

Evoluent Lefthanded Keyboard

numeric on the left side

 BAKKER ELKHUIZEN

Work Smart - Feel Good

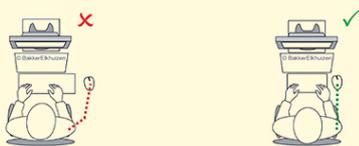

Special for left-handed users

The Evoluent left-handed keyboard has a numeric pad on the left side, creating more space for mouse use on the right.

The numeric pad stands in the way of mice: this is a fact. Evoluent has come up with a solution, by placing the numeric pad on the other side of the keyboard.

A compact keyboard does not have a numeric pad. For this reason, the mouse can be placed closer to the keyboard. Research has shown that 90% of keyboard users seldom if ever use the numeric pad. Working with a compact keyboard results in greater comfort because it reduces the reaching distance to the mouse (Cook, C., et al., 1998). This puts less strain on the shoulder and forearm. Dark letters on a light background make them easier to read (ISO 9241), and contribute to increased productivity (Snyder, 1990).

Ergonomic: numeric on the left side, results in more space using the mouse on the right side.

Better balanced: equally balanced of left and right arm.

Handy: frequently used keys as PageUp, PageDown, Home, End and the arrow keys are both on left as on the right side of the keyboard.

Thin: only 12.5 mm thickness on all sides.

Lay-out: US lay-out.

Width	390 mm
Height	13 mm
Depth	160 mm
Weight	700 gr
Product code	Multiple versions
