 Gb SAS 10K			
7XB7A00063	B1JJ	ThinkSystem 3.5" 300GB 10K SAS 12Gb Hot Swap 512n HDD	20
3.5-inch hot-swap HDDs - 12 Gb SAS 15K			
7XB7A00039	AUU3	ThinkSystem 3.5" 600GB 15K SAS 12Gb Hot Swap 512n HDD	20
7XB7A00040	AUUC	ThinkSystem 3.5" 900GB 15K SAS 12Gb Hot Swap 512e HDD	20
3.5-inch hot-swap HDDs - 12 Gb NL SAS			
7XB7A00042	AUU5	ThinkSystem 3.5" 2TB 7.2K SAS 12Gb Hot Swap 512n HDD	20
7XB7A00043	AUU6	ThinkSystem 3.5" 4TB 7.2K SAS 12Gb Hot Swap 512n HDD	20
7XB7A00044	AUU7	ThinkSystem 3.5" 6TB 7.2K SAS 12Gb Hot Swap 512e HDD	20
7XB7A00045	B0YR	ThinkSystem 3.5" 8TB 7.2K SAS 12Gb Hot Swap 512e HDD	20
7XB7A00046	AUUG	ThinkSystem 3.5" 10TB 7.2K SAS 12Gb Hot Swap 512e HDD	20

4XB7A17086	B8J3	ThinkSystem 3.5" 5300 7.68TB Entry SATA 6Gb Hot Swap SSD	20
4XB7A10160	B2X9	ThinkSystem 3.5" 5200 1.92TB Entry SATA 6Gb Hot Swap SSD	20

Table 42. 3.5-inch hot-swap PCIe 3.0 NVMe SSDs

Part number	Feature	Description	Maximum supported
3.5-inch SSDs - PCIe 3.0 NVMe - Mainstream (3-5 DWPD)			
4XB7A13944	B58C	ThinkSystem 3.5" Intel P4610 1.6TB Mainstream NVMe PCIe3.0 x4 Hot Swap SSD	4
4XB7A13945	B58D	ThinkSystem 3.5" Intel P4610 3.2TB Mainstream NVMe PCIe3.0 x4 Hot Swap SSD	4
4XB7A13946	B58E	ThinkSystem 3.5" Intel P4610 6.4TB Mainstream NVMe PCIe3.0 x4 Hot Swap SSD	4
4XB7A08532	B21Z	ThinkSystem 3.5" Toshiba CM5-V 800GB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	4
4XB7A08533	B220	ThinkSystem 3.5" Toshiba CM5-V 1.6TB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	4
4XB7A08534	B221	ThinkSystem 3.5" Toshiba CM5-V 3.2TB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	4
4XB7A08535	B2XK	ThinkSystem 3.5" Toshiba CM5-V 6.4TB Mainstream NVMe PCIe 3.0 x4 Hot Swap SSD	4
3.5-inch SSDs - PCIe 3.0 NVMe - Entry (<3 DWPD)			
4XB7A10178	B34Q	ThinkSystem 3.5" PM983 1.92TB Entry NVMe PCIe 3.0 x4 Hot Swap SSD	4
4XB7A10179	B34R	ThinkSystem 3.5" PM983 3.84TB Entry NVMe PCIe 3.0 x4 Hot Swap SSD	4
4XB7A10180	B4D4	ThinkSystem 3.5" PM983 7.68TB Entry NVMe PCIe3.0 x4 Hot Swap SSD	4

**Note:** NVMe PCIe SSDs support surprise hot removal and hot insertion, provided the operating system supports PCIe SSD hot-swap.

Table 43. M.2 SATA drives

Part number	Feature	Description	Maximum supported
M.2 SSDs - 6 Gb SATA - Entry (<3 DWPD)			
7N47A00129	AUUL	ThinkSystem M.2 32GB SATA 6Gbps Non-Hot Swap SSD	2
7N47A00130	AUUV	ThinkSystem M.2 128GB SATA 6Gbps Non-Hot Swap SSD	2
7SD7A05703	B11V	ThinkSystem M.2 5100 480GB SATA 6Gbps Non-Hot Swap SSD	2
4XB7A17071	B8HS	ThinkSystem M.2 5300 240GB SATA 6Gbps Non-Hot Swap SSD	2
4XB7A17073	B919	ThinkSystem M.2 5300 480GB SATA 6Gbps Non-Hot Swap SSD	2
4XB7A17074	B8JJ	ThinkSystem M.2 5300 960GB SATA 6Gbps Non-Hot Swap SSD	2

## Internal backup units

The server does not support any internal backup units, such as tape drives or RDX drives. External backup units are available as described in the [External backup units](#) section.

## Optical drives

The server supports the external USB optical drive listed in the following table.

Table 44. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, CD-RW, CD-R, CD-ROM.

## I/O expansion

The server supports a total of up to 9 PCIe 4.0 slots (8 with rear access, 1 internal for a RAID adapter or HBA) plus a dedicated OCP 3.0 SFF slot for networking. Slot availability is based on riser selection.

Slot length is dependent on the use of a mid-chassis drive cage: If the mid drive cage is present then slots are half-length; if the mid drive cage is not present, then slots are full-length.

The following figure shows the locations of the rear-accessible slots for each configuration selection. The OCP slot is located in the lower-left corner.

Figure 10. SR655 slots

The slots and riser cards are as follows:

- Riser 1: Slots 1, 2 and 3 - all FHHL or FHFL (16 or 32 lanes)
  - Option 1\*: x16, x8, x8 (all physically x16 slots)
  - Option 2\*: x16, x16, NC (slot 3 not connected)
  - Option 3: NC, NC, x16 (1U riser; slot 1 and slot 2 not connected)
  - Option 4: x16, NC, NC (slot 2 and slot 3 not connected)
- Riser 2: Slots 4, 5, and 6 - slot size varies (32 lanes)
  - Option 1: x16, x8, x8 (all physically x16 slots)
  - Option 2: x16, x16, NC (slot 6 not connected)
  - Option 3: NC, NC, x16 (1U riser; slot 4 and slot 5 not connected)
- Riser 3: Slots 7 and 8 - both FHHL or FHFL (16 or 32 lanes)

- Option 1\*: x8, x8 (both physically x16 slots)
- Option 2\*: x16, x16
- Slot 9: Internal PCIe 4.0 x8 low-profile slot for internal drive controller (physically a x16 slot)\*

\* The use of 32 lanes with Riser 1 or the use of Riser 3 or Slot 9 imposes restrictions on the use of the onboard SATA controller or the use of the M.2 Module or both. See [Table 43](#) below for details.

The riser cards used to provide the above slot combinations are listed in the following table.

Table 45. Riser card selections

Purpose (NC = Not connected)	Part number	Feature code	Description
Riser 1 (slots 1,2,3)			
Option 1 - x16,x8,x8	4XH7A09838	B5VX	ThinkSystem SR655 x16/x8/x8 PCIe Riser1
Option 2 - x16,x16,NC	4XH7A09837	B5VZ	ThinkSystem SR655 x16/x16 PCIe Riser1
Option 3 - NC,NC,x16	4XH7A09835	B5VV	ThinkSystem SR635/SR655 x16 PCIe Riser1
Option 4 - x16,NC,NC	4XH7A09834	B69R	ThinkSystem SR655 x16 PCIe 2U Riser 1
Riser 2 (slots 4,5,6)			
Option 1 - x16,x8,x8	4XF7A72372	B5VU	ThinkSystem SR655 x16/x8/x8 PCIe Riser 2 FH/LP Kit V2
Option 2 - x16,x16,NC	4XH7A09839	B5VY	ThinkSystem SR655 x16/x16 PCIe Riser2
Option 3 - NC,NC,x16	4XH7A09836	B5W0	ThinkSystem SR635/SR655 x16/x16 PCIe Riser2 (BF)
Riser 3 (slots 7,8)			
Option 1 - x8,x8	4XH7A09841	B5VT	ThinkSystem SR655 x8/x8 PCIe Riser3
Option 2 - x16,x16	4XF7A72373*	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser 3 Kit V2
Internal (slot 9)			
Internal slot - x8	4XH7A09843§	B5VW	ThinkSystem SR635/SR655 x8 PCIe Internal Riser

\* Option part number 4XF7A72373 includes the GPU power cable

§ Option part number 4XH7A09843 includes a bracket to hold two RAID adapter flash power modules (supercaps)

As described in this section, the use of some risers results in limitations on the use of NVMe drives, the onboard SATA controller, and M.2 drives. This is due to the dual use of some of the PCIe slimline connectors on the system board - use with riser cards and use with these other functions. The following table summarizes the restrictions.

**Tip:** The drive bay restrictions in the table refer to the front drive bays.

Table 46. Restrictions on NVMe, onboard SATA and M.2 with riser selection

<b>Purpose (NC = Not connected)</b>	<b>Description</b>	<b>NVMe restrictions (front bays)</b>	<b>Onboard SATA restrictions (front bays)</b>	<b>M.2 restrictions</b>
<b>Riser 1 (slots 1,2,3)</b>				
Option 1 x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser1, B5VX	3.5-inch bays: No restriction 2.5-inch bays: 8 NVMe drives max	3.5-inch bays: 8 drives max 2.5-inch bays: No support	No restriction
Option 2 x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser1, B5VZ	3.5-inch bays: No restriction 2.5-inch bays: 8 NVMe drives max	3.5-inch bays: 8 drives max 2.5-inch bays: No support	No restriction
Option 3 NC,NC,x16	ThinkSystem SR635/SR655 x16 PCIe Riser1, B5VV	No restriction	No restriction	No restriction
Option 4 x16,NC,NC	ThinkSystem SR655 x16 PCIe 2U Riser 1, B69R	No restriction	No restriction	No restriction
<b>Riser 2 (slots 4,5,6)</b>				
Option 1 x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser2, B5VU	No restriction	No restriction	No restriction
Option 2 x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser2, B5VY	No restriction	No restriction	No restriction
Option 3 NC,NC,x16	ThinkSystem SR635/SR655 x16/x16 PCIe Riser2 (BF), B5W0	No restriction	No restriction	No restriction
<b>Riser 3 (slots 7,8)</b>				
Option 1 x8,x8	ThinkSystem SR655 x8/x8 PCIe Riser3, B5VT	3.5-inch bays: No NVMe support 2.5-inch bays: No NVMe support	No restriction	No restriction
Option 2 x16,x16	ThinkSystem SR655 x16/x16 PCIe Riser3, B5W1	3.5-inch bays: No NVMe support 2.5-inch bays: No NVMe support	3.5-inch bays: 8 drives max 2.5-inch bays: 8 drives max	No M.2 support
<b>Internal (slot 9)</b>				
Internal slot x8	ThinkSystem SR635/SR655 x8 PCIe Internal Riser, B5VW	3.5-inch bays: No restriction 2.5-inch bays: 8 NVMe drives max	No restriction	No restriction

The choice of riser also determine which rear drive bays are possible, as listed in the following table.

Table 47. Use of rear drive bays with riser cards

Purpose (NC = Not connected)	Description	Riser can be used with:		
		Without rear bays	3.5-inch rear bays	2.5-inch rear bays
Riser 1 (slots 1,2,3)				
Option 1 - x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser1, B5VX	Yes	No	Yes
Option 2 - x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser1, B5VZ	Yes	No	Yes
Option 3 - NC,NC,x16	ThinkSystem SR635/SR655 x16 PCIe Riser1, B5VV	No	Yes	No
Option 4 - x16,NC,NC	ThinkSystem SR655 x16 PCIe 2U Riser 1, B69R	Yes	No	Yes
Riser 2 (slots 4,5,6)				
Option 1 - x16,x8,x8	ThinkSystem SR655 x16/x8/x8 PCIe Riser2, B5VU	Yes	No	Yes
Option 2 - x16,x16,NC	ThinkSystem SR655 x16/x16 PCIe Riser2, B5VY	Yes	No	Yes
Option 3 - NC,NC,x16	ThinkSystem SR635/SR655 x16/x16 PCIe Riser2 (BF), B5W0	No	Yes	No
Riser 3 (slots 7,8)				
Option 1 - x8,x8	ThinkSystem SR655 x8/x8 PCIe Riser3, B5VT	Yes	No	No
Option 2 - x16,x16	ThinkSystem SR655 x16/x16 PCIe Riser3, B5W1	Yes	No	No
Internal (slot 9)				
Internal slot - x8	ThinkSystem SR635/SR655 x8 PCIe Internal Riser, B5VW	Yes	Yes	Yes

## Network adapters

The server has a dedicated OCP 3.0 SFF slot with PCIe 4.0 x16 host interface. See [Figure 3](#) for the location of the OCP slot.

The following table lists the supported OCP adapters. One port can optionally be shared with the ASPEED management processor for Wake-on-LAN and NC-SI support. Only 1 OCP card can be installed in the server.

**280W processor support:** There are some restrictions regarding the use of some OCP adapters with a 280W processor installed due to thermal restrictions. See the [Operating environment](#) section for details.

Table 48. Supported OCP adapters

Part number	Feature code	Description
Gigabit		
4XC7A08235	B5T1	ThinkSystem Broadcom 5719 1GbE RJ45 4-port OCP Ethernet Adapter
4XC7A08277	B93E	ThinkSystem Intel I350 1GbE RJ45 4-port OCP Ethernet Adapter
10 GbE		
4XC7A08236	B5ST	ThinkSystem Broadcom 57416 10GBASE-T 2-port OCP Ethernet Adapter
4XC7A08239	B5SS	ThinkSystem Broadcom 57416 10GBASE-T 2-port + 5720 1GbE 2-port OCP Ethernet Adapter
4XC7A08240	B5T4	ThinkSystem Broadcom 57454 10GBASE-T 4-port OCP Ethernet Adapter
4XC7A08278	BCD5	ThinkSystem Intel X710-T2L 10GBASE-T 2-port OCP Ethernet Adapter
4XC7A08310	BB8U	ThinkSystem Marvell QL41132 10GBASE-T 2-port OCP Ethernet Adapter
25 GbE		
4XC7A08237	B5SZ	ThinkSystem Broadcom 57414 10/25GbE SFP28 2-port OCP Ethernet Adapter
4XC7A08242	B5SV	ThinkSystem Broadcom 57454 10/25GbE SFP28 4-port OCP Ethernet Adapter
4XC7A08246	B5T2	ThinkSystem Mellanox ConnectX-4 Lx 10/25GbE SFP28 2-port OCP Ethernet Adapter
4XC7A08264	B5SW	ThinkSystem Marvell QL41232 10/25GbE SFP28 2-Port OCP Ethernet Adapter

Some larger configurations of front drive bays limit whether a 10Gb or faster OCP adapter can be installed or whether performance fans must be installed. Details are listed in the following table. See the [Cooling](#) section for performance fan ordering information.

Table 49. Support of OCP adapters based on drive bay configurations

Drive bay configuration	Fan requirements for each supported OCP adapter		
	<ul style="list-style-type: none"> <li>• Broadcom 5719 1Gb</li> <li>• Intel I350 1Gb</li> <li>• Intel X710-T2L</li> </ul>	<ul style="list-style-type: none"> <li>• Broadcom 57414 25Gb</li> <li>• Mellanox CX-4 25Gb</li> <li>• Marvell QL41232 25Gb</li> <li>• Marvell QL41132 10Gb</li> </ul>	<ul style="list-style-type: none"> <li>• Broadcom 57416 2-port</li> <li>• Broadcom 57416+5720</li> <li>• Broadcom 57454 25Gb</li> <li>• Broadcom 57454 10GBT</li> </ul>
<b>3.5-inch front drive bays</b>

8x 2.5-inch NVMe + 16x 2.5-inch SAS/SATA	6x Either fan	6x Performance fan	6x Performance fan

**Installation & removal:** Before installing or removing an OCP adapter, power off your server and disconnect power cords first. See [Support tip HT509768](#) for details.

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:  
<https://lenovopress.com/servers/options/ethernet>

The following table lists additional supported network adapters that can be installed in the regular PCIe slots.

Table 50. Supported PCIe Network Adapters

Part number	Feature code	Description	Slots supported	Maximum supported
Gigabit Ethernet				
7ZT7A00484	AUZV	ThinkSystem Broadcom 5719 1GbE RJ45 4-Port PCIe Ethernet Adapter	1-8	8

† Broadcom 57454 10/25GbE SFP28 4-port PCIe Ethernet Adapter is currently only supported CTO, not supported as a field upgrade option

\* For these adapters, high performance cooling fans must be installed. See the [Cooling](#) section for details.

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:

<https://lenovopress.com/servers/options/ethernet>

## Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by the SR655.

Note that the Emulex LPe35000 adapters are supported either with EPYC 7002 "Rome" processors or with EPYC 7003 "Milan" processors, as indicated in the table.

Table 51. Fibre Channel HBAs

Part number	Feature code	Description	EPYC 7002	EPYC 7003	Slots supported	Maximum supported
<b>32 Gb Fibre Channel HBAs</b>						
4XC7A08250	B5SX	ThinkSystem Emulex LPe35000 32Gb 1-port PCIe Fibre Channel Adapter	Yes	No	1-2, 4-8	7

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters category:

<https://lenovopress.com/servers/options/hba>

## SAS adapters for external storage

The following table lists SAS HBAs and RAID adapters supported by SR655 server for use with external storage.

Table 52. Adapters for external storage

Part number	Feature code	Description	Slots supported	Maximum supported
SAS HBAs				
7Y37A01090	AUNR	ThinkSystem 430-8e SAS/SATA 12Gb HBA	1-8	8
7Y37A01091	AUNN	ThinkSystem 430-16e SAS/SATA 12Gb HBA	1-8	8
External RAID adapters				
7Y37A01087	AUNQ	ThinkSystem RAID 930-8e 4GB Flash PCIe 12Gb Adapter	1-8	4*

\* See configuration rules below

### Configuration rules

The following configuration rules apply to the use of the RAID 930-8e adapter and the flash power module (supercaps) that each adapter requires:

- If the 3.5-inch mid-chassis drive cage is configured, then the maximum number of flash power modules (and therefore the maximum number of 930-8e adapters) is 2
- If one or more GPUs are installed, then the maximum number of flash power modules and 930-8e adapters is 3.
- If any internal RAID adapters with flash power modules are installed, the maximum number of 930-8e adapters supported is further reduced by that number.

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters and RAID adapters categories:

<https://lenovopress.com/servers/options/hba>

<https://lenovopress.com/servers/options/raid>

The following table compares the specifications of the external SAS HBAs and RAID adapters.

Table 53. Comparison of external storage adapters

Feature	430-8e	430-16e	930-8e
Adapter type	HBA	HBA	External RAID
Part number	7Y37A01090	7Y37A01091	7Y37A01087
Controller chip	LSI SAS3408	LSI SAS3416	LSI SAS3516
Broadcom equivalent	HBA 9400-8e	HBA 9400-16e	MegaRAID 9480-8e
Host interface	PCIe 3.0x8	PCIe 3.0x8	PCIe 3.0x8
Port interface	12 Gb SAS	12 Gb SAS	12 Gb SAS
Number of ports	8	16	8
Port connectors	2x Mini-SAS HD SFF8644	4x Mini-SAS HD SFF8644	2x Mini-SAS HD SFF8644
Drive interface	SAS/SATA	SAS/SATA	SAS,SATA
Drive type	HDD/SSD/SED*	HDD/SSD/SED*	HDD,SED,SSD
Hot-swap drives	Yes	Yes	Yes
Maximum devices	1024	1024	216
RAID levels	None	None	0/1/10/5/50/6/60
JBOD mode	Yes	Yes	Yes
Cache	None	None	4GB (Standard)
CacheVault cache protection	None	None	Yes (Flash)
Performance Accelerator (FastPath)	No	No	Yes
SSD Caching (CacheCade Pro 2.0)	No	No	No
SED support*	Yes	Yes	Yes

\* SAS HBAs support SEDs (self-encrypting drives) by using software on the server and simply passing SED commands through the HBA to the drives. SED support by RAID controllers is provided using the built-in MegaRAID SafeStore functionality of the adapter.

## Flash storage adapters

The SR655 supports the PCIe Flash Storage adapters listed in the following table.

Table 54. Flash Storage Adapters

Part number	Feature code	Description	Slots supported	Maximum supported
Mainstream NVMe PCIe Adapters - Optimized for mixed-intensive application workloads with an endurance of 3-5 DWPD.				
4XB7A38234	BCGJ	ThinkSystem HHHH Kioxia CM5-V 1.6TB Mainstream NVMe PCIe3.0 x4 Flash Adapter	1-8	6
4XB7A38237	BCGK	ThinkSystem HHHH Kioxia CM5-V 3.2TB Mainstream NVMe PCIe3.0 x4 Flash Adapter	1-8	6
4XB7A38240	BCGL	ThinkSystem HHHH Kioxia CM5-V 6.4TB Mainstream NVMe PCIe3.0 x4 Flash Adapter	1-8	6
4XB7A14075	B8JH	ThinkSystem HHHH PM1735 1.6TB Mainstream NVMe PCIe 4.0 x8 Flash Adapter	1-8	6
4XB7A14076	B8HW	ThinkSystem HHHH PM1735 3.2TB Mainstream NVMe PCIe 4.0 x8 Flash Adapter	1-8	6
4XB7A14077	B96M	ThinkSystem HHHH PM1735 6.4TB Mainstream NVMe PCIe 4.0 x8 Flash Adapter	1-8	6

For details about these adapters, see the Lenovo Press product guides in the Flash Adapters category:  
<https://lenovopress.com/servers/options/ssdadapter>

### Configuration rules

The following configuration requirements must be met when installing flash storage adapters:

- GPU adapters are not supported.
- Processor TDP greater than 155W is not supported
- Ambient temperature 35 °C or lower
- Performance fans are required and will be derived by the configurator for configure-to-order builds.
- When adding Flash adapters as field upgrades, you will be required to replace all standard fans with performance fan modules. The ordering part number is listed in the following table - you will be required to order 6 fans.

Table 55. Performance fan upgrade for Flash adapters

Part number	Feature code	Description	Maximum Supported
4F17A14484	B5W3	ThinkSystem SR655 Performance Fan Module	6

## GPU adapters

The SR655 supports the following graphics processing units (GPUs).

Table 56. Supported GPUs

Part number	Feature code	Description	Slots supported	Maximum supported
<b>Double-width GPUs</b>				
4X67A13135	BEL5	ThinkSystem NVIDIA A100 40GB PCIe Gen4 Passive GPU	1,4,7*	3
4X67A13124	BB2E	ThinkSystem NVIDIA Tesla V100S 32GB PCIe Passive GPU	1,4,7*	3
4C57A09498	B1JY	ThinkSystem NVIDIA Tesla V100 16GB PCIe Passive GPU	1,4,7*	3
4X67A12088	B34S	ThinkSystem NVIDIA Tesla V100 32GB PCIe Passive GPU	1,4,7*	3
<b>Single-width GPUs</b>				
4X67A14926	B4YB	ThinkSystem NVIDIA Tesla T4 16GB PCIe Passive GPU	1,2,4,5,7,8	6**
4X67A11584	B31D	ThinkSystem NVIDIA Quadro P620 2GB PCIe Active GPU	1,2,4,5,7,8	6

\* When installed, the adjacent slot (2, 5, or 8 respectively) will not be usable

\*\* 8x NVIDIA T4 are supported via Special Bid

For information about these GPUs, see the ThinkSystem GPU Summary, available at:

<https://lenovopress.com/lp0768-thinksystem-thinkagile-gpu-summary>

The following figure shows the slots where double-wide (top image) and single-wide (bottom) are installed.

Figure 11. Slots used for GPUs

### Configuration rules

The following configuration requirements must be met when installing GPUs:

- All GPUs installed must be identical
- Double-wide GPUs are installed in the top slots of each riser (see [I/O expansion](#) for the location of the risers and slots). The adjacent slots are not available for use.
- For double-wide GPUs and the T4 GPU, the following front drive bay restrictions apply:
  - Maximum of 8x 3.5-inch front drive bays supported (12 bays not supported)
  - Maximum of 16x 2.5-inch front drive bays supported (24 bays not supported)
- Rear drive bays and mid-chassis drive bays are not supported.
- Flash storage adapters are not supported.

- 1600W power supplies (or in some configurations, 1100W power supplies) are required.
- Processor TDP and ambient temperature limitations are listed in the following table.

Table 57. Processor and thermal requirements for GPUs

GPUs installed	Front drive bays	Maximum processor TDP	Maximum ambient temperature
6x T4 GPUs	8x 3.5-inch SAS/SATA	200W	35°C
6x T4 GPUs	8x 3.5-inch SAS/SATA	280W (no restriction)	30°C
6x T4 GPUs	8x 2.5-inch SAS/SATA 16x 2.5-inch SAS/SATA	280W (no restriction)	35°C
6x P620 GPUs	8x 3.5-inch SAS/SATA 12x 3.5-inch SAS/SATA 8x 2.5-inch SAS/SATA 16x 2.5-inch SAS/SATA 24x 2.5-inch SAS/SATA	280W (no restriction)	35°C
3x V100 GPUs 3x V100S GPUs 3x A100 GPUs	8x 3.5-inch SAS/SATA 8x 2.5-inch SAS/SATA 16x 2.5-inch SAS/SATA	280W (no restriction)	30°C

When GPUs are installed, the necessary riser cards will be derived. The following table shows the riser cards for double-wide GPUs. In such a configuration, slots 1, 4, 7 are x16 used by the GPUs, slots 2, 5, 8 are inaccessible. The remaining slots 3 and 6 are available for x8 adapters.

**NVIDIA A100 support:** When installing an NVIDIA A100 GPU as a field upgrade to either Slot 4 or Slot 7, Riser 2 Kit V2 (4XF7A72372) or Riser 3 Kit V2 (4XF7A72373) is required. The previous riser kits (4XH7A09840 or 4XH7A09842, now withdrawn) are not supported.

Table 58. Riser cards for double-wide GPUs

Riser choice	Part number	Feature code	Description
Riser 1: x16,NC,NC	4XH7A09834	B69R	ThinkSystem SR655 x16 PCIe 2U Riser 1
Riser 2: x16,x8,x8	4XF7A72372	B5VU	ThinkSystem SR655 x16/x8/x8 PCIe Riser 2 FH/LP Kit V2
Riser 3: x16,x16	4XF7A72373	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser 3 Kit V2

The following table shows the riser cards for 6x single-wide GPUs. With 6 GPUs installed, slots 1, 2, 4, 5, 7, 8 are x16 slots used by the GPUs. The remaining slots 3 and 6 are not connected.

Table 59. Riser cards for 6x single-wide GPUs

Riser choice	Part number	Feature code	Description
Riser 1: x16,x16,NC	4XH7A09837	B5VZ	ThinkSystem SR655 x16/x16 PCIe Riser1
Riser 2: x16,x16,NC	4XH7A09839	B5VY	ThinkSystem SR655 x16/x16 PCIe Riser2
Riser 3: x16,x16	4XF7A72373	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser 3 Kit V2

Under Special Bid conditions, the server supports 8x NVIDIA T4 GPUs. The following table shows the riser cards for 8x NVIDIA T4 GPUs. With 8 GPUs installed, all rear PCI slots (slots 1-8) are used by the GPUs. Note that four of the GPUs are connected using x8 host interfaces.

Table 60. Riser cards for 8x single-wide GPUs (Special Bid only)

Riser choice	Part number	Feature code	Description
Riser 1: x16,x8,x8	4XH7A09838	B5VX	ThinkSystem SR655 x16/x8/x8 PCIe Riser1
Riser 2: x16,x8,x8	4XF7A72372	BFV6	ThinkSystem SR655 x16/x8/x8 PCIe Riser 2 FH/LP Kit V2
Riser 3: x16,x16	4XF7A72373	B5W1	ThinkSystem SR655 x16/x16 PCIe Riser 3 Kit V2

## GPU field upgrades

A cooling kit, DIMM fillers and auxiliary power cable kits may be required for GPU field upgrades.

When ordering GPUs as part of a CTO configuration, the necessary cooling features are automatically selected as part of the order. However when ordering the GPUs as field upgrades, you will need to also order the necessary thermal kit. One part number is needed per server.

- 4H47A38664 is for NVIDIA T4 upgrades
- 4H47A38663 is for V100/V100S GPU upgrades

**NVIDIA P620 GPUs:** A thermal kit is not required when installing NVIDIA Quadro P620 GPUs.

Table 61. Field upgrade kits for GPUs

Part number	Description	Quantity required
4H47A38664	<p>ThinkSystem SR655 Option T4 GPU Upgrade and Thermal Kit</p> <ul style="list-style-type: none"> <li>• 1U Performance Heatsink (replaces existing heatsink)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• GPU air baffle</li> <li>• 3x additional air baffles for NVIDIA T4 GPUs</li> </ul> <p><b>Tip:</b> Some components may not be needed in certain configurations. Consult the SR655 Setup Guide for information.</p>	1
4H47A38663	<p>ThinkSystem SR655 Option GPU Upgrade and Thermal Kit</p> <ul style="list-style-type: none"> <li>• 1U Performance Heatsink (replaces existing heatsink)</li> <li>• 6x Performance fans (replaces existing fans)</li> <li>• GPU air baffle</li> <li>• 3x additional air baffles (only needed for FHHL adapters)</li> </ul>	1

When a GPU is added as a field upgrade, all empty DIMM slots must have a dummy DIMM blank installed in each DIMM slot, to ensure the optimal air flow. Ordering information is in the following table.

Table 62. ThinkSystem Dummy DIMM Kit

Part number	Description	Quantity required
4M27A11810	ThinkSystem Dummy DIMM Package Kit (contains 24 dummy memory DIMMs)	1

When ordering double-wide GPUs as part of a CTO configuration, the necessary auxiliary power cables are automatically selected as part of the order. However when ordering the GPUs as field upgrades, you will need to also order the power cable separately. One part number contains 3 cables and only 1 needed per server.

**Note:** The T4 and P620 GPUs do not require an auxiliary power cable.

Table 63. GPU auxiliary power cable kit

Part number	Description	Quantity required
4X97A59853	ThinkSystem SR655 GPU Cable Kit <ul style="list-style-type: none"><li>• 2x 350mm GPU Power Cable (GPU in Riser 1 or 2)</li><li>• 1x 250mm GPU Power Cable (GPU in Riser 3)</li></ul>	1

## Cooling

The SR655 server has six 60 mm hot-swap fans and either 5 or 6 fans are standard depending on the configuration. The server offers N+1 redundancy, meaning that one fan can fail and the server still operates normally. The server also has one additional fan integrated in each of the two power supplies.

Under all of the following conditions, only 5 fans are required:

- No M.2 Module
- No internal riser slot
- No mid drive bays
- No GPUs
- No flash storage adapter
- No OCP adapter
- No Riser 3

For all other configurations, all 6 fans are required.

Table 64. Fan ordering information

Part number	Feature code	Description	Maximum supported
4F17A14485	B5W4	ThinkSystem SR655 2U Fan Module	6
4F17A14484	B5W3	ThinkSystem SR655 Performance Fan Module	6

Some configurations, such as the use of high-TDP processors or the addition of mid drive bays, rear drive bays, GPUs, flash storage adapters, M.2 drives, or Ethernet adapters of 100 GbE or higher, or Ethernet adapters of 4-port 10GbE or 10/25GbE or higher, will require the use of higher-RPM performance fans and an upgraded processor heatsink.

For configure-to-order builds, the DCSC configurator will automatically select the required components. For field upgrades, the option part numbers may include the upgraded components when they are needed, or you may need to order the performance fans separately.

See these sections for details:

- [Drive bay upgrade kits](#)
- [OCP adapters](#)
- [GPU upgrade kits](#)
- [Flash storage adapters](#)
- [PCIe network adapters](#)

## Power supplies

The server supports up to two redundant hot-swap power supplies.

The power supply choices are listed in the following table. Both power supplies used in server must be identical.

**Tip:** Use Lenovo Capacity Planner to determine exactly what power your server needs:

<https://datacentersupport.lenovo.com/us/en/solutions/lvno-lcp>

Table 65. Power supply options

Part number	Feature code	Description	Maximum supported	110V AC	220V AC	240V DC China only	-48V DC
<b>AC power input</b>							
7N67A00882	AVWC	ThinkSystem 550W (230V/115V) Platinum Hot-Swap Power Supply	2	Yes	Yes	Yes	No
7N67A00883	B6XT	ThinkSystem 750W (230/115V) Platinum Hot-Swap Power Supply	2	Yes	Yes	Yes	No
7N67A00884	B6XS	ThinkSystem 750W (230V) Titanium Hot-Swap Power Supply	2	No	Yes	Yes	No
7N67A00885	AVWF	ThinkSystem 1100W (230V/115V) Platinum Hot-Swap Power Supply	2	Yes	Yes	Yes	No
7N67A00886	AVWG	ThinkSystem 1600W (230V) Platinum Hot-Swap Power Supply	2	No	Yes	Yes	No
<b>-48V DC input power</b>							
4P57A15363*	B4Z5*	ThinkSystem 1100W -48V DC Power Supply	2	No	No	No	Yes

\* -48V DC power supply is only available via Special Bid

Dual-voltage power supplies are auto-sensing and support both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. For China customers, all AC power supplies support 240V DC.

All supported AC power supplies have a C14 connector. The -48V DC power supply has a Weidmuller TOP 4GS/3 7.6 terminal.

Power supply options do not include a line cord.

For server configurations, the inclusion of a power cord is model dependent. Configure-to-order models can be configured without power cords if desired.

## Power cords

Line cords and rack power cables with C13 connectors can be ordered as listed in the following table.

**110V customers:** If you plan to use the ThinkSystem 1100W power supply with a 110V power source, select a power cable that is rated above 10A. Power cables that are rated at 10A or below are not supported with 110V power.

Table 66. Power cords

For the -48V DC Power Supply, the following power cable is supported.

Table 67. -48V DC power cable

Part number	Feature code	Description
CTO only	B93F	ThinkSystem 2.5m,DC Cable

## Integrated virtualization

The server supports booting from an operating system or hypervisor installed on an M.2 solid-state drive. See the [M.2 drives section](#) for details and the list of available options.

You can download supported VMware vSphere hypervisor images from the following web page and load it on the M.2 drive using the instructions provided:

[https://vmware.lenovo.com/content/custom\\_iso/](https://vmware.lenovo.com/content/custom_iso/)

## Systems management

The server contains an integrated service processor which provides advanced control, monitoring, and alerting functions. The service processor is based on the ASPEED AST2500 baseboard management controller (BMC).

## Local management

The SR655 offers a front operator panel with key LED status indicators, as shown in the following figure.

**Tip:** The Network LED only shows network activity of the installed OCP network adapter.

Figure 12. Front operator panel

The server offers light path diagnostics. If an environmental condition exceeds a threshold or if a system component fails, the ASPEED service processor lights LEDs inside the server to help you diagnose the problem and find the failing part. The SR655 has fault LEDs next to the following components:

- Each memory DIMM
- Each drive bay
- Each system fan

- Each power supply

The front of the server also houses an information pull-out tab (also known as the network access tag). See [Figure 2](#) for the location. A label on the tab shows the network information (MAC address and other data) to remotely access the service processor.

## Remote management

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (traps and gets)
- Redfish support to the Redfish Schema 2018.1 (DMTF DSP0266 1.5.0 compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for the device being used - laptop, tablet, phone) with NLS support

Remote connectivity is provided by a dedicated 1Gb Ethernet management port (see the locations of ports at the rear of the server in the [Components and connectors](#) section). Remote management can also be performed via the first port of the installed OCP adapter using the shared management capability of the adapter via NC-SI. NC-SI connectivity is 10/100 Mbps Ethernet.

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 68. IPMI-over-LAN settings

Part number	Feature code	Description
CTO only	B7XZ	Disable IPMI-over-LAN (default)
CTO only	B7Y0	Enable IPMI-over-LAN

A virtual presence (iKVM remote control and virtual media) capability also comes standard in the server for remote server management.

The remote control functions include the following:

- Remotely viewing video with graphics resolutions up to 1920x1080 at 60 Hz and 32 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- Full remote administration with seamless access from UEFI POST through to operating system load
- OS independent - no drivers or OS agents required
- Support for up to four remote users simultaneously

The remote media functions include:

- USB 2.0 compliant connectivity
- Up to four simultaneously mounted diskette, HDD, CD, DVD, USB flash drive, or image files
- Optional encryption on connections
- Requires Java Runtime Environment (JRE) 1.4.2 or later
- Can be used as a boot device
- Persistent session across system reset (but not across AC power loss)

## Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions.

Lenovo XClarity Administrator provides agent-free hardware management for ThinkSystem servers, in addition to other Lenovo servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Lenovo XClarity Administrator supports only a subset of functions with the SR655:

- Discovery
- Inventory
- Monitoring & alerting
- Call home

Functions that are not supported are:

- Centralized user management
- Cryptography modes, server certificates, and encapsulation
- Configuration patterns
- Operating system deployment
- Firmware updates
- Control of the Location LED

For more information about Lenovo XClarity Administrator, including ordering part numbers, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

## Lenovo XClarity Provisioning Manager Lite

Lenovo XClarity Provisioning Manager Lite (LXPM Lite) v2 is an embedded application for system setup and firmware upgrades. The tool is accessed during system boot by pressing F11 when prompted.

The software tool provides the following functions:

- Easy-to-use, language-selectable graphical interface
- Integrated help system
- Automatic hardware detection
- Ability to install an operating system and device drivers either in an unattended mode or manually
- Ability to clone the settings in one server to other similarly configured Lenovo servers
- Supports RAID setup
- Diagnostics for memory test, hard disk drive test, and RAID log collection.

The LXPM Lite user interface is shown in the following figure.

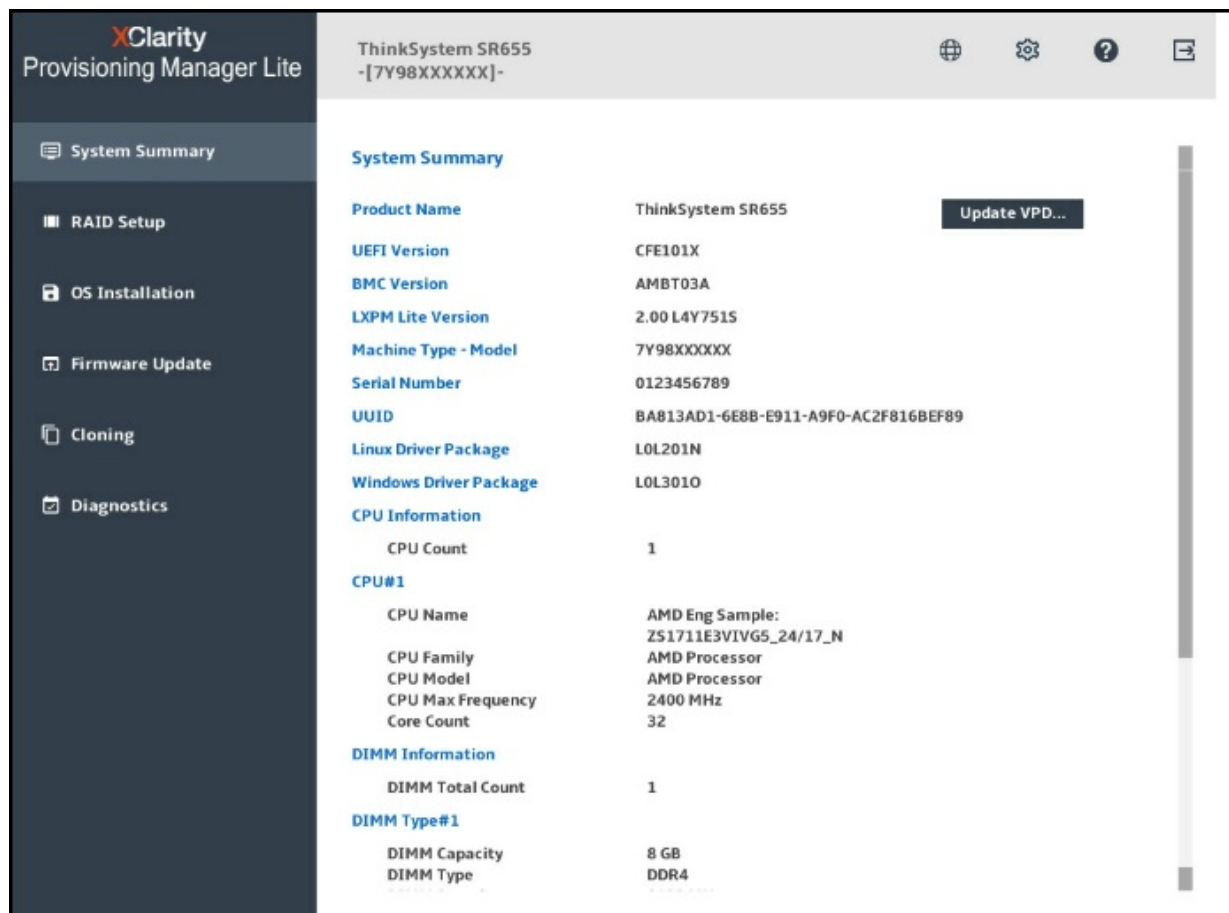

Figure 13. Lenovo XClarity Provisioning Manager Lite user interface (pre-production server)

For more information about LXPM Lite, see the following support page:

<https://datacentersupport.lenovo.com/us/en/solutions/HT507133>

## Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- Lenovo Essentials OneCLI

OneCLI is a collection of server management tools that uses a command line interface program to collect full system health information (including health status).

**Note:** OneCLI on the SR655 is limited to inventory and log collection functions only. Functions such as configuring system settings, and updating system firmware and drivers are not supported.

- Lenovo Essentials Bootable Media Creator

The Bootable Media Creator (BoMC) tool is used to create bootable media for offline firmware update.

**Note:** UpdateXpress is not supported on the SR655.

For more information and downloads, visit the Lenovo XClarity Essentials web page:

<http://support.lenovo.com/us/en/documents/LNVO-center>

## Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager provides a stand-alone, web-based agent-less power management console that provides real time data and enables you to observe, plan and manage power and cooling for Lenovo servers. Using built-in intelligence, it identifies server power consumption trends and ideal power settings and performs cooling analysis so that you can define and optimize power-saving policies.

Lenovo XClarity Energy Manager offers the following capabilities:

- Monitors room, row, rack, and device levels in the data center
- Reports vital server information, such as power, temperature and resource utilization
- Monitors inlet temperature to locate hot spots, reducing the risk of data or device damage
- Provides finely-grained controls to limit platform power in compliance with IT policy
- Generates alerts when a user-defined threshold is reached

**Note:** In the SR655, system power capping function is not supported on Lenovo XClarity Energy Manager.

Lenovo XClarity Energy Manager is an optional software component that is licensed on a per managed node basis, that is, each managed server requires a license. To manage systems, a node license pack should be purchased. The following table lists the geo-specific Lenovo XClarity Energy Manager software license options.

Table 69. Lenovo XClarity Energy Manager software options

Description	Part number (NA, AP, Japan)*	Part number (EMEA, LA)**	Quantity
Lenovo XClarity Energy Manager, 1 Node w/ 1 Yr S&S	01DA225	01DA228	1

For more information, refer to the Lenovo XClarity Energy Manager web page:

<http://datacentersupport.lenovo.com/us/en/solutions/Invo-lxem>

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:  
<http://datacentersupport.lenovo.com/us/en/solutions/Invo-lcp>

## Security

The SR655 server offers the following security features:

- Administrator and power-on password
- Integrated Trusted Platform Module (TPM) supporting TPM 2.0
- Optional Nationz TPM 2.0, available only in China (CTO only)
- Optional chassis intrusion switch (CTO only)
- Optional lockable front security bezel

The optional lockable front security bezel is shown in the following figure and includes a key that enables you to secure the bezel over the drives and system controls thereby reducing the chance of unauthorized or accidental access to the server.

Figure 14. Lockable front security bezel

The dimensions of the security bezel are:

- Width: 437 mm (17.2 in.)
- Height: 87 mm (3.4 in.)
- Width: 23 mm (0.9 in.)

The following table lists the security options for the SR655.

**Intrusion switch support:** The intrusion switch is mounted on the Riser 2 cage. As a result, the intrusion switch requires a 2U riser in the Riser 2 position (either riser B5VU or B5VY) and is not supported if the server has 3.5-inch rear drive bays configured.

Table 70. Security features

Part number	Feature code	Description
None*	B22N	ThinkSystem Nationz Trusted Platform Module v2.0 (China customers only)
None*	B9V3	ThinkSystem Intrusion Switch Cable
7Z17A02580	AURX	ThinkSystem 2U Security Bezel

\* Not available as a field upgrade. The component is CTO or in pre-configured models only.

## Rack installation

The following table lists the rack installation options that are available for the server.

The VGA Upgrade Kit allows you to upgrade your server by adding a VGA video port to the front of the server (if the server does not already come with a front VGA port). When the front VGA is in use, the rear VGA port is automatically disabled.

Table 71. Rack installation options

Option	Feature Code	Description
Optional front VGA port		
7Z17A02578	B6XX	ThinkSystem 2U EIA Latch w/ VGA Upgrade Kit (adds a VGA port to the front of the server)
4-post rail kits		
4M17A13564	B42B	ThinkSystem Toolless Friction Rail v2
7M27A05702	AXCA	ThinkSystem Toolless Slide Rail
7M27A05700	AXCH	ThinkSystem Toolless Slide Rail Kit with 2U CMA
Cable management arm		
7M27A05698	B135	ThinkSystem 2U CMA Upgrade Kit for Toolless Slide Rail

The following table summarizes the rail kit features and specifications.

Table 72. Rail kit features and specifications summary

Feature	ThinkSystem Toolless Slide Rail	ThinkSystem Toolless Friction Rail v2
Part number	7M27A05702 (no CMA) 7M27A05700 (with CMA)	4M17A13564
Rail type	Full-out slide (ball bearing)	Half-out slide (friction)
Toolless installation	Yes	Yes
Cable Management Arm (CMA) support	Yes <ul style="list-style-type: none"> <li>Standard on 7M27A05700</li> <li>For 7M27A05702, use 7M27A05698</li> </ul>	No
In-rack server maintenance	Yes	No
1U PDU support	Yes	Yes
0U PDU support	Limited*	Limited**
Rack type	Lenovo and IBM 4-post, IEC standard-compliant	Lenovo and IBM 4-post, IEC standard-compliant
Mounting holes	Square or round	Square or round
Mounting flange thickness	2 mm - 3.3 mm (0.08 - 0.13 in.)	2 mm - 3.3 mm (0.08 - 0.13 in.)
Distance between front and rear mounting flanges	610 mm - 864 mm (24 - 34 in.)	610 mm - 864 mm (24 - 34 in.)
Rail length***	730 mm (28.74 in.)	751 mm (29.6 in.)

\* For 0U PDU support, the rack must be at least 1100 mm (43.31 in.) deep without a CMA, or at least 1200 mm (47.24 in.) deep if a CMA is used.

\*\* For 0U PDU support with the friction rail kit, the rack must be at least 1000 mm (39.37 in.) deep.

\*\*\* Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail.

**Rack shipment:** The following restrictions apply when shipping the SR655 in a rack:

- No 2.5-inch rear drive bays
- No mid drive bays
- Maximum of 1x double-width GPU installed

## Operating system support

The SR655 with EPYC 7003 processors supports the following operating systems:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Red Hat Enterprise Linux 8.3
- SUSE Linux Enterprise Server 12 SP5
- SUSE Linux Enterprise Server 12 Xen SP5
- SUSE Linux Enterprise Server 15 SP2
- SUSE Linux Enterprise Server 15 Xen SP2
- VMware ESXi 6.7 U3
- VMware ESXi 7.0 U2

The SR655 with EPYC 7002 processors supports the following operating systems:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Red Hat Enterprise Linux 7.6
- Red Hat Enterprise Linux 7.7
- Red Hat Enterprise Linux 7.8
- Red Hat Enterprise Linux 7.9
- Red Hat Enterprise Linux 8.0
- Red Hat Enterprise Linux 8.1
- Red Hat Enterprise Linux 8.2
- Red Hat Enterprise Linux 8.3
- SUSE Linux Enterprise Server 12 SP4
- SUSE Linux Enterprise Server 12 SP5
- SUSE Linux Enterprise Server 12 Xen SP4
- SUSE Linux Enterprise Server 12 Xen SP5
- SUSE Linux Enterprise Server 15 SP1
- SUSE Linux Enterprise Server 15 SP2
- SUSE Linux Enterprise Server 15 Xen SP1
- SUSE Linux Enterprise Server 15 Xen SP2
- VMware ESXi 6.5 U3
- VMware ESXi 6.7 U3
- VMware ESXi 7.0
- VMware ESXi 7.0 U1
- VMware ESXi 7.0 U2

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

- SR655 with EPYC 7003: <https://lenovopress.com/osig#servers=sr655-7y00-7z01-epyc-7003>
- SR655 with EPYC 7002: <https://lenovopress.com/osig#servers=sr655-7y00-7z01-epyc-7002>

For configure-to-order configurations, the server can be preloaded with VMware ESXi installed on M.2 cards. Ordering information is listed in the following table.

Table 73. VMware ESXi preload

Part number	Feature code	Description
CTO only	B6U0	VMware ESXi 6.5 U3 (factory installed) (EPYC 7002 only)
CTO only	B88T	VMware ESXi 6.7 U3 (factory installed)
CTO only	BBZG	VMware ESXi 7.0 (Factory Installed) (EPYC 7002 only)
CTO only	BE5E	VMware ESXi 7.0 U1 (Factory Installed) (EPYC 7002 only)

## Physical and electrical specifications

The SR655 has the following overall physical dimensions, excluding components that extend outside the standard chassis, such as EIA flanges, front security bezel (if any), and power supply handles:

- Width: 445 mm (17.5 inches)
- Height: 87 mm (3.4 inches)
- Depth: 764 mm (30.1 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 74. Detailed dimensions

Dimension	Description
482 mm	$X_a$ = Width, to the outsides of the front EIA flanges
435 mm	$X_b$ = Width, to the rack rail mating surfaces
445 mm	$X_c$ = Width, to the outer most chassis body feature
87 mm	$Y_a$ = Height, from the bottom of chassis to the top of the chassis
698 mm	$Z_a$ = Depth, from the rack flange mating surface to the rearmost I/O port surface
730 mm	$Z_b$ = Depth, from the rack flange mating surface to the rearmost feature of the chassis body
727 mm	$Z_c$ = Depth, from the rack flange mating surface to the rearmost feature such as power supply handle
34 mm	$Z_d$ = Depth, from the forwardmost feature on front of EIA flange to the rack flange mating surface
47 mm	$Z_e$ = Depth, from the front of security bezel (if applicable) or forwardmost feature to the rack flange mating surface

Figure 15. Server dimensions

The shipping dimensions (cardboard packaging) of the SR655 are as follows:

- Width: 592 mm (23.3 inches)
- Height: 282 mm (11.1 inches)
- Depth: 992 mm (39.1 inches)

Weight:

- Maximum weight: 35.4 kg (78.0 lb)

Electrical specifications for AC power supplies:

- Electrical - Input voltage
  - 100 - 127 (nominal) V AC, 50 Hz or 60 Hz
  - 200 - 240 (nominal) V AC, 50 Hz or 60 Hz
  - 180 - 300 V DC (China only)
- Inlet current:
  - 100-127 V:
    - 550W power supply: 6.2 A
    - 750W power supply: 8.4 A
    - 1100W power supply: 12 A
  - 200-240 V:
    - 550W power supply: 3.0 A
    - 750W power supply: 4.1 A
    - 1100W power supply: 6 A
    - 1600W power supply: 8.7 A

Electrical specifications for DC input power supply:

- Input voltage: -48 to -60 Vdc
- Inlet current (1100W power supply): 26 A

## Operating environment

The ThinkSystem SR655 server complies with ASHRAE Class A2 specifications, and depending on the hardware configuration, also complies with ASHRAE Class A3 and Class A4 specifications. System performance may be impacted when operating temperature is outside ASHRAE A2 specification.

The restrictions to ASHRAE A2 support are as follows:

- With 24x NVMe front drive bays + 8x mid-chassis drive bays, ambient temperature cannot exceed 30°C
- With 8x 3.5-inch front drives + 6x single-wide GPUs, ambient temperature cannot exceed 30°C
- With 8x 3.5-inch or 8x 2.5-inch front drives + 3x double-wide GPUs, ambient temperature cannot exceed 30°C

See the [GPU adapters](#) section for details.

To comply with ASHRAE A3 and A4 specifications, the server models must meet the following hardware configuration requirements:

- Processor TDP greater than 155W not supported; the only exception is a configuration with 24x 2.5-inch front drive bays, where the processor TDP cannot exceed 120W.
- No support for 12x 3.5-inch front drive bays (the 8x 3.5-inch bay configuration is supported)
- No support for NVMe drives
- No support for rear drive bays or mid drive bays
- No support for GPUs
- No support for M.2
- No support for PCIe flash storage adapters
- No support for OCP networking adapters of 10Gb or faster
- No support for Ethernet adapters of 10GbE or faster
- No support for DIMMs of 128GB or larger capacity

The following additional restrictions apply if the server has a 280W processor installed:

- With either of the following drive bay configurations, slots 1, 2, 3 and the OCP slot cannot be used, and ambient temperature cannot exceed 35°C:
  - 12x 3.5-inch SAS/SATA front drives (no mid drives, no rear drives)
  - 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay front drives (no mid drives, no rear drives)
- With either of the following drive bay configurations, slot 3 and the OCP slot cannot be used, and ambient temperature cannot exceed 30°C:
  - 12x 3.5-inch SAS/SATA front drives + 4x 3.5-inch rear drives (no mid drives)
  - 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay front drives + 4x 3.5-inch rear drives (no mid drives)
- With any of the following drive bay configurations, the following OCP adapters cannot be used and ambient temperature cannot exceed 35°C:
  - 24x 2.5-inch SAS/SATA (no mid drives, no rear drives)
  - 24x 2.5-inch NVMe (no mid drives, no rear drives)
  - 8x 2.5-inch NVMe + 16x 2.5-inch SAS/SATA (no mid drives, no rear drives)
  - ThinkSystem Broadcom 57454 10GBASE-T 4-port OCP Ethernet Adapter, 4XC7A08240
  - ThinkSystem Broadcom 57416 10GBASE-T 2-port + 5720 1GbE 2-port OCP Ethernet Adapter, 4XC7A08239
  - ThinkSystem Broadcom 57416 10GBASE-T 2-port OCP Ethernet Adapter, 4XC7A08236
  - ThinkSystem Broadcom 57454 10/25GbE SFP28 4-port OCP Ethernet Adapter, 4XC7A08242
- The following drive bay configurations are not supported:

- 12x 3.5-inch SAS/SATA front drives + any mid drives
- 8x 3.5-inch SAS/SATA + 4x 3.5-inch AnyBay front drives + any mid drives

The server is supported in the following environment:

- Air temperature:
  - Operating:
    - ASHRAE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
    - ASHRAE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
    - ASHRAE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
  - Server off: 5°C to 45°C (41°F to 113°F)
  - Shipment/storage: -40°C to 60°C (-40°F to 140°F)
- Maximum altitude: 3,050 m (10,000 ft)
- Relative Humidity (non-condensing):
  - Operating
    - ASHRAE Class A2: 8% to 80%; maximum dew point: 21°C (70°F)
    - ASHRAE Class A3: 8% to 85%; maximum dew point: 24°C (75°F)
    - ASHRAE Class A4: 8% to 90%; maximum dew point: 24°C (75°F)
  - Shipment/storage: 8% to 90%

The server generates the following heat/thermal output:

- Minimum configuration: 421 BTU/hr, 123 W
- Maximum configuration: 5606 BTU/hr, 1643 W

The server has the following acoustic noise emissions declaration:

- Sound power level ( $L_{WAd}$ ):
  - Idling: 6.2 Bel (typical), 7.0 Bel (Storage rich), 7.0 Bel (GPU rich)
  - Operating: 6.2 Bel (typical), 7.2 Bel (storage rich), 8.5 Bel (GPU rich)
- Sound pressure level ( $L_{pAm}$ ):
  - Idling: 46 dBA (Typical), 54 dBA (Storage rich), 54 dBA (GPU rich)
  - Operating: 47 dBA (Typical), 56 dBA (Storage rich), 69 dBA (GPU rich)

Notes:

- The sound levels were measured in controlled acoustical environments according to procedures specified by ISO7779 and are reported in accordance with ISO 9296.
- The declared acoustic sound levels are based on the following configurations, which may change depending on configuration/conditions:
  - Typical: 1x 155W CPU, 16x 32GB RDIMM, 16x 2.5" HDD, RAID 930-16i, 10GBASE-T 2-port PCIe Ethernet Adapter, 2x 750W PSU
  - Storage rich: 1x 155W CPU, 16x 64GB RDIMM, 20x3.5" HDD, RAID 930-24i, 10GBASE-T 4-port PCIe Ethernet Adapter, 2x 750W PSU
  - GPU rich: 1x 155W CPU, 16x 64GB RDIMM, 8x 2.5" HDD, RAID 930-8i, 10GBASE-T 4-port PCIe Ethernet Adapter, 3x V100 GPU, 2x 1600W PSU

The server has the following vibration and shock limits:

- Vibration:
  - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
  - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:

- Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
- Non-operating:
  - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces (3x GPU config, 2.5" config)
  - 32 kg - 68 kg: 35 G for 136 in./sec velocity change across 6 surfaces (20x 3.5" HDD config)

Weight information for SR655 measuring in shock & vibration test:

- 3.5"x 12 HS + 3x DW GPU: 31.74 (kg)
- 3.5"x 12 HS + Mid 3.5"x4 HS + Rear 3.5"x4 HS: 35.74 (kg)
- 2.5"x 24 HS + Mid 2.5"x8 HS + Rear 2.5"x4 HS: 29.49 (kg)

## Warranty and Support

The SR655 has a 1-year or 3-year warranty based on the machine type of the system:

- 7Y00 - 1 year warranty
- 7Z01 - 3 year warranty

The standard warranty terms are customer-replaceable unit (CRU) and onsite (for field-replaceable units FRUs only) with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.

Lenovo's additional support services provide a sophisticated, unified support structure for your data center, with an experience consistently ranked number one in customer satisfaction worldwide. Available offerings include:

- **Premier Support**

Premier Support provides a Lenovo-owned customer experience and delivers direct access to technicians skilled in hardware, software, and advanced troubleshooting, in addition to the following:

- Direct technician-to-technician access through a dedicated phone line
- 24x7x365 remote support
- Single point of contact service
- End to end case management
- Third-party collaborative software support
- Online case tools and live chat support
- On-demand remote system analysis

- **Warranty Upgrade (Preconfigured Support)**

Services are available to meet the on-site response time targets that match the criticality of your systems.

- 3, 4, or 5 years of service coverage
- 1-year or 2-year post-warranty extensions
- **Foundation Service:** 9x5 service coverage with next business day onsite response. YourDrive YourData is an optional extra (see below).
- **Essential Service:** 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select countries). Bundled with YourDrive YourData.
- **Advanced Service:** 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select countries). Bundled with YourDrive YourData.

- **Managed Services**

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

- **Technical Account Management (TAM)**

A Lenovo Technical Account Manager helps you optimize the operation of your data center based on a deep understanding of your business. You gain direct access to your Lenovo TAM, who serves as your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. In addition, your TAM will help proactively make service recommendations and manage your service relationship with Lenovo to make certain your needs are met.

- **Enterprise Server Software Support**

Enterprise Software Support is an additional support service providing customers with software support on Microsoft, Red Hat, SUSE, and VMware applications and systems. Around the clock availability for critical problems plus unlimited calls and incidents helps customers address challenges fast, without incremental costs. Support staff can answer troubleshooting and diagnostic questions, address product comparability and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

- **YourDrive YourData**

Lenovo's YourDrive YourData is a multi-drive retention offering that ensures your data is always under your control, regardless of the number of drives that are installed in your Lenovo server. In the unlikely event of a drive failure, you retain possession of your drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The YourDrive YourData service can be purchased in convenient bundles and is optional with Foundation Service. It is bundled with Essential Service and Advanced Service.

- **Health Check**

Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that your systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo Service offerings are region-specific. Not all preconfigured support and upgrade options are available in every region. For information about Lenovo service upgrade offerings that are available in your region, refer to the following resources:

- Service part numbers in Lenovo Data Center Solution Configurator (DCSC):  
<http://dcsc.lenovo.com/#/services>
- Lenovo Services Availability Locator  
<http://lenovolocator.com/>

For service definitions, region-specific details, and service limitations, please refer to the following documents:

- Lenovo Statement of Limited Warranty for Data Center Group (DCG) Servers and System Storage  
<http://pcsupport.lenovo.com/us/en/solutions/ht503310>
- Lenovo Data Center Services Agreement  
<http://support.lenovo.com/us/en/solutions/ht116628>

## Services

Lenovo Services is a dedicated partner to your success. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

**Note:** Some service options may not be available in all countries. For more information, go to <https://www.lenovo.com/systems/services>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

Here's a more in-depth look at what we can do for you:

- **Asset Recovery Services**

Asset Recovery Services (ARS) helps customers recover the maximum value from their end-of-life equipment in a cost-effective and secure way. On top of simplifying the transition from old to new equipment, ARS mitigates environmental and data security risks associated with data center equipment disposal. Lenovo ARS is a cash-back solution for equipment based on its remaining market value, yielding maximum value from aging assets and lowering total cost of ownership for your customers. For more information, see the ARS page, <https://lenovopress.com/lp1266-reduce-e-waste-and-grow-your-bottom-line-with-lenovo-ars>.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

- **Basic Hardware Installation**

Lenovo experts can seamlessly manage the physical installation of your server, storage, or networking hardware. Working at a time convenient for you (business hours or off shift), the technician will unpack and inspect the systems on your site, install options, mount in a rack cabinet, connect to power and network, check and update firmware to the latest levels, verify operation, and dispose of the packaging, allowing your team to focus on other priorities.

- **Deployment Services**

When investing in new IT infrastructures, you need to ensure your business will see quick time to value with little to no disruption. Lenovo deployments are designed by development and engineering teams who know our Products & Solutions better than anyone else, and our technicians own the process from delivery to completion. Lenovo will conduct remote preparation and planning, configure & integrate systems, validate systems, verify and update appliance firmware, train on administrative tasks, and provide post-deployment documentation. Customer's IT teams leverage our skills to enable IT staff to transform with higher level roles and tasks.

- **Integration, Migration, and Expansion Services**

Move existing physical & virtual workloads easily, or determine technical requirements to support increased workloads while maximizing performance. Includes tuning, validation, and documenting ongoing run processes. Leverage migration assessment planning documents to perform necessary migrations.

## **Regulatory compliance**

The SR655 server conforms to the following standards:

- Energy Star 3.0
- FCC: Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 6, Class A
- UL/IEC 60950-1
- CSA C22.2 No. 60950-1
- NOM-019
- Argentina IEC60950-1
- Japan VCCI, Class A
- Australia/New Zealand AS/NZS CISPR 32, Class A; AS/NZS 60950.1
- IEC 60950-1 (CB Certificate and CB Test Report)
- China CCC (GB4943.1), GB9254 Class A, GB17625.1
- Taiwan BSMI CNS13438, Class A; CNS14336-1
- Korea KN32, Class A; KN35
- Russia, Belorussia and Kazakhstan, EAC: TP TC 004/2011(for Safety); TP TC 020/2011(for EMC)
- CE Mark (EN55032 Class A, EN60950-1, EN55024, EN61000-3-2, and EN61000-3-3)
- CISPR 32, Class A
- TUV-GS (EN60950-1 /IEC60950-1, EK1-ITB2000)
- India BIS certification

## External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

**Note:** Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site:

<http://datacentersupport.lenovo.com>

Table 75. External drive enclosures

Description	Part number		
	Worldwide	Japan	PRC
Lenovo Storage D1212 LFF Disk Expansion with Dual SAS IO Modules	4587A11	4587A1J	4587A1C
Lenovo Storage D1224 SFF Disk Expansion with Dual SAS IO Modules	4587A31	4587A3J	4587A3C
Lenovo Storage D3284 4TB x 84 HD Expansion Enclosure	641311F		
Lenovo Storage D3284 6TB x 84 HD Expansion Enclosure	641312F		
Lenovo Storage D3284 8TB x 84 HD Expansion Enclosure	641313F		
Lenovo Storage D3284 10TB x 84 HD Expansion Enclosure	641314F		

For details about supported drives, adapters, and cables, see the following Lenovo Press Product Guides:

- Lenovo Storage D1212 and D1224  
<http://lenovopress.com/lp0512>
- Lenovo Storage D3284  
<http://lenovopress.com/lp0513>

## External storage systems

Lenovo offers the ThinkSystem DE Series and ThinkSystem DM Series external storage systems for high-performance storage. See the DE Series and DM Series product guides for specific controller models, expansion enclosures and configuration options:

- ThinkSystem DE Series Storage  
<https://lenovopress.com/storage/thinksystem/de-series#rt=product-guide>
- ThinkSystem DM Series Storage  
<https://lenovopress.com/storage/thinksystem/dm-series#rt=product-guide>

## External backup units

The server supports both USB-attached RDX backup units and SAS-attached tape drives.

The following table lists the available external SAS tape backup options.

**Tip:** Verify the end-to-end support of an IBM tape backup solution through the IBM System Storage Interoperation Center (SSIC): <http://www.ibm.com/systems/support/storage/ssic>

Table 76. External SAS backup options

Part number	Description
External SAS tape backup drives	
6160S6E	IBM TS2260 Tape Drive Model H6S
6160S7E	IBM TS2270 Tape Drive Model H7S
6160S8E	IBM TS2280 Tape Drive Model H8S
External SAS tape backup autoloaders	
6171S6R	IBM TS2900 Tape Autoloader w/LTO6 HH SAS
6171S7R	IBM TS2900 Tape Autoloader w/LTO7 HH SAS
6171S8R	IBM TS2900 Tape Autoloader w/LTO8 HH SAS
External tape backup libraries	
6741A1F	IBM TS4300 3U Tape Library-Base Unit
SAS backup drives for TS4300 Tape Library	
01KP934	LTO 6 HH SAS Drive
01KP937	LTO 7 HH SAS Drive
01KP953	LTO 8 HH SAS Drive

For more information, see the list of Product Guides in the Backup units category:

<https://lenovopress.com/servers/options/backup>

The following table lists the external RDX backup options available.

Table 77. External RDX dock and cartridges

Part number	Feature code	Description
External RDX docks		
4T27A10725	B32R	ThinkSystem RDX External USB 3.0 Dock (No cartridge included with the drive)
Cartridges		
7TP7A01601	AVF8	ThinkSystem RDX 500GB Cartridge
7TP7A01602	AVF1	ThinkSystem RDX 1TB Cartridge
7TP7A01603	AVF0	ThinkSystem RDX 2TB Cartridge
7TP7A04318	AXD1	ThinkSystem RDX 4TB Cartridge

For more information, see the Lenovo RDX USB 3.0 Disk Backup Solution product guide:

<https://lenovopress.com/tips0894-rdx-usb-30>

## Fibre Channel SAN switches

Lenovo offers the ThinkSystem DB Series of Fibre Channel SAN switches and directors for high-performance storage expansion. See the DB Series product guides for models and configuration options:

- ThinkSystem DB Series SAN Switches and Directors:  
<https://lenovopress.com/storage/switches/rack#rt=product-guide>

## Uninterruptible power supply units

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo.

Table 78. Uninterruptible power supply units

Part number	Description
55941AX	RT1.5kVA 2U Rack or Tower UPS (100-125VAC)
55941KX	RT1.5kVA 2U Rack or Tower UPS (200-240VAC)
55942AX	RT2.2kVA 2U Rack or Tower UPS (100-125VAC)
55942KX	RT2.2kVA 2U Rack or Tower UPS (200-240VAC)
55943AX	RT3kVA 2U Rack or Tower UPS (100-125VAC)
55943KX	RT3kVA 2U Rack or Tower UPS (200-240VAC)
55945KX	RT5kVA 3U Rack or Tower UPS (200-240VAC)
55946KX	RT6kVA 3U Rack or Tower UPS (200-240VAC)
55948KX	RT8kVA 6U Rack or Tower UPS (200-240VAC)
55949KX	RT11kVA 6U Rack or Tower UPS (200-240VAC)
55948PX	RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55949PX	RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55943KT†	ThinkSystem RT3kVA 2U Standard UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55943LT†	ThinkSystem RT3kVA 2U Long Backup UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)
55946KT†	ThinkSystem RT6kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)
5594XKT†	ThinkSystem RT10kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)

† Only available in China and countries in the Asia Pacific region.

For more information, see the list of Product Guides in the UPS category:

<https://lenovopress.com/servers/options/ups>

## Power distribution units

The following table lists the power distribution units (PDUs) that are offered by Lenovo.

Table 79. Power distribution units

Part number	Description
<b>0U Basic PDUs</b>	
00YJ776	0U 36 C13/6 C19 24A/200-240V 1 Phase PDU with NEMA L6-30P line cord
00YJ777	0U 36 C13/6 C19 32A/200-240V 1 Phase PDU with IEC60309 332P6 line cord
00YJ778	0U 21 C13/12 C19 32A/200-240V/346-415V 3 Phase PDU with IEC60309 532P6 line cord

00YJ782	0U 18 C13/6 C19 Switched / Monitored 32A/200-240V/346-415V/3Ph PDU w/ IEC60309 532P6 cord
00YJ783	0U 12 C13/12 C19 Switched and Monitored 48A/200-240V/3Ph PDU w/ IEC60309 460P9 line cord
46M4003	1U 9 C19/3 C13 Switched and Monitored 60A 3 Phase PDU with IEC 309 3P+Gnd line cord
46M4004	1U 12 C13 Switched and Monitored DPI PDU (without line cord)
46M4005	1U 12 C13 Switched and Monitored 60A 3 Phase PDU with IEC 309 3P+Gnd line cord
<b>Ultra Density Enterprise PDUs (9x IEC 320 C13 + 3x IEC 320 C19 outlets)</b>	
71762NX	Ultra Density Enterprise C19/C13 PDU Module (without line cord)
71763NU	Ultra Density Enterprise C19/C13 PDU 60A/208V/3ph with IEC 309 3P+Gnd line cord
<b>C13 Enterprise PDUs (12x IEC 320 C13 outlets)</b>	
39M2816	DPI C13 Enterprise PDU+ (without line cord)
39Y8941	DPI Single Phase C13 Enterprise PDU (without line cord)
<b>C19 Enterprise PDUs (6x IEC 320 C19 outlets)</b>	
39Y8948	DPI Single Phase C19 Enterprise PDU (without line cord)
39Y8923	DPI 60A 3 Phase C19 Enterprise PDU with IEC 309 3P+G (208 V) fixed line cord
<b>Front-end PDUs (3x IEC 320 C19 outlets)</b>	
39Y8938	DPI 30amp/125V Front-end PDU with NEMA L5-30P line cord
39Y8939	DPI 30amp/250V Front-end PDU with NEMA L6-30P line cord
39Y8934	DPI 32amp/250V Front-end PDU with IEC 309 2P+Gnd line cord
39Y8940	DPI 60amp/250V Front-end PDU with IEC 309 2P+Gnd line cord
39Y8935	DPI 63amp/250V Front-end PDU with IEC 309 2P+Gnd line cord
<b>NEMA PDUs (6x NEMA 5-15R outlets)</b>	
39Y8905	DPI 100-127V PDU with Fixed NEMA L5-15P line cord
<b>Line cords for PDUs that ship without a line cord</b>	
40K9611	DPI 32a Line Cord (IEC 309 3P+N+G)
40K9612	DPI 32a Line Cord (IEC 309 P+N+G)
40K9613	DPI 63a Cord (IEC 309 P+N+G)
40K9614	DPI 30a Line Cord (NEMA L6-30P)
40K9615	DPI 60a Cord (IEC 309 2P+G)

Part number	Description
40K9617	DPI Australian/NZ 3112 Line Cord
40K9618	DPI Korean 8305 Line Cord

For more information, see the Lenovo Press documents in the PDU category:  
<https://lenovopress.com/servers/options/pdu>

## Rack cabinets

The following table lists the supported rack cabinets.

Table 80. Rack cabinets

Part number	Description
93072RX	25U Standard Rack
93072PX	25U Static S2 Standard Rack
93634PX	42U 1100mm Dynamic Rack
93634EX	42U 1100mm Dynamic Expansion Rack
93604PX	42U 1200mm Deep Dynamic Rack
93614PX	42U 1200mm Deep Static Rack
93084EX	42U Enterprise Expansion Rack
93084PX	42U Enterprise Rack
93074RX	42U Standard Rack

For specifications about these racks, see the Lenovo Rack Cabinet Reference, available from:  
<https://lenovopress.com/lp1287-lenovo-rack-cabinet-reference>

For more information, see the list of Product Guides in the Rack cabinets category:  
<https://lenovopress.com/servers/options/racks>

## KVM console options

The following table lists the supported KVM consoles, keyboards, and KVM switches.

Table 81. Console keyboards

Part number	Description
Console keyboards	
7ZB7A05469	ThinkSystem Keyboard w/ Int. Pointing Device USB - Arabic 253 RoHS v2

## Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region specific offers please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:

<https://www.lenovo.com/us/en/landingpage/lenovo-financial-services/>
