SPECIFICATIONS:

| Video Signal	DisplayPort
Number of Ports	2
External Connectors	1x DisplayPort Male
	2x DP Female
Maximum Display Resolution	4K at 30 Hz

Microsoft® Windows® Operation

With a DisplayPort 1.2 compatible video card, Microsoft Windows® will recognize the individual Displays (up to 2) and can either Extend or Duplicate the main Monitor.
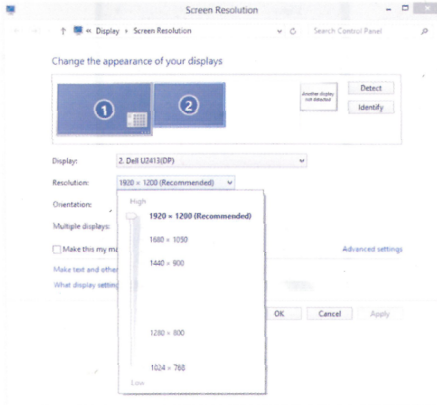

Adjust video settings in Microsoft Windows®

1. Right click the Windows Desktop and select"Screen Resolution". The Display Settings window appears.

NOTE: Each monitor connected in represented by a number displayed under "Change the appearance of your displays". to determine which number corresponds with each display click the Identify button.

2. To adjust the Resolution, click on the number that corresponds with the monitor you wish to adjust, and select the drop down menu next to "Resolution:".

3. To Choose whether the Monitor will Duplicate or Extend your main Monitor, select the number that corresponds with the Monitor you wish to adjust, and select the drop down menu next to "Multiple Displays:". "Extend these displays" will extend your monitor main onto the selected monitor. "Duplicate these Displays" will show the same image as your main monitor on the selected monitor.
