

Lenovo

Legion Y540 Series

SETUP GUIDE

The Lenovo logo, consisting of the word "Lenovo" in white, is oriented vertically within a red rectangular background.

Initial Setup

Overview

Legion Y540-15 Series

Overview

1. Ventilation slots (outlet)
2. Always On USB 3.1 connector Gen 1
3. Audio connector
4. USB-C™ connector
5. Mini DisplayPort® connector
6. USB 3.1 connector Gen 1
7. HDMI™ connector
8. Ethernet connector
9. Power connector
10. Mini security-lock slot
11. Privacy shutter *
12. Camera
13. Microphones
14. Power button
15. Touchpad
16. Power indicator
17. Novo button
18. USB 3.1 connector Gen 1

* for selected models

Note:

Read the statement on USB transfer rate in the *User Guide*. Refer to the *Safety and Warranty Guide* for accessing the *User Guide*.

Additional information

Specific Absorption Rate (ICNIRP)

YOUR DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES. Your device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The Europe 10g SAR limit for mobile devices is 2.0 W/kg. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for your device are as follows:

Maximum body-worn SAR with 0 mm separation distance:

- Legion Y540-15IRH: 1.104 W/kg
- Legion Y540-15IRH-PG0: 1.104 W/Kg
- Legion Y540-17IRH: 0.678 W/kg
- Legion Y540-17IRH-PG0: 0.678 W/kg

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the data connection. The lower the power output of the device, the lower its SAR value. If you are interested in further reducing your RF exposure then you can easily do so by limiting your usage or simply keeping the device away from the body.

European Union — compliance with the Radio Equipment Directive

Hereby, Lenovo (Singapore) Pte. Ltd., declares that the radio equipment type Legion Y540-15IRH, Legion Y540-15IRH-PG0, Legion Y540-17IRH, and Legion Y540-17IRH-PG0 are in compliance with Directive 2014/53/EU.

The full text of the system EU declaration of conformity and the EU wireless module declarations are available at the following Internet addresses:

- For notebook computers:
<https://www.lenovo.com/eu-doc-notebooks>
- For tablets:
<https://www.lenovo.com/eu-doc-tablets>

This radio equipment operates with the following frequency bands and maximum radio-frequency power:

Technology	Frequency band [MHz]	Maximum transmit power
WLAN 802.11b/g/n	2400 - 2483.5	< 20 dBm
WLAN 802.11a/n/ac	5150 - 5725	< 23 dBm
WLAN 802.11a/n/ac	5725 - 5875	< 13.98 dBm
Bluetooth BR/EDR/LE	2400 - 2483.5	< 20 dBm
